

THE GOOD GREEK

# NEIGHBORHOOD LIFESTYLE GUIDE

*Vol. IV*

The Good Greek Family and I want to be the first to welcome you to the neighborhood. To kick off this exciting new chapter, please enjoy our special Welcome Home Gift!

When I started Good Greek, my goal was simple: to become the #1 moving and storage company in Florida and beyond by providing my customers with the Best Move Ever. Through hard work, dedication and exceptional customer service, we've turned that vision into reality. In 2024, the American Trucking Associations recognized Good Greek Moving & Storage as the National Mover of the Year - an honor that underscores our devotion to excellence. The fact that most of our business comes from referrals and repeat customers is a testament to the outstanding reputation our company has earned. This commitment to creating customers for life also drove us to create our Welcome Home Gift, thoughtfully designed with you in mind.

Good Greek Moving & Storage is built on the principles of Faith, Honor, Strength and Courage. These same values guide us in selecting partners for our Welcome Home Gift, which is why we've chosen these

featured businesses for the 3rd edition of The Good Greek Neighborhood Lifestyle Guide.

As leaders in our industry, we set Good Greek apart by offering a complete range of Total Relocation Solutions, ensuring each move is as seamless as it can be. Our services include Good Greek Realty, Good Greek Insurance, Good Greek Auto Transport, Good Greek Junk & Debris Removal, Good Greek Concierge and, of course, Good Greek Moving & Storage. We are your Superhero Movers!

Enjoy the gifts in good health, and please share your experience with Good Greek and our partners with your neighbors, friends and family.

Sincerely,

A stylized, handwritten signature in white ink, consisting of several loops and a long, sweeping tail.

## MAKING MOVES

— 🏠 🏛️ 📄 🚚 📦 📞 🚚 —  
**IT'S ALL GOOD GREEK TO ME**

**T**he son of Greek immigrants, Spero Georgedakis grew up with a strong love for his country and an equally strong desire to serve. At 19, he became a police officer with the North Miami Police Department and quickly moved up the ranks to become a member of the elite S.W.A.T. team. While on the force, Georgedakis encountered countless victims of moving scams at the hands of rogue movers, inspiring him to revolutionize the moving industry by raising standards and practices. It was that experience, alongside his innate ambition to be the very best, that inspired him to change the reputation of the moving industry and build a multi-million-dollar business “The Good Greek Way.” Now

celebrating more than 25 years in the business, Georgedakis has built the World’s ONLY Total Relocation Company including Good Greek Realty, Good Greek Insurance, Good Greek Moving & Storage, Good Greek Junk Removal, Good Greek Concierge and Good Greek Auto Transport.

The “Good Greek” Spero is one of Florida’s most charitable philanthropists, supporting and/or serving on the boards of the American Red Cross, Homeless Coalition of Palm Beach, the Florida PBA, West Palm Beach Police Fund, American Cancer Society among others. Good Greek is your Total Relocation Solution and deep-rooted member of your community.

**COMMON  
COOLING  
SYSTEM  
MYTHS  
DEBUNKED:**

A/C & Heating Systems need annual maintenance regardless of age or usage - **TRUE!**

Regular maintenance helps keep your system running efficiently. Maintenance provides insight to address wear and tear before they become significant problems with high repair/replacement costs.

Leaving the AC on all day will save energy - **FALSE!**

Actually this will cause your system to work harder than necessary and waste more energy in the long run. Instead, use a programmable thermostat.

Ceiling fans make rooms cooler during hotter months - **FALSE!**

Ceiling fans don't actually effect air temperature at all; their main job is to move air around, so you feel cooler while sitting directly below them.

Closing vents in unused rooms will save energy - **FALSE!**

Closing off vents could be wasting energy by pressuring one part of the system more than another, causing strain on the entire system.
