" Carmel High School has been a remarkable journey for my children. With a focus on quality education and diverse activities, the school has significantly influenced their overall development allowing the exploration of interests, and fostering personal and social growth. A standout feature of Carmel High School is its commitment to cultural activities. My daughter showcased her singing talent at different events, highlighting the school's dedication to nurturing creativity.

The school's reputation for well-organized cultural fests like the Yugantara, Different Strokes, and many more reflects their wealth of experience. The NCC (National Cadet Corps) program at Carmel High School holds a special place in our hearts. My daughter not only loved it but also greatly missed it. The NCC experience went beyond physical fitness, positively impacting her mental well-being and bringing about positive changes in her behaviour. The 8-day NCC camp was a unique and enriching experience, enhancing her leadership skills, teamwork, and discipline.

In essence, Carmel High School is a place where children receive quality education, explore their interests, and grow personally and socially. The dedicated staff and diverse programs contribute to their overall development. I extend my best wishes to the entire faculty for continued success in the years to come. "

We are very grateful to all Teachers, Coordinators and the Principal. The school has been successful in striking an appropriate balance between academic and co-curricular activities. Our child always gets ample opportunities to explore and progress in all aspects. We are also happy to see improvement in our child, the school is very good and also the class teachers.

Our child is doing excellent. The school's infrastructure and facilities are good. We would like to take this opportunity to thank all the teachers for their kindness and guidance to our child.

As a parent, I am delighted to share that Carmel High School is an institution where all the teachers are not only educators but also mentors who care about the well-being and development of the child. They also foster a love for learning and provide a strong foundation in core subjects. The school goes beyond textbooks and encourages critical thinking and creativity in children.

The school provides ample opportunities for children to showcase their talents, which helped my child become more well-versed in arts. Not only drawing and painting, but many other cultural events include dancing, tattoo designing, t-shirt painting, and many more.

There are additional subjects like moral values and career guidance that enabled my daughter to explore numerous job opportunities. This helps children make good choices for their future jobs that interest them and are financially beneficial, helping them set clear goals and create a path towards achieving them.

The school also organizes a food fest for the 10th standard, which is the best way to learn marketing skills. At first, I thought that the food fest was a charity event, but after seeing my daughter's involvement, I realized that the event is not just a charity event but also an event that improves a child's critical thinking and marketing skills. These skills will help them in the future and prepare them to face all the hardships and failures in a positive way that they might encounter in the future.

I could not believe that my daughter had completed 12 years of her studies at Carmel High School, from LKG to 10 std. The time has passed like a breeze.

After admitting my daughter to LKG, I was a bit hesitant regarding the overall development of my daughter, as the school was well known mainly for studies. But I wanted a school that could provide a good education that involved much more than just studies including Sports, Cultural activities, Personality development, Social responsibilities and not but least Ethics.

I expressed my concerns to Mr. Roshan during our first meeting after the admission.

Mr. Roshan was very humble to me patiently and he just told me one word, that is to wait and let us speak after a year or two and assured me that he is already working towards the overall development of students and not just studies. I am really happy and proud to express my sincere regards to Mr Roshan as he has kept his word and this school provides a good education that includes all the above-mentioned.

I want to thank all the teachers, especially the kindergarten and primary teachers whom the little ones consider as their role models. I would like to thank all the staff members including the front office persons who always welcome you with a smile—special thanks to the aayas who take care of the little ones with utmost care and emotions.

It would not be correct on my part if I do not remember the security guards who are always ready to take care of student's safety.
