

WHY LYSULIN?

Lysulin helps manage blood sugar by binding naturally to the glucose in your blood and safely removing it from your body. When taken daily, Lysulin has been clinically shown to help people with type 2 diabetes and prediabetes maintain healthy blood sugar and A1c levels.

- A Natural Way to Lower Your Blood Sugar and A1c Levels
- Lysulin is the **only** supplement **clinically shown** to help **maintain healthy blood sugar and A1c levels** for people with diabetes or prediabetes.

Patented Formula

Lysulin is the patented discovery of a renowned Diabetes Scientist and supported by scientifically valid, clinical studies that show that the proprietary combination of natural ingredients in Lysulin can help people with diabetes and prediabetes maintain healthy blood sugar and A1c levels.

Subject: Re: FAcE - RE: Tracking number for 32 oz HOCL

John,

FYI, your Lysulin is without any doubt the most beneficial nutritional product ever, as I no longer have any symptoms of pre-diabetes these days and my HbA1C is totally normal, all while eating any healthy foods I want (already left 2 reviews for it in the past and so just wanted to tell you that nothing else works like it since I had tried dozens of diabetes related supplements prior to Lysulin - the rest of the world should see that too but big Pharma is simply too tied into all of the endocrinologists and other specialists who treat people with high blood sugar).

Best,
Adam

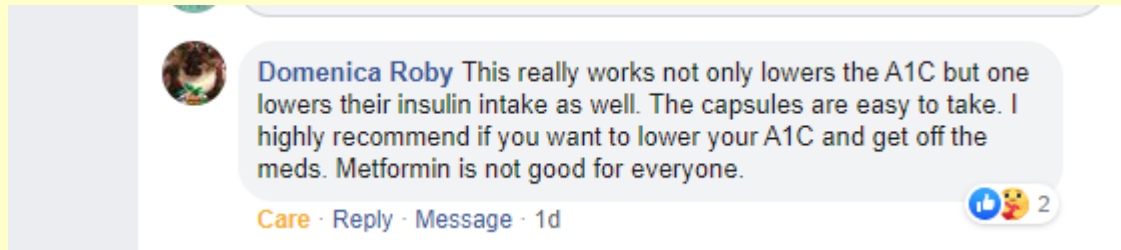

Jeri Isaacs Lysulin is NOT a scam. I've taken it every day for the past 6 months. I have Type 2 and take Trulicity once a week, which brought my A1C from 7 to 6.2, but that's where I stayed for 2 years. Since I've been taking Lysulin my A1C dropped to 5.7. I can tell by my daily blood sugars that my A1C is still getting lower. I wake up to 80-100...instead of 110-130. The only change I made was taking Lysulin daily...I didn't change my diet. I like the chewables, but recommend taking the powder...it's easier to take every day.

Domenica Roby This really works not only lowers the A1C but one lowers their insulin intake as well. The capsules are easy to take. I highly recommend if you want to lower your A1C and get off the meds. Metformin is not good for everyone.
