PHILIPS
ZOOM!

Professional
Whitening

**10% off all Philips Zoom
Whitening Kits for April only.**

Philips Zoom! Whitening Kits!

Are professional-grade systems available in both in-office and at-home formats, designed to whiten teeth by several shades while minimising sensitivity with a patented Amorphous Calcium Phosphate (ACP) formula.

Designed for overnight use (4–6 hours) or 2–4 hours during the day.

- 10% Carbamide Peroxide (CP): Best for users with sensitive teeth.
- 16% Carbamide Peroxide (CP): High-potency gel for those without sensitivity issues.

PHILIPS sonicare

Proud to be your exclusive Philips provider for Ireland
#No.1 recommended sonic toothbrush brand worldwide

Philips Sonicare toothbrushes operate with sonic technology. Brush heads move up to 62,000 times per minute, creating microbubbles that support cleaning between teeth. They are clinically proven to deliver a superior clean compared to a manual toothbrush while being more gentle on teeth and gums.

Bossklein Spectrum Tips

Disposable, high-quality 3-in-1 syringe tips designed for dental procedures. They are specifically engineered for use with American-style syringes and do not require an adapter for these models.

Key Product Features

- **3-in-1 Functionality:** Delivers a compressed air spray, a controlled water spray, or a combined air/water stream.
- **Assorted Colours:** Each pack of 250 contains 8 different vibrant colours.
- **Secure Fit:** Features a built-in lock-in notch to ensure the tip stays firmly attached to the syringe during use.
- **Patient Safety:** Manufactured from medical-grade PVC or ABS plastic with smooth, burr-free surfaces for maximum patient comfort.
- **Single-Use:** Being disposable eliminates the need for time-consuming cleaning and sterilisation, significantly reducing the risk of cross-contamination.

Bossklein Easy-Tip

A high-quality, disposable 3-in-1 syringe tip designed for use in dental procedures. These tips are single-use only, which helps maintain a sterile environment and reduces the risk of cross-contamination between patients.

Key Product Features

- **3-in-1 Functionality:** Delivers a controlled stream of water to rinse debris or cool instruments, and a stream of compressed air for drying tooth surfaces.
- **Clear Design:** These "Easy Tips" are typically clear, allowing for visibility during use.
- **Quantity:** Sold in a pack containing 250 tips.
- **Compatibility:** Designed to be used with standard 3-in-1 syringe adapters.

X-SMART PRO and PRO + Endodontic Motor

Both the Dentsply Sirona X-SMART Pro and the Dentsply Sirona X-SMART Pro+ utilize the same core motor technology to drive file systems like ProTaper Ultimate and WaveOne Gold.

- **Speed and Torque:** Both deliver up to 3,000 RPM and 7.5 Ncm torque, which is the highest in its category.
- **Brushless DC Motor Control:** Both feature a patented sensorless system for 360° speed and torque feedback, which allows for faster reaction times to torque loads compared to traditional brush-based motors.
- **File Library:** Both come pre-programmed with a library of Dentsply Sirona and VDW file settings and can be upgraded via Wi-Fi for future file systems

Vivadent IPS e.max CAD CEREC/inLab

The blocks are available in 9 A-D, 4 Bleach BL shades and in 2 different sizes (I12, C14). Due to their translucency, they are ideal for fabricating restorations in the staining and cut-back technique. Shading is based on the tried-and-tested shades of IPS Empress CAD LT. The blocks are shaded according to the tooth shade. Thus, staining and veneering is reduced to a minimum.

Curasept Implant Kit

is a comprehensive post-operative oral care kit specifically designed for patients who have undergone dental implant surgery or complex extractions. It provides a complete at-home hygiene routine to promote healing and maintain implant health.

Key Benefits

- **Healing Support:** The inclusion of Hyaluronic Acid and DNA helps soothe the oral mucosa and boost cellular regeneration.
- **No Staining:** The ADS formula prevents the brownish discoloration often associated with standard chlorhexidine products.
- **Alcohol & SLS Free:** These formulations are gentle on the mouth and won't cause the stinging or dryness associated with alcohol-based rinses.

Curasept ADS 220 Mouthwash (0.20% CHX, 200ml)

Key Benefits

- **Intensive Protection:** Contains 0.20% Chlorhexidine Digluconate, the "gold standard" for killing bacteria, viruses, and fungi that cause plaque and gum disease.
- **Post-Surgical Support:** Ideal for use before and after oral surgery, tooth extractions, or dental implant placement to prevent infection and inflammation.
- **Reduced Side Effects:** Minimises tooth staining and does not alter your sense of taste, making it easier to complete the full treatment course.
- **Plaque Inhibition:** Forms a protective film on teeth and gums that prevents bacterial buildup for up to 8-12 hours.
- **Gentle Formula:** Alcohol-free and sugar-free, ensuring no painful burning or irritation of the oral mucosa

Polydentia MyQuickmat Prime Kit Flamingo

The myQuickmat Prime system is a clear example of uncompromising simplicity consisting of a separation ring (myRing Prime), a ring extremity with integrated wedge myTines Prime and a contoured matrix for both premolars and molars (Quickmat Prime anatomical sectional matrices).

Advantages:

- Simplified posterior system that reduces chair time
- **Restorative essentials:** one ring, one ring extremity with integrated wedges and one contoured matrix (no separate wedge required)
- **Self-centring wedge-shaped extremities:** naturally guide insertion ensuring effective bilateral separation of the adjacent teeth with optimal matrix adaptation and cervical seal
- **Ring stability:** prevents the ring from slipping out
- Matrix contoured from cervical to occlusal allows accurate positioning of the contact point close to the equator
- **No compromise on efficiency or performance:** the result is an easier and more natural restoration of the proximal anatomy.

Solo Needles

These needles are designed with a triple-bevel lancet tip and a special friction-reducing coating to ensure precise placement of anesthetic while minimising patient discomfort and tissue trauma.

Key Specifications

- **Size:** 27 Gauge (27G), which indicates a thicker, more rigid needle compared to higher gauge (thinner) options like 30G.
- **Dimensions:** 0.40mm diameter x 35mm length (Long).
- **Thread Type:** Standard Imperial thread, making them compatible with a wide range of standard dental cartridge syringes.
- **Hub Design:** Features a plastic hub designed to accept wider thread tolerances to reduce the risk of breakage during use.
- **Colour Coding:** Often identified by a Yellow hub (though some variants or alternative brands may use Green).

Water Purifier Solo Refill 1 Cartridge Size 1

A replacement ion-exchange cartridge specifically designed for the Solo Water Purifier, a wall-mounted system used to produce de-ionised water for medical or laboratory equipment such as autoclaves.

Key Product Details

- **Application:** Ideal for dental practices and laboratories requiring de-ionised water for machinery.
- **Capacity:** The "Size 1" (Single) model is recommended for use in areas with soft or medium water hardness.
- **Maintenance:** Features a colour change exhaustion indicator, which visually signals when the cartridge needs to be replaced.
- **Filtration:** The outlet of the purifier system typically includes a built-in 50-micron filter to ensure water clarity.

Cavex Instant Stone

Key Product Features

- **Rapid Processing:** The material typically mixes in 15-30 seconds, pours directly into the impression, and hardens in roughly 10 minutes.
- **Clean Application:** It uses a unique "shake-and-pour" mixing system that eliminates the mess often associated with traditional gypsum and does not require a vibrating table to achieve a bubble-free result.
- **High Durability:** Once hardened, the models are strong with a smooth, plastic-like surface that offers high abrasion resistance.

Code	Product	Each £	Each €

Pascal Hydent Spray

An aerosol denture high-spot indicator spray used to locate and eliminate pressure points on dental appliances. It provides a smooth, even application that clearly defines where the denture is causing discomfort.

Key Features

- **Application:** Dispenses as a white indicator paste from a 30g aerosol can at the touch of a button.
- **Sanitary:** Reduces the risk of cross-contamination by eliminating the need for messy brushes or traditional paint-on pastes.
- **User Experience:** Features a pleasant, soothing mint flavour and contains no CFCs.
- **Easy Cleanup:** Can be quickly washed off the denture with soap and water after use.

Scaler Hygienist H6-H7 ErgoSense LM

The LM-ErgoSense® Scaler Hygienist series is a premium collection of dental hand instruments designed for superior ergonomics, tactile sensitivity, and optional intelligent tracking.

Key Features of the ErgoSense® Category

- **Ergonomic Handle Design:**
 - **Oversized Diameter:** The 13.7 mm silicone handle is larger than standard handles (e.g., LM-ErgoMax at 11.5 mm), significantly reducing the pinch force required.
 - **Tactile Grip:** The elastic silicone coating provides a non-slip, comfortable grip that dampens vibration and retains warmth, preventing hand fatigue and musculoskeletal strain.
 - **Scientific Validation:** Rated best in usability and productivity in clinical studies compared to thinner handles.
- **Intelligent Technology (DTS):**
 - **RFID Integration:** These are the first instruments with the option for built-in RFID chips.
 - **Tracking:** Compatible with the LM Dental Tracking System™, allowing clinics to track usage, sterilization cycles, and location for improved patient safety and asset management.
- **Instrument Variety:** The category includes sickle scalers (like the H6-H7), curettes, and other hygiene tools.

Kulzer Venus Diamond FLOW

An increasing number of dentists prefer flowable composites for very easy placement of minimally invasive restorations. Hence Kulzer developed Venus Diamond Flow: a flowable nano-hybrid composite to help you create beautiful, long-lasting restorations.

- **Easy and convenient to use:** The flowable, thixotropic consistency makes it highly versatile, offering ideal handling characteristics for class V restorations, amongst other indications.
- **Outstanding physical properties:** The material combines high flexural strength with minimal shrinkage stress. Its excellent radiopacity ensures a reliable diagnosis.
- **Pure aesthetics:** Venus Diamond Flow offers a wide range of shades and adapts to the surrounding hard tooth substance. Outstanding polishability and a permanent lustre guarantee truly beautiful, long-lasting restorations.

SDI Riva Self Cure and Light Cure

A versatile glass-hybrid restorative system offering both self-curing and light-curing options. Comes with:

- Strong fluoride release and ion exchange to support remineralisation
- Chemical bond to tooth structure (no separate bonding needed)
- Excellent handling, wear resistance, and aesthetic match
- Radiopaque formulation for clear radiographic contrast

Choose Self Cure for bulk-fill convenience and chemical setting without light.

Choose Light Cure for controlled working time, enhanced aesthetics, and higher flexural strength.

SDI Riva Light-Cure HV Capsules

Light-cured, resin-reinforced glass ionomer restorative cement. High Viscosity.

Indications:

- Non stress bearing Class I and II restorations
- Class III restorations
- Cervical (Class V) restorations
- Deciduous teeth restorations
- Geriatric restorations
- Core build-ups
- Temporary fillings
- Base/dentine replacement
- Co-curing with composite (Sandwich technique)

SDI Pola Light 6% Hydrogen Peroxide Kit

- 1 Pola LED mouthpiece
- 4 x 3g Pola Day 6% syringes
- 1 USB charging cord
- 1 instruction guide - includes FAQ
- The Pola Light combines: Pola's award winning professionally prescribed whitening gel + LED mouthpiece No need for a custom tray
- From 20 minutes per day
- Results in 5 days
- Together the system provides the clinic with a convenient and fast take home whitening solution for patients.
- The mouthpiece is a universal size that treats the top and bottom teeth at the same time.
- The LED light is a timer that will turn off and 'beep' at the end of the whitening treatment.
- Packaging is beautiful and will appeal to dental professionals and patients.
- Fully rechargeable for future tooth whitening treatments.
- Uses the POLA Day 6% 3g syringes which are available as refills in the dispenser kit.

SDI Riva Cem Automix Set MAXX Syringe Mixing Tip

Resin modified glass ionomer luting cement. Superior bond, high strength and less waste. Riva Cem Automix is a self-curing, radiopaque, resin modified glass-ionomer luting cement offering superior bond strength, sustained fluoride release and a light tack cure for easy removal of excess cement. It is indicated for the permanent cementation of metal and ceramic restorations. The automix tip attachment offers convenience over traditional hand mixed cement systems.

Filtek Easy Match Flowable Restorative

NEW TO BFM

Three shades, intuitive shade selection and virtually no bubbles. Solventum™ Filtek™ Easy Match Flowable Restorative is a three-shade system that simplifies anterior and posterior restorations. Its naturally-adaptive opacity provides enamel-like translucency where you need it and dentin-like opacity everywhere else, without the need for a blocker. Use on its own or pair with 3M™ Filtek™ Easy Match Universal Restorative. The Bright, Natural and Warm shades provide an excellent shade match to most patients' smiles.

Voco Profluorid Varnish

Treatment of hypersensitive teeth Sealing the dentinal tubules, e.g. for cavity preparations or on sensitive root surfaces.

Advantages:

- Moisture tolerant
- Esthetic, tooth-shaded varnish
- Fast desensitisation and fluoride release
- (5 % NaF $\hat{=}$ 22,600 ppm fluoride)
- In five pleasant flavours available:

Other flavours available

SINGLE
DOSE

Voco Profluorid Varnish

Advantages of the SingleDose:

- Easy, quick and hygienic
- No additional devices required
- No spilling in any position

GrandioSO Unlimited

Universal bulk-fill composite placed in 4 mm increments. Its VTT technology ensures deep cure and natural shade blending, while high filler content delivers strength and lasting aesthetics.

Voco Grandio Caps BL x 20

- Excellent physical properties for long-lasting restorations.
- Significantly lower polymerisation shrinkage than conventional composites.
- High filler degree of 87% w/w.
- Extremely high abrasion resistance.
- High transverse strength.
- Smooth consistency for convenient handling.
- Excellent aesthetics.
- Can be used with all dentine/enamel bonding agents.
- Available in 16 shades.
- Shade guide made from original material.

Other options available

Voco Bifix Veneer LC

- Light-curing nano-hybrid luting composite
- Intuitive and efficient shade system:
- The three shades (bright, clear, warm) make shade selection easy and allow positive modification of the aesthetic result

Try-in pastes: The final result can be checked in advance and the exact shade can be selected

Matching application cannula: Prevents discolouration or damage to the veneer thanks to a plastic cannula

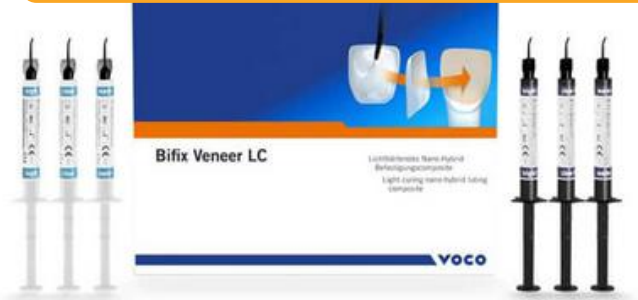

Optimum consistency: The material is stable enough to prevent run-off when applied to the veneer and at the same time sufficiently flowable to allow easy and definite positioning on the tooth

Effortless removal of excess material: After brief partial polymerisation

Securely picking up and placing the veneer: Thanks to the flexible application aid Sticky Tim with adhesive tip

Voco Profluorid Varnish + BioMin

- Enhanced enamel protection: Combines trusted VOCO Profluorid Varnish with BioMin bioglass to significantly harden acid-weakened enamel.
- Innovative remineralisation: BioMin bioglass releases calcium and phosphate ions in saliva, forming a crystalline layer with fluoride for superior enamel repair.
- Reliable desensitisation: Maintains 5% sodium fluoride (22,600 ppm) for long-lasting relief from tooth sensitivity.
- Proven efficacy: Clinically tested to seal most open dentinal tubules effectively and durably.

Other flavours available

MTA vpt powder 10g liquid 10ml

Maintaining pulp vitality in daily practice – biocompatible and monomer-free

- MTA for everyday clinical practice – biocompatible, free of monomers
- High pH value (12) – known for its bacteriostatic effect
- Release of calcium and hydroxide ions – promotes formation of tertiary dentine and remineralisation
- Reliable pulp protection – mineralises to form a bacteria-proof seal
- Time-efficient – immediate further processing thanks to layering without pressure
- Easy handling – application with standard instruments, or directly from the capsule
- No product-related discolouration – free of bismuth oxide and ferrous compounds
- Radiopaque (290 % Al)

Voco Amaris LC Fusion

Amaris is a nano-reinforced hybrid composite specifically designed for high-end aesthetic results through a simplified layering technique.

- **Layering Concept:** It uses a two-step system with five opaque base shades (O1-O5) and three translucent modifier shades (Light, Dark, and Neutral) to recreate the natural appearance of teeth.
- **Key Features:**
 - High Gloss: Excellent polishability and gloss retention.
 - Natural Appearance: Features natural opalescence and fluorescence for "invisible" restorations.
 - Working Time: Long resistance to ambient light, offering up to 8 minutes of working time.
- **Indications:** Ideal for Class III, IV, and V anterior restorations, direct veneers, and traumatic damage reconstruction.

Voco Admira Fusion

Admira Fusion is the world's first purely ceramic-based direct restorative material, using ORMOCER® (Organically Modified Ceramic) technology.

- **Pure Silicate Technology:** Both the fillers and the resin matrix are based on silicon oxide, making it monomer-free (no Bis-GMA, BPA, or TEGDMA) and highly biocompatible.
- **Key Features:**
 - Low Shrinkage: Features extremely low polymerisation shrinkage (1.25% by volume) and low shrinkage stress.
 - Durability: High surface hardness and edge stability for long-lasting results.
 - Admira Fusion 5: A newer version that uses only five "cluster shades" to cover all 16 VITA classical shades through a chameleon effect.
- **Indications:** Suitable for all cavity classes (I-V), core build-ups, and repairing veneers.

Quick Comparison		
Feature	Amaris	Admira Fusion
Material Class	Nano-reinforced hybrid composite	Nano-ORMOCER (Pure Ceramic)
Shade System	Layering (Opaque + Translucent)	Simplified (Cluster shades in Fusion 5)
Biocompatibility	High (standard composite)	Exceptionally high (monomer-free)
Main Advantage	Maximum aesthetic control	Minimal shrinkage & high biocompatibility

XP[®] SQUARED Technology

Compared to the original XP Technology, the XP² (SQUARED) version offers several enhancements:

- Superior Sharpness: Provides up to 59% greater sharpness out of the box than the previous generation.
- Extended Longevity: Boasts a 42% longer service life than the original XP instruments.
- Maintenance-Free: Eliminates the need for time-consuming and often inconsistent manual sharpening, saving practices time and money.
- Enhanced Ergonomics: Often paired with EagleLite[®] resin handles, which are roughly half the weight of traditional stainless steel, reducing hand and wrist fatigue.
- Improved Access: The technology allows for slimmer, thinner blades that glide more easily into narrow interproximal spaces and deep periodontal pockets.
- High Tactile Sensitivity: The permanent factory edge allows clinicians to use a lighter "exploratory" stroke to detect and shave off calculus layer by layer.

Pro-Tip Turbo Syringe Tips

Are single-use, disposable air/water syringe tips manufactured by Astek Innovations. They are designed to eliminate the need for sterilization and significantly reduce the risk of cross-contamination in dental practices.

Key Features and Performance

- **Dual-Chamber System:** Features a unique two-chamber design that keeps air and water completely separate. This guarantees instant dry air and a consistent, perfect mist spray without leakage.
- **High-Power Air Jet:** Engineered with a tapered outlet that intensifies air force, resulting in a higher velocity air jet for more effective clinical use.
- **Secure Locking System:** Uses an exclusive bayonet locking system to firmly secure the tip to the syringe, preventing accidental detachment during procedures.
- **Rigid Construction:** Made from sturdy, rigid plastic that allows for effective cheek retraction without bending or compromising air/water pressure.
- **Compatibility:** Designed to fit most existing dental syringes via a wide range of available Pro-Tip converters.

Microbrush Reflective DryTips

DryTips far outlast the saliva absorption capacity of cotton rolls and other absorbent pads, and they do not lose moisture when handled. DryTips facilitate the work far back in the oral cavity by keeping the procedure area clean and dry.

Microbrush Double Bend Applicator

A unique, double-bendable applicator tip - designed to give users better access to hard-to-reach areas of the mouth without tip springback.

The lint-free, non-absorbent fibre tips keep the liquid suspended until it is applied and, in combination with the 10-centimetre long handle, ensure maximum tactile control and precision during treatment.

Thanks to the non-absorbent nylon flocking, the applicator suffers no bonding loss.

The Microbrush Double Bend applicators are single use and are available in two different colours.
