

The background features several pieces of light-colored wood with various decorative architectural details. On the left, there is a close-up of a carved capital with a scale-like pattern. In the center and right, there are fluted columns of varying heights and orientations, some with decorative bases. The overall aesthetic is classical and elegant.

# DINING TABLE LEGS

Dining table legs are a subtle way to add continuity to the design of a home, and no dining table is ever complete without just the right set of legs. Though dining table legs may not be the first thing noticed by a person sitting to dine, they are indeed an integral part of the look and feel of the table.

# TABLE SLIDES

Innovative interior design solutions are consistently being developed, and functionality is often the driving point to various design trends. Table slides offer the ability to easily extend a table in order to accommodate more seating. A variety of table slides are available that can be used on a wide range of table designs. The three table slide types are standard, equalizer and a hybrid called standard equalizer.

## *Standard Slides* for split frame tables

*These table slides accommodate openings from 26" to 120" and are used to extend standard four-legged tables. They consist of parallel boards that slide back and forth on smooth joinery with a male and female butterfly notch. These slides develop a camber to avoid sag at the center of the table.*

# CEILING MEDALLIONS

When designing your home, it is easy to overlook one of the biggest elements in the room - the ceiling! Adding an intricately-carved wooden medallion to your ceiling can bring the entire room together. These beautiful pieces add dimension and shadow to your space without taking up a lot of space. Each medallion features a hole in the center allowing it to perfectly frame an existing light fixture.

## Table Assembly Hardware

# Recessed V Stabilizer

Steel stabilizers are attached to the underside of a table top, counter to the direction of the wood, to minimize wood warping, washboarding, cupping and gapping over time. Osborne has the parts you need to create your own recessed groove.

To install a steel stabilizer, you must first create a recessed groove underneath the table top. Next, insert the stabilizer into the groove and attach with wood screws.

# CASTER WHEELS

The industrial caster wheel collection includes different designs to best fit your project. The wheels are made of heavy duty iron with a black finish offering a modern look as well as flooring protection. In addition to their high functionality and durability, the casters are pre-drilled for easy installation.

## Fixed Base Casters

Fixed Base  
Caster 6" x 4" Wheel  
**Part #4956**

Fixed Base  
Caster 8" x 4" Wheel  
**Part #4958**

The ability to make furniture mobile immediately increases the functionality of your home. Add four caster wheels to the bottom of your kitchen island, coffee table, ottoman or end table and you will be ready for game night, exercise, dinner parties or a relaxing evening. The possibilities are endless!

## Swivel Casters

Caster 8" x 4" Wheel  
**Part #4978**

The right caster for your project depends on the use of the furniture you are attaching it to. Fixed base casters are ideal if the piece is moving forward and backward. Swivel casters allow the piece to move in any direction. Swivel lock casters can move in any direction but have a lock added to secure the wheel at a certain angle.

# BRASS & VINTAGE CASTERS

Casters can be used on almost anything to create a unique, mobile furnishing. With a variety of casters to choose from, you can easily increase the functionality of your home. These heavy duty pieces offer a modern take on a vintage style, giving your furniture a sense of traditional elegance.

# MID-CENTURY MODERN

*collection*

The Mid-Century Modern collection offers new table leg designs that boast simplicity and functionality. The Brighton table leg showcases unique geometric elements while the Belmont leg is a fusion design with a beautiful juxtaposition of a square wooden leg and brushed metal base.

**Brighton Dining Table Leg**  
29" x 2 3/4"  
**Part #1023**

**Contemporary Dining Table Leg**  
29" x 3"  
**Part #1199**

**Belmont Narrow Island Leg**  
34 1/2" x 3"  
**Part #240857**  
*\*base offered in five finishes*

*Wheeler legs feature a simple yet bold design that, when added to furniture, creates a statement piece.*

The Wheeler design is characterized by a sleek, round profile with a slight tapering. This clean look stands out without the need for intricate ornamentation. The Wheeler leg is available in heights ranging from 6" to 29" accommodating anything from a sofa to a dining room table. The classic Wheeler is a 100% wooden leg, but variations include a brushed metal ferrule at the base and a top block.

*These beautiful metal legs complement any décor while creating a modern aesthetic.*

The highly-anticipated hairpin legs feature a curved metal design and sturdy composition. They are ideal for modernizing any space. Sold in sets of four and available in the following heights: 6", 10", 18", and 29".

Other hardware options available in the Mid-Century Modern line are various solutions for floating shelves. The illusion of a floating shelf is created by concealed hardware and smooth edges. The Slotted Insert Shelf embodies the idea of hidden components with a dowel system. It is 24" x 8" x 1.5", available in ten wood types and ready to install on the wall of your choice. If you already have a shelf in mind that you would like to hang, you can grab the 1" or 1 1/2" Floating Shelf Bracket Kits. These can be purchased in 18", 30" or 42" lengths and include everything you need to create your own floating shelf.

There are multiple ways you can achieve the mid-century modern look effortlessly. Attach table legs with a straight angle or at a 12-degree angle with the Leg Mounting Plates. No table skirt needed! Another attachment solution is the Leg Mounting Cleats. These are available in straight and angled versions with sizes ranging from 12" - 36". Made of our hard maple and cherry, the stylish build of the cleats makes them an asset to the overall table design.

# CORBELS & BRACKETS

Corbels have long been recognized as subtle yet strong architectural components that lend weight-bearing support to extruding surfaces. While this is still the case, corbels and brackets have also become an important decorative element in the home. The wide range of corbel designs and styles available allows for endless possibilities all resulting in a unique and elegant look.

## Wood Types

*Corbels not only come in a variety of designs, but also multiple wood types. And it doesn't end there - they can be stained or painted to perfectly match the desired space. Please note all products are not available in every wood species.*

# Light Rail Moulding

*Having under-cabinet lighting is great but the hardware and components required to provide that extra lighting are not very pretty. That is where Light Rail Moulding comes in! Camouflage under-cabinet lighting by applying Light Rail Moulding to the front edge of your upper cabinets. This is a great way to hide electrical fixtures while adding beautiful detail and dimension to your cabinets.*
