AlertBlast
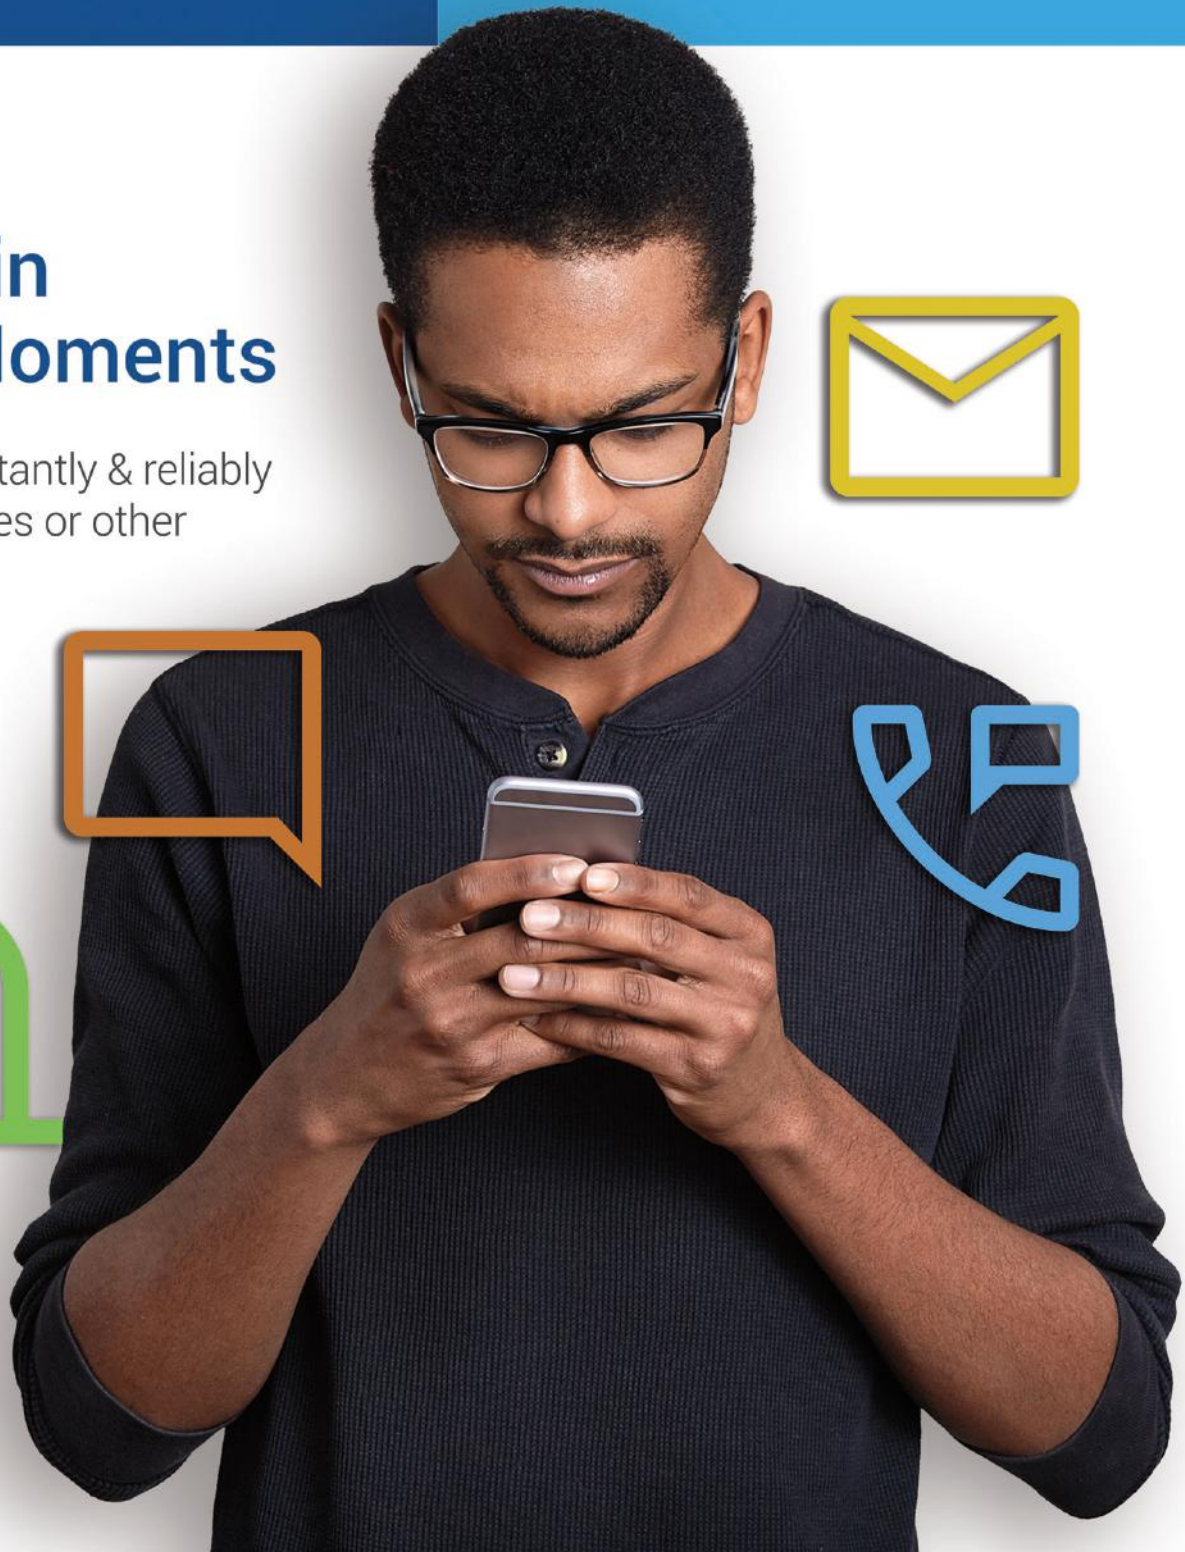

Connect in Crucial Moments

Communicate instantly & reliably during emergencies or other critical events

The uses for **AlertBlast** are practically limitless

From communicating vital emergency alerts that can save lives, to notifying staff of routine information, AlertBlast is the right tool.

Logistics

Communicate scheduling reminders, staffing updates, upcoming deliveries and more.

Emergency Notifications

Use AlertBlast's multi-channel platform to quickly protect employees or students from threats.

Appointment Reminders

Remind clients about upcoming appointments or send last-minute sales information.

Work Interruptions

Servers down? Got a maintenance issue? AlertBlast can notify every employee no matter what device they are using.
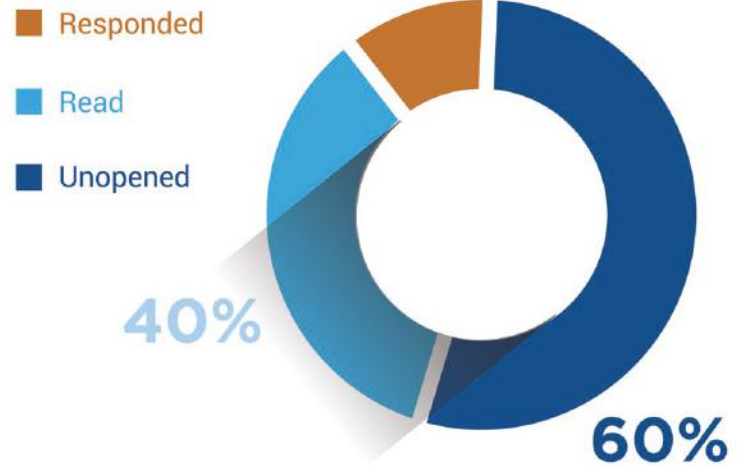

One Message Multiple Channels

AlertBlast allows you to engage in real-time, two-way communications with any size audience. With a simple interface that enables multiple channels — including SMS, voice, email, desktop, in-app notifications, paging, wallboards, IP phones, and more.

Reliable Communications for Any Emergency or Mission-Critical Event

Reporting & Analytics

Know if your messages were received and track responses with easy-to-read analytic graphs.

Responded — 10%
Read — 40%
Unopened — 60%
