Powerful, reliable and customizable

The 5596 Compact Autoclave takes hospital and surgery center autoclaves to a whole new level of quality, safety and flexibility. In addition to the wide range of options, the model can be reconfigured on demand to fit the layout of your facility. A compact and long lasting autoclave designed specifically for healthcare sterile processing. Reliable and easy to use, the 5596 boasts many types of cycle programs for a wide range of sterilization, comes standard with a full temperature range and a working pressure that meets AMSE and PED requirements. The 5596 can be purchased with a single or double door configuration, sliding or hinged doors.

Narrow and Compact

The slim design allows you to fit these models into a small space while maximizing load capacity.

Green Water Saving

AquaMinimal systems (optional) minimize water consumption between 50% and 90%.

Diverse Load Types

The 5596 autoclave is programmed with 8 perfectly optimized cycle programs that cover the processing needs of most CSSDs and operating rooms.

Multiple access levels and user passwords for added security.

Diagnostic In/Out test enables checking each system component separately.

Advanced Touch Control

The large, 7" multi-color touch screen gives you an easy-to-read overview of real-time chamber values, as well as temperature and pressure trend graphs.

Stainless Steel Piping

Piping is made of top-quality stainless steel to avoid corrosion and contamination of the sterilized loads.

Load Traceability

Transfer cycle data and associated barcodes to a PC with optional remote monitoring software and barcode scanner.

USB Ports, Ethernet and Internal battery backup.

Optional features include isothermal cycle for low temperature disinfection, software control and remote monitoring via R.P.C.R. software.

T-Max 8 Autoclave 565 Liter Chamber-Hospital Steam Sterilizer

Powerful, Reliable & Customizable

A narrow state-of-the-art autoclave designed specifically for healthcare applications, optimized to perfection. Reliable and easy to use, the T-Max 8 boasts multiple cycle options, come standard with a full temperature range and a working pressure that meets AMSE and PED requirements. The T-Max 8 narrow autoclave takes hospital and surgery center autoclaves to a whole new level of quality, safety and flexibility. In addition to the wide range of options, the model can be reconfigured on demand to fit the layout of your facility.

Stainless Steel Piping

Piping is made of top-quality stainless steel to avoid corrosion and contamination of the sterilized loads.

Eco-Friendly

Utilizing building supplied chilled water can reduce consumption up to 90%, making your facility greener and more cost-efficient.

Diverse Load Types

The T-Max 8 autoclave is preprogrammed with 8 perfectly optimized cycle programs that cover the processing needs of most CSSDs and operating rooms.

Advanced Touch Control

The large, colorful touch screen gives you an easy-to-read overview of real-time chamber values, as well as temperature and pressure trend graphs.

Load Traceability

Transfer cycle data and associated barcodes to a PC with optional remote monitoring software and barcode scanner.

Multiple access levels and user passwords to control access/operation of the autoclave.

Print a hard copy of cycle data via the built-in printer.

Store the last 200 cycles on your autoclave in built-in memory (Bacsoft).

Remote Internet access for technical support.

Generate PDF reports with graphs and tables using optional RPCR Software

Powerful, Reliable & Customizable

The Tiva 10-V washer disinfectors provides a flexible turnkey solution for washing, disinfecting and drying diverse medical instruments for a complete decontamination life cycle. The TIVA 10-V washer is equipped with automatic sliding door/s and is best suited for surgical and sterilization departments.

Automatic sliding glass door/s

The slim design allows you to fit these models into a small space while maximizing load capacity.

Washing Chamber made of High Quality AISI 316L

265 Liter chamber, suited for sterilization departments.

Diverse Load Types

Can be loaded with up to 6 washing levels for a total 12 DIN baskets. Available trolleys for different kinds of loads.

Advanced Touch Control

Touch panel with color graphic display with a total of 40 programs: preset and programmable.

Advanced Features

Air drying prefilter + HEPA H14 filter.
Boiler for purified water. 2 dosing pumps. 3 heating elements. Built-in steam condenser.

Hands-Free Door Operation

Equipped with a sensor for hands free door operation.

TIVA10 Da Vinci Instrument Trolley Available

Refined design, reduced dimensions and high-tech engineering

Tuttnauer's bedpan washer for washing and disinfecting human waste containers used in nursing-homes, small clinics and hospital departments, is simple to use and compact.

Column Floor-Mounted

The slim design allows you to fit these models into a small space while maximizing load capacity.

Complete with 3 washing programs

NORMAL for solid waste, ECONOMY for liquid waste, INTENSIVE for tough waste.

Thermal Disinfection

With a built in steam generator 3.2 kw complete with water level monitoring probe and a safety thermostat.

SDS - Self Disinfection System

Auto disinfection system starts a program if the machine is not used for more than 24 hours.

DWC - Disinfected Water Cooling

Automated system to disinfect the water used in the final rinse.

ACS - Air Cooling System (Optional)

After the disinfection phase cold air will be introduced in the washing chamber to cool down the temperature.

- **3 Washing programs**
- **ENC - Electronic Nozzle Control**
- **Wall or floor drain complete with DCS (Drain Control System)**
- **Manufactured in AISI 304 (DIN 1.4301) stainless steel**

Arjo Citadel Plus Bariatric Care System

Preserving dignity for patients of size

The bed is the centre of care during a hospital stay, providing a platform for patient recovery while helping reduce the risk of patient and caregiver injury. Citadel Plus is purpose-built for hospitals demanding the highest levels of safety and efficiency from their beds and therapeutic surfaces.

- Durable
- Plug-in Controls
- Easy to clean and Service
- Auto-contour
- Lockouts
- CPR
- Integrated weigh scale
- Varizone patient movement and exit detection
- Digital Angle Indicator
- Manages patients weighing up to 454 kg (1000 lbs).
- Variable width & length incorporates 3 width expansion options. Available even during power outages.
- Provides visual alerts on bed safety conditions
- AES (Anti-Entrapment System)

Arjo Prioma® Birthing Bed

Reliability and comfort for one of life's greatest moments

The Prioma Birthing Bed is an electrically operated delivery bed designed to provide comfort and support to the mother, as well as efficient and reliable functionality for the delivery team throughout all stages of the birthing process.

- Fully integrated patient and nurse control panels
- Large under tray
- Ergonomically designed, sturdy and reliable leg stirrups
- Retracting backrest
- Safe Working Load (SWL) 200 Kg
- 150 mm twin central locking castors
- Linak actuators
- ABS removable backrest panel
- High pressure compact laminate seat & foot panels
- Head end drop down side rails
- Integral bed extension - 580 mm
- Battery back up
- Manual CPR backrest quick release
- Removable lightweight head & foot panels
- Trendelenburg tilt 14°, reverse Trendelenburg tilt 12°

Arjo Hospital Bed Systems

Designed for quality of care

The Prioma range of medical beds has been designed to cater to the essential needs of daily care routines, complete with fully electric controls and a range of functions and positional movements as standard.

Prioma® Medical Bed 600

- Safe Working Load (SWL) 250 Kg
- Tente 125mm single central locking castors
- Linak actuators
- ABS removable deck panels
- Full length split side rails
- Embedded controls for nurse and patient
- Retracting backrest
- Manual CPR backrest quick release

essential
everyday care**

Arjo Stretchers and Trolleys

Your partner in patient management

The Lifeguard® range of variable height trolleys offers flexible solutions designed to improve all aspects of patient management.

Arjo Lifeguard® 20

Lifeguard®20 is a variable height, versatile patient support surface, designed to cope with the varied demands of acute healthcare settings.

- Optional full-length X-ray compatible
- Range of customer-defined options to suit needs/budgets
- Safe working load 180kg (396lbs)

Arjo Lifeguard® 50

Lifeguard® 50 is a high specification trolley that has been designed to cope with the rigours and demands of an emergency department.

- Lightweight with excellent maneuverability
- Dual-side hydraulic foot pedals for height adjustment
- Optional full-length X-ray and C-arm compatible
- Safe working load 250kg (550lbs)

Arjo Lifeguard® 55

Lifeguard® 55 is a versatile, high specification patient trolley suitable for trauma, patient examination and imaging, treatment, transport and recovery.

- Full-length radio-translucent mattress platform
- Conventional X-ray and C-arm compatible
- Lateral X-ray compatible
- Safe working Load 250kg(550lbs)

Arjo Floor lifters

Easy to understand, simple to operate and providing maximum resident/patient comfort. Arjo resident/patient lifts are firmly established as the most appropriate ergonomic choice for today's professional nurses and caregivers.

Maxi Move® floor lift is designed to enable a single caregiver to manage demanding everyday patient or resident transfer and repositioning tasks. It is a versatile solution that can be adapted using a variety of spreader bars to accommodate patient transfer needs.

- **Stable lifting:** Keeps the patient in a stable position during lifting and transferring
- **Precision transfers:** Integrated with the spreader bar is a powered dynamic positioning system (PDPS)
- **Versatility:** Optional interchangeable spreader bars
- **Wide lifting range-**Dual action telescopic mast
- **Flexible system with several options:** Optional scale and three sizes of castors
- **Safe working load:** 227 kg, 500 lb

Maxi 500® floor lifter has been designed to help caregivers transfer dependent patients or residents in hospitals, nursing homes, homecare environments or other assisted living centres.

- **Familiarity:** Available with 4-point clip or 2-point loop spreader bar
- **Dual controls:** Can be operated from the mast or with the hand control
- **Simplicity:** Easy to understand and simple to operate
- **Scale option:** Integrating weighing into transfer procedures
- **Safe working load:** 227 kg, 500 lb
