

Double Scissor Lift for moving materials across floors

 nandan.co.in/case-study/double-scissor-lift-for-moving-materials-across-floors

Challenges

- Nandan was approached by Dmart for helping in their material handling requirement of loading & unloading materials from ground to first floor
- Space was a major constraint & time management were of top most priority.

[Previous](#)

[Next](#)

Solution

- Nandan proposed a Double scissor lift to carry materials from the ground to first floor
- The solution was given so that space can be used in the most efficient manner keeping in mind the pace of work & safety in handling goods

Results

- Faster Loading & Unloading times.
- Exponential increase in safety.
- Reduction in Labor.
- Optimized usage of space
