

## PRESS RELEASE

### We need every day to be Earth day: Minimac Systems

[22-04-2023, Pune, Maharashtra] - As we celebrate Earth Day, Minimac Systems reaffirms its commitment to sustainability and reducing carbon emissions. Being a clean-tech company, their mission is to provide technological solutions to various industries, enabling them to reduce their carbon footprint and minimize used oil wastage. The company believes that industrial sustainability is crucial in creating a better future for our planet. By leveraging the latest technologies with the enabling of IIoT and AI, they are accelerating the adoption of sustainable practices across various industries. Their manufacturing plant in Chakan, Pune, has various innovative technologies which helps their customers to reduce their carbon footprints and used-oil wastage.

Minimac Systems provides end to end solution by mid-life treatment of oil and end-life treatment of oil by reconditioning and reclamation. By enhancing the life of oil, the purchase of new oil is reduced along with the used-oil waste and ultimately helping in reduced carbon emissions. The company is not only helping industries to reduce their carbon footprint but actively contributing towards circular economy and ESG norms. On the occasion of Earth Day, Minimac's efforts towards creating a more sustainable future were applauded.

“Climate change is now an integral part of development discussions, and no longer seen as a standalone subject. There are too many things which we can do to bring a change. We all should think about the choices we make which encourages emissions. Net-zero is a long haul, only our choices and habits will help the fight against climate change. I am proud of our commitment to sustainability and our efforts to reduce carbon emissions through innovative technologies which are helping our clients to reduce their carbon footprints. Minimac Systems will continue to push for bold actions.” stated by Mr. Anshuman Agrawal, Founder and MD of Minimac Systems.
