

ONS

A WORLD-LEADING STAGE FOR ENERGY,
TECHNOLOGY AND INNOVATION

ONS
FOUNDATION

ONS gathers the international energy industry to network, debate, do business and plan the future.

PROMOTING ENERGY

Welcome to ONS, the leading energy meeting place in Stavanger, Norway. A conference and exhibition where we strive to always be in the forefront of the energy conversations and trends.

Every other year we welcome participants from all over the world to discuss the future, do business, discover new opportunities, and connect with peers in the industry. We are in the middle of a major energy transition, and we take pride in showcasing the technology, innovation and new ways of thinking that drive this change.

Through conferences and summit we facilitate debates, discussions, and collaboration across the industry. In addition, we bring ONS downtown Stavanger for all to take part in through debates, networking, culture, and social events in the evenings.

Our vision is for ONS to be the driving force for the energy transition, both through our existing network and by broadening our view towards new technology, industries and markets every day.

We would be honoured if you would be a part of ONS and look forward to welcoming you to Stavanger!

President and CEO
The ONS Foundation

ABOUT ONS

The ONS Foundation is a world-leading, non-profit organisation facilitating discussions and collaboration on energy, technology and innovation.

ENHANCING SUSTAINABILITY

Sustainability is at the core of our business, and we aim to provide information, challenge established practices and promote low carbon solutions. We believe the sustainable energy future must be built on the shoulders of the oil and gas industry.

Through our global network of business and society leaders, innovators and politicians, we work to shape and influence the future energy society. At the core is the biennial ONS event which was started in 1974 as a key meeting place for the energy industry.

Continuously developing, ONS today represents a series of activities around the world. We believe in working in partnership with others as a united industry to create a new energy future.

HM KING HARALD V

THE VALUE OF ROYAL PATRONAGE

The ONS Foundation is proud and grateful to be under the patronage of HM King Harald.

The oil and gas on the Norwegian Continental Shelf has given Norway and its citizens a lot. A thriving industry. Employment. Innovative and technological edge. A solid economy.

The members of the Norwegian Royal Family recognised the importance of the activities on the shelf right at the beginning.

HM King Harald, who was then Crown Prince of Norway, soon became patron of ONS. As a result of this commitment, a member of the Royal Family has been present at every ONS since 1974.

The Royal Patronage encourages us to strive harder to achieve our goals and is an invaluable token of the importance of the ONS meeting place.

Her Majesty Queen Sonja at the Opening Ceremony at ONS 2014.

H.R.H Crown Prince Harald arriving at one of the very first ONS events in the early seventies.

His Majesty King Olav during a tour of the ONS Exhibition in the late seventies.

H.R.H. Crown Prince Haakon visited the ONS Exhibition in 2014.

H.R.H Crown Prince Harald has visited the exhibition a number of times.

From the early nineties, H.R.H. Crown Princess Sonja meets exhibitors at ONS.

CONFERENCE ARENAS

Nine different conference arenas secures valuable content for everyone, regardless of level or discipline. Energy, finance, society and technology are all represented throughout the many venues.

Conference

High level and in the forefront of the international energy agenda. This is where the international leading voices meet to discuss the trends influencing the energy industry.

Centre Court

Short and focused talks with emphasis on the future societies and energy solutions.

Summit

This is a unique meeting place for industry top executives and high level politicians, discussing geo-political and environmental issues. By invitation only.

Net Zero Markets

Down-to-business arena for projects, opportunities and industry experts within renewable energy and low carbon solutions. The leading venue for business opportunities and updated market perspectives in the renewable and low carbon sphere.

Scale-ups

The #1 place where start-ups & scale-ups in the energy sector meet the investors and energy companies. A unique networking arena with great business opportunities.

Young

ONS Young is made for and by young people. We wish to inspire youth to engage in the energy world and to use their passion for the climate within the industry.

Technical Sessions

Technical insights and inspirational ideas to help find solutions to the unsolved problems of the energy industry.

International Markets

The place to get fresh market updates from several international markets and a unique place for prearranged Business-to-Business (B2B) meetings. A unique window into the global energy industry, and collaboration with Norwegian Energy Partners (NORWEP).

ONS+

A mix of energy discussions, debates and informal talks downtown Stavanger. Facilitated by ONS, different companies, NGOs and others interested in setting the energy agenda. A networking arena for discussions and talks on energy for everyone to attend.

ONS Conference ENERGY EXPLAINED

A world leading venue for discussions on energy, technology and innovation. ONS is where the international leading voices meet to discuss the trends influencing the energy industry.

- The big questions addressed and debated
- Bringing together ministers, leaders, technical specialist and analysts
- but make no mistake, the topics are valuable to everyone who wants to know what is going on in the energy industry
- Plenary and parallel sessions

ONS Exhibition

A SHOWCASE FOR TECHNOLOGY AND INNOVATION

Eight exhibition halls filled with the very latest of innovations from the entire energy industry. The perfect opportunity to position yourself in front of the international energy industry,

One of the truly special features about ONS is the mix of individuals and companies present. Operators, suppliers, academia and institutions. Large companies and brand new start-ups. CEOs, analysts, engineers, entrepreneurs, ministers, project managers and government officials.

People meet at the ONS Exhibition – and they do business. We take great pride in that many contracts and deals have been made at the event or in the aftermath.

It is important for us to be at ONS because it is a great meeting place. It is where we meet everyone. From politicians to decision makers, from partners to suppliers.

INFLUENCING THE FUTURE OF THE ENERGY INDUSTRY

The ONS Summit is a forum where key leaders from the energy industry, politics and civil society meet for off-the-record discussions on global energy trends, their geopolitical implications, and the challenges this pose to states, energy companies and technology providers.

- Decision makers who influence the energy future
- Geopolitical debates on energy and environmental issues
- Cooperation between the leaders in the energy world

ONS brings together an exceptional gathering of top level decision makers and global experts for the energy industry. It has become a key meeting place to discuss the challenges facing the industry and to identify the way ahead".

Sir John Scarlett
Former Chief of the British Secret
Intelligence Service (MI6)

The ONS Summit

The Munich Security Conference Foundation (MSC) is a strategic partner of the ONS Foundation, and together we facilitate a round table discussion on energy markets, energy security challenges and the current geopolitics of energy.

Participation at the ONS Summit is by invitation only.

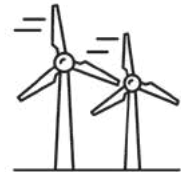

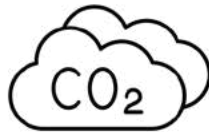

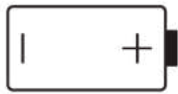

The ONS Summit facilitates closer cooperation between political and corporate leaders in the energy world.

ONS Net Zero Markets

EXPLORE OPPORTUNITIES ON THE ROAD TO A NET ZERO FUTURE

ONS Net Zero Markets, our conference arena for low carbon- and renewable energy solutions, provides unique access to current trends, opportunities and network across markets and industries. Together with a whole range of energy experts, we aim to provide you with the best insight, roadmaps, and business opportunities in different markets, both on International and European level.

We will look into

- The integrated energy system
- Ambitions, markets and investment
- Research and innovation
- Supply & logistics chain
- Regulations and public acceptance

ENERGETIC DEBATES, PAVILIONS AND BOATS - ENTERTAINMENT, FOOD AND DRINK

Every night during ONS, Stavanger Harbour transforms into a small urban village. Pavilions offer food, drinks, music, as well as being the hosts for our concept: debates, discussions, and presentation around the theme energy in society - we call it ONS+.

Join us for energetic debates from different companies, NGOs and other interested in setting the energy agenda. A popular networking arena in the evenings for locals and visitors to ONS.

COME EARLY. EXTEND YOUR STAY. STAVANGER HAS A LOT TO OFFER!

Can you be this close to one of Norway's most spectacular tourist attractions – and not see it?

The Pulpit Rock, a massive cliff 605 metres/1 982 feet above one of our fjords – Lysefjorden.

The Stavanger region offers numerous activities you can combine with your visit to ONS. Golfing, street art, hikes or guided tours in Stavanger and to our popular nature destinations.
