INTRODUCTION

Welcome to the 2017 Edition of Mexican Paper Money. This Edition is being produced only in digital format, which is available for purchase and download on our website worldnumismatics.com. Copies of the original hard cover book are still available and can also be purchased on our website.

I am very pleased that Duane Douglas, Alberto Hidalgo and Elmer Powell agreed to return as co-editors for this Edition. Duane Douglas was one of the editors of the CEMPM book, operates a store in Mexico City (El Mundo de La Moneda) and runs two auctions each year. For more information visit his website at elmundodelamoneda.com. Contact Duane at info@elmundodelamoneda.mx. Alberto Hidalgo was also one of the editors of the CEMPM book and is a very active dealer based in Mexico City. Alberto runs two auctions per year and you can get more information on his website, notafelius.com. Contact Alberto at albrtoiv@hotmail.com. Elmer Powell lives in Texas and has assembled the most advanced collection of revolutionary currency existing today. Elmer has extensively edited the Revolutionary section of this Book. Elmer can be contacted at ecp.adp@sbcglobal.net.

Two additional Editors have joined us for this edition. Simon Prendergast has spent over 20 years researching the Mexican banking history of Sonora and Chihuahua. His two websites, papermoneyofsonora.com and papermoneyofchihuahua.com contain an incredible amount of detail on the subject. Simon is also the Editor of the US Mexican Numismatic Association Quarterly Journal. If you are not a member of this great organization, you should be - usmex.org. Simon has made thousands of detailed changes to the book including the addition of new notes, new historical data, formatting changes and general editing. Simon can be reached at simon.prendergast@lineone.net. Huston Pearson Jr, also joins us and brings much needed depth to the Banco de Mexico modern notes. His study of this series is extremely detailed and he has revamped and greatly expanded the entire section. In addition, Huston has made substantial contributions to several Revolutionary areas of the book. Huston is a currency dealer based in Ennis Texas and specializes in Mexican, Latin American and World Currency. Visit his website at ww.worldpapermoney.us.com or email him at hpearson47@msn.com.

In addition, I received invaluable aid from a wide variety of individuals and companies who are listed in the credits on the following page.

Enjoy,

Cory Frampton

CREDITS

In addition to the Editors, I owe a special thanks to the following contributors who helped make this book a reality. They include all of the contributors from the first edition of Mexican Paper Money plus others who have made contributions to the second edition. Some scanned a few notes and others made their entire collections available. Others helped by locating images, photo editing and providing historical research. Still others assisted in bringing pricing up to date. Without their cooperation, it would have been impossible to publish this book in such a complete form. I want to take this opportunity to thank each and every one of them.
It seems in every effort of this nature, someone gets lost in the shuffle. In publishing the 2010 edition I missed listing several credits but most embarrassingly I did not include Itzel Hidalgo Calderon and Alberto Hidalgo Calderon, the daughter and son of Alberto Hidalgo. The two of them spent many hours on the Banco section preparing detailed pricing spreadsheets from Alberto's notes.

USING YOUR DOWNLOAD

The 2017 Mexican Paper Money digital download should be used in conjunction with the latest version of Adobe Acrobat Reader, which can be downloaded free on the Adobe website get.adobe.com.

This version of Mexican Paper Money is fully searchable using Adobe Reader. You can search for a specific word, an M number or anything else. The search window pops up when you open Adobe Reader. Further, the Table of Contents following this introduction section has links to the corresponding section in the book. For instance, you can click on Aguascalientes under Bancos and it will take you directly to that section.

USING THIS BOOK

DOES IT BELONG IN THIS BOOK?
By Simon Prendergast

In general, to be included in this book as paper money, items have to be printed, payable to the bearer, and denominated in discrete fractions or multiple of pesos.

During the revolution, because of the shortage of change, institutions such as shops and restaurants resorted to issuing their own scrip. These we have included where we have documentary evidence for their use as currency. We have left in items that have appeared in previous catalogs, even when they are obviously not "currency", but have been harsher with items that may have appeared in more recent auctions or listings.

Throughout Mexico's history national and state authorities resorted to forced loans or the issue of bonds to maintain their finances and these frequently produced documents that were capable of being negotiated, used to pay taxes or redeemed. Many were printed and for discrete amounts. However, we have restricted ourselves to items that were issued to circulate, however limited, as "currency" at the time, and to certain items that, in size and appearance", look more like "paper money" than bonds or stock certificates.

After the revolution, a large number of remainders were used as props in the Hollywood movie industry. When this supply dwindled the industry produced its own issues, based on Mexican originals. These numerous items, referred to as "movie money" are outside of the scope of this catalog.

Similarly, during and after the revolution, notes were so devalued, but at the same time so interesting, that they were frequently used for advertising flyers or souvenirs for shop, banks and other institutions or as political leaflets. Again, these are outside the scope of this catalog.

IS IT MONEY?.
By Elmer Powell

Gaytan's publication, "Paper Currency of Mexico", published in 1975 began to include and identify items that he said "are akin, collaterally (though once, twice, or many times removed) to the Paper Money of Mexico". He goes on to say, "many are included here because of their historical value" and included a list of 59 notes such as Revolutionary Council of Mexico, June 7, 1914 and the Zaragoza Bank notes (which are actually from a book-keeping school). Douglas, Verrey and Hidalgo in their publication of "The Complete Encyclopedia of Mexican Paper Money" released in 1981 did not separate out the above notes but included them as issued notes and added many train tickets, cafes, Billares (pool halls), Banos (public baths), bars, candy shops, and the famous Sanborn's Restaurant which troops of Emiliano Zapata used as a gathering place during the Mexican Revolution.

The question as in 1975 is to what extent can these tickets, etc. be considered paper money? Let's go back to 1964 and an earlier publication of "The Paper Money of Mexico" by Gaytan and-Utberg. On page 163 the writers are discussing The Cristero Banknotes and give a translation of the notes as follows:

Obverse: "Contribution for the conquest of Liberty"
Reverse: "Mexico! The sacrifice of thy sons, dead in Zamora, Chalchuites, Leon, and other places as martyrs of the Christian Faith, is the bugle sound of Liberty calling. It is our most sacred duty to reconquest, if either with our blood or our money."

"The National League for the Defense of Religious Liberty"
The writers go on to say "No one can help but agree that they are interesting from a historical standpoint and are collector's items".

That settles the question as once the word historical is applied to the notes they are collectable. However, it does not answer the question are these tickets, etc. considered paper money. During the Mexican Revolution, anything that had something called value was traded for value or what is called money. The Sanborns coupons are a reflection. Hard currency was nonexistent and the train tickets and other chits (vales) issued by private companies were used as items of trade. A train ticket might well have held more value than the currency that was handed out by the ever changing military or state governments.

I collect because I love history and each of these tickets, etc. represent a history of turbulent times. As Simon Prendergast says, "So vouchers were not such a bad idea, especially if they gain "currency" independent of the shop and did not have to be redeemed by the receiver. Therefore the answer is in the eye of the collector.

Types

We have usually assigned a different catalog number to each major difference in design.
Within each type we have attempted to list all known Series and dates of issue, (though not all documented as issued), but this cannot be complete and where a great number of dates are known, we have commented "various dates". Similarly, we have attempted to distinguish between major changes in color, but, especially for revolutionary issues, this may vary greatly.

Otherwise, we have assigned separate catalog numbers to
(a) noticeable errors or omissions
(b) proofs
(c) specimens
(d) remainders.

Most types of Mexican paper money, including banknotes and private issues but, most importantly, the

major revolutionary issues, were counterfeited, the last on an industrial scale by printers in the United States. Some such counterfeits might appear as different types, especially when overprinted 'FALSO' (though this could be applied to genuine notes, either in error or to decommission them), and we have occasionally mentioned when large numbers of counterfeits are known or suspected. However, in general, a detailed listing of counterfeit notes is outside the scope of this catalog.

Regrettably, in addition to the historically interesting contemporary counterfeits, modern counterfeits and fantasy notes pretending to be from the revolutionary period occasionally appear.

Validations

Most bank notes were validated with a fiscal stamp and the Secretaria de Hacienda's seal immediately before issue. Similarly, many military, state and private issues were stamped or handstamped with some form of validation.

In addition, many revolutionary issues bear (re) validation seals (commonly referred to as resellos) which traditionally have been listed and collected. These are frequently variation on the usual circular official rubber stamp with the Mexican eagle in the centre and title around the edge.

Such (re)validations can be of various types:
(a) Validation before issue. Some notes were stamped before being put into circulation, particularly once counterfeits had begun to appear.
(b) Local validations. Many handstamps were applied to (1) testify to a note's genuineness, (2) testify to a note's validity within a certain area. Occasionally we have documentary evidence of local officials instructing holders to present their notes for such a validation.
(c) Revalidation. Both Carranza, the Convention, and local commanders ordered that certain notes be handed in for revision and revalidation to weed out counterfeits. Hence the number of stamps with "Revalidado' with their legend
(d) Decommission. When notes were withdrawn from circulation they were occasionally stamped before being destroyed. Hence a number of stamps with words such as 'RETIRADO' and 'CANCELADO'. Incidentally, the purple "AMORTIZADO' stamp is found on such a variety of revolutionary issues, some of which were never 'amortized', that we believe that it is a fantasy, applied by a dealer or collector at some later date. However, as it has been listed in previous catalogs, we have continued to include it.

'PAGADO' is usually applied to notes that have been exchanged, by some institution or their issuer, for some other form of cash.

We have not attempted to list other types of stamps that might be found, including
(a) stamps applied by institutions or banks as part of their bookkeeping
(b) chopmarks and personal graffiti.

ORGANIZATION OF CONTENTS

This book is organized chronologically in six sections consisting of Imperial and Early Republic, Banks, Pre Revolution, Revolution, Post Revolution and Banco De Mexico. Thereafter, states, locations and banks are in alpha order. For instance, all the Banks are grouped together and then organized by State and then by issuing Bank. All of the revolutionary notes are grouped together in one section, organized first by State, then by the nature of the issuer, then by location. The sections are:

Imperial & Early Republic	1800 – 1867
Banks	1865 - 1914
Pre Revolution	1867 - 1909
Revolution	1910 - 1916
Post Revolution	1917 - 1943
Banco De Mexico	1925 to date

GENERAL DESCRIPTION OF SECTIONS

Following is a brief description of the various types of notes contained in each section:
Imperial and Early Republic 1800 – 1867

The section includes notes issued from colonial times through the Iturbide and Maximilian empires and includes the issues of the early republic. Currently, the first known notes are dated 1813. It would not be surprising to find earlier notes at some time in the future.
Banks 1865 - 1914

Early bank notes, or "Bancos" as they are commonly called, are identifiable simply by their heading "El Banco de" (The Bank of). Most of these notes are large size, colorful issues. They also bear attractive vignettes, portraits and scenes, and the vast majority of them were printed by The American Bank Note Co., the Homer Lee Bank Note Co. and Bradbury, Wilkinson & Co. See the section on Mexican Banking History for an interesting overview of these issues. This is probably the most popular type of note collected and the most attractive. They have bright colors, beautiful vignettes, and high quality engraving. Because of the existence of a number of unique or extremely rare notes, a complete collection has never been assembled.

Pre Revolutionary Issues 1867 - 1909

This section includes all notes, other than bank notes, issued after Maximilian and before the revolution began. The vast majority of these notes bear a date and, thus, are easily identified. There are a few undated notes which have been placed in this category because the name of the business enterprise, or the family name, has been traced to this period. Relatively few types were issued and they are generally very scarce.

Revolutionary Issues 1910 - 1916

This section contains three types of issuers which are listed separately within each State. They are Military Issues, State and Municipal Issues and Private Issues.

Military Issues (MI) Key words which help determine military issues are "militar" (military), "ejercito" (army), "brigada" (brigade) and "decreto militar" (military decree). The vast majority of notes in this group bear a date. Notes issued by military organizations are a very interesting category and bring with them a tremendous historical background of the Mexican Revolution.

State and Municipal Issues (SI) Key words which help identify state and municipal issues are "estado" (state), "ayuntamiento" (city hall), "ciudad" (city), "municipio" (municipality), etc., provided they are not used in combination with any of the military key words. The State and Municipal area includes a huge variety of notes and issuers.

Private Issues (PI) Private issues of this period normally have the name of a private individual, firm, association, or hacienda. Frequently they are small in size and the category includes many of the small pasteboard issues called "cartones". There are probably more private issues than both of the other categories combined.

Post Revolutionary Issues 1917 - 1943

This category includes all issues dated or issued after the revolution with the exception of the notes issued by the Banco De Mexico. No issues pertaining to the revolution are dated after 1917. Generally, these notes are easily identifiable because they are dated. The latest notes cataloged in this period are the 1943 50 centavos and 1 peso notes authorized to help solve the shortage of fractional coinage that year. These notes, like the prerevolutionary notes, constitute a small group of notes that are difficult to assemble.

Banco De Mexico 1925 to date

The Bank of Mexico was founded in 1925 and continues to issue bank notes of the federal government to this date. Only the early issues of the Bank are included in this book. The entire series, which includes thousands of listings, is covered in "The Paper Money of the Bank of Mexico" by Duane Douglas. See CONTACT INFORMATION to purchase this book.

NUMBERING SYSTEMS

Two numbering systems are used throughout the book. A new numbering system is used for the first time. The new numbering system appears in italics on the first line of each listing and along the left margin if varieties exist. There is only one number for each distinct note with a letter added for varieties. Only whole numbers are used and the numbering system follows the book layout. There are intentional gaps in the numbers which will allow the future inclusion of new notes. All numbers are preceded by the letter M for Mexico.

The CEMPM numbering system also appears on each listing and has been modified to include the hundreds of new issues and varieties discovered since the CEMPM book was published in 1982. New notes and varieties were inserted on a decimal basis.

A cross reference guide between the Krause numbering system, the CEMPM system and the new numbering system is included at the back of this book.

IMAGES

In the interest of minimizing the size of the book, backs of most notes have not been shown. Exceptions were made for notes with especially attractive backs or where the backs are critical to identification. None of the images are to scale.

GRADING

The grading standards of the International Bank Note Society (IBNS) have been used in this book. These grading standards are consistent with current industry practices and are used in the majority of foreign banknote catalogs.

UNCIRCULATED – UNC A perfectly preserved note, never mishandled by the issuing authority, a bank teller, the public or a collector. Paper is clean and firm, without discoloration. Corners are sharp and square, without any evidence of rounding. (Rounded corners are often telltale sign of a cleaned or "doctored" note.) An uncirculated note will have its original natural sheen.

ABOUT UNCIRCULATED – AU A virtually perfect note, with some minor handling. May show evidence of bank counting folds at a corner or one light fold through the center, but not both. An AU note cannot be creased, a crease being a hard fold which has usually "broken" the surface of a note. Paper is clean and bright with original sheen. Corners are not rounded.

EXTREMELY FINE – XF A very attractive note, with light handling. The note may have a maximum of three light folds or one strong crease. Paper is clean and bright with original sheen. Corners may show only the slightest evidence of rounding. There may also be the slightest sign of wear where a fold meets the edge.

VERY FINE – VF An attractive note, but with more evidence of handling and wear. The note may have a number of folds both vertically and horizontally. The paper may have minimal dirt, or possible color smudging. Paper itself is still relatively crisp and not floppy. There are no tears into the border area, although the edges do show slight wear. Corners also show wear but not full rounding.

FINE – F A note which shows considerable circulation with many folds, creases and wrinkling. Paper is not excessively dirty, but may have some softness. Edges may show much handling with minor tears in the border area. Tears may not extend into the design. There will be no center hole because of folding. Colors are clear but not bright. A staple hole or two would not be considered unusual wear in a Fine note. Overall appearance is still on the desirable side.

VERY GOOD – VG A well used note, abused but still intact. Corners may have much wear and rounding, tiny nicks, tears may extend into the design, some discoloration may be present, staining may have occurred, and a small hole may be seen at center from excessive folding. Staple and pinholes are usually present, and the note itself is quite limp but no pieces of the note can be missing. A note in VG condition may still have an overall not unattractive appearance.

GOOD – G A well worn and heavily used note. Normal damage from prolonged circulation will include strong multiple folds and creases, stains, pinholes, and/or staple holes, dirt, discoloration, edge tears, center hole, rounded corners and an overall unattractive appearance. No large pieces of the note may be missing. Graffiti is commonly seen on notes in Good condition.

FAIR – FR A totally limp, dirty and very well used note. Larger pieces may be half torn off or missing, beside the defects mentioned under the Good category. Tears will be larger, obscured portions of the note will be bigger.

POOR – PR A "rag" with severe damage because of wear, staining, pieces missing, graffiti, larger holes. May have tape holding pieces of the note together. Trimming may have taken place to remove rough edges. A Poor note is desirable only as a "filler" or when such note is the only one known of that particular issue.

Cleaning, washing or pressing paper money is generally harmful and reduces both the grade and the value of a note. At the very least, a washed or pressed note may lose its original sheen and its surface may become lifeless and dull. The defects a note had, such as folds and creases, may not necessarily be completely eliminated and their telltale marks can be detected under a good light. Carelessly washed notes may have white streaks where the folds or creases were (or still are).

Glue, tape, or pencil marks may sometimes be successfully removed. While such removal will have a cleaned surface, it will improve the overall appearance of the note without concealing any of its defects. Under such circumstances, the grade of the note may also be improved.

RARITY SCALE

A specific rarity scale has been developed and used in this book. The rarity scale is an estimate of the number of notes that exist in private collections. It does not include notes known to exist in government collections or museums as these notes are not likely to become available in the private market place. Keep in mind that these estimates are approximate and subject to change as additional notes are discovered.

Extremely Rare	XR	1 - 5
Very Rare	VR	6-10
Rare	R	11-20
Very Scarce	VS	21-40
Scarce	S	41-80
Common	C	81-160
Very Common	VC	161-500
Extremely Common	XC	501+

In the bank section two rarity scales are included at the beginning of each individual bank listing that provide an estimate of the rarity for the notes of each bank. One scale is for issued notes and includes remainders. The other scale is for specimens and proofs. The specimen and proof scale was developed from the records of the American Bank Note Company archives.

PRICING AND AVAILABILITY

The prices in this book should be used as a general guide, not as a bible. Pricing on rarer notes can change rapidly and hundreds of issues are not available on a regular basis. We have not priced notes that are unique or that have not appeared on the market in many years as an opinion of value would be very speculative. In addition, there are a lot of notes which exist only in certain grades. For instance, if a note is extremely rare above VF, we have not priced it. Instead of guessing at the value, we are letting you know about the condition rarity of the note and you can price it accordingly.

The vast majority of Mexican paper money is not available in high grade. There are exceptions to this in both banks and Revolutionary Issues but it would be fair to say that less than twenty percent of all notes can be readily obtained in uncirculated condition. Many notes are not known in grades above good.
All specimen and proof pricing assumes that the note is uncirculated and without damage. Adjust the value accordingly for notes that are damaged or unsightly for other reasons. The proof pricing assumes that a pair of front and back proofs are being offered together. From our perspective single fronts are worth about 60% of the indicated value and backs about 20% of the indicated value. Yes we know that does not add up. The whole is worth more than the sum of the parts. All prices in this book are in US dollars.

VARIETIES

The measurements of many notes have been included. Keep in mind that in many cases measurements of the same note vary from one example to another. Normal fluctuation in size is between one and three millimeters. However, differences of five or six millimeters are known. This is especially true of Revolutionary Issues, which were frequently prepared without adequate equipment, and with little time for, or interest in, uniformity. A variety of papers and inks were used with very little consistency based on what was available to the printer at a given time, resulting in a wide array of color variations.

Certain issues, such as the dos caritas series from Chihuahua, are collected by series, control letters and numbers which total in excess of 1,000 notes.
There are literally thousands of varieties in minor design changes, paper type, color and fonts which we have not listed in this edition and will not list in future editions as they would overwhelm the book.

SPECIMENS, PROOFS AND REMAINDERS

In the early 1990s the American Bank Note Company, which printed the vast majority of early Mexican bank notes, sold its archives. Included were a large number of previously uncataloged specimens and proofs. Since that time these specimens and proofs have been dispersed into the marketplace and no additional large hoards of these issues are known. A rarity scale for these notes was developed based on detailed information from the sale. Specimens and proofs also exist for most of the other printers but their remaining population is very difficult to estimate.

Specimens are bank notes printed in conjunction with the issued notes that generally have a series of zeros for the serial number and are overprinted with the word specimen or muestra. Specimens are printed on the same paper as the issued notes and quantities are generally relative to the numbers of issued notes. For instance, a note considered common as an issued note is probably common as a specimen. The most common specimens have a population of a couple of hundred. On the other hand, a very rare issued note might have a corresponding specimen population of two or three pieces. In general, most high denomination bills have specimen populations under ten pieces and in many cases less than five pieces. There are more than 50 Mexican bank notes that exist today only in specimen or proof as no remaining issued notes are known.

Proofs are generally printed on india paper and are uniface. They can be in color or in black and white. They are seen mounted on different types of card stock or not mounted at all. The original American Bank Note Company archives contained examples of a wide variety of different printing and mounting methods. Fronts and backs do not always show up together and were not necessarily produced in equal numbers. The price shown in the catalog for proofs assumes both front and back are together. Separate fronts are generally worth about sixty percent of the price shown and backs by themselves are worth around twenty percent of the price shown.

Remainders are printed bank notes with serial numbers that were never signed and issued. As banks were closed some destroyed all of the remaining unissued notes they had on hand and others simply abandoned them as they were not thought to have value. Remainders exist only on certain banks and are generally far more common than specimens.

BANCOS REFACCIONARIOS AND BONOS DE CAJA

Bancos Refaccionarios (investment banks) were created under the 1897 Credit Institution laws. They were authorized to make single term loans and while they were authorized to issue Bonos de Caja (cashiers bonds) for up to five times their assets, they were not allowed to issue circulating currency. Payable to the bearer, Bonos were treated as cash although they did not circulate publicly like normal banknotes. There are only about twenty different Bonos de Caja and they are for the most part rare and available only in specimen or proof as very few issued notes remain. All are listed in this catalog. Because they could not issue circulating bank notes or engage in traditional banking, these banks were unable to compete with banks of issue and were short lived.

THE SRE HOARD

In January 1997 the United States Government returned to the Mexican Government a huge wooden chest of Mexican Currency which United States troops removed from Mexico in 1914 during the American intervention in Mexico's revolutionary war. This very interesting hoard of notes is now in the possession of the Mexican Secretary of Exterior Relations (SRE). Duane Douglas wrote a detailed book on the hoard. For a copy of the book see CONTACT INFORMATION.

Duane theorizes that Venustiano Carranza took the chest out of Mexico City when he moved his government to Vera Cruz in 1914. At that point, either Carranza made a deal with the American troops to take the chest to the US on his behalf or they became aware of the chest and took it as war plunder to Washington. Either way it makes for a very interesting story.

The hoard consists of more than sixty thousand bank notes of which the bulk are low grade common notes. However, a number of rare high denomination notes are also included. There are currently no plans to sell any of the hoard and it may be subject to patrimony laws that would preclude its sale. If this hoard were eventually released into the market, we believe it could be easily absorbed and might actually increase the collector base.

INDEX

At the end of the book is an index of the cities, towns, haciendas and entities which issued paper money in Mexico. This index will be helpful when the note does not indicate the State of issue. The index will refer you to the first issue number following the location reference you are searching for.

STATE ABBREVIATIONS

With the exception of Quintana Roo, all of the States of Mexico have issued paper money. Following is a list of the Mexican States followed by the abbreviation used for each state:

Aguascalientes	AGU	San Luis Potosi	SAN
Baja California	BAJ	Sinaloa	SIN
Campeche	CAM	Sonora	SON
Chiapas	CHIP	Tabasco	TAB
Chihuahua	CHI	Tamaulipas	TAM
Coahuila	COA	Tlaxcala	TLA
Colima	COL	Veracruz	VER
Distrito Federal	DF	Yucatan	YUC
Durango	DUR	Zacatecas	ZAC
Guanajuato	GUA		
Guerrero	GUE		
Hidalgo	HID		
Jalisco	JAL		
Mexico, Estado de	MEX		
Michoacan	MIC		
Morelos	MOR		
Nayarit	NAY		
Nuevo Leon	NUE		
Oaxaca	OAX		
Puebla	PUE		
Queretaro	QUE		

IMPERIAL AND EARLY REPUBLIC

STATE OF CAMPECHE - CAM

CAMPECHE

Aduana Maritima de Campeche (Maritime Customs)

A series of 12,000 pesos in five denominations ($5, $10, $25, $50 and $100) of interest –bearing notes issued to raise funds to counter the French invasion. These notes were payable to the bearer and so can be considered paper currency.

DISTRITO FEDERAL

El Imperio Mexicano (The Mexican Empire)

By decree of December 20, 1822, Mexico issued its first paper money in denominations of 1, 2, and 10 pesos on January 1, 1823. Agustin de Iturbide, who was proclaimed Emperor of Mexico on May 18, 1822, and whose short-lived empire ended on March 19, 1823, ordered that the first paper money of Mexico be issued during the difficult economic times after the war for independence. Perhaps the unwillingness by the public to accept these notes contributed to Iturbide's rapid downfall. These are truly historical documents. A great deal of controversy exists in regard to counterfeits. If they exist, they are very difficult to recognize because all are printed on original paper pertaining to the historical period of the First Empire of Mexico.

The majority of these notes have been cancelled by means of a 2-inch long cut at the bottom. Uncancelled notes are much scarcer. All are printed in black ink on thin white paper with printed signatures.

Las Tesorerias de la Nacion (The Treasury of the Nation)

After Iturbide was exiled, the newly formed Republic decreed the issuance of paper money in the same denominations (1, 2 and 10 pesos) drawn on the National Treasury. These notes were printed on the back of Papal Bulls (Lent authorizations) dated 1816, 1817, 1818 and 1819. The notes bear the date of decree, April 11, 1823, and date of issue, May 5, 1823.

BANCOS

STATE OF AGUASCALIENTES

STATE OF AGUASCALIENTES - AGU

Aguascalientes – El Banco de

The Banco de Aguascalientes began operations on August 20, 1902, with a capitalization of 500,000 pesos. In addition to the main office in the City of Aguascalientes, there was a branch in Guadalajara, Jalisco. The portrait of Pedro Jose Garcia Rojas, first governor of the Federal Territory of Aguascalientes (1836), appears on the front of the 5 and 1000 peso notes. All denominations bear a reproduction of the church of San Marcos, in Aguascalientes, on the fronts and the portrait of a gypsy woman in the center of the backs. In 1915, when the federal government demanded full compliance with the Act of 1897 and the Bank realized this could not be done, it voluntarily went out of business. All notes were printed by the American Bank Note Company.

The branch overprint of Guadalajara is known on all denominations below the 500 peso note. All of these normally appear in low grades from Poor to Good except the 20 peso note which is known in higher grades from VG to Fine.

STATE OF CAMPECHE

STATE OF CAMPECHE - CAM

Campeche – El Banco de

This bank was founded on June 18, 1903 with a capital of 500,000 pesos. All notes were printed by the American Bank Note Co. The state coat-of-arms appears on the front of all denominations. Branch offices were opened in Villa de Heselchacan, Ciudad del Carmen, Merida and Laguna de Terminos. When the Reform Act of 1908 came into effect forcing issuing Banks to become loan Banks, the Bank of Campeche voluntarily gave up its right to issue notes and became a loan Bank. The 20 peso note is known with the branch overprint of Merida. The single known issued 50 and 100 peso notes are punch cancelled "Archivo Banco Nacional de Mexico".

Comercial de Chihuahua – El Banco

This bank obtained the concession of the Banco de Santa Eulalia in 1888. It was founded by Ignacio MacManus and his brother Tomas. It operated until 1900 when it was absorbed by El Banco Minero. All notes were printed by the American Bank Note Co., New York. The portrait of Miguel Hidalgo y Costilla appears on the front of all denominations. A branch office was opened in Gomez Palacio. In 1897 the legend on the higher value notes was changed from “En Moneda de Plata Del Cuño Mexicano” to “A La Par, En Efectivo”.

The Gomez Palacio branch overprint is known on 5, 10, 20, 50 and 100 peso notes.

Comercial Refaccionario de Chihuahua – Banco

This bank was founded on May 29, 1902, with a capital of 200,000 pesos. Though Enrique Creel was the person behind the bank, actual government approval was granted to Alberto Terrazas, Eduardo Cuilty and Joaquin Cortazar, all relatives of Creel and all involved in El Banco Minero. It was authorized to issue cashier bonds (Bonos de Caja) up to 1,000,000 pesos. Denominations of 100, 500, and 1000 peso notes were printed by the American Bank Note Company. Only $66,000 pesos of these bonds were issued and subsequently redeemed. Only remainders and specimens are known.

Estado de Chihuahua – El Banco del

Banknotes issued by decree of December 12, 1913, were printed by the American Bank Note Co. Although the bank operated in a rudimentary way throughout the territory controlled by Villa's forces, it never issued these notes. These notes are technically Revolutionary issues. All denominations have the printed signature of the cashier at the center and bear no signature at either side.

Mejicano – El Banco

This bank was founded on March 8, 1878, by Felix Francisco Maceyra, Luis Terrazas, Antonio Asunsolo, Ramon Lujan, Luis Faudoa, and Miguel Salas, with a capital of 77,000 pesos. The Series 1 notes were printed by the National Bank Note Co. The Series 2 notes were printed by the American Bank Note Co. In 1888, the Bank changed the spelling of its name to Banco Mexicano.

The Series 1 notes were reprinted by the American Bank Note Company using the original plates from the National Bank Note Company. The plates were altered to include a reference mark (a number two in a circle) which would identify the notes as the second printing by ABNC. On the 25 centavo note the symbol is at the end of Maceyra's signature. On the 50 centavo note it appears after 'portador'. On the 1 peso note it appears twice above the series letter. In addition, the reprinted 25 centavo notes have larger serial numbers than the first issue. Some of the reprinted 25 centavo notes are seen with no serial number as the last 52,576 were delivered to the bank without numbering.

Minero – El Banco

In 1888, the Banco Minero Chihuahuense changed its name to “El Banco Minero”. Enrique C. Creel and his father-in-law, Luis Terrazas, managed to make this bank the most powerful in northern Mexico. All of the State banks of Chihuahua were forced to close when the Banco Minero began to buy up the paper money issued by the other banks, thus becoming the only bank of issue in the state. All notes were printed by the American Bank Note Co. The issues of the bank are divided into two series. The first from 1888 to 1897 bears the legend “PAGARA A LA VISTA AL PORTADOR EN MONEDA DE PLATA DEL CUNO MEXICANO” (will pay on sight to the bearer in legal tender silver coinage of Mexico). The second, issued from 1898 to 1914, bears the legend, “PAGARA A LA VISTA AL PORTADOR A LA PAR EN EFECTIVO” (will pay on sight to the bearer in cash). The 1 peso denomination bears the early legend throughout both periods. Branch offices were opened outside the state in Gomez Palacio and Hermosillo.

In 1910, El Banco Minero issued the first commemorative banknotes of the world, 5 and 10 peso notes commemorating the centennial of the 1810 Revolution. In 1915, when faced with the difficulty of bringing their metallic reserves up to required standards, the Bank refused to submit accounting materials for review and its charter was canceled.

Notes of the early series (1888-1897) are scarce and generally appear in low grades. The availability of the late series (1898-1914) is much greater in all denominations and they may be obtained in high grades, usually dated 1914. All of them are difficult to obtain in uncirculated condition. In March 1908 the bank’s Chihuahua offices were robbed, probably as an inside job. The bank recalled all $1,000 peso notes and in the following weeks revalidated many of its higher value notes, which explains the multiple overdates.

Minero Chihuahuense – El Banco

The first Banco Minero Chihuahuense was set up by an anti-Terrazas faction in 1878, but though it ordered notes from the American Bank Note Company, dated Chihuahua 1880, it did not issue any. The second Banco Minero Chihuahuense was set up on 31 July 1882 by a group of financiers led by Luis Terrazas and his son-in-law, Enrique C. Creel, together with Pedro Zuloaga and Ynocente Ochoa and used these earlier notes. Just like the Banco de Santa Eulalia and Banco Mexicano this bank also issued locally printed fractional notes in 1884 as a response to the crisis when the public rejected the newly issued nickel coins. On June 1, 1888, a federal charter was issued to this Bank, which changed its name to El Banco Minero.

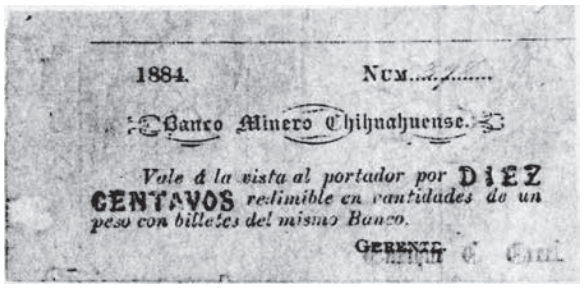

The 1 peso note exists with and without the overprint: “VALE POR PESOS FUERTES A LA PAR”. It is rare with the overprint. Some notes are overprinted Batopilas as the bank had some arrangement with its local *patron* Alexander R. Shepherd.

The Banco Minero issued the following denominations bearing the name "El Banco Minero de Chihuahua". The 50 centavo note was printed by Eduardo I. Aguilar. The 2 peso note was printed by the American Book & Printing Co. The 5 and 10 peso notes were printed by Bouligny & Schmidt. All three of these firms were located in Mexico City.

The Bank of Santa Eulalia was founded on November 25, 1875. Francisco MacManus was the charter president and L.H. Scott was the accountant, both of whom signed bank notes for this institution. The 5 and 10 centavo notes were printed locally. The 25 centavo through 10 peso issues were printed by the American Bank Note Company. When the act of 1884 came into effect requiring a federal charter, the Bank negotiated a new charter which was approved March 15, 1889. At the same time, the Bank of Santa Eulalia changed its name to the Banco Comercial de Chihuahua.

STATE OF COAHUILA

STATE OF COAHUILA – COA

Coahuila – El Banco de

This Bank was founded in Saltillo, Coahuila in 1897, and during its period of operation it had branch offices in Monclova, Ciudad Porfirio Diaz, Torreon, Parras, Matamoros, Cuarto Cienegas, San Pedro, Viesca, and Sierra Mojada. The Series 1 notes were printed by the American Bank Note Co. The Series 2 notes were printed by the American Book & Printing Co. The portraits of Miguel Ramos Arizpe (left) and Victoriano Cepeda (right) appear on the front center on all denominations. In 1915, the charter of this Bank was canceled by the federal government after not being able to comply with the asset requirements to support issued notes.

Comercial & Agricola de Texas – El Banco (Bank of Texas)

On April 30, 1835, the congress of the state of Coahuila and Texas, by Decree Number 308, granted to Samuel May Williams a 20-year charter for the "Banco Comercial y Agricola de Texas". The bank was to open at Columbia, Texas. While notes were printed and other fiscal papers were prepared, the bank never opened and all known notes are remainders. All are dated 18__. Other than the one peso note, complete notes are rare. During the American Civil War, the remainders were cut in half and Louisiana notes of the Confederate States of America were printed on the backs. The original printer was Draper, Longacre & Co. of New York.

Nacional de Texas – El Banco

This bank was established as a bank of issue by Governor Jose Felix Trespalacios in San Antonio Bexar on October 21, 1822. Members of the city council were officers of the bank and all notes were handwritten by four soldiers assigned to the task. The Iturbide government subsequently ordered the bank to cease issuing banknotes and all bank notes were redeemed by the federal government. The very interesting history of this bank is included in the section on Mexican Banking History. The existence of this bank and the fact that it issued bank notes is historically irrefutable. Unfortunately, no remaining notes are known. Since the notes are handwritten and likely crude, they may very well still exist in an historical archive. If you have information about notes from this Bank, please contact the publisher.

Hipotecario Mexicano – El Banco

On March 21, 1882, a bank named El Banco Hipotecario Mexicano was founded by Garay *et al*. It was authorized to make mortgage loans in the Federal District and was restricted to issue only cashier bonds and certificates of deposit. Specimen cashiers bonds were printed by Bradbury Wilkinson. In August 1888 its concession was modified and its name was changed to El Banco Internacional e Hipotecario.

Industrial de Mexico – El Banco

This bank is of obscure historical origin. All notes are dated March 6, 1898 and probably never circulated because denominations smaller than 5 pesos had been forbidden by 1897 legislation. The notes also lack serial numbers and seals. As Richard Long noted in his research, this may have been scrip of a credit union or some other company. It will be left under banks until more information is available.

Internacional e Hipotecario de Mexico - El Banco

This institution was originally authorized in March 1882 under the name of El Banco Hipotecario Mexicano, and the corporation was formed on April 24, 1882, by Eduardo Garay and Francisco de Tavera. It was restricted to the issue of cashier bonds and certificates of deposit. Certificates of deposit for 1000 grams in gold are known to exist. All notes were printed by the American Bank Note Company. The portrait of Miguel Lerdo de Tejada, seven times Secretary of State during five presidential periods, appears on the front of the 1 peso note. An antique frame containing a complete set of front and back uniface proofs of certificates of deposit exists. The frame was originally presented to the executives of the Banco Internacional e Hipotecario de Mexico by the American Bank Note Co., and was found in the basement of the heir's home. It measures approximately 5 feet in height by 3 ½ feet in width.

Londres, Mexico y Sud America – El Banco de

A British firm authorized to issue paper money was chartered on February 15, 1864 in Mexico City. Its original name was “Bank of Mexico, Ltd.”. Since it was to operate in Peru, Columbia, Venezuela, and Chile as well as in Mexico its name was changed 10 days later to “The London Bank of Mexico and South America”. The charter founders were William Newbold and Robert Geddes.

On August 1, 1864, it opened its doors to the public and its activities included discounting of promissory notes, opening of checking accounts, and the issuing of paper money. The original capital was 2,000,000 pounds, of which the equivalent in Mexican currency at that time was 10,000,000 pesos.

By 1865, it had opened 15 agencies throughout the Republic of Mexico in the cities of Acapulco, Aguascalientes, Guadalajara, Mazatlan, Monterrey, Veracruz, Tampico, Guanajuato, Zacatecas, San Luis Potosi, Morelia, Matamoros, Puebla, Colima and Durango, as well as two others - one in the capital of British Columbia and the other in Havana, Cuba.

On February 13, 1865, the bank issued its first paper money. These notes were dated and issued in Mexico City and were signed by C.A. Thurburn, President of the Board of Directors of the London office; William Newbold, President of the bank; and Robert Geddes, Cashier. This first issue was made up of 1,400 notes of the 5 peso denomination. From May through July 1865, 10, 20 and 50 peso notes were issued. In March 1866, 500 peso notes were issued followed by 100 peso notes in June. The 1000 peso denomination was first issued in January 1867.

When the Emperor Maxmilian was killed and the Republic restored, the Bank nearly lost its authorization to operate under the new government. In 1884, when the Code of Commerce was passed, the Bank was threatened by the more rigorous restrictions but was able to stay in business by acquiring the charter of the Commercial Bank (Banco Empleados) by merger in 1886.

The London Bank of Mexico and South America operated as such until July 1, 1889, when it became the Banco de Londres y Mexico, which issued its own paper money until 1914. Five series of paper money were printed for the bank as described below.

p)	BK-DF-19	Proof				3,000.

Londres y Mexico – El Banco de

The London Bank of Mexico and South America obtained the federal concession of the Banco de Empleados on August 20, 1886. In this way, the London Bank of Mexico and South America was able to comply with the new commerce code of April 15, 1884 and, consequently, was able to continue operating by changing its name to El Banco de Londres y Mexico, S.A., which it did on July 1, 1889. The London Bank of Mexico and South America in London was the main stockholder of the new institution. The Series 1 notes were printed by the American Bank Note Co. The Series 2 notes were printed by Bouligny and Schmidt. The Banco de Londres y Mexico survived the crises of the Revolution and the Constitutional reforms and today is part of Banco Serfin, one of the largest Banks in Mexico.

A large number of branch offices were opened throughout the Republic. Branch notes are identified by a hand placed rubber stamp on the front of the note with the name of the branch. These validations usually appear twice on each note, at each side, though some branches only stamped their notes once. Red is the most frequent color, but purple, black, blue and others are also seen. All known branch validations have been listed by denomination. Normal condition for these overstamped notes is G to VG.

Series 2 specimens are known overprinted “Muestra”.

Mercantil Mexicano – El Banco

Banco Mercantil Mexicano was authorized by federal charter on December 3, 1881, and began operations on March 27, 1882. The founding manager was Eduardo L'enfer. Centered in Mexico City, it had branches in Guanajuato, Puebla, Queretaro, San Luis Potosi, and Veracruz. In 1884 it merged with the Banco Nacional de Mexico. All notes were printed by the American Bank Note Company.

Nacional de Mexico – El Banco

The Banco Nacional de Mexico came into being as the result of a merger of the Banco Nacional Mexicano and the Banco Mercantil Mexicano, both of which were banks of issue. The federal concession for the new bank was approved by Congress on May 31, 1884. The bank began operation in June, 1884 and issued its first notes in January 1885. The bank was originally capitalized at 20,000,000 pesos divided into 200,000 shares at 100 pesos each. There were 80,000 of the shares distributed among the shareholders of the merged banks. M. Edouard Noetzlin, representative of the “Junta de Paris”, acquired 15,000 shares.

Concessions were granted to the bank by the government in exchange for an open line of credit. In addition to committing customs duties received at the ports to guarantee payment of the credit line, the government agreed to restrict additional banks of issue in the Federal District and to accept the notes of Banco Nacional in all government transactions. These concessions placed the Banco Nacional de Mexico in an advantageous position relative to all other banks of issue. Banco Nacional survived the problems encountered by other issuing Banks during and after the Revolution, and is the largest Bank in Mexico today known as Banamex.

The Banco Nacional inherited the branch offices of the two banks which merged to form it and opened others in Chihuahua, Durango, Guadalajara, Monterrey, and Oaxaca. By the turn of the century, branch offices had been opened in a majority of the important cities and towns throughout the Republic of Mexico.

All notes were printed by the American Bank Note Company. The portrait of Manuelita Garcia Teruel appears on the front of all these notes. Each denomination shows a different scene on the back. A 100 peso specimen of an entirely different design, bearing, on the front, a reproduction of the Castle of Chapultepec, also printed by the American Bank Note Co., exists in specimen and proof only.

In 1934, the Banco Nacional de Mexico produced a 50th anniversary book dealing with the history of the bank which contained remainder front and back examples of each denomination from 5 through 1000 peso notes. The legend "Billete sin Valor" (Bill without Value) was printed on the front of half of those notes and on the back of the other half. The notes were originally glued to the pages of the book and traces of the glue are always noticeable at the left margin.

Overprints exist from over 50 branch offices throughout the Republic of Mexico. All ranges of availability exist from common to extremely rare. Condition is normally Good to Very Good.

Nacional Mexicano – El Banco

This institution was granted a federal concession on August 16, 1881 and began operations on February 22, 1882, having the main office in Mexico City and branch offices in Guanajuato, Merida, Puebla, San Luis Potosi, and Veracruz. In 1884, it merged with Banco Mercantil Mexicano to form the Banco Nacional de Mexico. All notes were printed by the American Bank Note Company.

Republica Mexicana – El Banco de la

In 1917, President Carranza decreed the creation of this Bank to serve as sole bank of issue for Mexico and in the process do away with all other banks of issue. The Bank never entered full operation, but was a major stepping stone in the reorganization of the banking industry in Mexico and the founding of the Bank of Mexico in 1925. Two distinctly different sets of specimens were produced, none of which were issued.

STATE OF DURANGO

STATE OF DURANGO - DUR

Durango – El Banco de

The Bank of Durango was founded on September 6, 1890 by Carlos Bracho and Juan G. Asunsolo with a capitalization of 500,000 pesos. The Series 1 notes were printed by the American Bank Note Co. The Series 2 notes were printed by Bouligny & Schmidt. All were signed, sealed and issued except the 500 peso. Branch offices were opened in Canatlan, Cd. Lerdo, Gomez Palacio, Guanacevi, Mapimi, Nazas, San Juan de Guadalupe, Santiago, Papasquiaro, and Nombre de Dios. On December 15, 1915 the federal government canceled its charter after the Bank refused to submit accounting records for review to determine compliance with asset requirements.

The 5, 10 and 20 peso notes exist with the overprint of “Gomez Palacio”.

STATE OF GUANJUATO

STATE OF GUANAJUATO - GUA

Guanajuato – El Banco de

The Bank of Guanajuato began to operate on April 25, 1900. The Series 1 notes were printed by the American Bank Note Co., New York. The Series 2 notes were printed in Mexico City by Bouligny & Schmidt, Sucr. On the front of the 5, 500, and 1000 peso notes, the portrait of Manuel Doblado, State Governor, appears. The coat-of-arms of the State of Guanajuato appears on the back of the 1 and 2 peso, and on the front of the 10, 50, 500, and 1000 peso notes. Branch offices were opened in Guanajuato State in Acambaro, Apaseo, Celaya, Irapuato, Chamacuero, Dolores Hidalgo, Jaral del Valle, Leon, Penjamo, Salamanca, Salvatierra, San Jose Iturbide, San Luis de la Paz, San Miguel Allende, Silao, and Valle de Santiago. Another was opened in Guadalajara, Jalisco, and two more in Moroleon and Zamora in the State of Michoacan. After the Bank had its charter canceled by the federal government on December 15, 1915, it was rechartered as a non-issuing Bank and continued operations into the 1920's.

Branch overprints of Irapuato are known on 5, 10 and 20 peso notes.

STATE OF GUERRERO

STATE OF GUERRERO - GUE

Guerrero – El Banco de Iguala

This bank was granted a federal concession on September 30, 1903. The corporation was formed on June 14, 1905 with 500,000 pesos of capital. All notes were printed by the American Bank Note Company. All denominations are known as signed and issued notes except for the 500 peso note. The portrait of Vicente Guerrero Saldana, well known figure of the War of Independence and third president of the Republic, appears on the front of the 10 and 50 peso issues of the Bank of Guerrero. The Cathedral of Taxco is depicted on the front of the 100 peso note. A panoramic scene of the port of Acapulco appears on the back of all notes. Branch offices were opened in Acapulco and Bravos (Chilpancingo). The charter of this institution was canceled on December 15, 1915, and the Bank wound up its affairs shortly thereafter.

The 5, 10, and 20 peso notes are common as remainders in Unc needle punched “AMORTIZADO” which means cancelled. The 50 peso remainder is less frequent than the lower denominations, but is also available in Unc. The 100 peso remainder is scarce in Unc condition.

STATE OF HIDALGO

STATE OF HIDALGO - HID

Hidalgo – El Banco de Pachuca

The Bank of Hidalgo was founded on November 1, 1902 and was capitalized at 500,000 pesos. All notes were printed by the American Bank Note Company, New York. The back of the 1 peso note and front of the 500 peso note bear the portrait of Miguel Hidalgo y Costilla. The portrait of Juan C. Doria, Governor of the State of Hidalgo during the French Intervention appears on the front of the 10 and 100 peso notes. The image of Pedro Romero de Terreros, a wealthy Spanish nobleman who founded the Nacional Monte de Piedad, appears on the front of the 50 peso note. A monument to Miguel Hidalgo y Costilla in Pachuca is depicted on the front of the 5, 20, and 100 peso notes. A panoramic scene of the City of Pachuca appears on the back of all denominations except the 1 peso note. Branch offices were opened in Actopan, Apam, Apulco, Atotonilco el Grande, Atotonilco el Chico, Cuautepec, El Cardonal, Huejutla, Huichapan, Ixmiquilpan, Jacala, Metepec, Mixquihuala, Molanzo, Omitlan, Real del Monte, San Miguel Regla, Singuilucan, Tepeji del Rio, Tezontepec, Tula, Tianguistengo, Tizayuca, Tlaxcoapan, Tulancingo, Velazco, Zacualtipan, and Zimapan. On November 16, 1915, the Bank had is charter canceled by the Regulatory Commission for inadequate assets on hand.

A small number of notes bearing a back overprint of Tulancingo are known in low grade. No other branch office overprint has been recorded. All denominations exist as remainders needle punched AMORTIZADO except the 100 peso note. The 1 to 20 peso remainders are all common in Unc. The 50 peso remainder is somewhat scarce in this grade. The 20 peso cancelled note is also known with either two or three signatures.

STATE OF JALISCO

STATE OF JALISCO – JAL

Jalisco – El Banco de

The Bank of Jalisco was founded by federal government concession in July 1898 and began operations in March 1897 with an initial capital of 6,000,000 pesos. From 1898 to 1900 Bradbury Wilkinson & Co. printed the Series 1 notes. From 1902 to 1914 the American Bank Note Co. printed the Series 2 notes which include two distinct types of the 100 peso note. The backs of all the notes printed by ABNC bear a panoramic scene of the city of Guadalajara. The coat-of-arms of the State of Jalisco appears on the front of both notes. Branch offices were opened in Autlan, Encarnacion, Lagos, Mascota, San Gabriel, Sayula, Teocuitatlan, Tepatitlan, and Zapotlan (present-day Ciudad Guzman). In Michoacan, a branch office was opened in Zamora. Another was opened in Colima, Colima and another in Tepic, Nayarit. On December 15, 1915, the charter of this Bank was canceled after not being able to demonstrate adequate resources as required by the government.

The Bradbury Wilkinson & Co. 50 centavo and 1 peso notes were printed in 1898 but were not used until 1914. Overprints of Tepic and Colima are known on the Series 1 five and ten peso notes. The 5 peso notes of Series 2 exist with branch office overprints of Tepic, Zamora and Zapotlan. The 10 peso notes of Series 2 exist with the Tepic and Zamora branch overprints.

STATE OF MEXICO

STATE OF MEXICO – MEX

Estado de Mexico – El Banco del — Toluca

The Bank of the State of Mexico was formed as a corporation in July 1897 with capital of 1,500,000 pesos. The Series 1 note is known as a pattern only and was printed by Perkins, Bacon & Company London. The American Bank Note Company, New York, printed Series 2 which bear the national coat-of-arms on the front. The 1 and 2 peso denominations listed as Series 3 were printed by the American Book and Printing Co., Mex. D. F., in 1914.

Branch offices were opened in Amecameca, Coatepec, Cuautitlan, Chalco, El Oro, Ixtlahuaca, Jilotepec, La Teneria, Lerma, Otumba, Sultepec, Temascaltepec, Tenancingo, Tenango, Texcoco, Tultitlan, Zacualpan, and Zumpango. In the State of Michoacan, branch offices were opened in Acambaro, Morelia, Patzcuaro, and Uruapan. The Bank was found to be in compliance with the asset requirements of the government in 1915, and continued operations for a short while longer.

The only branch overprint known is that of Morelia on 5, 10, 20 and 50 peso notes. Normal condition for these overprints is Fr to G. Remainders of all Series 1 denominations are known but are very rare. The Series 2 notes are known as specimens overprinted “Muestra”.

STATE OF MICHOACAN

STATE OF MICHOACAN - MIC

Michoacan – El Banco de Morelia

This bank obtained a federal concession to operate in May 1902 with an initial capital of 500,000 pesos. It became a development bank on March 1, 1909, relinquishing the right to issue paper money. The American Bank Note Company printed all of the notes. Branch offices were opened in Apatzingan, Ario, Cotija, Cuitzeo, Huetamo, La Huacana, La Piedad, Maravatio, Moroleon, Panindicuaro, Patzcuaro, Puruandiro, Tacambaro, Uruapan, Zamora, Zitacuaro, and Zinapecuaro. In the State of Guanajuato, a branch office was opened in Guanajuato.

The 5 peso note is known with branch office overprints of Moroleon, Puruandiro, and Acambaro. The 10 peso note is known with overprints of Cotija, Moroleon, and Puruandiro. Most are low grade.

STATE OF MORELOS

STATE OF MORELOS – MOR

Morelos – El Banco de

The Bank of Morelos was founded on March 25, 1903, and was capitalized at 1,000,000 pesos. The main office was in Cuernavaca and there were branch offices in Cuautla, Morelos and Acapulco and Iguala, Guerrero. The American Bank Note Company printed all of the notes except a one peso note printed by Eduardo I. Aguilar in 1914. In December of 1915, the Bank had its charter canceled after not presenting accounting materials to the Regulatory Commission which was investigating Bank assets.

In general, it is very difficult to obtain notes from this bank in high grades. The only overprint known on notes of the Bank of Morelos is that of Acapulco on 5, 10, and 20 peso denominations. An issued 500 peso is known in the SRE hoard.

STATE OF NUEVO LEON

STATE OF NUEVO LEON – NUE

Mercantil de Monterrey – El Banco

The Banco Mercantil de Monterrey was founded on June 27, 1899 and was capitalized at 2,500,000 pesos. All notes were printed by the American Bank Note Company. All denominations bear, on the front, the portrait of General Mariano Escobedo, chief commander of the Army of the North, to whom Maximilian surrendered at Queretaro on May 15, 1867, and who later became governor of the States of San Luis Potosi and Nuevo Leon. General Escobedo was the only male personage who lived to see his portrait printed on bank notes. A panoramic scene of the City of Monterrey appears on the back of all denominations. Branch offices were opened in Cadereyta, Lampazos, Linares, Monte Morelos, and Villa Dama in Nuevo Leon, Allende, Cuatro Cienegas, Piedras Negras, Monclova, Parras, Saltillo, San Pedro, and Torreon in the State of Coahuila, as well as Nuevo Laredo and Ciudad Victoria in Tamaulipas, and Gomez Palacio in the State of Durango. Surviving the inquiries of the Regulatory Commission in 1915, the Bank had its charter canceled by the government on March 8, 1916. The Bank was later reorganized as a development Bank under the Law of 1924.

The denominations of the early series dated August 15, 1900 bear the legend: "Pagara a la Vista al Portador en Moneda de Plata del Cuno Mexicano" (Will Pay on Sight to the Bearer in Legal Tender Silver Coinage of Mexico). The late series, dated 1906-1911, bears the legend, "Pagara a la Vista al Portador en Moneda Corriente del Cuno Mexicano" (Will Pay on Sight to the Bearer in Cash Coinage of Mexico).

The only known overprint is Linares on an early series 10 peso.

Nuevo Leon – El Banco de Monterrey

(Spelled Monterey on all notes)

The Bank of Nuevo Leon was chartered by federal concession in December 1891. It was founded by General Francisco Olivares and Manuel Peniche with a capital of 600,000 pesos. The most important shareholders were Evaristo Madero, relative of Francisco I. Madero, Marcelino Garza, General Geronimo Trevino, Romulo Larralde and Viviano L. Villarreal. All banknotes were printed by the American Bank Note Company except the 50 centavo pattern produced by Eduard C. Jones, Co. and Hallgarten & Co. All notes bear on the front the portrait of General Ignacio Zaragoza and, except for the 50 centavo note, they bear the coat-of-arms of the State of Nuevo Leon on the back. Branch offices were opened in Allende, Aramberri, Bustamante, Cadereyta, Jimenez, Linares, Lampazos, Montemorelos, Salinas Hidalgo, Salinas Victoria, Teran and Villaldama. Although the Bank was found not in full compliance with the Act of 1897 by the Regulating Commission in 1915, it was allowed to continue operations. Its charter was canceled on December 14, 1916 and the Bank was reorganized as Bank of deposit and discount.

Other than the 50 centavo and 1 peso notes, all notes are known unsigned and cancelled. The 5 peso note with the branch overprint Allende and the 10 peso note with the overprint Torreon are very rare.

Patricio Milmo – El Banco de Monterrey

This was a private bank established by Patricio Milmo, born Patrick Mullins Dowd of Irish origin. Milmo arrived in Mexico in 1845 and married the daughter of Santiago Vidaurri, a very wealthy hacienda owner. He eventually became one of the most powerful and wealthy landowners and businessmen of northern Mexico. He founded his own private bank in Monterrey, Nuevo Leon during the latter part of the 19th century. No issued notes are known. These notes were printed in denominations of 5, 10, 20, 50, and 100 peso notes by the Kendall Bank Note Company, New York. They are all unsigned and undated bearing only the first two digits: 18xx.

STATE OF OAXACA

STATE OF OAXACA – OAX

Oaxaca – El Banco de

The Bank of Oaxaca was founded on June 15, 1902, and was capitalized at 500,000 pesos. It merged with the Banco Oriental de Mexico on June 2, 1909. The American Bank Note Company printed all denominations. All bear the illustration of an indigenous woman (Tehuana) in typical costume on the back of the notes. A monument to Benito Juarez appears on the front of the 5, 50, and 100 pesos. Branch offices were opened in Istmo, Ocotlan, Puerto Angel, Salina Cruz, Tehuantepec, and Tuxtepec. A single 20 peso bears the branch overprint of Istmo.

Oriental de Mexico – El Banco

Leopoldo Gavita, Ignacio Rivero, Agustin Mora, S. Letona, Ignacio Morales y Benitez, and the Lyon brothers founded the Banco Oriental de Mexico which was granted a federal authorization on September 19, 1899, and opened its doors to the public on January 17, 1900. The original capital was 3,000,000 pesos which was increased to 6,000,000 pesos in 1905. On June 2, 1909, it absorbed the Bank of Chiapas and the Bank of Oaxaca. The American Bank Note Company printed the Series 1 notes. The American Book and Printing Co., Mex. D.F. printed the Series 2 notes. The portrait of Esteban de Antunano, who is famous for having modernized the textile industry in Puebla, appears on all Series 1 notes. Branch offices were opened in Acatlan, Atlixco, Chiautla de Tapia, Mier, San Andres, Chalchicomula, Santa Ana, San Martin Texmelucan, Tehuacan, Tecamachalco, Teziutlan, and Tlatlanqui, all in the State of Puebla. In the State of Oaxaca, branch offices were opened in Huajuapan, Juchitan, Oaxaca, and Tehuantepec. The charter of this bank was canceled by the government in December 1915 after the bank was unable to meet the minimum asset requirements.

STATE OF QUERETARO

STATE OF QUERETARO – QUE

Queretaro – El Banco de

The Bank of Queretaro was founded on February 24, 1903, with a capitalization of 1,000,000 pesos. The American Bank Note Company printed the Series 1 notes. The American Book & Printing, Co. printed the Series 2 notes. Branch offices were opened at Huimilpan, San Juan del Rio, Colon, Toliman, and Tequisquiapan in the State of Queretaro. A number of branch offices were also opened in the State of Guanajuato at Dolores Hidalgo, San Miguel Allende, Penjamo, San Jose de Iturbide, Irapuato, Leon, Apaseo, Valle de Santiago, Acambaro, and Celaya. In the State of Michoacan, an office was opened at La Piedad. The 10 peso note bears, on the front, the portrait of Guadalupe Obregon. The 20 and 500 peso notes bear on the front the portrait of Juan Antonio de Urrutia y Arana. The 50 and 1000 peso notes bear on the front the portrait of Josefa Ortiz de Dominguez (La Corregidora). All denominations, except for the 20 and 500 peso notes, bear the State coat-of-arms on the front. All denominations except the 1 and 2 pesos bear, on the back, a reproduction of the famous aqueduct of the City of Queretaro. Like so many other issuing Banks, Queretaro had its charter canceled in December of 1915 for inadequate metallic reserves.

The 5, 10, 20, 50, 100, and 500 peso notes are known with the Irapuato branch office overprint and all appear in low grades (Pr to G).

STATE OF SAN LUIS POTOSI

STATE OF SAN LUIS POTOSI – SAN

San Luis Potosi – El Banco de

The Bank of San Luis Potosi was founded in 1897 by the Madero brothers and the Meade brothers with capital of 1,000,000 pesos. The American Bank Note Company printed the Series 1 notes. Series 2 was printed by the American Book and Printing Company. The portrait of General Mariano Arista, President of Mexico from 1851 to 1853, appears on the front of the 5 and 1000 peso notes. All denominations bear the coat-of-arms of the State of San Luis Potosi on the front. The National coat-of-arms appears on the back of all denominations. Branch offices were opened in Cedral, Cerritos, Matehuala, Rio Verde and Santa Maria del Rio. In the State of Guanajuato, branch offices were opened in Celaya and Leon. The charter of the Bank was canceled in 1915 when it could not prove adequate resources to the federal Regulatory Commission.

Branch overprints of Celaya exist on denominations of 5, 10, 20 and 50 peso notes. The Leon branch overprint is known on denominations from 5 to 100 peso notes. Normal condition of these overprints is Poor to Good.

Occidental de Mexico – El Banco

The Banco Occidental de Mexico was chartered on January 29, 1898 with an initial capitalization of 500,000 pesos. Branch offices were opened in Altat, Bebelema, Culiacan, Cosala, Rosario, San Ignacio, Quila and Mororito. Others were opened in Colima, Colima, and in Hermosillo and Guaymas in the State of Sonora. All notes were printed by the American Bank Note Company, New York. The portrait of an unidentified young lady appears on the front of all denominations. The back bears a panoramic scene of the port of Mazatlan. While the Bank survived the inquiry of the Regulating Commission in 1915, its charter was canceled by the government on December 14, 1916. It was reorganized as a lending bank under the laws of 1925 and 1926.

Overprints are known from Colima, Culiacan and Guaymas and they normally appear in low grades.

San Ignatio (Ignacio) – El Banco de

This was supposedly the first bank of the State of Sinaloa. However, it has not been possible to confirm this fact. S.C. Toof & Co. Lith., Memphis, Tenn printed notes in denominations of 2 reales, 1 and 5 peso notes. Note the simultaneous use of the Real system and the decimal system. "Ignacio" is spelled with a "C" on the 2 real note and with a "T" on the other denominations.

STATE OF SONORA

STATE OF SONORA - SON

Sonora – El Banco de

This bank was authorized in September 1897, and began operations in January, 1898. It was capitalized at 500,000 pesos. Its founders were Prospero Sandoval, Luis A. Martinez, Baudelio Salazar, and Ramon Corral. Branch offices were opened in Alamos, Agua Prieta, Altar, Ascencion, Cananea, Guaymas, Naco, Nogales, Quito, Vaguita, and Ures in the State of Sonora. Branch offices were also opened in Chihuahua, Chihuahua and in Culiacan, Sinaloa. The American Bank Note Company printed all denominations. The portrait of Hortensia Corral Velez, the daughter of Ramon Corral, appears on the front of all notes. Ramon Corral was the main stockholder of the bank, a state governor and later Vice President of the nation. On December 14, 1916, the Bank had its charter canceled by the federal government and it reorganized as a development Bank.

All denominations issued in 1898 and 1899 exist with no underprint on the back, called “white backs”. All later dates bear a grey grill design in the overprint on the back. The early type (1898-1899) is rare in all denominations. The only branch overprint known is that of Chihuahua on 5 and 10 peso notes. All denominations of this series exist as remainders which are available in Unc condition and are very common.

STATE OF TABASCO

STATE OF TABASCO – TAB

Tabasco – El Banco de

The Bank of Tabasco was founded on September 29, 1900, and began operations on January 1, 1901 with an initial capital of 1,000,000 pesos. Branch offices were opened in Chiapas, Frontera, Cunduacan, Comalcalco, Humanguillo, Macuspanan, Pichucalco, and Tlapa. All denominations were printed by the American Bank Note Co. The 5 peso note bears the image of Malintzin (La Marina) and the State coat-of-arms on the front. The front of the 10 peso notes shows the State Government Palace located in the present-day state capital, Villahermosa. The back of all denominations bears a panoramic dock scene of the city of Villahermosa on the Grijalva River. The federal government canceled the charter of the Bank on December 14, 1916, even after it had survived the Regulatory Commission review of the year before.

The Pichucalco branch overprint is found on 5 and 10 peso notes. The Laguna branch overprint and needle punch perforation has also been found on the 5 and 10 peso denominations.

STATE OF TAMAULIPAS

STATE OF TAMAULIPAS - TAM

Tamaulipas – El Banco de

This bank was founded on March 26, 1902, and opened to the public on October 15, 1902. In 1910 the capital was 2,500,000 pesos, and bank notes in circulation amounted to 963,695 pesos. The American Book & Printing Co., Mexico, D.F. printed the 1 peso note. The American Bank Note Company, New York, printed all of the other notes. The front of the 5 peso note bears the portrait of Guadalupe Obregon, who also appears on the 10 peso note of the Banco de Queretaro. The front of the 500 peso note bears the portrait of General Juan Jose de la Garza, Governor of the State of Tamaulipas. The back of all denominations shows the State coat-of-arms. Branch offices were opened in Cd. Victoria, Cd. Guerrero, Matamoros, Nuevo Laredo, Reynosa, and Tula de Tamaulipas. The Bank had its federal charter canceled on December 15, 1915, after not meeting asset requirements for issuing Banks, and converted to a development Bank.

All denominations except the 1 peso notes exist as unsigned and unissued bank remainders. The 5 through 100 peso remainders are common in Unc. The 500 peso remainder is very scarce. The 1000 peso remainder is rare.

STATE OF VERACRUZ

STATE OF VERACRUZ - VER

Mercantil de Veracruz – El Banco

Founded on October 18, 1897, the Banco Mercantil de Veracruz opened its doors to the public on March 15, 1898, with a capital of 1,000,000 pesos.. The American Bank Note Company printed all of its notes. There are two types of the 10 peso denomination. The front of the second type bears the portrait of Miguel Lerdo de Tejada, who was seven times Secretary of State during five presidential periods. The back of all denominations bears a panoramic scene of the harbor of Veracruz. Branch offices were opened in Coatepec, Cordoba, Coatzacoalcos, Cosamaloapan, Huatusco, Jalapa (Xalapa), Minatitlan, Misantla, Orizaba, Papantla, San Andres Tuxtla, Tantoyuca, Tlacotlalpam, and Tuxpam, all in the State of Veracruz. The charter of the Bank was canceled when President Carranza arbitrarily canceled all Bank charters, although the Bank continued to be active into the late 1920's.

The only branch overprints known are Orizaba, San Andres Tuxtla, and Xalapa.

STATE OF YUCATAN

STATE OF YUCATAN - YUC

Mercantil de Yucatan – El Banco

This bank was founded in 1889, the same year as the Banco Yucateco. It had an original capital of 600,000 pesos. In 1905 it merged with the Banco Yucateco to form the Banco Peninsular Mexicano. The Homer Lee Bank Note Co. printed the Series 1 notes. Miguel Hidalgo appears on the front of the 100 pesos. Series 2 was printed by the American Bank Note Company.

The Homer Lee Series, other than the 1, 10, 50 and 100 peso notes, are known only as front and back proofs, though the word "specimen" was handwritten on the front of each denomination. The ABNC 10 peso note is unknown without the needle punch cancellation "CANCELADO".

After Banco Mercantil de Yucatan merged with Banco Yucateco and formed the new bank Banco Peninsular Mexicano, the new bank continued to use some of the old notes after overprinting them. They are the 100 peso note of Series 1 and the 50 and 100 peso notes of Series 2. These notes appear under Banco Peninsular Mexicano

Peninsular Mexicano – El Banco

This bank was created by the merger of El Banco Yucateco and El Banco Mercantil de Yucatan in 1905. Initial capital was 16,500,000 pesos. In Series 2 the issued one peso note was printed by the American Book and Printing Co. Interestingly, the proof of the same note was printed by the American Bank Note Company. The American Bank Note Company printed the 5 peso note. The bank ceased operation after its charter was canceled by the federal government in December of 1915.

After the merger and formation of El Banco Peninsular Mexicano, the new bank continued to use some of the old notes after overprinting them. These notes are issues of Banco Peninsular and are listed as Series 1 below. The 5, 10 and 20 peso notes are found with a needle punch perforation of “Campeche”, with or without the rubber stamp overprint, “Sucursal de Campeche”. The 5 and 10 peso notes can also be found with the needle punch perforation, “Laguna” and the rubber stamp overprint, “Sucursal en Carmen, Camp.”.

Yucateco – El Banco

The Banco Yucateco was founded in Merida by the wealthiest families of Yucatan on September 7, 1889. It opened to the public on February 1, 1890, with a capital of 350,000 pesos. By 1903 capital had reached 8,000,000 pesos. In 1905 the Banco Yucateco merged with the Banco Mercantil de Yucatan to form the Banco Peninsular Mexicano. The American Bank Note Co. printed all of the bank notes.

The 5, 10 and 20 peso notes exist with the needle punch perforation “Campeche”, and with or without the rubber stamp overprint, “Sucursal de Campeche”.

After Banco Mercantil de Yucatan merged with Banco Yucateco and formed the new bank Banco Peninsular Mexicano, the new bank continued to use some of the old notes after overprinting them. They are the 5, 10 and 20 peso notes of this series. These notes appear under Banco Peninsular Mexicano.

STATE OF ZACATECAS

STATE OF ZACATECAS - ZAC

Zacatecas – El Banco de Zacatecas

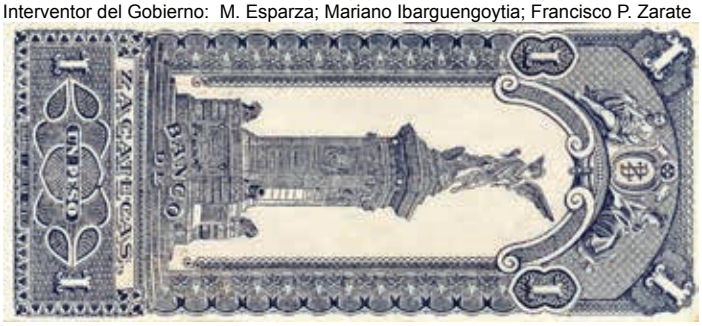

The Bank of Zacatecas was founded by Rafael Villalpando, Genaro Garcia, Jesus A. Garcia and Antonio Garcia, on May 25, 1891, capitalized at 600,000 pesos. Branch offices were opened in Aguascalientes, Aguascalientes; Lagos, Jalisco; Leon, Guanajuato; and Chalchihuites, Fresnillo, Jerez, Mazapil, and Sombrerete in the State of Zacatecas. The 1 peso note proof was printed by Eduardo I. Aguilar, Mexico. All others were printed by the American Bank Note Co. The portrait of Francisco Garcia Salinas, State Governor (1828-1834), appears on the front of all denominations. The Bank was able to meet the asset requirements for issuing Banks in 1915 only to have its charter canceled in the general revocation of Bank charters by Carranza in 1916. An attempt was made to reorganize as a development Bank under the law of 1926, but this was not successful.

Unsigned and undated remainders are known in all denominations except the 1 and 20 peso notes. The 5 peso remainder is common in Unc. The 10 peso remainder is fairly common and is also obtainable in Unc. The 50 peso remainder is very scarce but available in high grade. The 100 peso remainder is scarce but also appears in Unc. The 500 peso remainder is very rare in high grade. The only branch office overprints known are Aguascalientes on the 5 and 10 peso notes and Lagos on the 5, 10, and 50 peso notes.

BANK OF LOWER CALIFORNIA - MAG

MAGDALENA

This issue dates from the time when Americans were interested in pursuing recent mineral discoveries in Baja California and Mexico was eager to encourage settlement by granting floating colonial grants of vast tracks of land to companies willing to promote settlement in the region. The Lower California Company was formed to take over a land grant contract originally negotiated in 1864 by Jacob P. Leese and incorporated by the State of New York in May 1867. The company operated for a few years but had its grant rescinded by the Mexican Government in July 1871, for failure to attract sufficient settlers to the region. The company ignored the order to suspend colonization and evacuate, whereupon the Mexican government sent troops to enforce its decree. There occurred a military confrontation between the company's local staff and the Mexican troops, which resulted in the colony being forcibly closed down. Drake Dekay, the signatory, had by this time become U.S. Consul at Magdalena and he sought to obtain official American intervention "to protect American lives and property.".

STATE OF CHIAPAS - CHIP

TUXTLA GUTIERREZ

Republica Mexicana – Tesoreria y Direccion General de Rentas

On July 24, 1866 the military governor of Chiapas, Col. Jose Pantaleon Dominguez ordered the issue of $16,000 in provisional currency, consisting of 8,000 50c (Series A), 4,000 $1 (Series B), 1,000 $3 (Series C), 500 $6 (Series D) and 300 $10 (Series E). These were in reality a forced loan on the wealthiest inhabitants to raise funds for the fight against Maximilian.

DISTRITO FEDERAL - DF

Nacional Monte de Piedad (National Pawn Shop)

Pedro Romero de Terreros arrived in New Spain in 1732. Wealthy but philanthropic, after many business successes he founded the Nacional Monte de Piedad on February 25, 1775, by royal decree of King Charles III dated June 2, 1774. The first building occupied by this institution was located on San Ildefonso Street and it subsequently was moved to the location it presently occupies at the northwest corner of the central plaza of Mexico City, which before the time of the conquest was the ancient Palace of Axayacatl, later occupied by the Aztec Emperor Moctezuma. The Nacional Monte de Piedad grew in scope and by 1849 a banking department of deposits and savings had been opened paying an annual interest rate of 5% on savings. Later, it began to operate on an international scale placing money in accounts in European banking institutions.

On September 6, 1879, the Nacional Monte de Piedad was authorized to issue Certificados Confidenciales de Deposito (Confidential Certificates of Deposit) which were receipts used in commercial transactions and were made out to the bearer. In 1881 the "Monte" was granted the right to issue certificates as bills of voluntary circulation in the amount of 9,000,000 pesos. The portrait of Pedro Romero de Terreros appears on the face of all denominations and the historic building which still lodges the main offices of the institution appears on the back.

By 1882 difficult economic times and bad financial policies of the board of directors put the bank in a dangerous financial position. By 1884 the economic depression in Mexico became a crisis and the "Monte" could not redeem all notes presented for collection. The newly formed Banco Nacional de Mexico took over the payment of 80% of the face value of these notes while the federal government agreed to accept the other 20% in payment of taxes. The Nacional Monte de Piedad never again issued paper money.

All notes were printed by the American Bank Note Co. Notes were issued in denominations of 1, 5, 10, 20, 50, 100, 500 and 1000 pesos. All known notes are remainders with the exception of the 1 and 5 peso notes. The 1 and 5 peso issued notes are almost unknown in high grades. All notes are available as remainders in uncirculated condition and are known with and without counterfoils.

STATE OF GUANAJUATO - GUA

GUANAJUATO

Casa de Stallforth, Alcazar y Cia

This company had been formed in 1876 by Ramón Alcázar, from a prominent local family, and the German Guillermo Stallforth, who had come from Bremen, and its principle activity, in the beginning, had been mining machinery, though later it branched out as commission merchants and bankers. Ther notes were printed by the Kendall Bank Note Company of New York and issued notes are known with a date of 28 December 1883.

The original date, December 28, 1883, is stamped on the back. These small paper notes bear the overprint, “Pagadero en Plata” (Payable in silver), and are hand-signed. During the Revolution unissued notes of this series were used by the State Treasury by blocking out the name of the firm and adding the name of the State Treasury (see M1655-M1660).

TOPOLOBAMPO

Credit Foncier Company

These notes were issued by a colony started in Topolobampo in 1886 by Albert Owen. The colony was formed on a communal basis and issued stock and notes to its members in return for labor. The colony envisioned a grand city, to be called Pacific City, at the Topolobampo end of a new railroad between Texas and Topolobampo. It failed in 1893.

Gobierno Constitucionalista – Territorio de la Baja Cfa (Constitutionalist Government, Territory of Lower California)

In order to pay his troops and facilitate commerce on August 21, 1914 the new Constitutionalist Jefe Politíco of southern Baja California, Miguel Cornejo, acting on an authorization that he had received on April 30 from General Alvaro Obregón, as chief of the Ejército del Noroeste, authorized an issue of three denominations (five, ten and twenty pesos). These bore the signature of either Miguel L. Cornejo or of Ignacio L. Cornejo.

These were declared invalid by the Carrancista General Felix Ortega on February 9, 1915 (decree no. 1 at La Paz)

Tesoreria General del Estado (General State Treasury)

All notes were printed by the State Print Shop of Chihuahua. Despite the fact that this series of notes bears the title of the General Treasury of the State, we consider them to be military issues because they also bear the name of General Francisco Villa, and the main reason for their creation was to pay Villa's troops. This is the popular series commonly referred to as "Villa's Bed Sheets" (Sabanas de Villa). Multiple O/Ps exist on faces and backs of denominations from 5 through 100 pesos. Most of these O/Ps are either state, political or military and were used to give official authorization for these notes to legally circulate within the area indicated by the O/P. These notes were massively counterfeited, which explains certain varieties, such as the metal rather than rubber Treasury seal on the back of 5 and 10 peso notes or the two lines in the peso sign on 5 peso notes. It might also explain others, such as the lack of an "x" in the upper left hand corner of 10 peso notes.

____	43.	Pagaduria General, Brigada M. Chao.
____	50.	Enigmatic tiny "Spider Web" stamp. Provenance unknown.

Some of the O/Ps are followed by additional handwritten signatures. Up to five different O/Ps have been found on a single note. Combinations of the O/Ps listed may be found. The normal handstamped seal of the "Estado Libre y Soberano de Chihuahua Tesoreria General" appears on all notes of this series from 50 centavos through 100 pesos and should not be considered as an O/P. Any exception to this should be classified as an error.

NOTE: Various type sizes were used for the printing of Serie letters, abbreviations, and serial numbers. These sizes are frequently seen "mixed" with small type to the left and large type to the right The abbreviation "No." is occasionally known in italic font.
Type 1. Abbreviation "NUM." at upper right followed by single serial number.
Type 2. Abbreviation "NUM." at upper right with serial numbers left and right.
Type 3. Abbreviation "No." at left, "Num." at right with serial numbers after each.
Type 4. Abbreviation "No." at left, "No." at right with serial numbers after each.
Type 5. Abbreviation "No." at upper right followed by single serial number.

El Estado de Chihuahua (The State of Chihuahua)

This series is an authentic revolutionary issue and is commonly referred to in Spanish as the "Dos Caritas" series (two little faces or two portraits). As in the case of Villa's "bedsheets", despite the fact that these notes bear the name of the State of Chihuahua, they are true revolutionary issues because they were issued by military decree as specified by the face legend "Conforme al Decreto Militar de Fecha 10 de Febrero de 1914".

The face bears two portraits, Francisco I. Madero at left and the assassinated Chihuahua Governor Abraham Gonzalez at right.

The 10, 20, and 50 peso denominations are known with two handwritten signatures. The center signature is printed in these cases. All denominations exist with all three printed signatures, except the 50 pesos which always has two handwritten signatures and one printed signature.

In general all denominations are common; however, the 50 peso note is the least common followed by the 5 peso denomination. Strangely enough, the most common is the 20 peso note.

A large variety of validations exist in this series on denominations of 5, 10, 20, and 50 pesos. The 50 peso notes with a validation are quite scarce. Normally, only one validation appears on each note; however, a few are known with two. As in the case of Villa's "bedsheets", these validations were applied in order to authorize the free circulation of these notes within a given area or state and frequently indicated in the validation itself who the new issuing authorities were.

The early issues of this series bear circular seals on the face or back. The earliest notes were also validated with a scalloped seal of the Ejercito Constitucionalists de Mexico (ECdM) and control letters.

Circular
Treasury Seal

ECDM
Treasury Seal

Scalloped
Treasury Seal

The later issues of this series bear the Treasury Seal as well as control letters on the back of all denominations.

Many, though not all, of the late issues bear a date at the center of the back. This date will usually appear in the same color ink as the seal and control letters, and though they seem to be typewritten at first glance, they were really printed together with the seal and control letters in a type very similar to that of a typewriter. Known dates are quite numerous and appear on all denominations of the late series, though not on all notes of each denomination. The back seal normally appears at the left, the date at the center, and the control letters at the right of each note. The control letters are normally found in a horizontal position, though once in a while, they may be seen in a vertical position.Legends in known Validation Seals:

Ejercito Constitucionalista de Mexico (Constitutionalist Army of Mexico)

This series of notes was issued by the Constitutionalist Army in Chihuahua by decree of February 12, 1914 with the date of issue March 30, 1914. These notes have a variety of controls based on letters and Roman or Arabic numerals; for example, the 1 peso note was issued in three sequences with controls based on Benito Juarez's maxim EL RESPETO AL DERECHO AJENO ES LA PAZ. These notes are also found with validations which are listed below.

STATE OF COAHUILA - COA

MILITARY ISSUES – Coahuila

MONCLOVA

Gobierno Constitucionalista de Mexico (Constitutionalist Government of Mexico)

DECREE OF APRIL 26, 1913

This was the first issue of paper money issued by revolutionary forces and, consequently, the first military issue of the revolution. These notes were issued by General Venustiano Carranza's forces when they were fighting against those of President Victoriano Huerta. The early issue of the 20 peso note of this series bears an error where the word "VEINTE" is misspelled, "VIENTE". The late issue bears the correct spelling. Other catalogs have listed the late series as a counterfeit. The authors believe that both types are genuine. The early issues of the 5, 10 and 20 peso notes, aside from having lower serial numbers than the late series, bear a much lower quality engraving. The logical improvement in engraving came with the later series. The denomination in letters, which appears on the back of the 5, 10, and 20 peso notes is much larger on the late series than on the early series. It would be illogical to suppose that a counterfeiter would make such a radical change in design on all denominations. The terms, "small letters" and "large letters" used in cataloging this series refers to the size of the letters used in the back denomination. All denominations of the late series are available in high grades, however, the early series is very scarce in high grades. The late series 1 through 50 pesos may be obtained in Crisp Uncirculated condition. Normal condition for the 100 pesos is VG to F, however, both may be had in EF and are difficult in CU. Handwritten and printed signatures appear on the 50 and 100 peso notes. This series is known with the following overprints:

TORREON

Ejercito Constitucionalista, Division del Norte (Constitutionalist Army, Northern Division)

The back legend on these notes stipulates that they are redeemable in multiples of 5 pesos for checks pertaining to the bank over bank series issued at Torreon, Coahuila and Gomez Palacio. General Francisco Villa ordered this series to be printed when he was still under Venustiano Carranza's orders.

Manuel Suarez. Oro Nacional (National Gold)

The one-time Villista commander, Manuel Suarez, claimed that these notes were created to pay his troops. However, their date and design suggests that they were in fact issued by a local (cotton) business.

Bank on Bank Checks

These checks were issued by the banks of Torreon, Coahuila, payable to the bearer at Mexico City once the railroad was reopened. They were cleverly devised by the local bank executives under pressure by General Francisco Villa who demanded cash to pay his troops. Thus, these bank on bank checks became legal tender.

Some of these notes bear the O/P "FALSO"; however, they are all genuine. All these notes are handsigned except the 1 and 2 pesos, Banco de Coahuila/Banco de la Laguna.

SALTILLO
La Tesoreria de la Federacion
(The Treasury of the Federation)

On January 27, 1914 the Treasury of the Federation at Saltillo had decreed an issue of paper money in denominations of 10, 25, 50 cents and 1, 2 and 5 pesos.

The following overprints are known on 50 centavos, 1 and 2 peso denominations:
1. Jefatura de Hacienda Coahuila (round)
2. Jefatura de Hacienda. Coahuila. (Oval-shaped)
3. Jefatura de Armas, Coahuila
4. Gobierno del Estado de Coahuila. Saltillo, Coah.
5. Admin. Gral. de Rentas San Luis Potosi

STATE OF COLIMA - COL

STATE & MUNICIPAL ISSUES - Colima

La Tesoreria General del Estado de Colima
(General Treasury of the State of Colima)

DECREE OF APRIL 22, 1914

Because of the shortage of small change on April 24, 1914, using extraordinary powers granted him two days earlier, the interim Huertista governor, Antonio Delgadillo, authorised the State Treasury to issue a series of vales.There were a total of 100,000 pesos in four denominations dated June 1914. The Constitutionalists under General Alvaro Obregón captured Colima on July 19, 1914 and a week later Obregón banned Delgadillo's notes.

DECREE OF JULY 22, 1914

As small change was still needed, on July 22, 1914 the new governor and military commander Eduardo Ruiz ordered an issue of 20,000 pesos in four denominations. The two pasteboards have Governor Ruiz' signature whilst the two higher values carry the signatures of Ruiz and Arturo Gómez as Secretary.These were intended to circulate for just six months, but on 26 September Ruiz had to order a second issue of another 30,000 pesos.

DECREE OF JANUARY 18, 1915

On January 18, 1915 the new provisional governor, Juan José Ríos, issued his decree number 7 authorizing an issue of 50,000 pesos in five denominations – 5c, 10c, 20c, 50c and one peso. These notes would be redeemable after six months.

DECREE OF JUNE 4, 1915

Another decree of June 4, 1915 authorized a new issue of 80,000 pesos. These were produced by the printing house Litografía J. M. Iguíniz, in Guadalajara, Jalisco. On 27 August, because of the deterioration and counterfeiting of the previous issue, Ríos increased the June 4, 1915 issue by $50,000 to a total of $130,000, and this $50,000 was to be used to replace the January 18 issue.

DISTRITO FEDERAL – DF

MILITARY ISSUES – Distrito Federal

Gobierno Provisional de Mexico (Provisional) Government of Mexico

The 1 to 50 peso notes are dated October 20, 1914, and the 100 peso note is dated September 28, 1914. The period between August 15, 1914 and June 4, 1916 is known as the Constitutionalist Party paper money period because the dominant issues were those of General Venustiano Carranza's Constitutionalist Government. On August 18, 1914, Carranza entered Mexico City to take charge and establish the first revolutionary administration whose control would be at a national level. On September 19, 1914, Carranza decreed that an interior debt of 130,000,000 pesos was to be created by means of paper currency. The bills were issued in denominations of 1, 5, 10, 20, 50, and 100 pesos series lettered A, B, C, D, E, and F respectively. The new bills were declared compulsory circulation, to be accepted at face value in all types of payments and transactions. A certain amount of this new issue was used to retire from circulation previous Constitutionalist Government issues. On September 28, 1914, Carranza decreed that the issue of fractional money, created by decree of March 4, 1914, was to be increased by 3,000,000 pesos, by means of "cartones", small pasteboard notes in the following amounts: 1,000,000 pesos of the 5 centavos denomination, 1,000,000 pesos of the 10 centavos denomination, and 1,000,000 pesos in the 20 centavos denomination.

During the first days of December of 1914, due to pressure from the Conventionist Government, Carranza decided to move the capital of the Constitutionalist Government to Veracruz. The newly formed Conventionist Government set up its headquarters in Mexico City at this time and, on December 13, 1914, decreed the issuance of "REVALIDADO" notes. That is, Carranza's "Gobierno Provisional de Mexico" notes in denominations of 1, 5, 10, 20, 50, and 100 pesos were overprinted with bold type in red ink with the following legend: "REVALIDADO - Por Decreto de 17 de Diciembre de 1914" (Revalidated - by Decree of December 17, 1914).

It is believed that the Conventionist Government ordered the printing of "Gobierno Provisional de Mexico" issues at Yecapixtla, Morelos with the overprint, "REVALIDADO". These notes are 5, 10, and 20 pesos. The tell-tale sign of a Yecapixtla note is its low to disatrously low printing centering and engraving quality. All Yecapixtla notes have their treasury seals printed by the flat lithography or book press process. While many of these notes are on the thin paper sandwiched in between thick paper so appear in a variety of thicknesses.

Resellos (overprints) of diverse types and nature are abundant on notes of the "Gobierno Provisional de Mexico" series. Municipal, state, federal and military resellos are known, and they normally appear in very low grades (Fair). In order to indicate that these issues should be accepted in local areas, municipalities and within a given state, they were handstamped with seals pertaining to the corresponding local authorities. These resellos also served as a guarantee of the authenticity of the notes. It is also common to find these notes with either overprint of "FALSO" or "NULO" but many of these notes are genuine despite these overprints.

Besides the series letter and date the key features to identify the different types of Gobierno Provisional notes from Mexico City (M1239-M1244) and Veracruz (M3968-M3978) are as follows:

Printer's imprint: Two styles are known:

Imprint A

Imprint B

Titles: Four titles were used for the treasury official whose signature appears on the lower right front of each note. In English these translate either as 'the Subsecretary (or Chief of Staff) in charge of the Department of Finance or 'by order of the Secretary, the Subsecretary'.

Title A
EL S.S. ENCARGADO DE LA SRIA. DE HACIENDA

Title B
EL O.M.. ENCARGADO DE LA SRIA. DE HACIENDA

Title C
P.O. DEL SECRETARIO
EL SUBSECRETARIO

Title C
P.O. DEL SRIO. EL S.S.

Underprints: Three general types are known for all denominations.

Type 1 underprint: A series of loops resembling Chinese fortune cookies

Type 2 underprint: A series of wavy lines

Type 1 underprint: A series of interlocking loops containing the words "Gobierno Provisional de la Republica Mexicana" Chinese fortune cookies

Gobierno Federal de la Republica Mexicana (Federal Government of the Mexican Republic)

These proofs were prepared by the American Bank Note Company for ex-President Huerta, when he planned a return to Mexico in 1915. However, Huerta was arrested in the United States for conspiracy to violate neutrality laws and died whilst still under arrest, so the attempted rebellion was aborted.

Ejercito Reorganizador Nacional

These are a series of proofs prepared by the ABNC in early 1915 for Felix Diaz, a nephew of Porfirio Diaz. Felix Diaz fell out with Huerta in 1913 and was driven into exile where he organized the Ejercito Reorganizador Nacional. He returned to Mexico in May 1916 but his revolt was unsuccessful.

PRIVATE ISSUES – Distrito Federal

A variety of private issues came into existence throughout most of the States of the Republic during the Mexican Revolution. However they were more abundant in the Federal District than in most of the States. The following issues are usually printed on pasteboard and are referred to in Spanish as "cartones", that is cardboards or pasteboards. Nonetheless, some are found printed on paper. When this occurs, they usually retain their small size. Normal size for these issues is approximately 54 x 29mm. They are listed in alphabetical order.

STATE & MUNICIPAL ISSUES - Durango

DURANGO

Bono al Portador (Bond to the Bearer)

FIRST ISSUE

Originally rebels extorted forced loans from merchants and other well to do citizens, many of whom had all their wealth in lands and buildings. As these properties could not be sold readily, a group of businessmen, who called themselves the Asociación Durangueña suggested an issues of 100,000 pesos in bonos in denominations of 50c, $1 and $5, to be used to overcome the shortage of small change and to pay for the costs of war. On September 13, 1913 , because of the shortage of small change, Rouaix agreed that the Association could replace $5.000 in $5 notes with a similar amount in 20c notes, so there were four different values. These notes carried the signatures of Manuel del Real Alfaro as Director General and Juan M. Olagaray as Collector of contributions (Recaudor de Contribuciones)

Sections of the decree are printed on the back.

100. --

The Arrieta brothers, from the Sierra Madre of Durango, were among the first to take up arms in 1910 in support of Francisco Madero.Then after Huerta's coup d'état in February 1913 they rebelled again. On June 18 their forces captured the city of Durango, and installed Pastor Rouaix as provisional governor. Domingo Arrieta met with Carranza in Durango in August 1913, and was appointed a General and Comandante Militar of the state. Domingo Arrieta took over as provisional governor on August 14, 1914 and that month there was an issue of $5 and $50 notes with the signatures of Arrieta as governor, José B. Fuentes as secretary and Juan Clark as Director General de Rentas.

GUANAJUATO
Tesoreria General del Estado

SERIES 1

By late 1913 the Huerta government still held Guanajuato but because of the shortage of small change on December 24 the interim governor José de Jesús Peña authorized the Tesorería General to issue 25,000 pesos in 50c and one peso notes. They were to be of voluntary acceptance , except that public offices had to take them in payment of taxes or other debts. The Treasury also had to exchange them for notes of forced circulation when requested.

SI-GUA-48	6.1.14 - 168 x 99mm		300.	500.	--	--

SERIES 2

As the shortage of small change continued, on March 5, 1914 the current interim governor, General Rómulo Cuéllar, authorized a further 100,000 pesos in notes of 25c, 50c and one peso, in a similar format. These were printed by the Mining Journal Press, of Mexico City.

SERIES 3

On August 1, 1914 the Administración General de Rentas del Estado launched a series of five values (5c, 10c, 20c, 30c, 40c and 50c). They used unissued remainders from Stallforth Alcazar y Cia (M719-M724), overprinted the legend so that they were now payable in the Tesorería General and added the phrase 'of obligatory acceptance in the State of Guanajuato (DE CIRCULACION OBLIGATORIA EN EL ESTADO DE GUANAJUATO)' on the reverse.

Tesoreria Municipal

On March 5, 1915, the local authority (Presidencia Municipal) was authorised to issue $6,000 in 1c, 5c and 10c fractional notes. These had a common template with the denomination, series letter and number on the face, and city coat-of-arms, denomination and signatures on the reverse, applied in a series of passes. Some of these had the stamped names of the President, Teniente Coronel Manuel R. Rubi and Secretary, Agustín Téllez, and others that of Luis Lozano, who was in charge of the municipal treasury.

The date is on the back.

Camara de Comercio del Estado de Guanajuato

On July 2. 1915 it was announced that the Chamber of Commerce, having deposited a sum in the Treasury, was going to issue 5c, 10c, 25c and 50c notes, to a total value of $18,600.

These entered circulation three days later and were readily accepted by the general public. Businesses themselves, however, imposed restrictions, much to the public's annoyance.

Guanajuato Reduction and Mines Company

On August 2, 1914 representatives of three American mining companies met with the Constitutionalist General Jesus Carranza to discuss the lack of currency in circulation, and received permission to issue their own notes as a short-term measure. On October 28 the companies warned that the notes were to be withdrawn, giving people five days to hand them in for redemption.

The Guanajuato Reduction and Mines Company was given permission to issue $65,000 in notes of eight denominations (5c, 10c, 25c, 50c, $1, $2, $5 and $10).

El Banco Revolucionario de Guerrero (The Revolutionary Bank of Guerrero)

This series and M1847 are the only notes known to have been printed by order of Emiliano Zapata, and they are the only Revolutionary notes bearing the name of a bank as a title, despite the fact that this bank never officially existed as such.

The Banco Revolucionario de Guerreo was established by General Jesus H. Salgado on October 5, 1914.

GUADALAJARA

La Pagaduria del Cuerpo de Ejercito del Noroeste

Signed by “Teniente Coronel Serrano”

While in Guadalajara, Jalisco, Obregón had the resources to produce a better class of note. On 1 August 1, 1914 he issued a series of five denominations (50c, $1, $5, $10 and $20), as Series C, signed by himself and Serrano, now a teniente coronel.These were printed by the local firm Litografía de Ancira, with the design made by one of their employees, Luis Vázquez Foncerrada. The two vignettes of Madero and the gun crew were based on photographs by Jesús H. Abitia. The vignette on the reverse of these notes is of a group of artillerymen with the cannon “Zaragoza” which sunk the Huertista gunship Morelos off the Isla de la Piedra, Mazatlán in May 1914.

La Pagaduria Gral. del Cuerpo de Ejercito del Noroeste

Signed by "General Serrano"

On April 18, 1915 General Manuel Diéguez recaptured Guadalajara from the Villistas. Maintaining a large army placed a great strain on resources and so on 1 May, 1915 the Pagaduría General del Cuerpo del Noroeste produced a similar series in five denominations (50c, $1, $5, $10 and $20) but as Series D and with differences in the legend (PAGADURIA GRAL. instead of PAGADURIA) and text (Serrano is now a general), edging, Madero's portrait and the allegory of Patria.

Ejercito Constitucionalista

On January 20, 1915 Diéguez issued another series of notes, but in his capacity as General en Jefe de la División de Occidente, rather than as governor. These bear more than a passing resemblance to Obregón's Pagaduría del Cuerpo del Noroeste issue (M2261-M2265) and have a portrait of General Ramón Corona, a native of Jalisco who fought the French and accepted the surrender of the Emperor Maximilian, and a view of the Palacio de Gobierno in Guadalajara.

GUADALAJARA
Estado de Jalisco

Manuel Macario Diéguez was born in Jalisco but by 1906, at the age of 32, he was working as an overseer for the Cananea Consolidated Copper Company mine in Cananea, Sonora. He was one of the leaders of the famous strike there and was subsequently sentenced to fifteen years in the infamous prison of San Juan de Ulúa. When Madero became president Diéguez was released and returned to Cananea where he became presidente municipal. After the decena trágica he joined Obregón's Cuerpo de Ejército del Noroeste and rose to be a general. On June 12, 1914 he was appointed governor of his native state. His first two decrees were issued from San Marcos, before Obregón captured the state capital, Guadalajara, on July 8, 1914.

Issued pursuant to Dieguez' decree no. 2 (see also M2313-M2316). This first issue, printed by José María Iguíniz in Guadalajara, consisted of cartones of 5c, 10c and 20c and notes for fifty centavos.

La Direccion Gral. de Rentas del Estado

DECREE NO. 2: JUNE 18, 1914

Decree no. 2 of General Manuel Diéguez, in San Marcos, authorized $100,000 (300,000 x 5c, 100,000 x 10c, 75,000 x 20c and 120,000 x 50c)

The printer did not have enough pasteboard for cartones, so printed some notes. These carry the printed signatures of Diéguez as governor, Manuel Aguirre Berlanga as secretary, and E. J. Jiménez as Director General de Rentas.

Estado Libre y Soberano de Mexico

DECREE NO. 4: MARCH 1, 1915

On March 1, 1915, Gustavo Baz, provisional governor of the state of Mexico, by decree no. 4, authorized an issue of $500,000 in four denominations (5c, 10c, 20c and 50c). On March 25, by decree no. 7, Baz amended this decree so that the denominations would be 5c, 10c, 20c, 50c, $1 and $5, without altering the total value of the issue. Subsequent decrees (no 10 bis on May 6, no. 19 on July 13 and no. 20 on July 26) increased the amount of a final total of $3,000,000.

Gobierno Provisional del Estado de Mexico

DECREE NO. 44: 1.3.15

On March 1, 1915 decree no. 5 authorised an issue of up to $30,000 in $5 provisional notes, to pay the troops. These were to be withdrawn after four weeks, and this condition was printed on the notes. On May 22 Baz reminded people to exchange these notes in the Oficinas Rentísticas, as on 30 June they would lose any value."

SAHUAYO

Columna Galvez Toscano

DECREE OF NOV. 15, 1914

In late 1914 the town of Sahuayo rose against the anti-clerical Carrancista General Zuñiga. José Ramírez Sánchez and his brothers together with Miguel Gálvez Toscano organized a defensive battalion and issued this locally produced currency. The uprising was put down in December 1914 by a troop of 200 Yaquis under General Fox.

URUAPAN

Ejercito Constitucionalista

Francisco Murguía was one of the first to support Carranza's Plan de Guadalupe, campaigned with General Pablo González and briefly served as Governor of the Estado de México. He supported Carranza at the Convention and with a column of 10,000 men marched to Michoacán to join Manuel M. Diéguez in the fight against Villismo in the east of Mexico. During this campaign Murguía found it necessary to issue paper money to pay his troops, probably due to the desire to outlaw the enemy's currency in newly-captured territory. These were authorized by a decree issued in Uruapan, Michoacán on December 20, 1914. In a report to Carranza on January 8, 1915 Murguía stated that his decree authorized a total of a million pesos but in the event he had only issued $120,000 up to that date.

Administracion de Rentas del Territorio (Administration of Revenue for the Territory)
Printed by order of General Rafael Buelna

After the Convention at Aguascalientes Buelna decided to support Villa and was nominated Comandante Militar of northern Jalisco, Tepic and the south of Sinaloa. In 1915 he authorised an issue of low-value notes (10c, 20c, 50c and $1) that carried the legend that they would be redeemed upon presentation in the Administración de Rentas of the territory.

MILITARY ISSUES – Nuevo Leon

MONTERREY

Republica Mexicana, Division del Bravo Cuartel General

Joaquin C. Téllez was General-in-Chief of the División del Bravo, stationed in northeastern Mexico, originally to attack Villa's División del Norte in its rear as it progressed into central Mexico and, after the United States landing at Veracruz, to deter an invasion through Brownsville, Texas and Matamoros. With the agreement of the governor and Jefe de Hacienda, Téllez authorised an issue of notes to cover military expenses. These have the printed signatures of Rodolfo Garza Aldape as Jefe de Hacienda, Téllez as General en Jefe, and Salomé Botello as governor and on the reverse have the seals of their respective authorities.

Téllez was the driving force behind the issue. On January 8 he wrote to the local paper 'El Noticiero', explaining that as his paymasters were without funds, with the agreement of the governor and Jefe de Hacienda, he had authorised an issue of $100,000 in vales, to cover military expenses. These vales would be of forced circulation, and he

asked merchants not to refuse or discount them or raise their prices.

On January 5, 1914 Garza Aldape had asked the printing firm of 'El Modelo' to produce 250,000 notes (50,000 of each denomination). About a month later, on 1 February, Téllez wrote to the firm authorizing a new issue of another 800,000 notes (200, 000 of 10c, 300,000 of 50c, 200,000 of $1, 100,000 of $2) which have the same series letter but an extra subseries. Armando Botello had been appointed Interventor to oversee the work and on February 27 reported that one million pesos in notes had been printed and sent to the Jafatura de Hacienda

Molinos para Nixtamal de Garza Flores, Hnos.

In Monterrey 24 September 24, 1914 the nixtamel (corn paste for tortillas) sellers complained about the lack of one and two centavo coins, so governor Antonio I. Villarreal authorised them to produce notes of one or two centavos, stamped by the Presidencia Municipal, to a total of one hundred pesos.

	SI-OAX-7	8.4.14:	May 1914	200.	300.	400.	600.

The following notes were issued in accordance with decrees of February 19, 1915, July 10, 1915, November 8. 1915, January 12, 1916 and January 18, 1916. A massive study by Nicholas Follansbee of the production runs of these notes has provided the ability to organize these notes, and come up with a new catalog order which should help both type collectors and more advanced collectors in organizing their notes into a meaningful and complete collection of the Oaxaca "Credit Bond" notes. No effort is made to distinguish between the broad variety of paper types (plain and ledger paper can be bond, watermarked, thick or thin); the darker blue and green and the bluish grey and greenish grey papers used for the 10 pesos and the 1 peso notes, respectively, are the only exception.

The old catalog references to a printer's error in the imprint for JULIAN S. SOLO might well have been an attempt at anti-counterfeiting. This may have been coupled with an intentional change in color for the Zapotec Princess "Donaji" (as well as denominations) from blue to grey to blue and back to grey. Therefore we do not reference either of these as "errors" in this current work.

Subscripts on some of the series letters are used by Follansbee to distinguish the printings of a series when more than one printing was made for that series letter for the issue date. Also, some series letters are annotated with a ? or cannot confirm where current work has not verified their actual printings. Finally, Follansbee researched the paper used extensively and has a number of very thin types of Ledger Paper that have faint (and in some cases no) lines visible in some notes; collectors will mistake these for Plain Paper where a Ledger Paper is shown, but, we have shown the use of Plain and Ledger Papers according to his research.

One can further reference the serial number ranges, the paper types and watermarks, and many more details, i.e., seal positions, by accessing Nicholas Follansbee's, The Oaxaca "Credit Bonds" of 1915-1916(2004).

STATE OF PUEBLA - PUE

MILITARY ISSUES – Puebla

ACATLAN
Brigada Reyes Marquez. Division Salazar

General Ricardo Reyes Márquez, a native of Acatlán, was a local commander, supposedly aligned with Zapata. On January 22, 1915, he wrote to Zapata to tell him that, since he did not have any small change for purchases, he had issued $2,000 in bonos of five, ten and twenty centavos, backed by the same sum deposited in hard cash in the district's Recaudación de Rentas.

CHIETLA

Municipalidad de Chietla

SERIES 1

Counterfeits exist in all notes of both series. The counterfeits may be more common than the legitimate notes. Generally speaking, the eagles in the stamps on the backs of the notes are crude on the counterfeits and crisp on the legitimate ones. Back images shown are from legitimate notes. Prices shown are for legitimate notes.

STATE OF SINALOA - SIN

MILITARY ISSUES – Sinaloa

CULIACAN

Ejercito Constitucionalista Cuerpo de Ejercito del Noroeste

Alvaro Obregón entered politics in 1911 with his election as municipal president of the town of Huatabampo, Sonora and became a supporter of Madero shortly after Madero became President. In April 1912 he volunteered to join the local Maderista forces to oppose Pascual Orozco's revolt and was quickly promoted through the ranks. On Madero's assassination he offered his services to the government of Sonora. On September 30, 1913 Carranza appointed Obregón commander-in-chief of the Constitutional Army in the Northwest, with jurisdiction over Sonora, Sinaloa, Durango, Chihuahua, and Baja California. In November 1913 Obregón's forces captured Culiacán, the capital of Sinaloa, where he authorized his first issue of currency, a series of notes, dated April 23, 1914, that the Paymaster General would repay within a fortnight of that date. These notes had the printed signature of Obregón and the handwritten or stamped signature of Chief of Staff Francisco Roque Serrano. They are similar to the notes that Riveros had already issued in San Blas and Culiacán (see M3763 to M3779 and M3745 to M3747).

El Estado de Sinaloa - Brigada Sinaloa

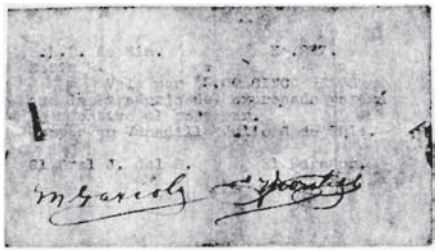

This note refers to Riveros' decree no. 14 (see M3775 to M3779), but is of a cruder design and the seal is of the Regimiento Cosala of the Brigada Sinaloa. Cosala is a small town in Sinaloa, about 50 miles south east of Culiacán, whilst the Brigada Sinaloa, commanded by General Ramón F. Iturbe, was part of the Constitutionalist Cuerpo de Ejército del Noroeste. Presumably this was an extremely local issue, trying to piggyback on the acceptance of Riveros' issues.

STATE & MUNICIPAL ISSUES – Sinaloa

CULIACAN
El Estado de Sinaloa

DECREE NO. 17. DEC. 13, 1913

On November 14, 1913 the rebels took the state capital, Culiacán and with Carranza's blessing, decree no. 17, of December 13, authorized another $500,000 in 25 series (Series A bis to T bis, W, U bis, V bis, X bis, Y bis) each composed of 2,500 $1, 2,500 $5 and 500 $10. These notes had the new location, Culiacán, and José G. Heredia,

as secretary.

MAZATLAN

La Tesoreria General del Estado de Sinaloa

After the assassination of President Madero in February 1913 the city of Mazatlán remained under the control of the Huerta government and in November 1913 was besieged by Alvaro Obregón. At the end of February 1914 the federal government authorized the state governor, Miguel Rodríguez, to issue 100,000 pesos (100,000 x 10c, 100,000 x 20c and 140,000 x 50c) in vales, and the local governor passed the relevant decree on February 25. The notes were printed by the local firm 'La Nacional' and carried the printed signatures of Eduardo Bátiz as Tesorero and Juan. R. Sais as Contador. On April 10 Rodriguez authorized another series (B) of 200,000 50c notes. The federal forces in Mazatlán held out until August 9, 1914.

SAN BLAS
El Estado de Sinaloa

DECREE NO. 3. JULY 13, 1913

Felipe Riveros was elected governor for the four year term beginning September 27, 1912. In February 1913 he at first acknowledged Huerta's usurpation but Huerta had him arrested and taken to Mexico City. He was tried for treason but acquitted and fled back to Sinaloa, where the rebels established themselves at San Blas. On July 5 Carranza recognized Riveros as governor of Sinaloa. Riveros' first currency decree, (no. 3) from San Blas on July 13, 1913 was for an issue of $100,000 in five denominations in five series (A – E). There were to be $20,000 in each of the series, made up of 10,000 25c, 5,000 50c, 5,000 $1, 1,000 $5 and 500 $10 notes.These carried the printed names of Riveros as governor and Felipe Dussart as secretary (even though he had already stepped down) and the signature of José A. Meza as state treasurer (Tesorero General).

DECREE OF FEB. 22, 1915

On February 22, 1915, in decree no. 1, Riveros authorized a new issue of five million pesos, thus:

25c	A-J	100-40100	$100,000
50c	A-J	100-40100	$200,000
$1	A-J	100-40100	$400,000
$5	A-J	1000-9000	$400,000
$10	A-J	1000-10000	$900,000
$20	A-J	10000-17500	$1,500,000
$50	A-J	10000-12000	$1,000.000
$100	A-J	10000-10500	$500,000

In late 1915 the Constitutionalist Luis Herrera, General Jefe of the Brigada 'Benito Juárez', was isolated from other Carrancista forces and needed to improvise paper currency to pay his troops until he met up with the forces under J. B. Treviño. Since he had captured a batch of $80,000 of Riveros' notes, he reused them and on November 29, in Parral, Chihuahua, included them in a list of issues that were legal tender, provided that they had been revalidated with the Brigade seal and the signature of either himself or his chief of staff, Coronel R. Dominguez.

HERMOSILLO

El Estado de Sonora

As well as the obvious differences in series, these notes have a variety of hand and mountain seals, different Treasury seals (38.5mm and 35.5mm) and different fonts for 'Numbers' as well as minor type varieties such as a broken 'J' in 'Juan Sanchez Azcona'. The third and fourth series $5 and fourth series $10 have the additional signature of Interventor Astiazaran. Remainders are known without seals and/or numbers. These notes were also widely counterfeited, and numerous errors in coloring, text and numbering have been identified. The series bears resellos on the 1, 5, and 10 peso denominations as follows:

Ejercito Constitucionalista de Mexico
La Caja de la Brigada Caballero

On June 6, 1914 the Carrancista General Luis Caballero authorized the Caja de la Brigada Caballero to issue $25,000 in 50c notes and another $25,000 in one peso notes. On 22 September 22 1914, the Tesorería General of the state, in Ciudad Victoria, announced that Caballero had agreed to withdraw the notes and so they could be handed in at the office of the Tesorería General.

Gobierno Provisional de Mexico (Provisional Government of Mexico)

The following series of notes were issued by Venustiano Carranza when he retreated from Mexico City during the first days of December 1914 and established the capital of his Constitucionalist Government in Veracruz. Numerous varieties exist including color, design, overprints, official seals, hand signatures and errors. It is common to find genuine notes overprinted Falso.

For the key features to identify the different types of these notes refer to the section on the Mexico City notes (M1239-M1244).

DECREE OF JUNE 1, 1915

These were known as the “bedsheets of the three Manuels”. These were issued under the Zapatista Provisional State Government, headquartered in the city of Misantla for approximately six months. The signatories are provisional governor Manuel Armentu, Treasurer General Manuel Mirón Velorde and paymaster Manuel Roselló Gil.

MERIDA

La Tesoreria General del Estado

DECREE NO. 550 OF MAY 23, 1916. NATIONAL GOLD

On May 9, 1916 Governor General Salvador, by decree no. 536, authorised the Comisión Reguladora del Mercado del Henequén to issue $20,000,000 in Bonos de Caja in national gold (oro nacional), giving as his reasons the lack of paper currency, the Comisión's need for reserves and the fact that its gold holdings and the special taxes that it was to receive would guarantee the issue. The denominations were to be: 2,000,000 50c; 3,000,000 $1; 2,000,000 $2; 800,000 $5; 200,000 $20 and 40,000 $100 notes.

Then on May 23, 1916, by decree no 550, Alvarado, blaming bankers and speculators for the economic troubles, authorised a new issue of $40,000,000 in bonos de caja of the Tesorería General in oro nacional. The distribution was to be 5,000,000 $1; 2,500,000 $2; 3,000,000 $5 and 1,500,000 $10 notes. As 'oro nacional' the notes were to have a fixed value of 50 centavos to the American dollar, and were guaranteed by half of the taxes and export duties on henequen. In a contract dated July 13, 1916 (and modified on 4 August) the Parsons Trading Company of New York agreed a contract with M. C. Rolland, the duly authorized representative of the Mexican Government acting in particular for the Government of Yucatan, to print this new issue. The contract added 5000,000 $20 and 100,000 $100 notes.

The first four denominations were to carry the legend 'La Tesorería General del Estado', whilst the two highest denominations were to be entitled 'La Comisión Reguladora del Mercado de Henequén' (see M4165 and M4166).

For the next four years Alvarado was to issue more of the "Reguladora" notes, supposedly backed by gold stocks held in Yucatán vaults, or firmly guaranteed by the henequen stored in New York harbour. With the approval of both the federal and state governments, this paper currency circulated until 1919, with businesses and the public accepting that it had sufficient backing. However, at the beginning of 1919 the Comisión began to refuse to issue drafts drawn on New York, and the edifice started to collapse.It is estimated that by 1919 there were more than 34,000,000 paper pesos circulating; much of it in fact was made good by the government, but there still remained in circulation in 1920 more than 10,000,000 pesos worth of Reguladora notes, with only half that amount in henequen stored in New York to back it up.

MERIDA

La Comision Reguladora del Mercado de Henequen

The Comisión Reguladora del Mercado del Henequén was formed in 1912 as an attempt to break the oligopoly that had flourished during the Porfiriato by banding the leading sisal growers into a commission that would be empowered to regulate the price of henequen. On July 25, 1914, due to the shortage of small change governor Prisciliano Cortés authorized the Comisión to issue up to $1,000,000 in notes of 10c, 20c and 50c values, though in the event only 20 and 50 centavos notes were issued. There were 100,000 20c notes in each of 10 series (A-J) and 100,000 50c notes in 15 series (A-O).

On December 12, 1914 Carranza, as Primer Jefe, argued that the Comisión Reguladora needed the necessary resources to fulfil its aims and authorized it to issue up to ten million pesos ($3,000,000 in $5; $3,000,000 in $10; $2,000,000 in $20; and $2,000,000 in $50). These would be of forced circulation in Yucatan and in Campeche, if the Comisión Reguladora extended its operations there.

Because of an urgent need for notes whilst a new issue was being prepared, on May 13,1916, in decree no. 549, governor Alvarado ordered that the 20c and 50c cheques of July 27, 1914 and the $50 and $100 notes of 24 September 1915 that, in accordance with a decree of March 1, 1916, had been taken in by the Comisión as payment, could be revalidated as “ORO NACIONAL” and reissued. These would then be exchanged, in due course, for the new issue.

Comision Reguladora del Mercado de Henequen. Bono de Caja (Cashier's Bond)

DECREE OF SEPTEMBER 24, 1915

On September 24, 1915 Alvarado decreed that since the Comisión Reguladora had sufficient resources to guarantee the notes that it had issued and needed extra funds to protect henequén producers, he, with Carranza's explicit authorisation, was authorising a futher issue of Bonos de Caja to the sum of $15,000,000. There were 100,000 $50 and 100,000 $100 notes,

La Comision Reguladora del Mercado de Henequen
Bono de Caja (Cashier's Bond)
Oro Nacional (National Gold)

When, in March 1915, the Carrancista General Salvador Alvarado took over as Military Commander and Governor, he saw the Comisión Reguladora as an excellent opportunity for enriching the gaping coffers of the Carranza faction. By decree, he began to issue paper currency – not his own at first, merely revalidating the Comisión notes which had already been placed in circulation. On May 9, 1916 Governor General Salvador, by decree no. 536, authorised the Comisión to issue $20,000,000 in Bonos de Caja in national gold (oro nacional), giving as his reasons the lack of paper currency, the Comisión's need for reserves and the fact that its gold holdings and the special taxes that it was to receive would guarantee the issue. The amounts were to be 2,000,000 50c, 3,000,000 $1, 2,000,000 $2, 800,000 $5, 200,000 $20 and 40,000 $100.

"Contribucion para la Conquista de la Libertad. Ano de 1927"
(Contribution to the Conquest of Liberty. Year of 1927)

These bonds, issued by the National League for Defense of Religious Liberty in 1927 to raise funds, were probably made in the Federal District where this group had its headquarters. The signer, Jose Tello, was in reality Jose Gonzalez Pacheco, who clandestinely worked as the League's vice-president and as secretary in charge of propaganda, of the press and of finances. They will have been distributed in the regions controlled by the Cristeros forces and mostly in Mexico City and perhaps around Guadalajara.

BANCO DE MEXICO

Introduction to Banco de Mexico Notes

This Banco de Mexico section of the Mexican Paper Money catalog expands on the previous edition in several ways, but, is still focused on the notes printed by the American Bank Note Company (ABN Co.). First, it updates the data on the large size notes. Second, It expands the scope of information of the small size notes to include all the issues. Information on the small size notes comes from research and information provided by Duane Douglas, Simon Prendergast, Carlos Sainz, Neil Shafer and many other collectors and dealers (especially, Champion Stamp of New York City).

A significant part of the information came in the form of copies of the actual Banco de Mexico and ABN Co. records of orders, production quantities, dates of printings and issuances, and the overlaps in Sub-series letters (serial number prefix letters). Neil Shafer started me down the path that led to this work when he found that the Krause Publication's Standard Catalog of World Paper Money was in need of revision based on his assessment of the marketplace at that time.

I found in talking with collectors and dealers that they were not just collecting the catalog numbers by date, and not just collecting the series letters for those dates, but, were collecting the notes by sub-series as well. So my research expanded to cover the breadth of the hobby to include all of these areas and as I continued to buy and sell the notes I found that more than just a handful of collectors were advanced into the subseries, but, that some were also adding Specimen notes to their collection.

Thus, the information in this section has expanded to include all of these areas of the hobby. In doing so Cory Frampton and I decided that the collector would benefit and hopefully appreciate the addition of the production figures for the notes (much as coin collector books do for coin collectors). We added a column to the right of the UNC prices to include prices for the Specimens.

Prices for issued notes are basically figured on the basis of the relative scarcity and to some extent by the length of time the notes were in circulation. It is easy to obtain numbers for the common notes at the end of their production run as they are readily available (even though they often can vary greatly in price from seller to seller). Likewise, the data is available for the large size notes as they have recent trades which allow for the pricing of this group. What was more difficult was the pricing of the notes from 1948 to the mid-to-late 1950's. These generally are only available in lower grades, especially, as one progresses to the higher denominations. These notes have prices that have come about from observations as well as from calculations.

Only the 1 Peso note seems to be available for all series and sub-series in UNC. However, the sub-series collectors can find themselves have to pay 10-15 times the cost of the more common sub-series for the same series letter. I have had to repeatedly decline to get into the costs for the issues that have 10 Sub-series per Series letter; my logic is one has to be in the right place and the right time to get one reasonably, or, worse risk paying very high prices only to find notes from several packs surface in the market place after making a purchase at the very high price.

The additional column for the Specimens is a totally new concept in paper money catalogs. Since the principal way that collectors acquire these notes for their collection is by date we had added pricing by date and added a column to the far right which shows how many series letters are available for the date. The quantity of specimens is generally based on the manner in which the ABN Co. production sheets were run. The large size notes were done on 4 note sheets typical for all large size notes. The small size notes seem to have been done on 16 notes per sheet format up until about 1961 when the production changed to 24 notes per sheet. The production run for specimens is as follows:

With each of the major design changes (2-3 depending on the denomination, the two basic varieties have differing center signature titles) the ABN Co. produced an undated note (for the Banco de Mexico's approval). Then as each order came in there was a sheet printed with the date added (absent any series letters). Finally, as each series letter production run was printed for the Banco de Mexico the ABN Co. printed a sheet with the series letter(s) (some series letter sheets may not have been printed for higher denominations in the early dates). (Since the specimen notes have serial numbers 00000 or 000000 without any prefix letters the Sub-series Collectors who wish to collect specimens are limited to series letters, only, where they exist).

The Specimen pricing is more straight forward that that for issued notes. Generally, we have priced the later notes at about 1/3 to 1/4 of the current catalog prices (where they exist) from the Krause catalogs. The one exception is for the 10,000 pesos notes. The earlier notes are priced to sell based on the number of notes which are available by date, factoring in the relative value issued notes.

(1) Serial Number Ranges/Series Qtys - Up to 1961 mostly from type written notes from the American Bank Note Company and the Banco de Mexico;
“from 1961 to end of each denomination is mostly derived from “”The Paper Money of the Bank of Mexico””, Duane Douglas, (3rd Edition, 2003);”
“then where anomolies exist, by observation/verification of actual notes against catalog data.”
I wish to especially thank the following list of contributers for all their help:
“Duane Douglas(Mex), Simon Prendergrast(UK), Carlos Sainz(USA), Neil Shafer(USA), Mark Wm. Clark(USA), Sergio Villanueva(Mex), Raul Elizando(Mex)“

(2) Prices are based on a combination of observed selling prices and on a statistical model I received from a college professor on how to more properly estimate values for coins.
I applied this model to the paper money without attempting to compensate for the reduced circulation time of paper vs coin.“
I realize that these prices are likely to please some and cause others to scorn, but, I think that they move the existing, available catalog prices more towards observed”
selling prices and hence form a good starting point for future pricing.

r* - Unsigned remainders are known. They are without Date/Serie/Controls/et al on face; they have seals on back. They are punch-hole cancelled (typically one large hole).

“NOTE: Partially issued notes without signatures, only, are known and are usually circulated, typically in VG to VF grades. These are more properly ERROR notes”
rather than Remainders and are worth more than unissued remainders in UNC grade. Since they are considered ERRORS no catalogue #s are given.
