Little Steps into the World of Math!

Observing this series in the form of the National Curriculum Framework (NCF) 2023 for the fundamental stages

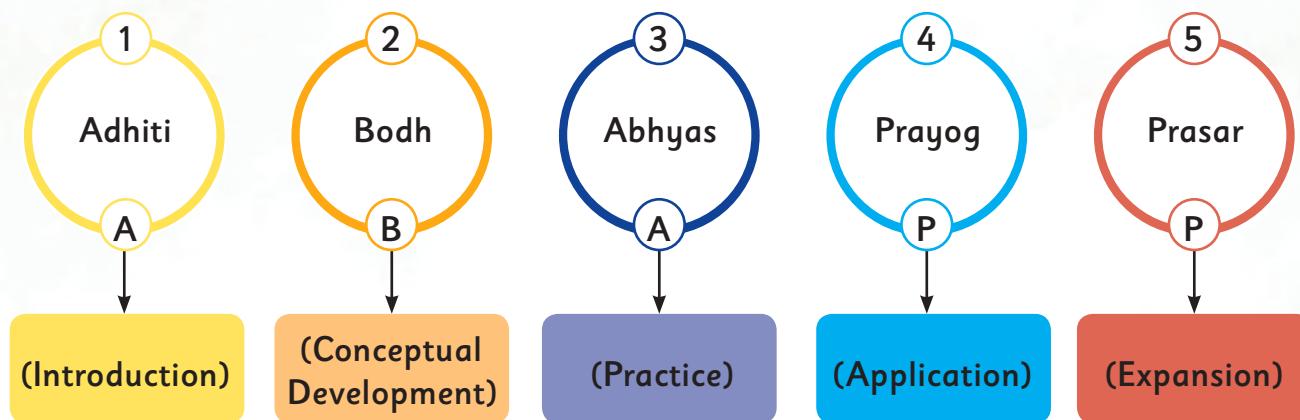

We have prepared this new series based on the directions and guidelines of the National Curriculum Framework (NCF) 2023. It focuses on play-based, activity-based, and experience-based learning while keeping teaching at the center and preparing the material accordingly.

Five-step teaching process – For early years:

Keeping in mind the five-step teaching process, we have presented each lesson and activity in the following order:

- Introduction (Adhiti) – Introducing children to the topic with stories, songs, and poems.
- Conceptual Development (Bodh) – Understanding concepts through simple language and activities.
- Practice (Abhyas) – Engaging children in activities based on repetition, recognition, and identification.
- Application (Prayog) – Giving children opportunities to express what they have learned through their environment.
- Expansion (Prasar) – Group discussions, storytelling, or showing pictures to enhance children's expressive ability.

Panchaadi: (A Five Step Learning Process)

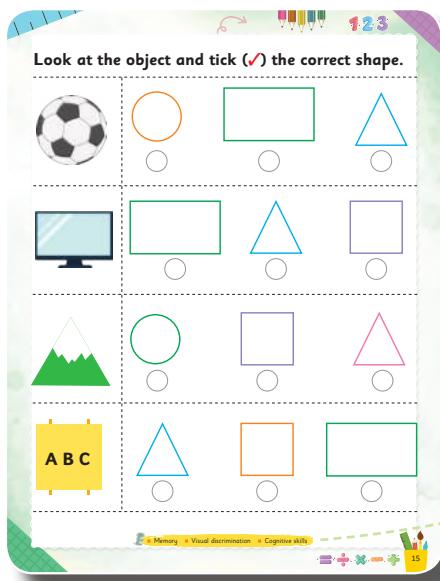

Based on five domains of development

According to NCF 2023, this series pays special attention to children's five main development areas:

- **Physical development** – Developing motor skills through running, jumping, climbing, throwing, catching, and playing activities.
- **Mental development** – Developing emotional stability, cooperation, and social skills.
- **Cognitive development** – Enhancing the ability to think, recognize, and ask questions.
- **Moral development** – Showing moral values through stories with ethical messages.
- **Aesthetic development** – Understanding nature, compassion, beauty, and art.

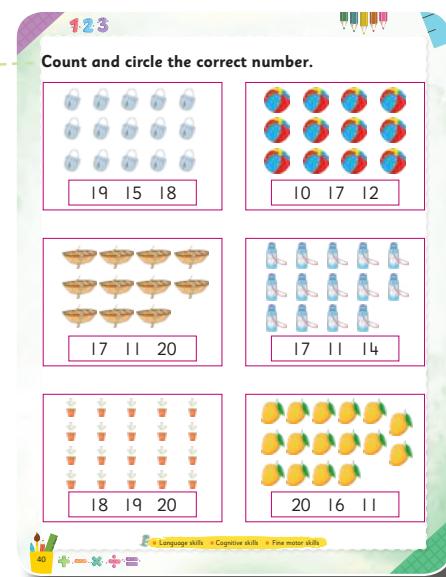

Our aim is that children not only learn Hindi language but also develop morally, cognitively, and emotionally, building confidence to maintain a bright future.

Key Features

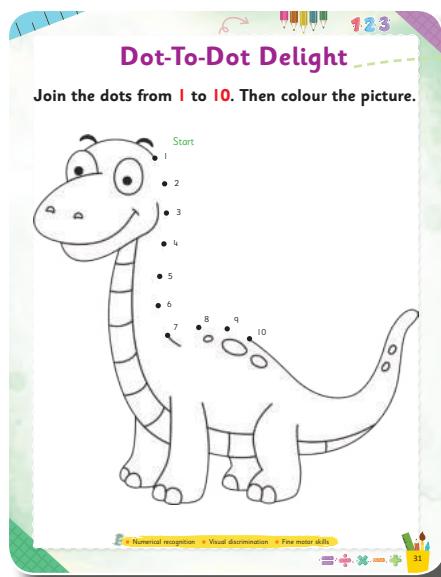

Develops specific skills through targeted and engaging learning exercises.

Interactive and engaging practice sheets designed to reinforce learning through varied exercises.

Fun activity where children connect numbered dots to form shapes or pictures, enhancing number recognition and fine motor skills.

Play-way Method: Uses games, puzzles, and fun activities to teach math concepts, fostering a joyful learning environment and making math enjoyable and easy to grasp for young learners.

Addition

Understanding Addition

'Addition' means putting two or more things together. The sign of addition is '+' (plus).

Avinash has three balls.

Shivansh gave him one more ball.

Now, Avinash has four balls.

Thus, **three** and **one** make **four**.

We write it as $3 + 1 = 4$

'+' means addition or plus.

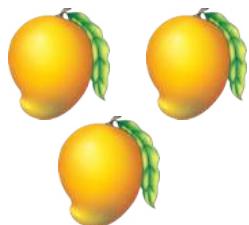

'=' means equals or is the same as.

$3 + 1 = 4$ is read as
Three plus one is equals to four.

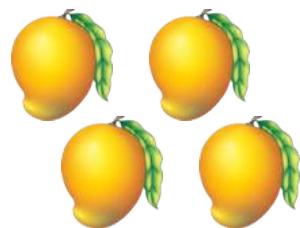

Addition by Counting Objects

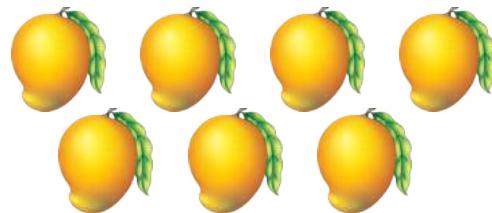

Count, write and add.

$$8 + \boxed{} = 8$$

$$5 + \boxed{} = 5$$

$$9 + 0 = \boxed{}$$

$$\boxed{} + 7 = \boxed{}$$

$$1 + 0 = \boxed{}$$

$$0 + \boxed{} = 6$$

$$3 + 0 = \boxed{}$$

Addition by Drawing Lines

Add by drawing lines.

Example: Let us add 2 and 5.

$$\begin{array}{r}
 2 \quad | \quad | \\
 + 5 \quad | \quad | \quad | \quad | \\
 \hline
 7
 \end{array}$$

- Draw two lines for 2.
- Draw five lines for 5.
- Then, count all the lines and write the number.

$$\begin{array}{r}

Subtraction

Understanding Subtraction

A 'subtraction' means taking away a number from a group. The '-' sign shows subtraction.

Bhawna has three balls.

Myra takes away one ball from her.

Now, Bhawna has 2 balls.

Thus, **one** takes away from **three** leaves **two**.

We write it as $3 - 1 = 2$

'-' means taken away.

'=' means equals or is the same as.

$3 - 1 = 2$ is read as
Three minus one is equals to two.

Subtraction by Crossing Objects

Subtraction by Drawing Lines

Example: Let us subtract 5 from 8.

$$\begin{array}{r} 8 \\ - 5 \\ \hline 3 \end{array}$$

1 | 1 | / / / / / /

- Draw eight lines for 8.
- Cut five lines from these 8 lines.
- Then, count the remaining lines and write the number.
