INTRODUCING ALICE®

ALICE Households

In 2023, based on the Federal Poverty Level (FPL), 19% of Louisiana households were defined as being in poverty. Yet this measure failed to account for an additional 30% of the state's households that were also experiencing financial hardship. These households are **ALICE: Asset Limited, Income Constrained, Employed** – earning above the FPL, but not enough to afford basic expenses in the parish where they live.

Between ALICE households and households living in poverty, **an estimated 50%* of households in Louisiana were below the ALICE Threshold in 2023**, the [highest rate](#) among all states and the District of Columbia. Households below the Threshold are forced to make impossible choices – like deciding whether to pay for utilities or a car repair, whether to buy food or fill a prescription.

Households below the ALICE Threshold are in every state and county/parish across the U.S. and represent all demographic groups. Workers below the ALICE Threshold often perform the jobs that keep our economy functioning smoothly – they are child care providers, food service workers, cashiers, personal care aides, delivery drivers, and more. Their stories capture the systemic and structural barriers to financial stability, and the struggles and resilience of families experiencing financial hardship.

ALICE Measures

The ALICE measures were developed by [United For ALICE](#) to answer the pressing need for a more accurate picture of financial hardship. The FPL is an outdated instrument that does not consider the wide variation in cost of living by location (except for a slightly higher state-level FPL for Alaska and Hawai'i). As a result, official measures based on the FPL sharply underestimate the true extent of financial hardship in the U.S. And because the FPL is the basis for defining eligibility for many types of public assistance, ALICE households often do not qualify.

Two pillars of the ALICE measures are household costs and income. The [ALICE Household Survival Budget](#) calculates the cost of household basics for each parish in Louisiana, relying on a wide range of publicly available sources as outlined on page 6. Change over time in the cost of these household basics is tracked in the [ALICE Essentials Index](#).

Household costs are compared to income to determine if households are **below the ALICE Threshold**. For household income, ALICE measures rely on the U.S. Census Bureau's [American Community Survey](#) (ACS) – both household tabulated data and individual data from the [Public Use Microdata Sample](#) (PUMS) records. To provide additional details on household assets, this Report also includes analysis of the [Federal Reserve Board's Survey of Household Economics and Decisionmaking](#) (SHED) (2023).

The data included in this Report spans 2010 to 2023 (latest available). This data does not reflect policy or funding changes that have occurred since, yet it provides an important baseline and context to inform current conversations and decision making.

**In Louisiana in 2023, out of 1,819,905 households, there were 351,248 (19.3%) in poverty plus 554,557 (30.5%) that were ALICE, totaling 905,805 (49.8%) below the ALICE Threshold, which is rounded to 50% in this Report.*

LETTERS TO THE COMMUNITY

Louisiana Association of United Ways

Message from Sarah H. Berthelot, President and CEO

ALICE lives in every town and every parish in our state – working as child care providers, aides for the elderly, cashiers, mechanics, waiters, and so much more. Each and every day, we witness countless ALICE workers provide essential services that keep our economy moving, often times without adequate health care access and optimal child care supports. They are our friends, family, and people we rely on every day – through good times and hard times.

Thank you for taking time to learn about ALICE in Louisiana. When ALICE can improve financial stability, we are all stronger and more prosperous.

A very special thanks to the Entergy Corporation for their generous support and activism for ALICE. The Louisiana Association of United Ways is also grateful for the partnership of United Ways throughout our state and the countless governmental, nonprofit, and business partners who work to find ways to help ALICE.

To access a digital copy of this publication, you can visit launitedway.org/ALICE. You can also access expanded ALICE data and resources for Louisiana at UnitedForALICE.org/Louisiana.

Entergy Corporation

Message from Patty Riddlebarger, Vice President of Corporate Social Responsibility

Entergy is pleased to partner with United Ways throughout Louisiana to bring forth the ALICE Report for Louisiana. It is an honor to serve as the Louisiana statewide sponsor since the inception of this project in 2016.

At Entergy, our focus on ALICE is rooted in the economic reality of the communities we serve – we know ALICE well.

That's why we are proud to partner with United Ways to raise awareness about ALICE, and support efforts to help ALICE. We are especially proud of our collaborative work focused on Volunteer Income Tax Assistance (VITA) which provides free tax preparation services for Louisiana ALICE workers so they can access much-needed tax credits to support their families.

Entergy is deeply committed to equipping ALICE families with the tools to succeed while also inspiring action from businesses, policymakers, and communities to build stronger financial stability for hardworking families throughout Louisiana.

United For ALICE

Launched in 2009 with a study of financial hardship in one New Jersey county, the nonpartisan [United For ALICE movement](#) has grown to include 35 states and the District of Columbia. With a commitment to [racial and economic justice](#), United For ALICE partners use the ALICE data to give voice to the challenges ALICE households face. Together, they inspire action, strategies, and policies to ensure that all households have enough income for necessities and can save for the future.

In Louisiana, this research is brought to you by the [Louisiana Association of United Ways](#) and this work is also sponsored by Entergy. Learn more about how the ALICE data is being used to inform strategies and solutions across our partner states in the [ALICE in Action](#) Database.

KEY FINDINGS

Financial hardship: In 2023, of Louisiana's 1,819,905 households, 19% (351,248) were below the Federal Poverty Level (FPL), and another 30% (554,557) were ALICE – households with income above the FPL, but not enough to afford the ALICE Household Survival Budget for their household composition and location. **Combining these two groups, 50%* (905,805) of households in Louisiana were below the ALICE Threshold** (Figure 1).

The cost of basics: In Louisiana in 2023, the ALICE Household Survival Budget was \$29,316 for a single adult and \$81,432 for a family of four with two adults and two children in child care – much higher than the FPL (\$14,580 for an individual and \$30,000 for a family of four). Basic costs varied substantially [by parish](#).

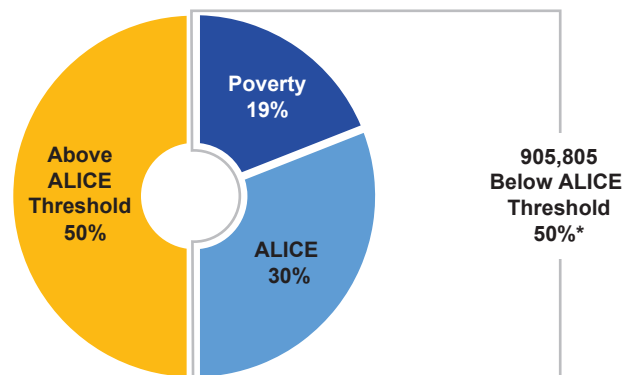

ALICE demographics: There were households below the ALICE Threshold across all demographic groups in Louisiana. However, due to [systemic racism](#), [ageism](#), [gender discrimination](#), and [geographic barriers](#) that limit many families' access to resources and opportunities for financial stability, certain groups were more likely to experience hardship. These groups included Black households (66% below the Threshold) and Hispanic households (49%); households headed by people under age 25 (78%) or age 65 and older (57%); single-parent-headed households (82% single-female-headed, 57% single-male-headed); and households in rural areas (58%).

ALICE in the labor force: Of the 20 most common occupations in Louisiana in 2023, 16 paid less than \$20 per hour. And of all workers in the top 20 occupations, 44% lived in households below the ALICE Threshold, with rates as high as 71% for cooks and 65% for personal care aides.

Trends in Louisiana: Between 2010 and 2023, the total number of households in Louisiana increased by 8%, the number of households in poverty increased by 19%, and the number of ALICE households increased by 17%. Behind these overall trends, there were important changes in the numbers of families with children and 65+ households. In addition, housing affordability continued to be a challenge, and basic costs continued to outpace wages in low-wage jobs.

Stable households, stronger communities: If all households in Louisiana had enough income to meet their basic needs, not only would households' hardship be eased, but there would be a positive economic impact on the wider community through increased consumer spending and contributions to the tax base.

Figure 1. Half of Louisiana Households Faced Financial Instability in 2023

Sources: ALICE Threshold, 2010–2023; U.S. Census Bureau, American Community Survey, 2023

*In Louisiana in 2023, out of 1,819,905 households, there were 351,248 (19.3%) in poverty plus 554,557 (30.5%) that were ALICE, totaling 905,805 (49.8%) below the ALICE Threshold, which is rounded to 50% in this Report.

KEY TERMS

- **ALICE:** Asset Limited, Income Constrained, Employed – households with income above the Federal Poverty Level (FPL) but less than the basic cost of living in their county
- **ALICE Household Survival Budget:** Reflects the minimum costs of household necessities (housing, child care, food, transportation, health care, and technology) plus taxes, adjusted for all U.S. counties and various household compositions
- **ALICE Threshold:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs, calculated for all U.S. counties/parishes
- **Below ALICE Threshold:** Includes households in poverty and ALICE households combined

Data Notes: The income data used in this Report rely on ACS estimates. The ACS is based on a representative sample of housing units and people; therefore, these estimates have a [degree of uncertainty](#). Some data points are geographic averages, others are one- or five-year averages depending on population size (these are reported in the [Data Sheet](#)). Percentages are rounded to whole numbers, sometimes resulting in percentages totaling 99% or 101%. ALICE analysis includes households regardless of work status, as employment is fluid and most households have members who are working, have worked, are out on disability, or are looking for work. ALICE analysis includes families and roommates but does not include people who are unhoused or living in group quarters (such as college residence halls, skilled nursing facilities, and military barracks).

BASIC COSTS: THE ALICE HOUSEHOLD SURVIVAL BUDGET

To capture the reality of household costs across Louisiana, **the ALICE Household Survival Budget is calculated for all parishes and various household compositions.** This budget reflects the minimum cost to live and work in today's economy. (See the Budget Overview on page 6 and use the [ALICE Budget and Income Status Tool](#) for custom budgets by household composition and location.)

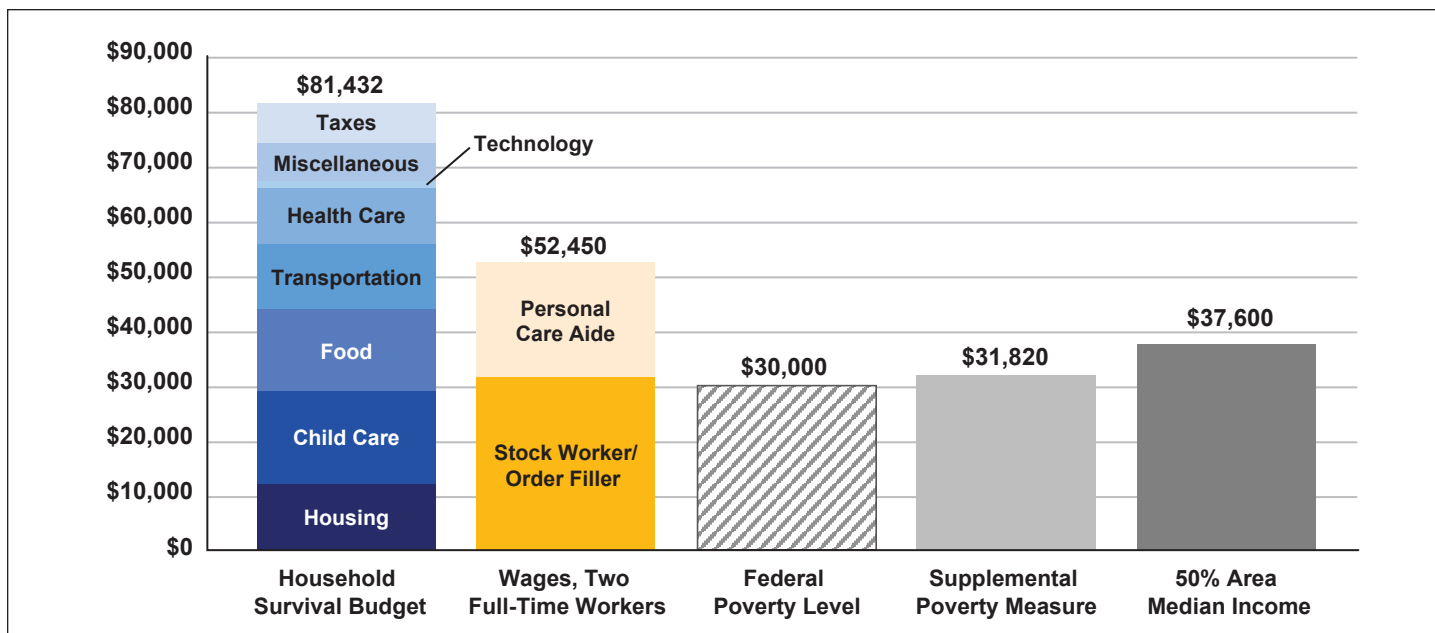

Figure 2 illustrates the mismatch between costs, wages, and official measures of financial hardship. It includes ALICE Household Survival Budget costs for a Louisiana family with two adults and two children in child care (totaling \$81,432 annually) and the combined full-time wages of two common Louisiana occupations – a personal care aide and a stock worker/order filler (totaling \$52,450 annually). Figure 2 also compares costs and income to three governmental measures of financial hardship:

- **The Federal Poverty Level** (FPL): The FPL is based on an [outdated methodology](#) for household costs; it does not account for cost-of-living differences across the continental

U.S., or within states; and it is adjusted by the Consumer Price Index, which underestimates inflation in essential costs (as demonstrated by the [ALICE Essentials Index](#)). In 2023, the FPL was \$14,580 for a single adult and \$30,000 for a family of four.

- **The Supplemental Poverty Measure** (SPM): First published by the U.S. Census Bureau in 2011, the SPM is based on the costs of food, clothing, shelter, and utilities. In 2023, the SPM threshold for a renter household with two adults and two children in Louisiana was \$31,820.
- **Area Median Income** (AMI): The AMI is the midpoint of income distribution within a geographic area (half of households earn more, half earn less). Percentages of AMI are used for federal housing assistance; very low-income households earn less than 50% of AMI, the typical threshold for Section 8 eligibility. AMI is based on income, not costs, so it does not capture whether households can afford basic expenses. In Louisiana in 2023, for a four-person household, 50% of AMI was \$37,600 – more than the FPL and the SPM, but still well below the Household Survival Budget.

Figure 2. Basic Costs Exceeded Wages of Common Jobs and Official Measures of Hardship
Annual Budget, Wages, and Official Measures of Financial Hardship, Family of Four, Louisiana, 2023

Note: [Personal care aides](#) monitor the condition of people with disabilities or chronic illnesses and help them with daily living activities. [Stock workers/order fillers](#) receive, store, and issue merchandise, materials, equipment, and other items from stockrooms, warehouses, or storage yards, and may operate power equipment to fill orders.

Hourly Full-Time Earnings Needed to Support the Household Survival Budget*		\$14.66	\$16.70	\$40.72

*Represents the earnings needed at 40 hours/week, 50 weeks/year to support the annual total, including taxes.

FINANCIAL HARDSHIP BY DEMOGRAPHIC GROUP

There are households below the ALICE Threshold across Louisiana, and they reflect a wide range of demographics and household types (Figure 3). However, some groups had a higher rate of financial hardship in 2023, a result of factors including [systemic racism](#), [ageism](#), [gender discrimination](#), and [geographic barriers](#) that limit many families' access to resources and opportunities for financial stability:

- **Age:** In 2023, the youngest and oldest households had the highest rates of financial hardship: 78% of households headed by someone under age 25 and 57% of households headed by someone age 65 and over lived below the ALICE Threshold in Louisiana. By comparison, rates were lower for those in their prime working years, with 45% each of households headed by people age 25–44 and households headed by those age 45–64 living below the Threshold.
- **Race/ethnicity:** Rates of financial hardship differed substantially by race/ethnicity in Louisiana. In 2023, the largest number of households below the ALICE Threshold were White (447,894), making up 42% of all White households. Black households were the next largest group below the Threshold (354,843), yet they made up 66% of all Black households. There were also 49,851 Hispanic households below the Threshold, making up 49% of all Hispanic households. Other, smaller groups also had high rates of hardship: 58% of Native Hawaiian/Pacific Islander households, 48% of American Indian/Alaska Native households, and 49% of households headed by someone of Two or More Races were below the Threshold. Asian households had the same rate as White households – the lowest in the state (42%).
- **Household type:** In 2023, 50% of single or cohabiting households without children headed by someone under age 65 – the most common household type – were below the ALICE Threshold in Louisiana. Among all families with children, 42% were below the Threshold. And longstanding disparities in financial hardship by household type remained: 82% of single-female-headed families and 57% of single-male-headed families were below the Threshold, compared to 20% of married-parent families.
- **Location:** In 2023, the rate of financial hardship was higher in rural areas of Louisiana, where more than half of all households were below the ALICE Threshold (58%), compared to 48% in urban areas. By parish, the percentage of households below the Threshold was highest in East Carroll Parish at 75% and lowest in Cameron Parish at 33%. Hardship varied even within parishes: For example, in East Baton Rouge Parish, the percentage of households below the Threshold ranged from 30% in ZIP code 70817 (Shenandoah/Old Jefferson) to 83% in ZIP code 70805 (downtown Baton Rouge/Mid City North).

INTERACTIVE ALICE DATA

ALICE data is available online by [race/ethnicity](#), [age of householder](#), [household type](#), [parish](#), [parish subdivision](#), [census designated place](#), [ZIP code](#), and [legislative district](#). See all available geographies and more on the [ALICE Mapping Tool](#).

Figure 3. Financial Hardship Varied Substantially by Demographic Group

Key Demographic Groups, Louisiana, 2023

	Total	Below ALICE Threshold	<div> <div></div> Poverty <div></div> ALICE <div></div> Above ALICE Threshold </div>		
ALL HOUSEHOLDS	1,819,905	905,805	19%	30%	50%
AGE					
Under 25 Years	76,704	59,969	43%	35%	22%
25 to 44 Years	599,601	270,849	21%	24%	55%
45 to 64 Years	636,378	285,406	17%	28%	55%
65 Years and Over	507,222	289,581	17%	40%	43%
RACE/ETHNICITY					
American Indian/ Alaska Native	9,178	4,372	13%	35%	52%
Asian	27,734	11,560	11%	31%	58%
Black	537,807	354,843	22%	44%	34%
Hispanic	101,159	49,851	11%	38%	51%
Native Hawaiian/ Pacific Islander	1,125	653	12%	46%	42%
Two or More Races	87,546	42,594	12%	36%	51%
White	1,072,300	447,894	10%	32%	58%
HOUSEHOLD TYPE					
Married With Children	283,862	56,551	8%	12%	80%
Single-Female-Headed With Children	143,204	117,921	57%	26%	18%
Single-Male-Headed With Children	43,802	24,945	25%	32%	43%
Single or Cohabiting, Under 65, no Children	841,815	416,807	18%	32%	50%
RURAL/URBAN					
Rural	276,886	159,932	25%	33%	42%
Urban	1,543,019	745,873	18%	30%	52%

Note: The groups shown in this figure are based on head of household and overlap across categories. Within the race/ethnicity category, all racial categories except Two or More Races are for one race alone. Race and ethnicity are overlapping categories; in this Report, the American Indian/Alaska Native, Asian, Black, Native Hawaiian (includes other Pacific Islanders), and Two or More Races groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race. Because household poverty data is not available for the American Community Survey's race/ethnicity categories, annual income below \$15,000 is used as a proxy. Parishes are defined as rural or urban based on the USDA's designation of metropolitan or non-metropolitan at the census tract level. Parishes with 50% or more of the population in metropolitan tracts are designated as urban; those with 50% or more of the population in non-metropolitan tracts are designated as rural.

*In Louisiana in 2023, out of 1,819,905 households, there were 351,248 (19.3%) in poverty plus 554,557 (30.5%) that were ALICE, totaling 905,805 (49.8%) below the ALICE Threshold, which is rounded to 50% in this Report.

Sources: ALICE Threshold, 2023; U.S. Census Bureau, American Community Survey, 2023

ALICE IN THE LABOR FORCE

Workers below the ALICE Threshold increasingly bear the brunt of economic change and uncertainty as the workforce shifts to incorporate new [technology and automation](#) and as employers increase [reliance on non-standard work arrangements](#) – like [hourly paid work, part-time employment, and gig work](#). These [arrangements](#) make it easier to [reduce work hours or cut employment](#) altogether when the economy ebbs (which happened to a large degree during the COVID-19 pandemic) and expand them when demand increases (which happens seasonally for a range of industries such as hospitality, recreation, and retail sales).

In 2023, of the 20 most common occupations in Louisiana as reported by the Bureau of Labor Statistics (BLS), 16 still paid less than \$20 per hour. And of the workers in these 20 occupations, 44% were living in households below the ALICE Threshold. Occupations with the largest share of workers in households below the Threshold included cooks (71%), personal care aides (65%), fast food/counter workers (63%), and food preparation workers (63%) (Figure 4).

Figure 4. A Large Share of Workers in the 20 Most Common Occupations Were Below the ALICE Threshold

Labor Characteristics, Most Common Occupations, Louisiana, 2023

Most Common Occupations	Total Employment (BLS)	Percent of Workers Below ALICE Threshold (ACS PUMS)	Median Hourly Wage (BLS)
Cashiers	53,020	58%	\$12.89
Retail Salespersons	48,150	39%	\$13.59
Laborers and Movers, Hand	45,040	39%	\$15.38
General and Operations Managers	43,130	18%	\$48.80
Driver/Sales Workers and Truck Drivers	42,680	31%	\$20.36
Janitors and Building Cleaners	41,260	54%	\$12.28
Personal Care Aides	39,120	65%	\$10.00
Fast Food and Counter Workers	38,580	63%	\$10.74
Registered Nurses	36,840	11%	\$36.85
Secretaries and Administrative Assistants	32,880	27%	\$17.80
Office Clerks	32,220	37%	\$14.08
Waiters and Waitresses	31,300	59%	\$10.69
Cooks	29,910	71%	\$12.57
Food Preparation Workers	29,250	63%	\$10.76
Elementary and Middle School Teachers	29,180	15%	\$25.54
Stockers and Order Fillers	27,780	57%	\$15.22
Customer Service Representatives	27,330	44%	\$16.99
Other Healthcare Support Workers	25,200	63%	\$16.08
Construction Laborers	24,760	47%	\$18.89
Maintenance and Repair Workers, General	22,380	26%	\$18.79

Note: BLS = Bureau of Labor Statistics; ACS PUMS = American Community Survey Public Use Microdata Sample. This figure includes all workers with income from these occupations (full-time, part-time, and freelance). [ALICE Threshold status](#) is determined by comparing workers' total household income to the ALICE Household Survival Budget for their household composition and location.

Sources: ALICE Threshold, 2023; Bureau of Labor Statistics–Occupational Employment Statistics, 2023; U.S. Census Bureau, American Community Survey, PUMS, 2023

The Labor Landscape

Full- and part-time work: Though the majority of adults in Louisiana were working in 2023 and most households had at least one worker, only 21% of the population age 16 and over had the security of a full-time job with a salary. Of those in the labor force (blue bars in Figure 5), nearly two-thirds (65%) were paid hourly and/or worked part time. Workers who are paid by the hour are more likely to have fluctuations in income due to [schedule changes and variable hours](#), and they are [less likely to receive benefits](#), such as health insurance, paid time off, family leave, or retirement plans.

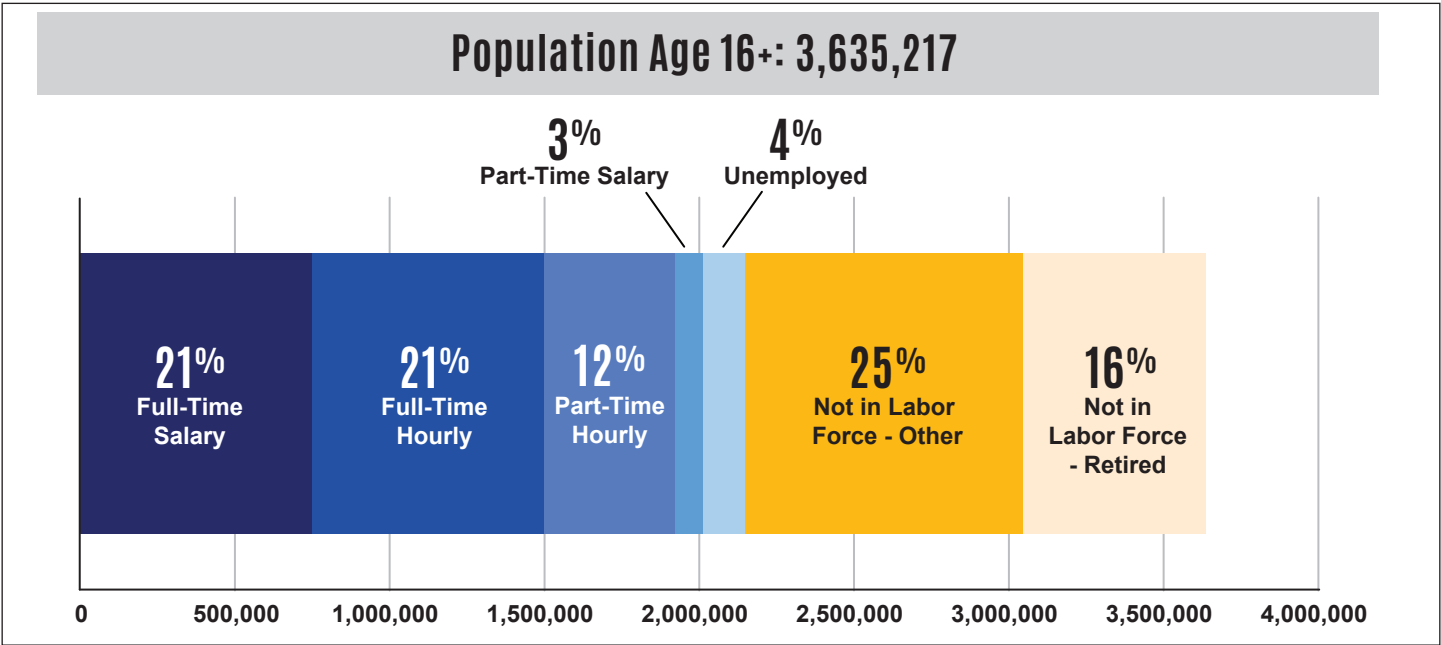

Unemployment: In 2023, 4% of Louisianians age 16 and over were unemployed – not currently working but looking for work in the prior four weeks (light blue bar in Figure 5). The

unemployment rate for workers below the ALICE Threshold in different parts of the state is often notably higher than the official rate. To see more data on workers below the ALICE Threshold in your community, visit [UnitedForALICE.org/ALICE-EVD](#).

Out of the labor force: Another 41% of Louisianians age 16 and over were out of the labor force in 2023 (gold bars in Figure 5), including those who were retired (16%) and those who were out of the labor force for other reasons, such as disability, health issues, caregiving responsibilities, or student status (25%).

For more data on the labor landscape and occupations in your state, visit [UnitedForALICE.org/Labor-Force/Louisiana](#).

Figure 5. Less Than One-Fourth of People Worked Salaried, Full-Time Jobs
Labor Status, Population Age 16+, Louisiana, 2023

Note: Data for full- and part-time jobs is only available at the national level; these national rates (approximately 50% of full-time workers and 82% of part-time workers paid hourly) have been applied to the total state workforce to calculate the breakdown shown in this figure. Full-time represents a minimum of 35 hours per week at one or more jobs for 48 weeks per year.

Sources: Federal Reserve Bank of St. Louis, 2023; U.S. Census Bureau, American Community Survey, 2023

SPOTLIGHT ON SAVINGS AND ASSETS

When households are not earning enough to cover basic costs, their ability to save for emergencies, retirement, or other future needs is greatly hindered. According to the [Federal Reserve Board's Survey of Household Economics and Decisionmaking](#) (SHED), in 2023, respondents below the ALICE Threshold in the [West South Central Census Division](#) (which includes Louisiana) were far less likely than those above the Threshold to have savings that could cover three months of expenses in the event of an emergency (26% vs. 64%), or to have retirement assets (33% vs. 82%). Additionally, non-retirees below the Threshold were less likely to say that their retirement savings plan was on track (7%, vs. 32% above the Threshold).

TRENDS IN LOUISIANA

Over the last decade, the number of ALICE households in Louisiana has been on the rise as wages have failed to keep up with the cost of household basics. When prices increase faster than wages, purchasing power decreases. This is especially challenging for ALICE households that are already struggling to make ends meet.

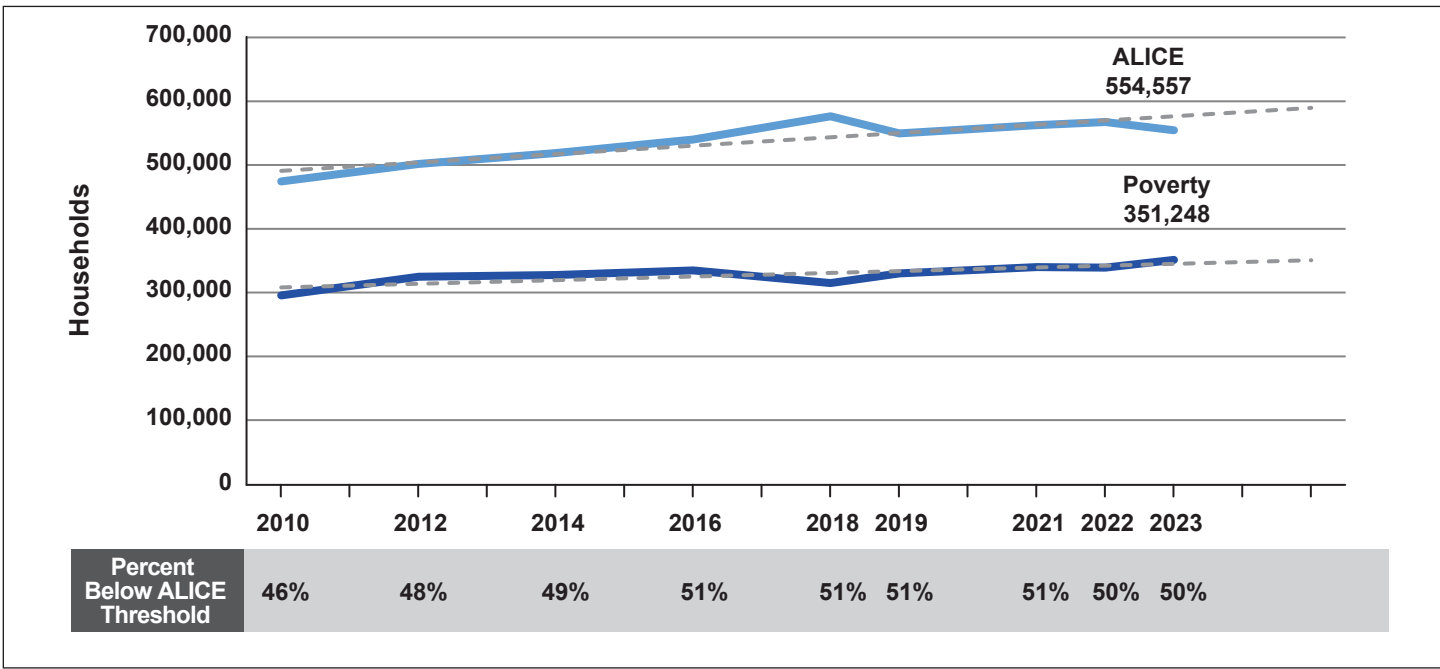

Between 2010 and 2023, the total number of households in Louisiana increased by 8%, the number of households in poverty increased by 19%, and the number of ALICE households

increased by 17%. During this period, households below the ALICE Threshold in Louisiana consistently made up between 46% and 51% of all state households (Figure 6).

Most recently, from 2022 to 2023, the number of ALICE households decreased slightly (contrary to the general trend for this group) and the number of households in poverty increased slightly. It will be important to track if these trends continue or shift direction in the coming years.

Figure 6. The Number of ALICE Households Decreased Slightly With Most Recent Update, Yet has Trended Upward Over Time

Number of Households by Income, Louisiana, 2010–2023

Note: The gray dashed trend lines in this figure highlight the general direction of the point-in-time data for the years shown. These lines indicate whether the numbers of ALICE and poverty-level households have been generally increasing, decreasing, or remaining flat. The ALICE trend line is statistically significant at $p=0.001$ and the Poverty trend line is statistically significant at $p<0.01$.

Sources: ALICE Threshold, 2010–2023; U.S. Census Bureau, American Community Survey, 2010–2023

Families with children: Following the national trend, the number of households with children under age 18 in Louisiana declined from 2010 to 2023, falling 5%. During the same period, the number of these households below the ALICE Threshold remained largely unchanged overall. However, by family type, the trends varied: The number of married-parent families decreased, while the number of these households below the Threshold increased; the number of single-female-headed families decreased, as did the number of these households below the Threshold; and for single-male-headed families, both the total number and the number below the Threshold increased.

Older Americans: With the [aging of the Baby Boomer generation](#), households headed by people age 65 and over were the fastest-growing age group in Louisiana (up 43% between 2010 and 2023). They were also the age group with the most substantial increase in the number of households below the ALICE Threshold (reaching 57% of all 65+ households in 2023).

Wages: Across the country, [wages increased from 2018 to 2023](#), growing fastest in 2022. In 2023, wage growth slowed yet remained above pre-pandemic levels. But while wage increases help households cover costs, they have generally not been enough to make up for years of falling behind. For example, in

2010, [retail sales workers](#) – selling goods ranging from clothes to appliances to cars – earned a median wage of \$9.35 per hour (\$19,460 annually for full-time work) in Louisiana. This worker’s household fell \$10,949 short of the annual Household Survival Budget for a family with one adult and one school-age child (\$30,409). By 2023, the median wage for this occupation increased by 45%, to \$13.59 per hour (\$28,260 annually, full-time). Yet the annual Household Survival Budget for one adult and one school-age child also grew (to \$44,172), leaving these essential workers \$15,912 short of covering basic costs – even further behind than they were in 2010.

Housing: [Housing costs continued to challenge](#) households below the ALICE Threshold. In 2023, 25% of all renter households below the Threshold in Louisiana paid 30% to 49% of their income on housing. An additional 40% paid half of their income or more. **Combined, 65% of all renter households below the Threshold in Louisiana were rent burdened** (paying 30% or more of their income on rent and utilities), similar to the rate in 2021. For homeowners below the Threshold, 44% were housing burdened (paying 30% or more of their income on homeowner costs, including mortgage payments, utilities, and homeowner’s insurance), up from 41% in 2021.

STABLE HOUSEHOLDS, STRONGER COMMUNITIES

Households below the ALICE Threshold play a vital role in their communities – as neighbors, family members, and civic participants. They also contribute to their local economies – as workers, consumers, and taxpayers. Yet these households, nearly 906,000 in Louisiana, did not earn enough to cover basic costs in 2023.

This is not a new problem. The share of households below the ALICE Threshold in Louisiana has varied only slightly for more than a decade, persisting through shifting economic conditions and the COVID-19 pandemic, and across political administrations.

This is not a small problem. In Louisiana, 50% of all households were below the ALICE Threshold in 2023. These households face [day-to-day challenges](#) of trying to make ends meet, while also being more vulnerable to the impacts of crises, both widespread (i.e., natural disasters, public health emergencies) and personal (from unexpected car repairs to major health issues). And while isolated interventions can help ameliorate some of these challenges, the core issue remains: There is a wide gap between households' income and what they need to make ends meet.

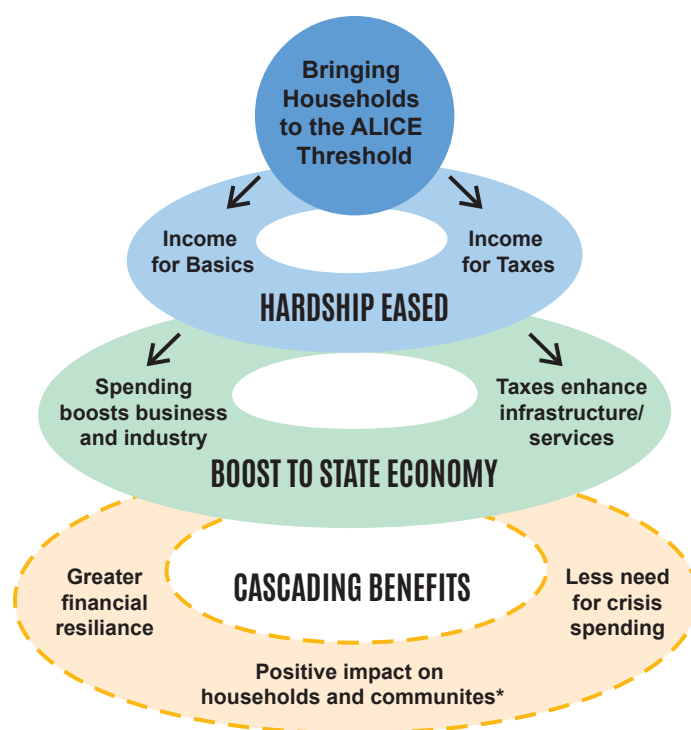

But what if all households had enough income to cover their basic needs? In Louisiana, bringing all households to the ALICE Threshold would have taken \$21 billion in 2023. Working to meet this gap through coordinated effort and investment from multiple sectors, including government, nonprofit, business, and philanthropy, would change the trajectory for Louisianians who are struggling financially – and it would also benefit the state economy.

This matters for all of us. Households below the ALICE Threshold are more likely to [spend than to save](#) additional income, so this income would largely go back into the economy as households spend to cover costs and pay additional taxes.

Increased spending in the local economy has a [multiplier effect](#). Mark Zandi, Chief Economist at [Moody's Analytics](#), [estimates economic multipliers](#) for additional household income spending on food (1.57), utilities (1.27), and other necessities (1.42). For instance, every dollar [spent on food](#) spurs an additional 57 cents in business growth in the retail, agriculture, trucking, and rail freight industries.

There are also economic multipliers for the additional income taxes that households below the ALICE Threshold would pay.

Zandi estimates economic multipliers for tax revenue spent on aid to state and local governments (1.27) and transportation infrastructure (1.23), meaning that every dollar households below the Threshold pay in additional taxes would fuel even more in state and local investments.

** See Figure 7 for additional details/sources related to the benefits of meeting basic needs.*

Beyond these economic contributions, there are cascading benefits of meeting basic needs in Louisiana (Figure 7). If all households are on a more solid financial footing, communities can look beyond crisis spending and poverty alleviation toward broader community well-being. For example, funding that went toward emergency housing or food assistance could be redirected to create more affordable housing and locally grown food systems for the long term. Funding could also be used to enhance opportunities for civic engagement, arts, and recreation. Together, these investments can improve physical and mental health and overall quality of life – not just for ALICE families, but for entire communities and the state as a whole.

Figure 7. Cascading Benefits of Meeting Basic Needs

If households have sufficient income for...	Benefits for ALICE Households	Benefits for the Wider Community
 Safe, Affordable Housing	Improved physical and mental health through safer environments and reduced stress ; improved educational performance and outcomes for children; greater stability for household members; a means to build wealth and racial equity for homeowners	Expanded and updated housing stock , reduced systemic housing inequities ; lower health care costs ; reduced homelessness ; increased opportunities for jobs and more money spent in local communities
 Quality Child Care and Education	Increased labor force participation , lifetime earnings and retirement security for women ; health benefits for children , school readiness , improved educational attainment and graduation rates ; improved performance in higher education ; higher lifetime earnings	Reduced racial/ethnic inequalities in learning and development ; positive health, education, and economic outcomes for children and families ; stronger community economies ; more homebuyers and higher property values through availability of quality child care
 Adequate Food	Decreased food insecurity; improved health (especially for children and adults age 65 and over); decreased likelihood of developmental delays and behavioral problems in school	Lower health care costs ; improved school and workplace productivity; less spending on emergency food services ; greater equity by gender, race/ethnicity and immigration status
 Reliable Transportation	Decreased transportation insecurity ; improved access to work/job opportunities , school and child care , health care and social services, food/retail markets , and support systems (friends, family, faith communities)	Improved air quality and reduced gasoline consumption/carbon emissions ; increased economic opportunity through returns on investment ; a more diverse labor market ; decreased income disparities ; more integrated neighborhoods
 Quality Health Care	Better mental and physical health (including increased life expectancy); improved access to preventive care ; fewer missed days of work and school ; decreased need for emergency services ; lower share of income spent on health	Decreased health care spending and strain on emergency services; reduced racial/ethnic disparities in insurance coverage and access to care ; fewer communicable diseases; improved workplace productivity ; decreased wealth-health gap ; better outcomes during health crises
 Reliable Technology	Improved access to job opportunities ; expanded access to health information and telemedicine services ; increased job and academic performance	Closing the “ digital divide ” in access to technology by income; increased economic development ; increased connectivity and social inclusion that helps reduce social, economic, and political disparities
 Savings	Ability to withstand emergencies without impacting long-term financial stability; greater asset accumulation over time (e.g., interest on savings ; ability to invest in education, property, or finance a secure retirement)	Less spending on public services to cover basic needs like health care, food, and housing — especially for unexpected or emergency expenses

We All Have a Role to Play

Our vision is a country where ALICE families not only have sufficient income to afford the basics but can also save and invest in their future. This is a vision not only for ALICE, but for the nation as a whole. The information presented in this Report can help stakeholders prioritize economic prosperity for all. We all have a role to play:

Community members:

- Raise awareness of ALICE through ALICE [news](#) and [videos](#) or [share your experiences](#)
- [Connect with your local United Way](#) for advocacy, support, and volunteer opportunities
- Advocate for the continuation of current government datasets (e.g., American Community Survey, Fair Market Rents). Consistent data over time is crucial for informed decision-making, effective policy implementation, and accountability.

Policymakers and nonprofits:

- Explore ALICE by district using the [Legislative District Tool](#)
- [Map ALICE by location](#) to pinpoint need and identify gaps in community resources
- Use interactive tools from the Federal Reserve Bank of Atlanta (which use ALICE budgets), including the [Policy Rules Database](#) and the [Career Ladder Identifier and Financial Forecaster](#)
- See examples of [policies, practices, and programs](#) United For ALICE partners have implemented using ALICE data

Employers:

- [Implement strategies](#) that support the well-being and retention of ALICE workers while also boosting engagement, productivity, and the bottom line
- Advocate for community resources that support your employees – from affordable housing to quality child care

ALICE IN ACADIA PARISH

2023 Point-in-Time Data

Population: 57,218 • **Number of Households:** 21,529

Median Household Income: \$45,266 (state: \$58,229)

Labor Force Participation Rate: 55.3% (state: 59.2%)

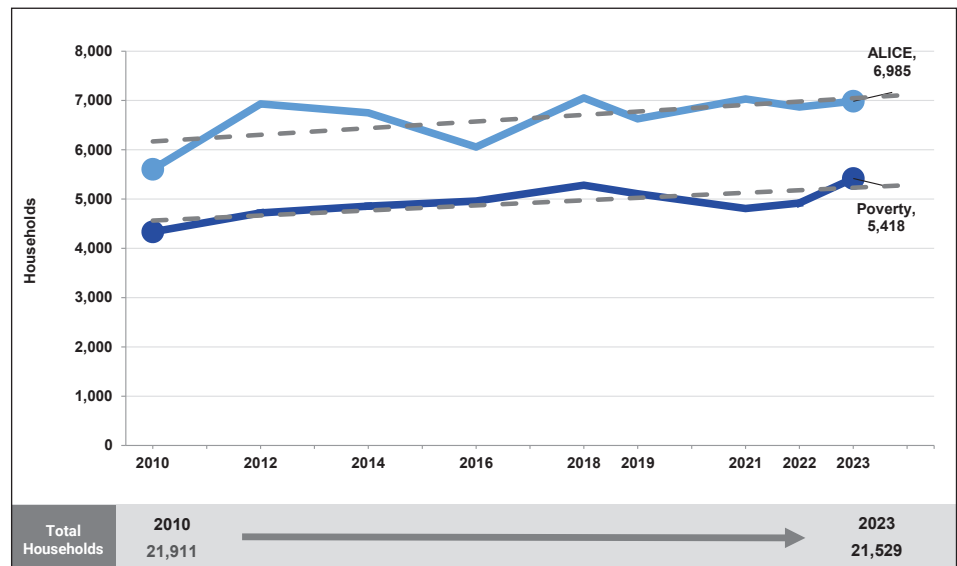

ALICE Households: 32% (state: 30%) • **Households in Poverty:** 25% (state: 19%)

Trends in Financial Hardship

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

Households move below or above the ALICE Threshold as economic factors and circumstances change. The line graph to the right shows the number of ALICE and poverty-level households (solid blue lines), as well as the trend over time (dotted gray lines). **By 2023, 12,403 households (58%) were below the ALICE Threshold in Acadia Parish.**

ALICE and Poverty-Level Households, Acadia Parish, 2010–2023

Note: See an interactive version of this data at UnitedForALICE.org/Louisiana

Sources: ALICE Threshold, 2010–2023; American Community Survey, 2010–2023

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in Acadia Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

To see costs for different household compositions in Acadia Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

Household Survival Budget, Acadia Parish, 2023

	Single Adult	2 Adults, 1 Infant, 1 Preschooler
Monthly Costs		
Housing	\$588	\$874
Child Care	–	\$1,421
Food	\$450	\$1,221
Transportation	\$456	\$983
Health Care	\$186	\$850
Technology	\$86	\$116
Miscellaneous	\$177	\$546
Taxes	\$265	\$569
Monthly Total	\$2,208	\$6,580
ANNUAL TOTAL	\$26,496	\$78,960
Hourly Wage*	\$13.25	\$39.48

**Full-time wage required to support this budget*

ALICE IN CALDWELL PARISH

2023 Point-in-Time Data

Population: 9,563 • **Number of Households:** 3,686

Median Household Income: \$44,957 (state: \$58,229)

Labor Force Participation Rate: 49.7% (state: 59.2%)

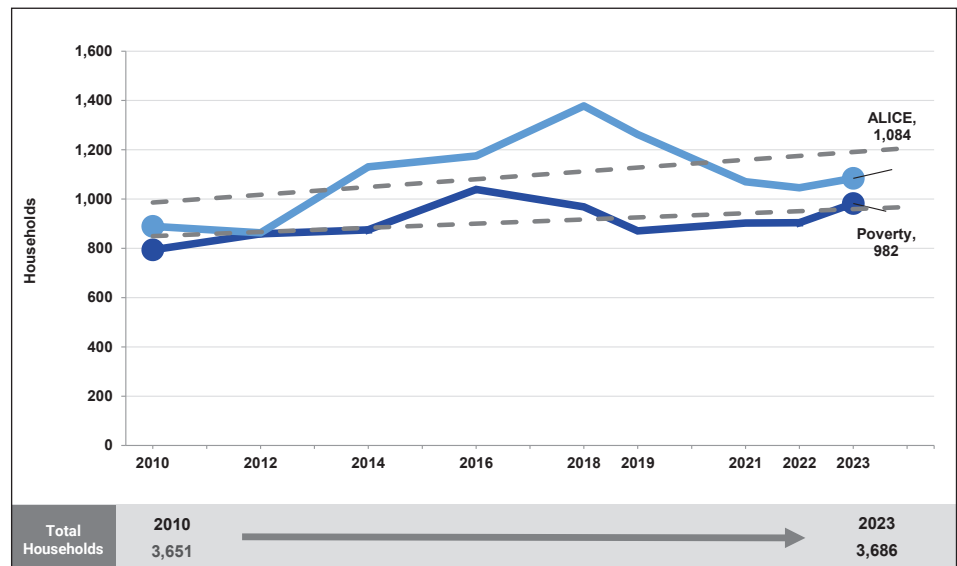

ALICE Households: 29% (state: 30%) • **Households in Poverty:** 27% (state: 19%)

Trends in Financial Hardship

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

Households move below or above the ALICE Threshold as economic factors and circumstances change. The line graph to the right shows the number of ALICE and poverty-level households (solid blue lines), as well as the trend over time (dotted gray lines). **By 2023, 2,066 households (56%) were below the ALICE Threshold in Caldwell Parish.**

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in Caldwell Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

To see costs for different household compositions in Caldwell Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in East Carroll Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

Trends in Financial Hardship

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

Households move below or above the ALICE Threshold as economic factors and circumstances change. The line graph to the right shows the number of ALICE and poverty-level households (solid blue lines), as well as the trend over time (dotted gray lines). **By 2023, 5,521 households (50%) were below the ALICE Threshold in Iberville Parish.**

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in Iberville Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

To see costs for different household compositions in Iberville Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in Ouachita Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in St. Bernard Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

Counties and Places with populations over 65,000 are 1-year averages; otherwise, they are 5-year averages. Geographies with fewer than 100 households are not included. Therefore, totals will not match the county-level numbers.

ALICE IN ST. MARTIN PARISH

2023 Point-in-Time Data

Population: 51,559 • **Number of Households:** 19,963

Median Household Income: \$53,394 (state: \$58,229)

Labor Force Participation Rate: 59.2% (state: 59.2%)

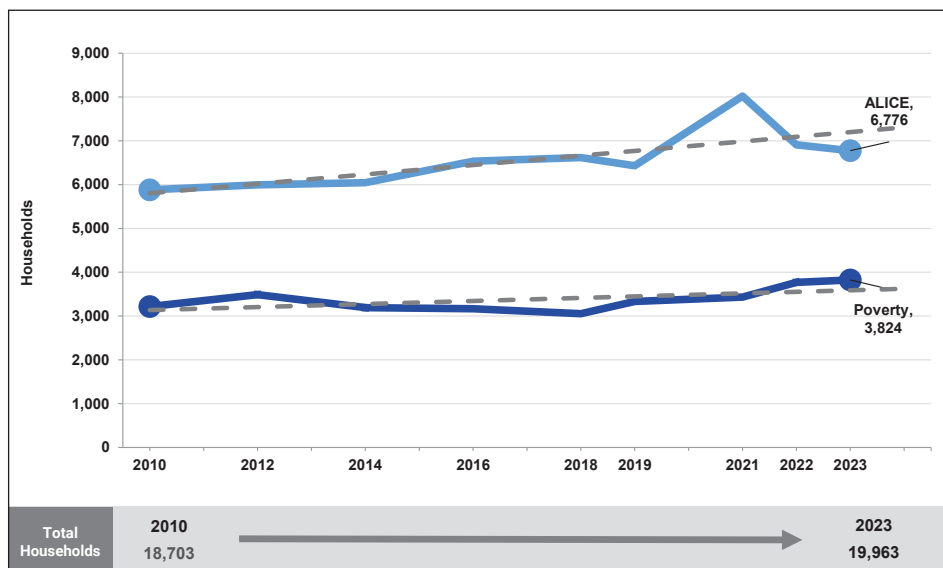

ALICE Households: 34% (state: 30%) • **Households in Poverty:** 19% (state: 19%)

Trends in Financial Hardship

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

Households move below or above the ALICE Threshold as economic factors and circumstances change. The line graph to the right shows the number of ALICE and poverty-level households (solid blue lines), as well as the trend over time (dotted gray lines). **By 2023, 10,600 households (53%) were below the ALICE Threshold in St. Martin Parish.**

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in St. Martin Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

To see costs for different household compositions in St. Martin Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in Union Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.

To see costs for different household compositions in Union Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

Note: Municipal-level data on this page is 1- or 5-year averages for U.S. Census Bureau Places, which include Incorporated Places and Census Designated Places (CDPs). Counties and Places with populations over 65,000 are 1-year averages; otherwise, they are 5-year averages. Geographies with fewer than 100 households are not included. Therefore, totals will not match the county-level numbers.

ALICE IN WEST FELICIANA PARISH

2023 Point-in-Time Data

Population: 15,381 • **Number of Households:** 3,911

Median Household Income: \$74,277 (state: \$58,229)

Labor Force Participation Rate: 44.7% (state: 59.2%)

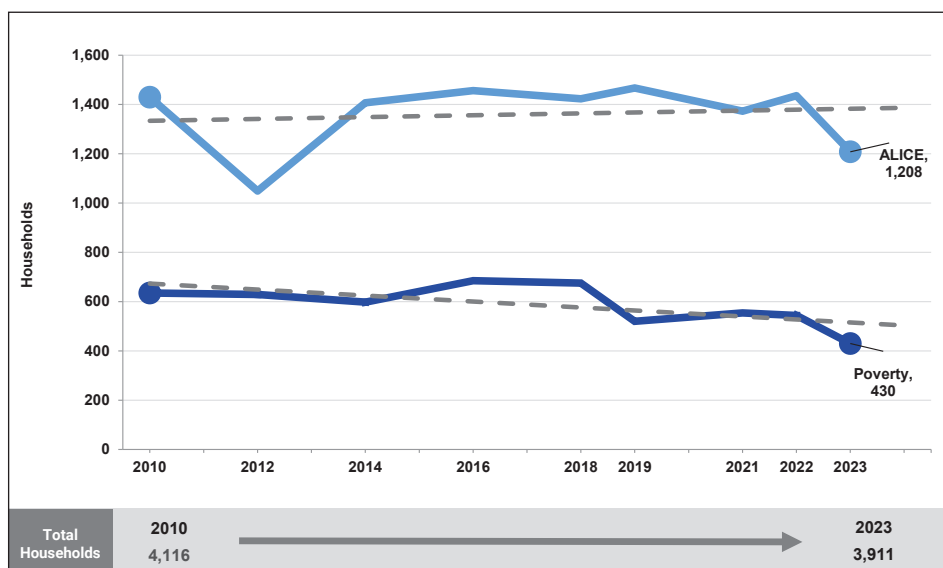

ALICE Households: 31% (state: 30%) • **Households in Poverty:** 11% (state: 19%)

Trends in Financial Hardship

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

Households move below or above the ALICE Threshold as economic factors and circumstances change. The line graph to the right shows the number of ALICE and poverty-level households (solid blue lines), as well as the trend over time (dotted gray lines). **By 2023, 1,638 households (42%) were below the ALICE Threshold in West Feliciana Parish.**

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the current economy and includes housing, child care, food, transportation, health care, technology, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and by household composition, as costs can vary greatly depending on location and household needs.

In 2023, household costs in West Feliciana Parish were well above the Federal Poverty Level of \$14,580 for a single adult and \$30,000 for a family of four.
