PRIMED MDF

Medium Density Fiberboard (MDF) is crafted from refined wood fibers and contains 95% recycled materials, making it both versatile and eco-friendly. Its flexibility allows for endless design possibilities, and its smooth surface is perfect for painting, offering excellent adhesion and minimal expansion or contraction for a flawless finish.

POPLAR

Versatile and affordable, poplar opens doors to a myriad of possibilities. Ideal for high-traffic areas, poplar doors withstand everyday wear and tear while maintaining their aesthetic appeal. Poplar has a fine and even texture with straight graining and is ideal for prefinishing with both stain and paint.

OAK

Oak, a slow-growing hardwood, is known for its dense, heavy nature and exceptional durability. With its prominent straight grain and coarse texture, oak is an excellent choice for staining, enhancing its natural beauty and timeless appeal.

KNOTTY ALDER

Knotty alder, native to the Pacific Northwest, brings a distinctive rustic charm and natural beauty. Typically light brown with warm undertones of red and peach, it takes finishes beautifully.

HARDWARE

Hinges

Ball bearing hinges deliver smooth, silent operation with reduced friction and extended lifespan. Ideal for high-traffic areas and heavy doors, they provide consistent, low-maintenance performance.

Bypass Track

Bypass track maximizes room functionality by eliminating door swing radius, providing smooth operation and easy access to closets while maintaining a clean, streamlined appearance.

Double Door Hardware

Magnetic Catch Hardware

This product is ideal for applications where a typical ball catch would have been specified, such as double doors on a closet or the entrance to an office.

- Eliminates the need for adjustments
- Magnets will never wear out
- Latch noise is a thing of the past

Ball Catch Hardware

Ball catch hardware is used to secure the tops of double doors that do not require a locking mechanism, such as hallway or closet doors.

- Adjustable tension for customized door closure
- Durable, low-maintenance design
- Works well with dummy door knobs or pulls

Barn Hardware

Almost any door can become a barn door with the right hardware. To simplify the process, we provide complete barn door kits for you and your customers.

Track kit includes:

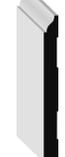

hangers with bearing wheels, door stops, floor guides, anti jumps, spacers, bolts and extensions
