

Proxyclick Visitor Management Solution

Proxyclick Flow - Employee Check-Ins

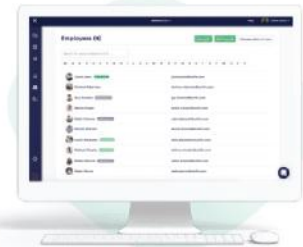

A comprehensive set of capabilities to support a safe and compliant return to work for employees, contractors, and visitors.

Create a safe, welcoming workplace

- **Touch-less check-in:** Reduce the risk of spreading COVID-19 with our fully touch-less experience
- **Advanced Safety:** See who is, will be and has been your premises and contact them in case of an emergency.
- **Smart rules:** Control exactly how you want employees to enter your place with our highly customizable workflows.

Deliver the future of work - now

- **Desk & Room booking:** Control the flow of your workplace while providing your employees a way to do focused work to stay productive. (Our partners; Robin & Condeco)
- **Shift & Pod Scheduling:** Manage your building capacity/occupancy while empowering your employees to plan their visits with teammates and stay connected*
- **Leverage existing tools:** Ability to integrate existing tools with our growing ecosystem of 30+ integrations.

Save costs, save time

- **Remote Registration:** Save time by allowing your visitors to complete key questions ahead of their visit (QR code generated if touch-less check in enabled)
- **Self-Service and recurring visits:** Increase visitor satisfaction and save time with our self-service check in capabilities paired with recurring visits for your visitors.
- **Bulk actions/multi locations:** Reduce operational errors and costs with our bulk administration and multi-location management

proxyclick

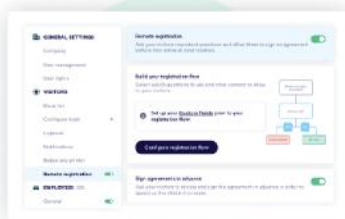

Connecting people to the places they need to be.

Proxyclick's comprehensive enterprise visitor management solution helps facility and security leaders across 35 million+ visitor check-ins in more than 120 countries.

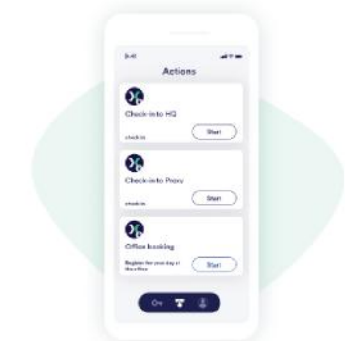

We help companies ensure end-to-end visitor security and improve lobby efficiency, all while maintaining the highest global privacy standards.

Visitor security - your way.

- **Health and safety features:** Reduce the risk of spreading COVID-19 with touchless check-ins, screening questionnaires & contact tracing.
- **Smart rules:** Customize exactly how visitors enter your locations with our highly configurable workflows.
- **Watchlists & ID Match:** Maintain full control with internal and external watchlists using ID Match.
- **Your lobby, your brand:** Project your brand to your visitors with branded emails, kiosks, and badges.

Cut costs, save time.

- **Remote registration:** Save time by allowing your visitors to answer key questions ahead of their visit (and get a QR code for access).
- **Bulk actions/multi-locations:** Reduce operational errors and costs with bulk administration and multi-location management.
- **Self-service and recurring visits:** Increase visitor satisfaction and save time with self-service check-in capabilities.
- **Seamless integration:** Keep using the tools you already rely on to get your work done.

Protect your data and privacy.

- **Automatic data deletion:** Comply with local and international privacy regulations with highly customizable data retention/deletion rules.
- **Audit reporting:** Satisfy regulatory requirements with one-touch access to detailed audit reports of visitors flow across your locations.
- **Industry-leading security and privacy certifications:** Including GDPR, SOC 2 Type 2, ISO 27001.
- **NDA's:** Preloaded NDA agreements.

Prepare, Prevent, and Protect

for a Return Ready workplace!

Proxyclick's visitor management system is committed to helping your business become Return Ready, by providing you the technology you need to transition to your return to the office.

Prepare

Screen visitors ahead of time with custom questionnaires.

Educate visitors by sending ahead health and safety instructions with mandatory videos and images.

Prevent

Equip visitors with unique QR codes they can scan at front desk tablets or at access control points for a touchless check-in.

Deny visitors' access to your building if they do not meet your health and safety criteria.

Protect

Easily export a full audit trail of visitor logs to enable contact tracing in case of an outbreak.

Uphold data privacy laws with automatic data deletion of sensitive visitor information after a specific date.
