

ZUCCHETTI.

BRAND ZUCCHETTI

For 95 years, Zucchetti has been manufacturing design faucets and bathroom accessories. An excellent production made in Italy, supervised by skilled and highly specialized staff, using only the best, carefully selected raw materials and cutting-edge technological machineries, to always guarantee the best results.

The product range is wide and cross cutting to adapt elegantly to every interior design project with elegance and to be functional for any user.

Research and innovation, design culture, quality and customer service are part of the Zucchetti's experience, which over the years made use of the collaboration of many prestigious international design firms, to interpret and anticipate the needs of a global market. Zucchetti is a consolidated industrial reality which nevertheless has the capability and the will to offer in parallel a tailoring activity, capable of accompanying every design need.

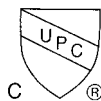

QUALITY

Zucchetti maintains high quality standards in relation to its products, manufacturing processes and environmental policies, pursuing a corporate strategy focused on continuous improvement.

In agreement with the UNI EN ISO 9001 certification, the faucet collections are made to last over time and all items are rigorously and carefully tested, both in-house and by external laboratories, which guarantee reliability and durability, renewing and expanding product certifications year after year.

At Zucchetti, ensuring quality and service is a priority. With this in mind, the manufacturing plants and equipment are constantly updated, the professionalism of human resources is supported thanks to targeted training programs, aimed at guaranteeing the protection of health and safety too. This has led to prestigious UNI EN ISO 45001 certification, which represents the highest international standard in this field.

In 2024, obtaining the UNI Pdr 125 certification for gender equality demonstrates Zucchetti's concrete commitment to promoting a fair and inclusive work environment and was a further important step in the path of continuous improvement that characterizes the company's approach to the future.

ECO SUSTAINABILITY

Ecological habits have become a must for all those, companies or individuals, who care about the fate of planet Earth. The awareness of the value of water has always been part of Zucchetti's DNA.

In full respect of the territory, production is eco-sustainable: the activities of control, purification, recycling of the water used in the manufacturing process are careful and constant, as is the commitment to reuse or rational disposal of processing waste. Zucchetti has also long implemented actions to contain the production of CO2 deriving from electricity consumption.

In products' fulfilment, whether faucets or shower systems, Zucchetti engineers pay maximum attention to the issue of consumption and adopt ad hoc solutions and devices with the aim of always having a limited flow rate, in compliance with current regulations, ensuring water and energy savings, without sacrificing comfort of use.

Adherence to the strictest standards, constant attention and assiduous research activity testify to the company's strong commitment to the environment.

LEED (Leadership in Energy and Environmental Design) certification, applied to the sustainability assessment of buildings, is becoming increasingly important.

For this reason, the Zucchetti technical department offers support to builders and contractors, providing all the information necessary to certify that the Zucchetti installed products comply with the required standards by the building, in order to obtain this certification.

AWARDS

The will to innovate has always been an ultimate pillar of Zucchetti's corporate philosophy.

The ability to develop original ideas, combined with the experience and industrial know-how grown in 95 years of history, have allowed the creation of unique and cutting-edge projects and products, awarded with the most prestigious international design prizes.

A well-deserved tribute to the passion and constant daily commitment of every member of the Zucchetti team.

THE NEW 2025 PRICE LIST

The new 2025 ZUCCHETTI USA price list is divided into several sections to help the consultation.
The first part is dedicated to the ZUCCHETTI brand.

The opening section, APPROVED, gathers the collections certified according to UPC or CSA standards.

The NOT APPROVED section, on the other hand, includes the collections that are not certified, but still available and usable on the American market.

The chapters dedicated to specific product categories follow: showers , electronic faucets, kitchen faucets, miscellaneous spare part and extensions.

Finally, the chapter dedicated to washbasins and bathtubs which complete the bathroom offer.

SHOWER FOCUS

Zucchetti offers a wide range of solutions for the personalization of the shower area, technical solutions that meet any design needs, freely choosing the collection that best suits your own bathroom style.

Today the shower area can also be conceived by choosing the new Hoop thermostatic push-button mixers, which thanks to an essential and cross-cutting design can be combined with any faucets shape.

Thermostatic mixers allow to set the water temperature to the desired gradient, to reach it in a very short time and to keep it constant throughout the period of use, even if pressure or temperature changes occur. The inner thermostatic valve mixes hot and cold water, to maintain the constant output temperature at the pre-set scale.

A safety device ensures that the mixed water temperature does not inadvertently exceed 38° C. Higher temperatures can be reached only by pressing a safety button. It is a comfortable, safe, reliable and cost-effective mixer, in terms of both water and energy saving.

HOOP

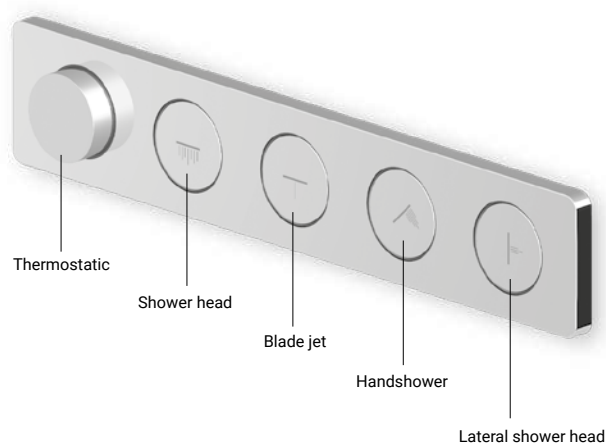

Versatile, minimal, intuitive and functional. Hoop, the push – button shower system, comes in a thermostatic version for bath and shower and can combine one to four water outlets.

Hoop joins the unrivalled convenience of thermostatic mixers with modern, versatile, direct aesthetics. With a simple gesture, the water is turned on or off by pressing the button corresponding to the desired output (hand shower, shower head, body jets, spout etc.).

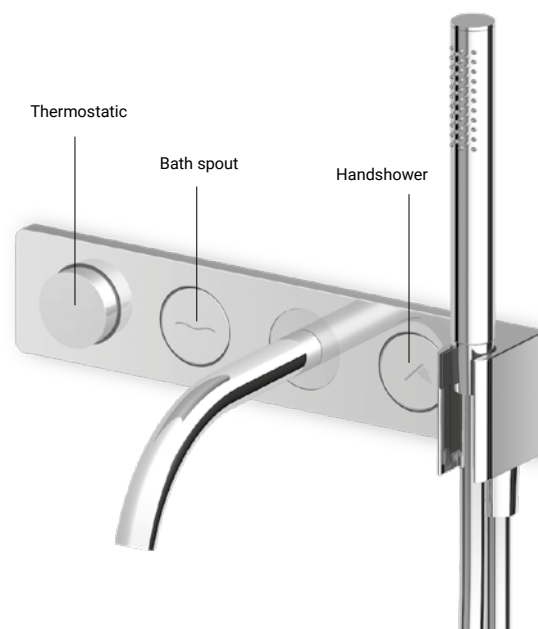

Hoop can be teamed with any line of faucets and it can be installed horizontally or vertically, allowing ample compositional freedom. Wellness and safety are guaranteed thanks to a device that keeps the water temperature steady, ensuring that it never inadvertently exceeds 38° C.

Hoop can be purchased by choosing one of the standard configurations or by freely combining the individual elements.

ROUGH-IN THERMOSTATIC MIXER

NEW ROUGH-IN PARTS

Z-BOX is the new generation of mixers' and thermostatics' rough-in parts by Zucchetti.

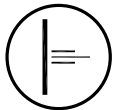

The pluses are multiple:

- compact dimensions to make them suitable for any type of wall, especially plasterboard walls
- waterproofness to guarantee perfect sealing and avoid any eventual condensation phenomena
- easy, immediate and fast installation
- use of eco-sustainable materials, metal parts made of low lead content brass, box made of ABS and recycled polypropylene

Z-BOX is a smart, innovative and advanced solution that allows better management of the design, installation, use and maintenance stages for rough-in faucets.

2025 FINISHES

Zucchetti collections are proposed in a wide range of finishes that perfectly adapt to contemporary lifestyle trends and allow designers to create the ideal style for every project.

For brass products, Zucchetti offers:

- galvanic finishes available in different shades, both glossy and brushed;
- painted finishes in various colors and combinations;
- PVD finishes in different shades. Extremely hard and resistant, time-proof and non-toxic, PVD finishes guarantee excellent performances and are particularly suitable for the hospitality industry.

For stainless steel products, Zucchetti offers:

- brushed PVD finishes in different shades that are extremely hard and resistant, time-proof and non-toxic. PVD finishes guarantee excellent performances and are particularly suitable for the hospitality industry.
- matt finishes with a sandy texture available in various shades, obtained with the PVD process. These finishes are also extremely hard, resistant, unalterable over time and non-toxic, making them ideal for the hospitality industry.

Zucchetti creates its finishes using cutting-edge technologies, with meticulous attention to every detail, in order to provide customers with impeccable products, suitable for any requirement.

All shower heads in brushed stainless steel – finish .X – can be combined with faucets in brushed nickel finish .C3.

The table below summarizes all color variants available on our price list for each collection.

NOTE

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

ZUCCHETTI.

ZUCCHETTI. GENERAL SALE CONDITIONS

Upon the confirmation of the order, all the following conditions of sale of Zucchetti Rubinetteria S.p.A. (hereinafter also as the "Company" or the "Seller") are understood to be fully accepted.

PRICES

The prices stated in the Zucchetti US price-list are in \$ (Dollar), are subject to change and not binding. The prices have to be considered ex-works factory in Gozzano, packing and VAT excluded. Orders are valid only if accepted by regular order confirmation. All Seller direct and indirect offers are not binding. Zucchetti pricelists are for enterprises and economic operators only.

PAYMENTS

All payments terms specified in the invoice are binding: any variation, which has not previously and expressly agreed in writing, will be rejected. Delayed payments of the supplies will cause the charge of the relevant bank interests to the extent provided for by the regulations in force. In the event of payments not made within the agreed terms, the Seller is entitled and has the right to hold deliveries and any order already confirmed. No payment can be differed in case of disputes. Any additions or changes made by the Customer on purchasing orders will not be valid unless communicated in writing and then accepted in writing by the Seller.

In the event that the Customer fails to pay the due amount, within the agreed terms, or it is found to be in breach of further obligations under the terms of sale and / or signed with additional writings, the Seller is entitled and has the right to resolve the business relationship with immediate effect. The Seller has the right to hold, as a penalty, the sums already paid, without prejudice to any further claims for compensation of the damages. All without any criminal burden or liability towards the Customer.

CUSTOMER IDENTIFICATION DATA

The Customer is responsible for all the identification data provided to the Seller, such as: company name, registered office, fiscal code, VAT number and any other information specifically requested by the existing law.

DELIVERY TERMS

Delivery terms are approximate. Possible delay due to production accidents, strikes, transport, pandemic events or to any others reason of Force Majeure, do not give the right to recede from the purchase contract or to claim for damages. The Seller reserves the right to fulfil an order in multiple deliveries according to availability of products.

PACKAGING

The packaging is made properly by specialized personnel.

TRANSPORT

The delivery is made at Customer's risk and peril even if the term free destination has been agreed. The Seller declines any responsibility for delays, damages, breakages, shortages during transportation. Any claim has to be presented directly by the Customer to the carrier, even if this one has been chosen by the Seller. The Seller reserves the right to charge the Customer with additional charges to the mere transportation costs previously paid to the carrier (e.g., demurrage, special unloading operations, and so on). Transport costs, unless otherwise agreed, are borne by the Customer.

RESPONSIBILITY

All Seller products are carefully tested and checked. Seller's responsibility for the quality of the material is limited to the acceptance of defective goods return, only after previous written agreement. The goods must be returned free to Gozzano, without any charge for packaging. It is left to the Seller's decision whether to replace them (in any case without the bond to pay any allowance).

Seller assumes no responsibilities for wrong handling of the supplied articles. Any claim for compensation of direct or indirect damages caused by the setting of defective material is excluded. Any further working on goods of the Seller is absolutely prohibited. The Seller will accept return of goods only after its previous authorization.

GENERAL PROVISIONS

The Seller reserves the right, at any time, to modify the technical characteristics of the products, as well as to modify or discontinue models. The images and descriptions contained in this price list or in the catalogues represent individual articles and do not constitute an undertaking of faithful execution. The details, measurements and weights indicated must be considered as indicative and may be modified without notice.

CLAIMS

Claims will be accepted only within 8 (eight) days from receipt of goods for the Italian market and within 2 (two) days from receipt of goods for foreign markets: no claims will be accepted after these terms.

The claim must be sent to the Seller by written notice, detailing: the defects found, the number of defective parts detected, the verification methods implemented, the delivery references (e.g., ddt and label details attached to the box) and any other useful elements (e.g., photographs) to allow the Seller to track the product, the related records of the claim and, if the case may be, implement the first immediate corrective actions.

Any request for return or rework / selection at the Customer place will be authorized only after appropriate evaluations.

Under no circumstances the Customer can suspend the payment of the product object of the claim. The Customer cannot perform any work, repair or intervention on the product unless previously agreed in writing by the Seller.

JURISDICTION

In case of dispute, competent courts will be Borgomanero and Novara.

For anything not explicitly stated, the rules of law in force apply.

ZUCCHETTI. WARRANTY

All Zucchetti products are subject to functional tests during each step of the production process to provide the most accurate quality performances.

All items are guaranteed in accordance with the applicable laws concerning warranty. This warranty applies to Zucchetti products sold in North America by AUTHORISED DEALERS ONLY, for purchased attested by official receipt.

The warranty covers the following cases:

- 1** Casting, porosity and surface finishes defects
- 2** Manufacturing defects recognized by our technical department.

The guarantee does not apply and becomes void in the event of:

- 1** Deterioration of surface finishes (chrome plated or different) due to use of cleaning agents containing acids or abrasive substances.
- 2** Deterioration of surface finishes due (chrome plated or different) to limescale deposits.
- 3** Installation or use of the products in an inappropriate manner or that does not comply with the conditions of use specified on the documents found inside the product packaging.
- 4** Repairs and maintenance carried out by not authorized by the company personnel or with non-original spare parts, purchased from unauthorized sources.
- 5** Atmospheric phenomena.
- 6** Overvoltages on the electrical power system.

The warranty can only be applied upon providing the company with photos and/or samples of the defective products.

The claim must be received via written notice containing: the details of the defects found, the number of defective pieces detected, the verification methods implemented, the delivery references (delivery note and details of the labels on the box) and any useful element (photographs) to allow to trace the product and related registrations that are the subject of the dispute and possibly implement the first immediate corrective actions.

Zucchetti warranty cannot be renewed.

For more detailed information please refer to M-UFC009 document available at the following link:

ZUCCHETTI. PRODUCT CARE AND MAINTENANCE

To keep the products in perfect conditions for a long time and avoid limescale deposits, it is important to carry out a periodic and thorough cleaning, according to the indicated methods.

The products' surfaces must be cleaned with mild neutral detergents or with soap and water. Zucchetti alternatively recommends to use the Zetabril product (code R99993). Always carefully rinse the surfaces to completely eliminate residues of the cleaning product and dry completely with a soft cloth to prevent limescale deposits.

It is important never to use cleaners that contain hydrochloric, hydrofluoric, phosphoric, formic, acetic acid, or bleach or ammonia. In case of using potentially harmful products, rinse immediately with abundant water.

Never spray detergents directly on the products but spray into a soft cloth.

Do not use steam cleaners, because high temperatures can damage the products.

Do not use sponges or brushes with an abrasive effect that would irreparably damage the surfaces.

It is recommended to avoid leaving residues of cosmetic or hygiene products such as creams, soaps, lotions, toothpastes, etc. on the surfaces for a long time.

PRODUCTS IN PAINTED FINISH

On painted surfaces, use only water, if necessary with the addition of neutral detergents (pH 6,5 – 7,5) and characterized by light additives. Never use solvents or abrasive cloths.

PRODUCTS IN PVD FINISH

For surfaces in PVD finish, always use a cloth soaked in mild, diluted detergent, with neutral pH (6,5 – 7,5). Never spray the product directly on the surface as the spray could leave halos. Do not use detergents containing hydrochloric acid, formic acid or acetic acid, do not use detergents containing acid or abrasives components.

PRODUCTS IN STAINLESS STEEL

To clean all stainless steel faucets, it is recommended to use specific products for the care of stainless steel.

Commercial detergents with neutral pH (6,5-7,5) can be used and, if necessary, only on the steel parts, to use diluted isopropyl alcohol or sodium carbonate.

Do not use in particular detergents based on chloric, hydrofluoric, phosphoric and muriatic acids.

SHOWER HEADS

For a proper shower heads functioning over time and to avoid limescale accumulation, it is recommended regular cleaning of the anti-limescale nozzles, rubbing them gently with a soft cloth to help to detach the deposits.

AERATORS

In order to always have a good water jet it is recommended the periodic cleaning of the filters of the aerators, dipping them (after having removed them from the faucets) in a solution of diluted vinegar or using the product Zetabril (code R99993).

Some finishes (C8, C3, C50, C51, C40, C41) may vary or change their tone over time. These finishes are subject to oxidation and change according to the environment in which the product is installed, to the use and to the water properties. This means that each product can take on a unique appearance over time.
