Customer Feedback

„With Xvise, we developed a new central logistics system in a time-challenging project and are very impressed by the "out-of-the-box" thinking of the entire team.

The excellent collaboration was characterized by structured, goal-oriented workshops, rapid development work and perfect implementation support.

This gives us the best prerequisites in all processes for the desired operational excellence..“

Petra Kitzberger – Management
Bründl Sports

Customer Feedback

„With the experience of Xvise we were able to develop a project totally focused on our needs.

Using special tools, an As-is analysis was created in a very short time, and precise tender documents for potential logistics partners were developed.

Due to the very professional support and the collaboration in a spirit of partnership, the new logistics concept was implemented quickly and to our complete satisfaction.”

Ing. Günter Franke – Member of the Management Board/ COO

Customer Feedback

„Due to our difficult structural starting position and the complex processes, we absolutely needed to win a partner with experience for our project.

Together with Xvise, we succeeded in creating a logistics concept that fully meets our expectations and provides the basis for our further planning.,,

Wolfgang Schröcker –
Logistics Manager

Customer Benefit

Martini Sportswear GmbH
