Fine crafted soft wooden puzzle offer hands on introduction to English Alphabets. Children learn through play as they fit the brightly coloured wooden pieces in the cavities of the board. Kids can use the pieces for tracing out words. It helps to build kids imagination and sharpness their power of observation. It also exercises their memory, improves finger coordination and helps them to sort out differences in shapes, size and colours.

This raised puzzle is an engaging educational tool designed to enhance language learning and literacy skills. This puzzle typically features individual pieces representing each letter of the alphabet, vowels, consonants and numbers from Hindi, English and Math. These pieces are raised for easy handling and can be placed into corresponding slots on a board. By matching the pieces to their respective positions, learners can visually and tactilely connect letters with their sounds and forms in both languages. This interactive method helps in reinforcing letter recognition, phonetic skills, and the understanding of bilingual orthographic systems, making it an effective resource for language educators and learners.
