

Imperial[®]

**The best fit for your lifestyle:
from the clubhouse to the lake house - and everything in between.**

Imperial is all about the finer things in life. The back nine at dusk. Cool breeze on a warm night. Relaxing with friends at the beach. Backyard oyster roasts in the fall. Saturday tailgating done right. We believe life is a series of moments and you better be ready for them. Our mission is to prepare you for endless opportunity by providing style and comfort.

Expert craftsmanship is something we consider a tradition at Imperial. We pay close attention to every detail and every stitch on everything we make. Classic with a twist is what we aim for, and we've been doing it since 1916.

It simply doesn't get any better than The Imperial Life.

Go ahead ... tee it up.

photo shows
X240 The Gambit in apricot

On Front Cover
X240 The Gambit in stone khaki

Imperial's focus on the development of high-grade performance fabrics made from GRS and Oeko-Tex® certified recycled polyester, and the sourcing of Oeko-Tex® certified cotton fabric, has led to a third of all Imperial styles now being in alignment with the Sustainability Project.

Imperial has also worked diligently to increase energy conservation. Approximately 25% of the power used in two of Imperial's largest domestic decoration and USA made visor facilities is now provided by solar energy.

COMPLIANCE

We will comply with all customer, international, federal, local and governmental policies. We will audit for compliance and maintain action plans that ensure that we move forward.

ENVIRONMENTAL EXCELLENCE

We will strive to create a positive impact on the environment through our business policies and development of our people. Our roadmap will consist of looking for environmentally friendly alternatives in all aspects of our business: raw materials, production methods and production equipment and facilities.

We will strive for zero landfill. We will track and develop for month to month and year over year improvements.

WASTE REDUCTION

We will strive do more with less through execution of a vision that continually reduces all resources. We will develop action plans that drive and track continual improvement across all these resources.

ENERGY CONSERVATION

The journey towards sustainability and improved environmental responsibility will not be easy and will require many strategic decisions, new ways of thinking and working. One technology or process will not be the complete answer. It's more about being bold and having the courage to stand up, make these declarations and begin to align the tactics for our organization and operations.
