

GOLDEN EDGE series

TIMELESS PRINCIPLES *of* INSPIRED LEADERSHIP

Soundarya Krishnan is an Indian Knowledge Systems (IKS) researcher, educator, curriculum developer, and public speaker dedicated to making India's timeless scientific knowledge relevant to modern learners. With a postgraduate degree in Computer Science specializing in Systems Engineering and Data Science from University of Paderborn, Germany, she began her career as a Software Developer working on enterprise solutions, MBSE, and AI-assisted systems. She later transitioned to researching Ayurveda, Yoga, and Classical Indian philosophies, contributing to curriculum development, teacher training, and integrating traditional Indian sciences with contemporary education and well-being.

SYNOPSIS

Artificial Intelligence is transforming the way we learn, work, and make decisions, but it also raises important questions about ethics, sustainability, and human well-being. Indian Knowledge Systems (IKS), rooted in centuries of scientific inquiry, philosophy, mathematics, and holistic thinking, offer enduring principles that complement technological advancement. From the invention of zero to profound insights into logic, consciousness, health, and systems thinking, India's knowledge traditions provide a balanced perspective for the AI age. This session explores how ancient wisdom can guide responsible innovation, foster ethical leadership, and help create human-centric technologies that combine intelligence with values for a sustainable future.

PROGRAMME

- | | |
|---------|---|
| 6:00 PM | Tea/Coffee/Networking |
| 6:15 PM | Welcome Address & Introduction of the Speaker |
