Main unit					
	EH-01 SINUM CENTRAL DEVICE The EH-01 main unit is a device that collects and processes information from external devices and executive modules, enabling the user to view and change their operating status from the local network and through CLOUD access. The EH-01 main unit also allows you to create automations based on connected devices as well as on data collected from them. It is also possible to create scenes and schedules.

 RGB-P4 / RGB-P4m	RGBW-01 RGBW MODULE RGB modules are used to power and control the operation of RGB LED strips. Thanks to the use of the module, you will be able to manage both the color and intensity of light, as well as the temperature. All this depending on the selected scene, automation or manually. RGB-S5m and RGB-S5 are RGBWW module.				 RGB-S5 / RGB-S5m
