

GLOBAL GYM CUSTOMIZATION SPECIALIST
DESIGNED BY HARISON IN USA **GYM CLUB**

NOTHING IS IMPOSSIBLE!

The world's greatest achievement in the world is to be ahead of the times and be superior to others

HARISON Commercial Training Equipment, the result of 27 years of research and development by HARISON, combines sports ergonomics and modern technology, unique and stunning on the market!

HARISON commercial training equipment, create high-end fitness clubs and commercial gym clubs, achieve more impossible!

BRAND INTRODUCTION

HARISON FITNESS has been established since 1996 in the United States. The founder, George Harison, liked to exercise and research sports equipment since he was a child. In the early days, we are mainly OEM for local brands in the United States, manufacturing aerobic fitness equipment and bar dumbbell equipment. In 1998, we began to develop and manufacture electric treadmills and water paddling equipment, and provided them to professional sports teams. Later, we focused on the R&D and manufacture of commercial gym equipment, long-term cooperation with many fitness clubs in the United States, and provided professional aerobic exercise and strength exercise equipment. We have professional research institutions such as "Aerobic Exercise Research Institute, Strength Training Research Institute, Functional Flexible Strength Research Institute, Dynamic Balance Laboratory". Up to now, HARISON has become a global comprehensive fitness brand integrating professional fitness technology, fitness equipment R&D; manufacturing and professional fitness training. There are branches in more than 60 countries and regions such as the United States, Europe, Australia, Mainland China, Hong Kong and Taiwan. We have more than 20 years of R&D and operation experience in competitive sports, sports rehabilitation, ergonomics and data interconnection, providing a full range of technical services and solutions for global fitness enthusiasts. In 2018, HANCHEN China reached the strategic cooperation with HARISON USA. By wholly acquiring the brand and global business of HARISON USA, positioning itself as a global professional sports and health technology company, we have been focusing on designing, developing, producing, and selling global high-end commercial fitness equipment and innovative home use products as well as providing interconnection and technology services for new generation. Since 2019 we have started to set up offline equipment flagship stores and international fitness academy sites globally which cover most developed provincial capitals in China, and have provided prestigious services to more and more Chinese fitness consumers.

GLOBAL GYM CUSTOMIZATION SPECIALIST

We not only have professional and comprehensive fitness equipment, but also provide the completion of the program design, product customization, service optimization, fitness guidance and other full process supply, not let the gym becomes an ornament.

CUSTOMIZER

Professional And Comprehensive Equipment

Reasonable Space Design

Efficient Customer Service

Precise Fitness Program

Leading Fitness Instruction

PROFESSIONAL AND COMPREHENSIVE EQUIPMENT

For the corporate procurement field, HARISON will provide commercial grade cardio equipment, strength equipment (single function, multi-function), auxiliary fitness equipment and group functional training equipment. These products demonstrate excellence in terms of safety, aesthetic appeal, durability, as well as ease of maintenance.

Full Range Equipment :

HARISON provides you with more qualified and cost-effective commercial fitness equipment series which cover aerobic training, fixed strength training, free strength training as well as customized equipment and accessories, to meet a variety of fitness needs.

Quality Assurance:

HARISON is mainly authorized to manufacture products in the United States and Asia and other international factories. After strict factory inspection by HARISON's standard inspection team, HARISON's engineering and quality inspection headquarters will control the manufacturing line and accept the products in strict accordance with American and EU standards.

Dare To Innovate:

HARISON has adhered to the principles of "intelligent, scientific, customization, and precise" as the principle of innovation, and has continued to seek technological innovation and bold breakthroughs in order to design new products that are more in line with sports and health.

PROFESSIONAL AND COMPREHENSIVE EQUIPMENT

SPACE DESIGN

REASONABLE SPACE DESIGN

By adopting a localized gym space design, based on practicality and personalization, and giving professional guidance on equipment procurement according to coaches needs. We will bring you a gym planning and design plan full of corporate culture, and will give coaches a comfortable experience full of sports passion.

SPACE DESIGN

REASONABLE SPACE DESIGN

By adopting a localized gym space design, based on practicality and personalization, and giving professional guidance on equipment procurement according to customers' needs. We will bring you a gym planning and design plan full of corporate culture, and will give customers a comfortable experience full of sports passion but friendly.

Atmosphere Creation

The gym environment can affect the mood of trainers, and gym design needs to consider light, color, and Temperature, ventilation and the perfect match of equipment. A spacious, bright, quiet and comfortable exercise space that makes exercising more relaxing.

Space Planning

We will take into account the size of the company and the number of users, and based on the company's fitness space, we will carefully plan the gym layout, equipment, and accessories, in order to provide you with a practical solution.

Customized Design

Our design team consists of professionals from Europe and America, who provide customized gym plans for businesses based on their company culture and style preferences.

EFFICIENT CUSTOMER SERVICE

From gym planning and configuration to gym completion in one step, eliminating the need for a lot of hassle. Nationwide setup
Thousands of service outlets to provide a full range of services for your gym services.

Free Measurement

An engineer with years of experience visits and measures the gym to meet your construction Needs

Configuration Options

On-demand corporate gym configuration and free 2D/3D design according to actual situation

Delivery And Installation

Relying on our strong logistics system and installation team, free door-to-door nationwide delivery and loading

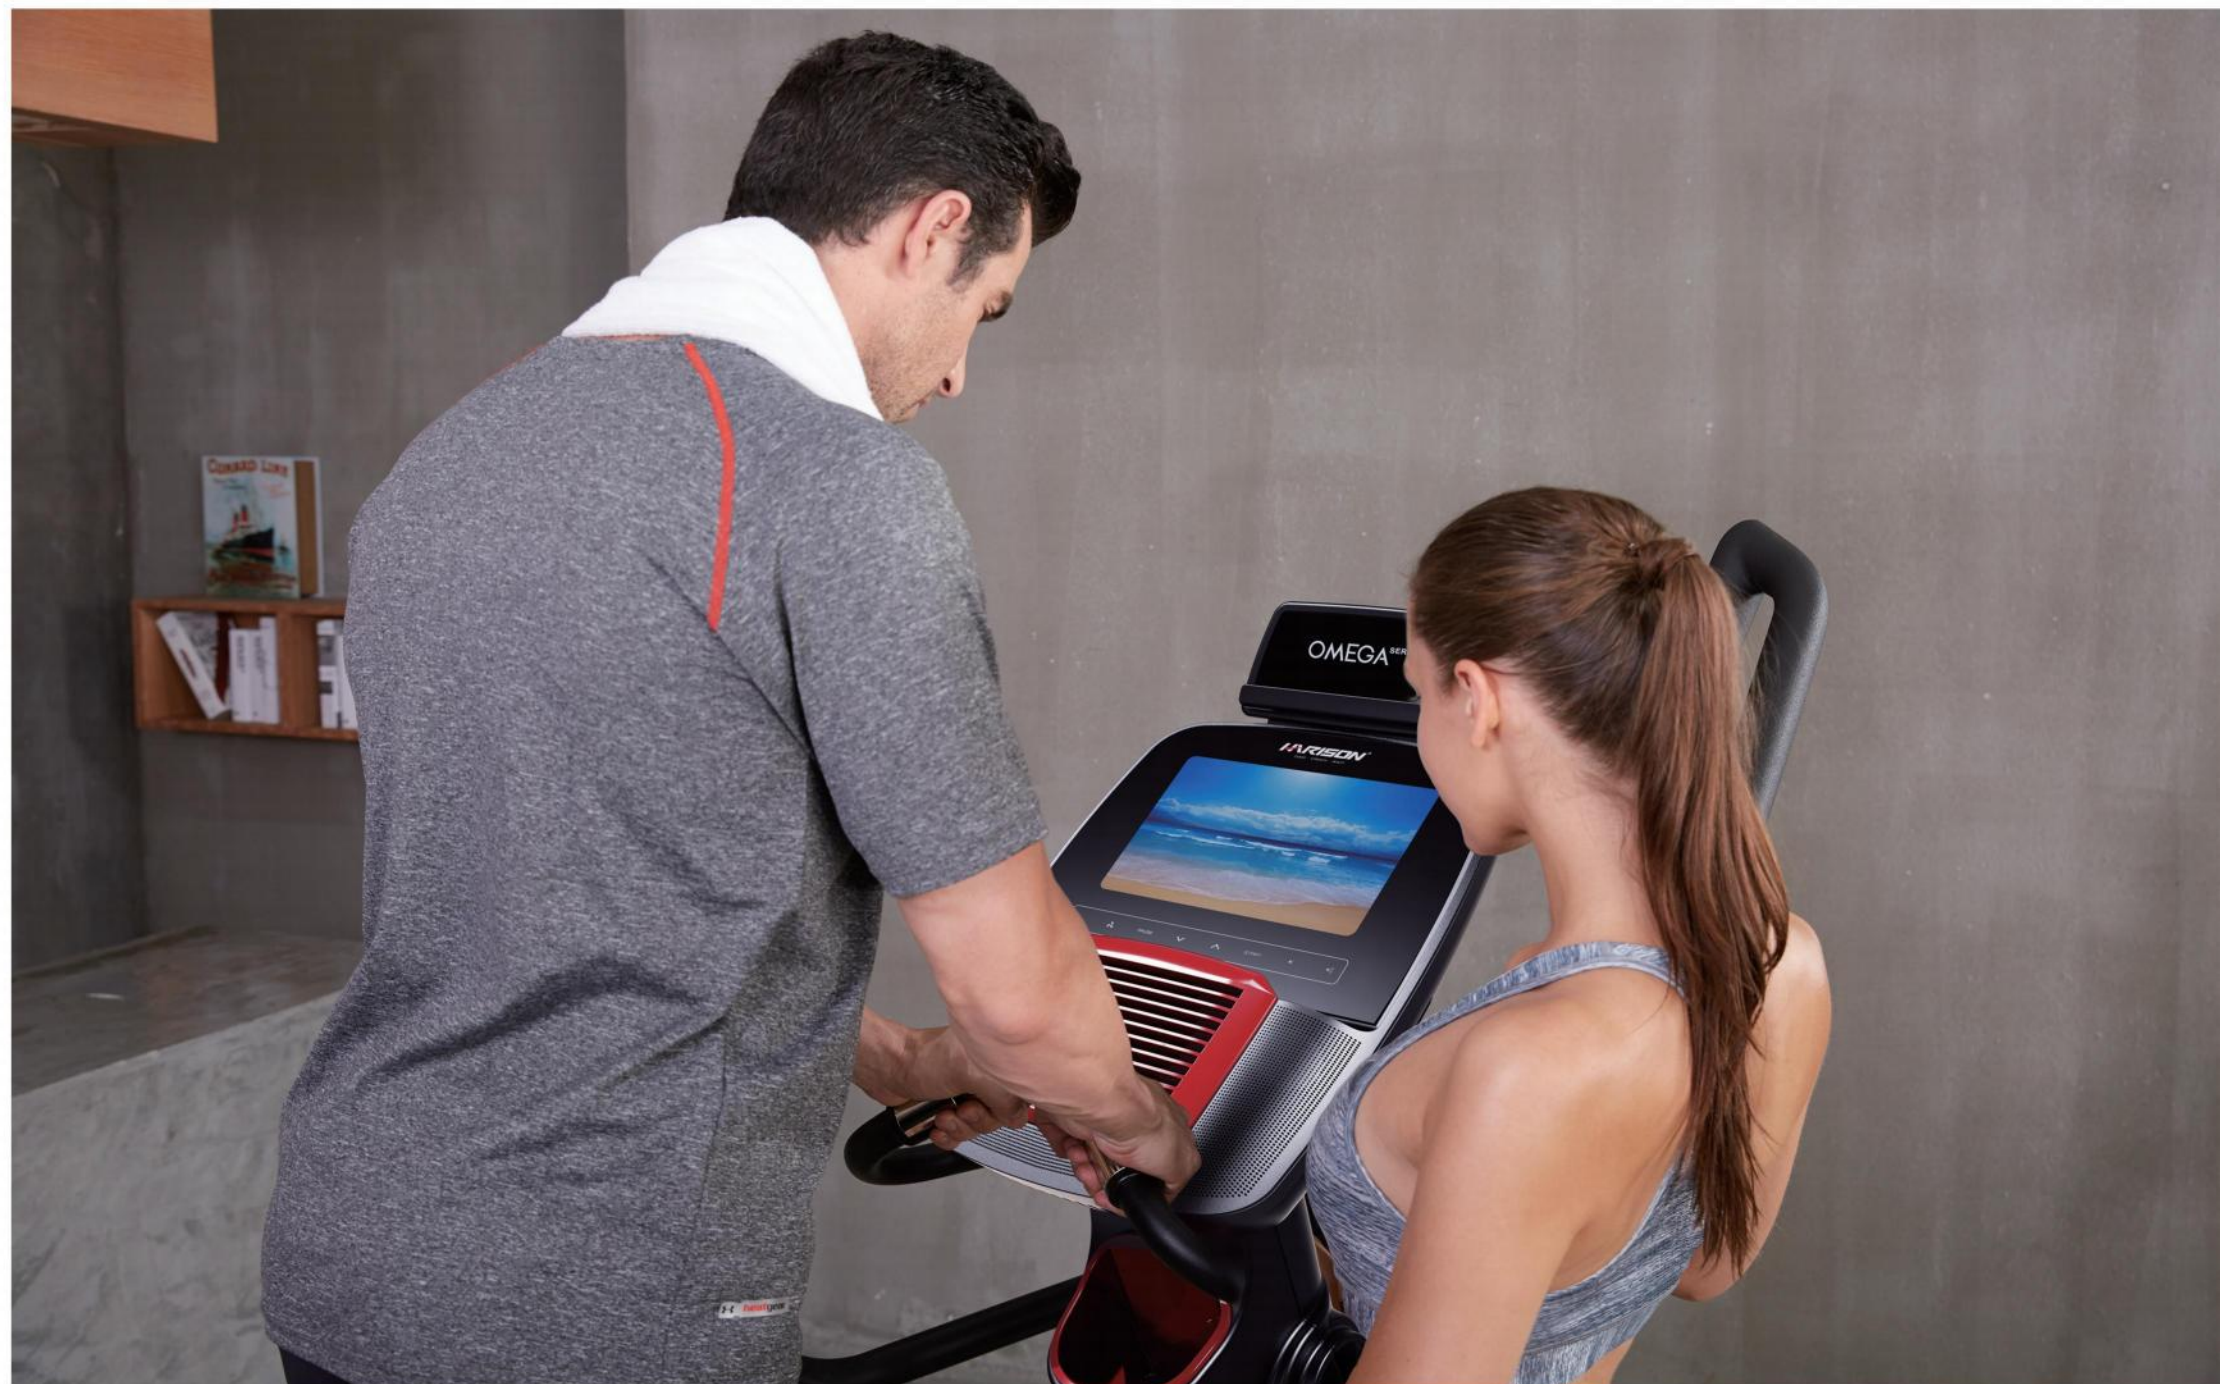

Lifetime After-Sales Service

We offer a lifetime after-sales guarantee for our corporate customers nationwide

Teaching Guidance

Provide free in-home coaching sessions with professionally certified instructors

OVERVIEW OF THE INSTITUTE

HARISON International Fitness Institution is part of the organization for fitness trainers training and fitness club planning & operation under HARISON FITNESS. It has continuously introduced and developed sports and health concepts and technologies since it was founded. Nowadays it has been continuously and deeply working in different ways with many sports & fitness institutions and sports researchers across the United States. By recruiting excellent fitness teams and members from many countries such as Europe, America, Australia and Japan, A number of international certification training courses have been developed. HARISON International Fitness Institution focuses on study of (EAHS) sports health and (MH) mental health, and has developed its own unique research and training systems on (PC) physical beauty, (WLS) weight loss and body shaping, (SR) sports rehabilitation, (NAH) healthy nutrition and (EM) sports performance and other projects. They have trained a number of top health teaching talents to the world. They also regularly organizes and participates world-renowned fitness competitions and events around the world, and has contributed its part and gained great achievements in the global fitness and fitness industry.

The institution headquarter is located in Batavia illinois, usa with branches all over the world. Its Chinese branch is headquartered in Guangzhou and has set up branch stations in Beijing, Shanghai, Hangzhou, Shenzhen, Kunming, Guiyang, Wuhan, Chengdu, Xi'an and other capital cities to meet different customer service request. At the same time, the institution also provides internationally featured custom operation solutions for global fitness clubs and companies. From zero to one, from inside to outside, face to face guides, it uses integrated data management for the process.

"Sports changes everything" is the service motto of HARISON International Fitness Institution. Health is the foundation of everything. Only with healthy body you can fight for your dream, wish all people with dream and ambitions in the world can achieve their dreams and their dreams come true.

beyond any other

TREADMILL

Intelligent Commercial Electric Treadmill

HR-T3800/HR-T3800Track

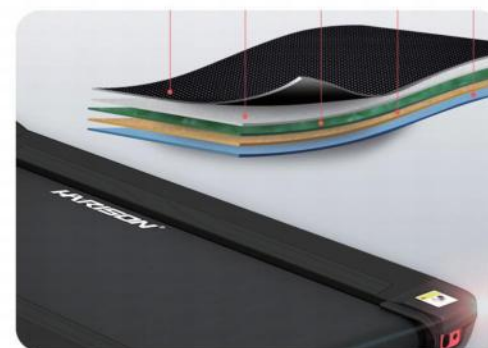

Classic Shape, Reproduce The Beauty Of Fine Workmanship

HR-T3800Track intelligent electric treadmill, classic body construction, dynamic and fashionable body, left and right bottom tube Use of high-tech special aluminum alloy, multi-process procedures layer by layer grinding, fine polishing casting, to create a super stable and cool machine body, ergonomic design, so that the running process is more smooth and safe.

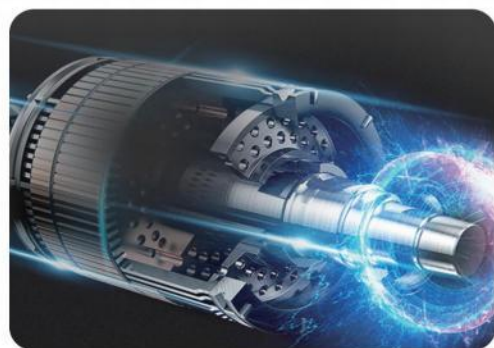

Wide And Durable Running Platform, Patented Shock Absorption Technology

600x1630MM widened running belt, steel frame, run with the heart.

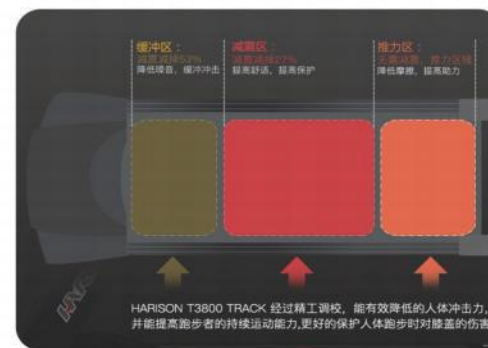

High-Performance Shock-Absorbing Running Board

All-around high-strength elastic running board, anti-slip and wear-resistant surface texture, five layers of high-tech materials combined, layer by layer filtering vibration noise, restore a better sports experience.

Powerful Motor, Power Surging

Peak 7.0HP servo AC inverter motor, low electromagnetic interference, strong power, fast speed, looking for your excitement emotion.

Sub-Area Sports Shock Absorption System

Buffer zone can damp 53%, reduce noise, cushioning impact; shock absorption zone can damp 27%, improve comfort; thrust zone to reduce friction, improve assistance, after fine tuning, effectively reduce the impact on the human body, to better protect the human body running on the knee injury.

21.5-Inch Full Touch Color Screen

21.5-inch 7H reinforced glass, can provide 178 wide viewing angle, safe and durable touch display effect, built-in intelligent Operating system can be connected to WIFI, Internet, watching movies, real-world running, etc.

Real-Time Heart Rate Scientific Motion Monitoring

Hand-held pulse sensing exercise heart rate, monitor the body's condition at any time, adjust the running speed, so that scientific exercise, exercise with the heart.

EXERCISE BIKE

DISCOVER B3620/B3620Track

Smart Mega Touch Screen

21.5-inch super large touch screen, rapid experience. Equipped with Android intelligent system. Control all kinds of entertainment information at will, high-definition display picture quality, multi-touch free operation.

Two-Way Precision Magnetic Control Flywheel

26 pounds of precision magnetic control flywheel, two-way operation, with dynamic balance adjustment device, safe and quiet riding

Stepless Magnetic Control Resistance Adjustment

Commercial magnetic control precision adjustment, to adapt to the needs of different fitness groups, adjust the appropriate resistance, so that the cycling movement to create an infinite experience.

Adjustable Body Structure Design

The head seat can be adjusted according to the structure of different user needs, making the movement more comfortable and free.

Commercial Silent Drive Belt

Double-sided belt protection compartment, safe and wear-resistant, experience the smooth movement. Four-slot tight grip belt, experience silent transmission.

Bluetooth Entertainment APP Fitness System

Connect the cell phone Bluetooth, synchronize sports data to APP, you can experience the multiplayer cycling competition, the first place in the list, breathing light always show the connection status, more intuitive, more interesting.

Stable Triangle Body Frame

Triangle stable body structure, high purity quality plus phase steel, strong and stable, so that every ride is a cross-country experience.

Electromagnetic Control
Stationary Bike

- With 24 levels of high-precision smooth resistance adjustment system, more detailed, more smooth, more convenient control.
- Professional customized 21 groups of sports preset program, professional fitness team customization, more effective to achieve fitness results.
- Intelligent APP health management, Bluetooth 4.0 connection, increase the fun of sports.
- The intelligent APP health management, Bluetooth 4.0 connection, increase the fun of exercise. Adjustable sports seat, in any user's exercise can provide excellent comfort.
- LCD digital display window. Simple and clear, make exercise more professional.
- Real-time heart rate data monitoring, so that exercise brings more accurate health data.
- Steel construction, professional mechanical structure design, fine baking paint process, to provide a safe and comfortable riding experience.
- IPAD holder + sports water bottle holder, attentive to your sports experience, relaxation.
- Soft silicone hand pad + high quality memory foam, providing a more skin-friendly touch. Breathable, comfortable and convenient.

RECUMBENT BIKE

Enjoy the pleasure of riding

12.5KG Silent Electronically Controlled One-Way Flywheel Set

Electronically controlled flywheel is more uniform. Stable and not stuck, internal magnetic is more silent.

Adjustable Seat Forward To Back And Up To Down

Seat up and down 10 adjustable, adjustable front and rear, to meet the design of people of different heights, to provide more sports comfort!

Intelligent Sports Data Health Management

Mepanel App health management system, Bluetooth 4.0 connected to mobile devices, realistic free training, tracking exercise data, and increase the fun of sports.

Soft Silicone Hand Pads

Warm design, always take care of your arm, make exercise more comfortable.

B2810

Commercial Exercise Bike

- 20KG dynamically balanced and tuned flywheel system, two-way drive, strong and wear-resistant.
- Multi-stage professional racing handlebar, ready for HIT high intensity training.
- Dynamic balance adjustment for many times, to match your comfortable sports experience.
- Thickened belt drive, efficient transmission potential, even and smooth force, silent experience riding fun
- Steel body structure, widen the body, triangle stability design, provide safe and stable riding space.
- Stepless speed adjustment, felt brake system, light press transmission, stable stop
- Racing-grade special saddle, high elasticity and delicate, make the movement more comfortable and convenient.
- Adjustable seat and handle, suitable for sports enthusiasts of different heights, making sports more comfortable and scientific.
- Sports water bottle placement rack, attentive to your sports experience, relaxation.

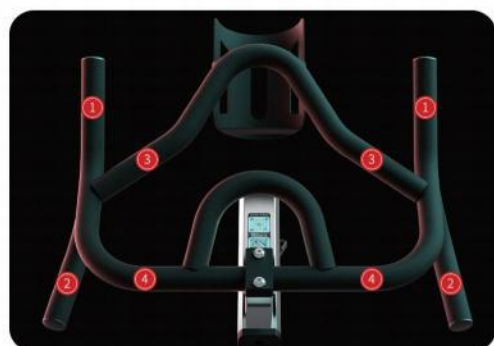

EXERCISE BIKE

Competitive riding, beyond self

20KG Silent Dynamic Balancing Flywheel

Commercial dynamic balance tuning system, more stable operation. Strong inertia, sufficient resistance, giving you a surging super experience.

Multi-Segment Professional Racing Handlebar, Ready For HIT High Intensity Training

Multi-stage race handle design, adapted to the HIT high-intensity training needs, integrated molding, comfortable grip. Sweating does not slip. For your professional fitness escort.

Adjustable Dody Structure

Humanized design using different people, the armrests can be adjusted in height, and the seat can be adjusted back and forth and in height. Through different groups platform, adjust the body force point to make the movement more efficient.

Silent Drive Belt

Silent and smooth transmission power, smooth operation, uniform and smooth force.

Luxury Intelligent Adjustable
Wind Resistance Rower

- European and American designers to create
- Quality from the persistent pursuit of technology
- Metal chain drive more technology
- Longer exercise stroke, higher calorie consumption
- 10-speed wind resistance system, simulating professional rowing experience
- External IPAD holder, more entertainment functions
- Stainless steel track, smoother and more wear-resistant
- Preferred by star hotels and high-end clubs

Wind resistance rowing
stimulate the potential of the whole body

Wind System

The output resistance is adjusted by the wind wheel, across different levels of responsibility and different resistance environments required by different trainers.

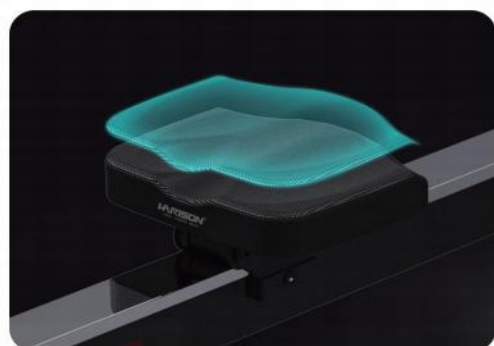

Stainless Steel Chain

Can maintain an accurate average transmission ratio, high transmission efficiency, no slippage, reliable transmission, strong overload capacity.

LCD High-Definition Instrumentation, Real-Time Display Data

Multifunctional dashboard allows you to keep track of your exercise, view exercise data in real time, customize exercise goals, and operate easily.

Ergonomic Seat Cushion

Upgraded seat cushion, strong resilience, fit the tailbone position, comfortable sitting

DISCOVER SERIES OF HOME GYM

DISCOVER series comprehensive
multifunctional strength training equipment

MULTIFUNCTION TRAINING MACHINE

Multifunctional Training Squat Machine

DISCOVER G108

Main Technical Parameters

- The main material is 100x50x3.0mm flat oval tube, which completely meets the safety strength of the equipment.
- Using the surface of the spraying material for environmental protection powder bundle, harmless to human body.
- For the rigid collision with cushioning loose rubber parts, are used non-toxic odorless natural rubber.
- The cushions and back cushions in contact with the human body are made of high-quality PU leather safe and environmentally friendly.
- The radius R is greater than 2.5 for all edging and sharp angles on the surface of each support body. All parts are overslide or protected.
- The loose end of the pipe shall be sealed with ABS material.
- The coupling fasteners are in full compliance with national standards, with high coupling strength and excellent anti-loosening performance.
- The rotating parts all adopt high precision bearings, the service life is higher than the common sleeve bearing.

STRENGTH

Widened And Thickened Pipe

The main tube is made of wider and thicker flat oval tube to meet the safety strength of high-strength apparatus use

Thickened Steel Rope

Thickened rope to ensure the service life and make the movement smooth and comfortable.

Adjustable Body Structure

The height of the machine body is adjustable in multiple ranges of equipment to meet the needs of different people and continuously improve the efficiency of sports.

4*102KG Standard Counterweight Piece

Free choice of counterweight strength, to meet the fitness enthusiasts high-intensity training.

MULTIFUNCTION TRAINING MACHINE

FTS Glide Multifunctional Training Machine

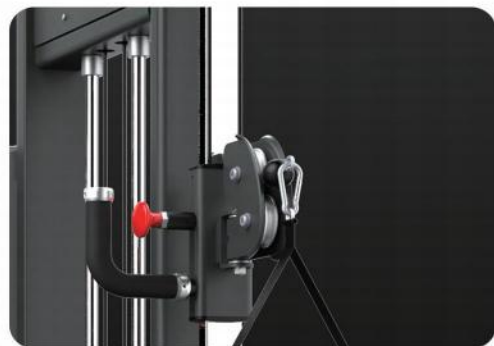

DISCOVER G109

Main Technical Parameters

- Heavy Duty equipment, 260kg product quality, solid and safe.
- The spraying material on the surface is environmentally friendly powder, harmless to human body
- High-precision adjustable pulley set, silent and wear-resistant.
- Adjustable rod with 28 holes training height, suitable for different people.
- 2*72KG Sufficient counterweight block, to meet the exercise of different sports intensity
- Large space range of motion, free to rotate 180°
- 18 Multifunctional muscle training, training the whole body muscles.

STRENGTH

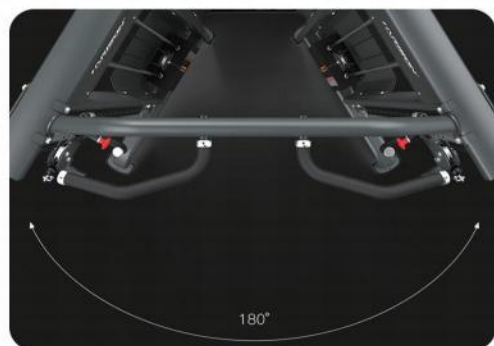

Adjustable Pulley Movement Components

A silent, wear-resistant frictionless pulley set, high-precision bearings to extend the service life, and an adjustable rod with a 20-hole design for people of different heights.

An Adjustable Counterweight Block

2*72kg counterweight options, each group of 12 counterweight pieces freely adjustable to meet the needs of different exercise intensities.

Have a Wide Space To Train Freely

Experience various training intensities with independent grip adjustment and free 180° rotation.

Tubing That Has Been Reinforced And Thickened

Because it is made of high-quality materials, it can survive repeated use and high-intensity training for a longer service life.

8-Station Multi-Function Trainer

DISCOVER 1060

Main Technical Parameters

- 3-speed free height adjustable priest stool, experience different training intensity, suitable for different groups of people
- Using the surface of the spraying material is environmentally friendly powder, harmless to human body.
- Free to adjust the counterweight, three adjustable butterfly arm, more training methods can be selected.
- Contact with the human body cushion, back cushion are made of high-quality PU leather safety and environmental protection.
- Rectangular pipe structure, the overall stronger and more durable.
- Eight people stand 60 functional full-body training.
- Professional steel rope, with high-precision anti-slip wheel set.
- Scientific humanized design, to create a different fitness tool.

STRENGTH

Note: Barbell piece is not in the product list, and needs to buy separately

Adjustable Priest Stool

3-speed height adjustable priest stool, adapt to the needs of different people.

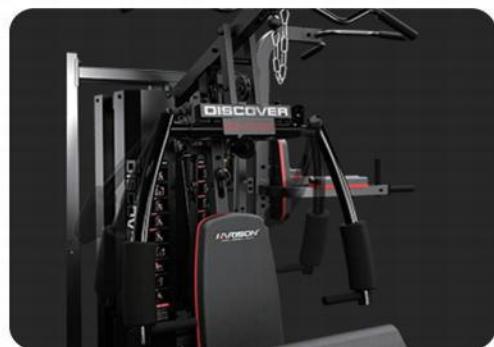

Finely Crafted PU Seat Cushion

High-quality PU leather, thickened multi-composite layer material, making the movement more comfortable.

Main Body Thickened Pipe

Rectangular pipe structure, solid and safe.

Butterfly Arm Function Training

Free adjustment of counterweight, three adjustable butterfly arm, more training methods can be selected.

MULTI-FUNCTION ROPE MOTION INTEGRATED HOME GYM

Glide Multi-Function Training Machine

DISCOVER G30411

Main Technical Parameters

- The main frame pipe adopts 2.5mm thickness of medium 95 round steel pipe and 50*100 round steel pipe.
- Special dynamic pulley design, can increase the movement stroke three times, the total stroke 3240mm.
- The use of fully wrapped metal shield, making the movement more secure.
- The movable arm can be adjusted up and down by 13 gears and left and right by 6 gears.
- Grouped counterweight iron allows two exercisers to use at the same time.
- The use of aluminum alloy pulley, improve the durability of the equipment and smooth movement.
- Immersion pretreatment process, full surface phosphate film, electrostatic powder not sprayed.
- ϕ 20mm Steel solid guide bar, after anti-corrosion plating and polishing treatment to ensure smooth operation and prevent rusting.

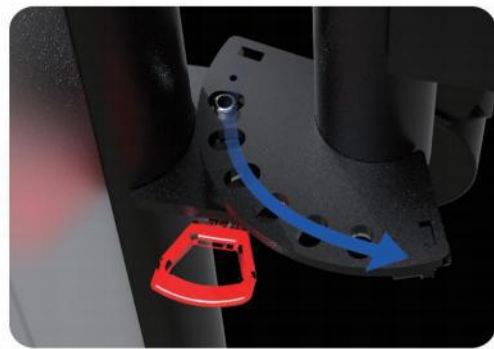

STRENGTH

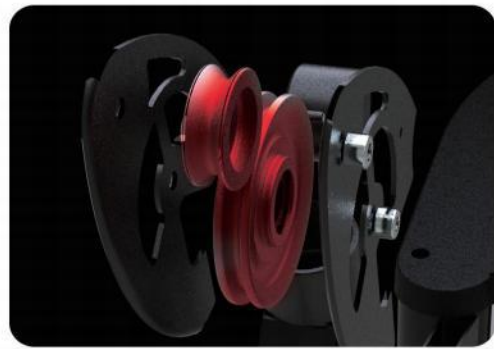

The Swing Arm 13 Gears Up And Down Freely Adjustable

According to the professional degree of the trainer can develop more training functions, a number of characteristic fitness exercise, so that users get a more comprehensive fitness effect.

6-Speed Front And Back Free Adjustment Of The Swing Arm

According to the trainer's professional degree, more training functions can be developed to carry out a number of characteristic fitness exercises, so that users can get a more comprehensive fitness effect.

Aluminum Alloy Pulley

The use of aluminum alloy pulley to improve the durability of the equipment and smoothness of movement, unique dynamic pulley design, can increase the movement of three times the stroke, the total stroke 3240mm.

28 Pieces Of Counterweight Blocks

Adopt 28 pieces of high quality counterweight (254mm high quality steel) and strong magnetic self-absorbing counterweight pins to meet the different intensity of fitness training.

Model Number	DISCOVER G1070 - B
Shield Material	Carbon steel
Pipe Specifications	50x100x2mm
Cushion Cushion	High quality PU leather
Pad Thickness	50mm
Paint Baking Process	Spray molding
Counterweight Specifications	60kg
Bearing	150kg
G.W	255kg
N.W	229kg
Product Size	2100*2415*2130mm

- High-quality ABS environmentally friendly plastic parts.
- One-time molding high rebound sponge, wear-resistant breathable leather outside, comfortable and durable
- The whole machine design in line with ergonomics.

Note: This product does not contain barbell pieces or O-bar, only show the role

Technical parameter

Model Number	DISCOVER G3004
Product Size	1510x1715x1225mm
Colour	Red + Black
N.W	56kg
Target Muscles	Chest, Barbell exercises
Counterweight	-

Note: This product does not contain barbells, only show the role

09 Technical parameter

Model Number	DISCOVER G3009
Product Size	1065x860x990mm
Colour	Red + Black
N.W	31kg
Target Muscles	Dumbbell and barbell exercises
Counterweight	-

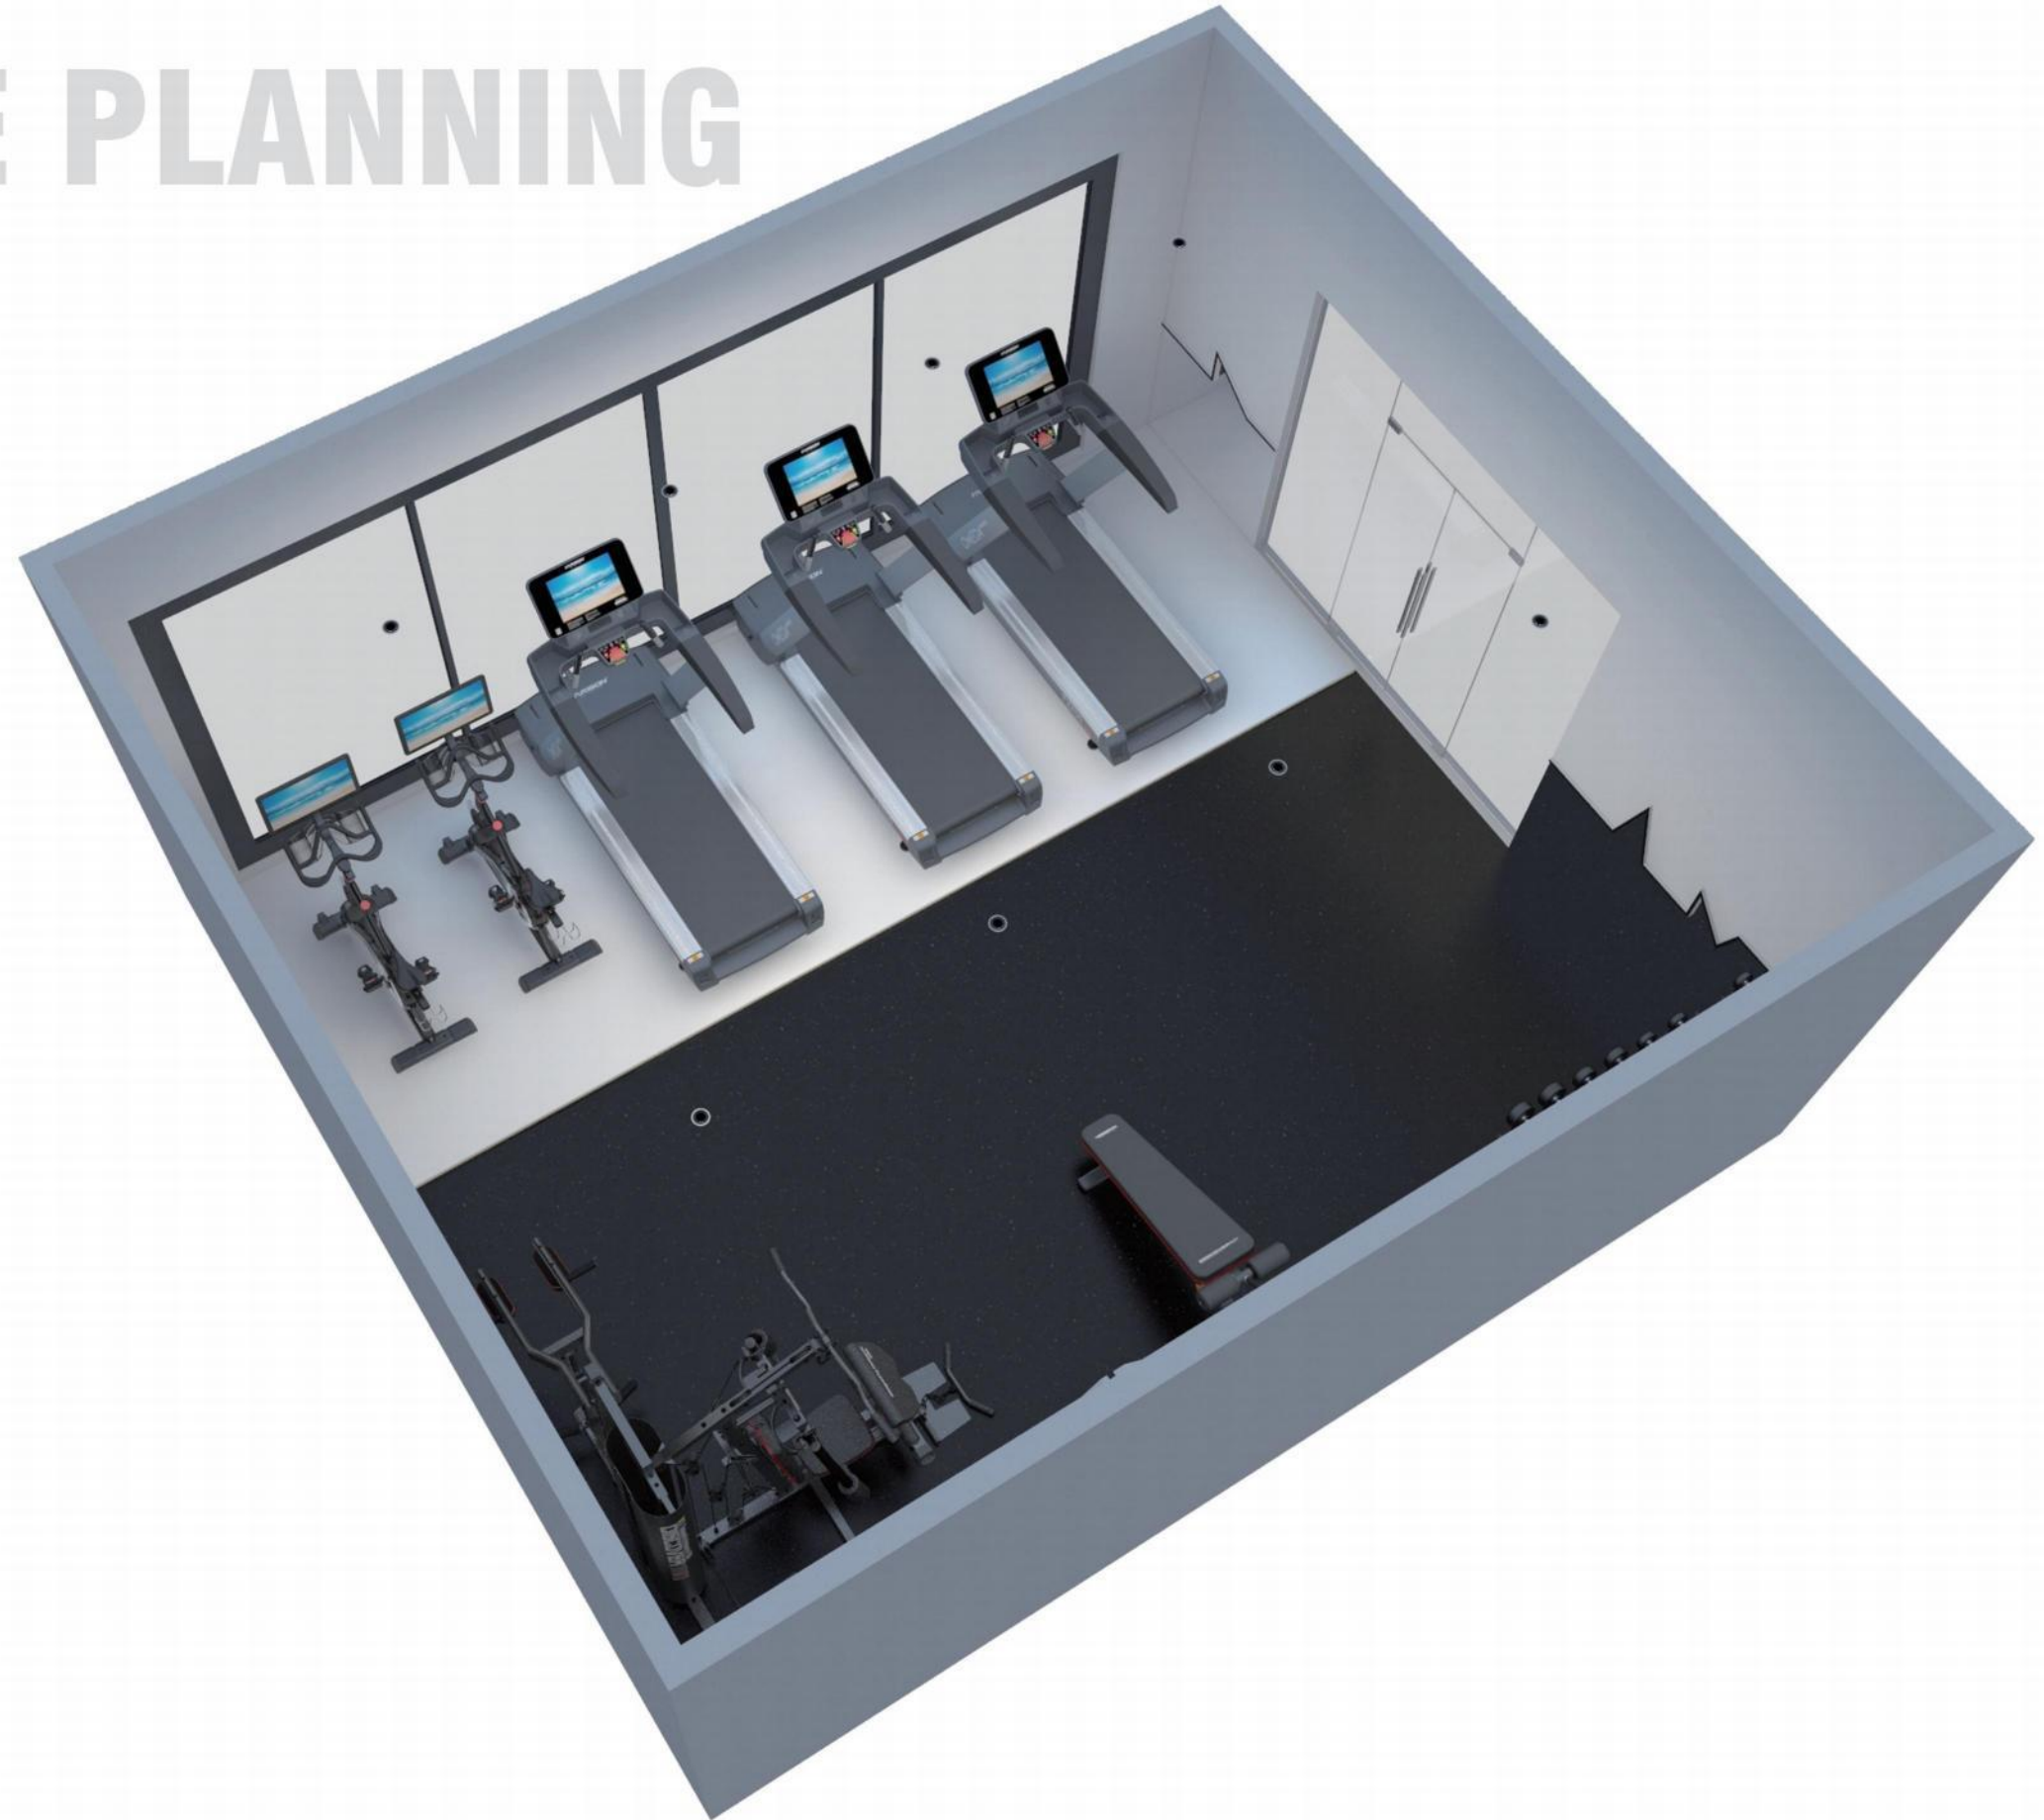

07 Technical parameter

Model Number	DISCOVER G3007
Product Size	1560x620x855mm
Colour	Red + Black
N.W	31kg
Target Muscles	Waist, abdominal position, flexibility exercises
Counterweight	-
