

MBX®

PREPARATION
FROM
SCRATCH

IT'S GONNA GET ROUGH

QUALITY MADE IN GERMANY SINCE 1987

 **MONTIPOWER**
Ultimate Surface Preparation

MBX®

OUR MBX® TECHNOLOGY HAS BEEN SPECIALLY DEVELOPED FOR USE IN AUTOMOTIVE WORKSHOPS. THE MBX® REMOVES RUST, CORROSION, OXIDATION, GASKETS, PAINT, UNDERSEAL AND SEALANTS FROM CAR PANELS WITH EASE.

LOW
ROTATIONAL
SPEED OF MAX.
3,500
RPM

THE MBX® ADVANTAGE

- Rapidly removes corrosion and oxidation of both hard and soft material
- Performs on uneven surfaces
- Highly flexible in tight areas
- No clogging or gumming of bristles
- No grinding or removal of substrate material
- Efficient cutting action - creates angular profile
- Cleans surfaces evenly
- Full visibility of work surface
- No heat development
- Long performance life and low cost of operation
- High safety level
- Adjustable rotation speed

SELECTED MBX® APPLICATIONS

- Removing corrosion and oxidation, rust and scale
- Removing paint, protective coatings and sealers
- Creating surface textures - from sharp, angular profiles to smooth finish
- Feathering into existing coatings
- Roughing fiberglass, plastic or rubber surfaces for repair or bonding
- Removing residue from industrial, manufacturing or construction operations

THE MBX® TECHNOLOGY

- The flexible-wire belts rotate in a patented housing, spinning outward with centrifugal force and working on a cushion of air
- Specially designed bristles are U-shaped staples inserted through a durable polyamide belt and provide safe, long lasting performance
- Bristle tips are angled, striking the surface and rebounding in a chiseling action removing surface coatings and scale but not substrate material
- Bristle tips are hardened and ground sharp to effectively remove both hard and soft material and create textured surface profiles
