

**Pharmacy is frustrating. We get it.  
We have, for over 45 years.**

## The Datascan Difference

Independent pharmacies are already being squeezed — PBMs, wholesalers, and everyone in-between. Datascan exists to help you protect your margins and regain control, with technology that exposes profit leaks and a business model that doesn't dip into your pockets. Our pricing is stable, our fees are transparent, we don't upsell you to death, and our support team sticks around — so you get real answers from people who actually know your pharmacy.

## Dependable by Design

### The Datascan Guarantee:

- ✓ **No hidden Fees:** No surprise price increases.
- ✓ **No Hidden Lock-in Language:** You're not locked into anything you cannot get out of.
- ✓ **No Forced Vendor Relationships:** We focus on the big picture, longevity in our relationship. You have choices.
- ✓ **Stable Software Environment:** Our goal is to keep your business running smoothly.
- ✓ **Support Team with Very Low Turnover:** We get to know each other. Like family.
