Introducing Sex Toys Into Your Relationship

Sex toys can be a great way to ensure that all parties are having fun during sex. From finding new erogenous zones to learning how to reach orgasm, vibrators can enhance intimacy with your partner. Everyone has different needs and desires, and sex toys can be a great way to make sure everyone can finish. However, bringing up this subject can be difficult, as we don't want to invalidate our partner's feelings by suggesting that they aren't enough to satisfy our needs.

There is a misconception that vibrators are for solo use, or can only be used by one party during sex. This also means that it can be difficult to bring this up with a partner, especially if you haven't had that conversation before. When a couple has good communication skills and can ask for what they want and need during sex play, then the use of dildos and vibrators as well as other sexual paraphernalia is just another way to increase pleasure. A lot of people are also too scared to 'rock the boat' and change from vanilla sex, but opening up this conversation is going to make it a lot easier for you and your partner to understand each other, and therefore have more enjoyable sex.

How to go from wanting to introduce toys into your relationship to actually introducing sex toys into your relationship remains the question.

Below are a few handy tips to help you broach the topic. Is your timing right - set aside time outside of sex for a conversation about bringing toys into your play. There is no optimal time frame in a relationship to talk about sex toys. Months or even years down the road, once you've started having more open and regular conversations about your sexual wants and needs, you can raise the topic.

You might also try saying, 'I'd love for us to look at toys together to enhance the sensations for the both of us.' Or, 'I love when we have sex and I think it might be fun to try something different together'

Or, if you're interested in using something like a vibrating cock ring or vibrating harness, you could say 'I'd love to try something you can wear.' Again, make it clear that it's not about replacing your partner, but experiencing something new together.

You need to know that what you're proposing is totally normal—and not a big deal. It's completely normal to want to add sex toys into the bedroom, to want to experiment with someone you trust and/or love, or even to need a vibrator to reach orgasm,

If you are both on the same page go shopping together, whether it's online or a physical shop. Once you become accustomed to looking at different sex toys together it will be a lot of fun too!

The benefits of sex toys.

Every relationship is VERY different. Sex aids make it easier for everyone to have the best experience possible, using vibrators, dildo's and butt plugs in your relationship can help you have more enjoyable sex and quicker and more intense orgasms but also help to foster a more intimate relationship. They can also be used solo (even when you are in a relationship) eg. if you're long-distance, or maybe your partner just likes to watch you get off. Sex toys shouldn't be considered a replacement for human contact, but as a way to help people learn more about their bodies and what feels good. Overall, they can be a catalyst to growing sexually and allow you to have a more enjoyable time. It's been proven that orgasms relieve stress and boost your mood, and toys are just another way to achieve.

Struggle My Bed Restraints

PILLOW TALK

With **JONI MORRISSEY**

What is a fetish or kink? Is my fetish normal?

A fetish can be defined as anything that triggers feelings of sexual desire in a person that is usually nonsexual. A fetish is when something completely ordinary brings you great pleasure and fulfilment sexually. As well as having a fetish for something (like feet), you can also have a fetish for a place (such as sex in public); or you might have a fetish for a texture, such as latex. Defining fetishes as those that are outside the norms doesn't mean every out-of-the-box sexual desire can be termed a fetish. I believe there is a line separating something that is a fetish from something that is just kind of fun. As a true fetish, there must be an associated sex act that triggers your desire for the object or act. For example, if you enjoy getting spanked occasionally or even regularly, that does not mean you have an actual spanking fetish, which is the act of dominating that gets a person off.

Why do we have these sexual kinks and quirks? "Fetishes are generally thought to be learned behaviours where a person associates a certain object with sexual arousal through experience," Your fetish may have been formed in childhood or adolescence, or you may have discovered it as an adult. I always urge people to be curious and to try new things because they don't know if they're into them until they try them."

Bringing up your sexual fetishes with a new partner can be tricky, partly because of a general misunderstanding of fetishes. Our own fetishes can cause us to feel shame because we don't understand them. However, there's no need to feel shame. First of all, you don't choose your fetish. Second, they're extremely common.

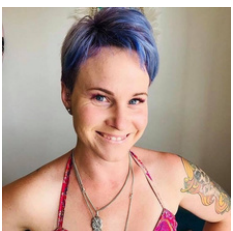

Unlike other words, fetish has a long and distinguished history. "Feitico" comes from the Portuguese word meaning obsession. A fetish is today considered a recurring fantasy, desire, or behaviour that is sexually compelling and lasts at least six months. There are various types of fetishes, from sexually manifested to non-sexually manifested. In simple terms, sexual fetishes are just a type of paraphilia, or atypical behaviour, which includes non-traditional activities such as cross-dressing and dominance.

Is My Fetish Normal?

The notion that certain sexual preferences and desires are 'abnormal' is controversial because what is considered "normal" differs across cultures and changes over time; there is no agreed-upon definition as to what constitutes paraphilia.

Despite the prevalence of certain fetishes, human sexuality is highly individualized: Almost anything can be a fetish: feet, fur coats, diapers, pee, bugs, menstrual blood, mythical creatures like unicorns and dragons, bicycles, bondage, watching or being watched during sex, and more. Having sexual interests is a normal part of you!
