THE SURGICAL ROOM

Surgical Specialist Team | Canada

Our Surgical Team is a national network of expert specialists spanning coast-to-coast across Canada, united by advanced experience in implant dentistry and regenerative therapies. With diverse clinical backgrounds and deep surgical expertise, our team delivers practical, evidence-based insight across the latest biomaterials, cutting-edge regenerative solutions and a host of clinical armamentarium. This breadth of knowledge ensures strong clinical relevance and credible perspective across both emerging innovations and established treatment protocols.

Beyond clinical leadership, our specialists serve as trusted partners for industry collaboration. We support promotional initiatives, educational programs, and new product launches by providing knowledgeable representation, clinical validation, and meaningful engagement with the surgical community. Please connect with our specialist team and discover how our experts can help elevate your clinical outcomes and advance the future of regenerative implant dentistry.

Wishing you all predictable surgical outcomes.

JASON SCHULER
National Manager, Surgical Sales

Your neck feels every gram, and lighter loupes help minimize cervical loading linked to musculoskeletal pain.

Loupe weight may seem incremental, but the neck experiences it continuously. Even small reductions in weight can lessen cervical loading during long procedures, helping reduce muscular fatigue and musculoskeletal pain over time. When visual tools are lighter and better balanced, they require less compensatory effort.

Q-Optics

A lifetime warranty isn't a tagline, it's a promise.
We stand behind our loupes for the long haul, so you can focus on your patients, your practice, and the years ahead.

INDUCE Oi-9™ BIOIMPLANTS - Induce Biologics

Induce Oi-9™ bioimplants are 100% allograft products processed with innovative NMP technology, designed to enhance the bioavailability of growth factors for optimal bone regeneration. These bioimplants are available in multiple forms, including fibers and particulates, to accommodate diverse procedural needs and ensure seamless integration into clinical workflows.

Convenient and shelf-stable, Induce Oi-9™ products are sterile and can be stored at ambient temperatures. At the time of use, they can be quickly rehydrated using blood, sterile saline (0.9%), or another isotonic solution, based on the clinician's preference.

Induce Oi-9™ bioimplants are tissue-based products that meet the criteria for regulation solely under section 361 of the PHS Act and are considered 361 HCT/P. Each product package includes an Instructions for use (IFU) document, which should be reviewed for detailed product information.

INDUCE Oi-9™ Bioimplants

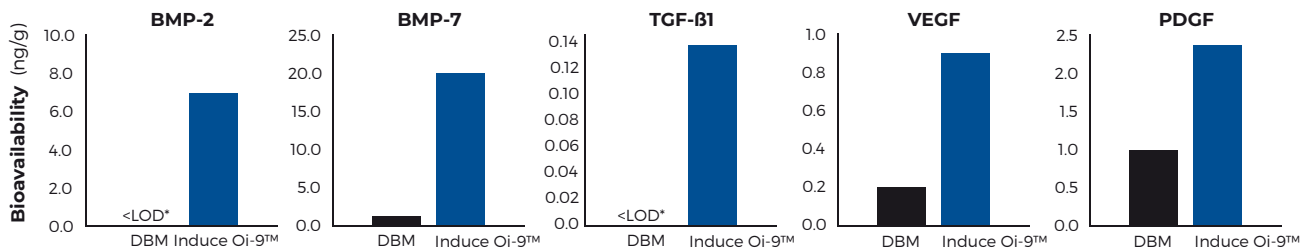

Available in multiple forms to meet specific procedural and anatomic requirements

SURGICAL ROOM - Regenerative

Allograft Particulate

ORAGRAFT® - LifeNet Health®

Mineralized Cortical Particulate (FDBA)

Used in areas where an osteoconductive graft is needed. Can be freely mixed with other grafting materials and retains the mechanical properties of normal bone.

★ Most Popular

Description	Order #	Size
250-1000 microns	LNH-GC1/20	0.25 cc
	LNH-GC1/10	0.50 cc
	LNH-GC1/8	0.70 cc
	LNH-GC1/4	1.20 cc
	LNH-GC	2.50 cc

Demineralized Cortical Particulate (DFDBA)

Used as a bone void filler in GTR and GBR applications. Demineralized using proprietary and patented PAD technology that targets ranges between 1.0-4.0% residual calcium.

Description	Order #	Size
250-1000 microns	LNH-DGC1/20	0.25 cc
	LNH-DGC1/10	0.50 cc
	LNH-DGC1/8	0.70 cc
	LNH-DGC1/4	1.20 cc
	LNH-DGC	2.50 cc

Mineralized Cancellous Particulate (FDBA)

A larger particle osteoconductive graft providing a scaffold for new bone growth in a grafted area. Popular for extraction, sockets and ridge augmentation.

Description	Order #	Size
250-1000 microns	LNH-OCAN-0.5A	0.50 cc
	LNH-OCAN-1.0A	1.00 cc
	LNH-OCAN-2.0A	2.00 cc
1000-2000 microns	LNH-OCAN-0.5B	0.50 cc
	LNH-OCAN-1.0B	1.00 cc
	LNH-OCAN-2.0B	2.00 cc

Demineralized Large Particulate (DFDBA)

The largest particle graft available, commonly used in ridge augmentation and sinus lift procedures. Provides mechanical strength in areas used.

Description	Order #	Size
1-8 mm Cancellous	LNH-DCAN5	5.0 cc
1-4 mm Cortical	LNH-DGC5	5.0 cc

Mixed Allograft Particulates

ORAGRAFT® - LifeNet Health®

50% Mineralized Cortical / 50% Mineralized Cancellous Mix (FDBA)

The cancellous and cortical blend provides an osteoconductive scaffold as well as effective volume bulking and fast site development.

★ Most Popular

Description	Order #	Size
250-1000 microns	LNH-CCMIX-0.5	0.50 cc
	LNH-CCMIX-1.0	1.00 cc
	LNH-CCMIX-2.0	2.00 cc

70% Mineralized Cortical / 30% Demineralized Cortical Mix (FDBA)

70/30 Mix reduces time to blend grafts chair-side and minimizes the need to carry multiple graft types in inventory.

Description	Order #	Size
250-1000 microns	LNH-MD050	0.50 cc
	LNH-MD010	1.00 cc
	LNH-MD020	2.00 cc

MAXGRAFT® - Botiss

Maxgraft® granules are allograft bone substitute from human donor bone, processed by the Cells+Tissuebank Austria with a special cleaning process (Allotec® process) and available in cancellous and cortico-cancellous form. Due to its preserved natural bone structure and collagen content, it serves as a scaffold for natural bone regeneration and has the potential of complete remodeling into patients' own bone.

Description	Order #	Size
0.25 mm to 1.0 mm particle size in vial	BOTISS-35005S	0.50 cc
	BOTISS-35010S	1.00 cc
	BOTISS-35020S	2.00 cc
	BOTISS-35040S	4.00 cc

Demineralized Moldable Fibers

100% Bone, No Carrier

ORAGRAFT® ENDURE - LifeNet Health®

OraGRAFT Endure is comprised of two components¹: bone fibers which are demineralized to encourage bone formation and healing and² cancellous particulate (250-1000 microns) which allows for improved space maintenance. The bone fibers interlock, allowing the graft to become moldable upon rehydration without the use of a carrier.

Order #	Size
LNH-DFC1007	0.5 cc
LNH-DFC1008	1.0 cc
LNH-DFC1009	2.5 cc

¹ Murphy MB, Suzuki RK, Sand TT, et al. Short term culture of mesenchymal stem cells with commercial osteoconductive carriers provides unique insights into biocompatibility. J Clin. Med. 2013; 2:49-66; doi:10.3390/jcm2030049
² Zhang M, Powers RM, and Wolfinbarger L. Effect(s) of the demineralization process on the osteoinductivity of demineralized bone matrix. J Periodontol. 1997; 68:1085-1092

ORAGRAFT® PRIME - LifeNet Health®

OraGRAFT Prime is 100% bone fibers, demineralized to encourage bone formation and healing. The fibers interlock, allowing the graft to become moldable upon rehydration without the use of a carrier. Contains more BMP's than bone putty's with a carrier.

Order #	Size
LNH-DF1007	0.5 cc
LNH-DF1008	1.0 cc
LNH-DF1009	2.5 cc

Cortical Plate

ORAGRAFT® CORTICAL PLATE - LifeNet Health®

The cortical plate functions as a stable, slowly resorbed material that can be used as a substitute for autologous bone recovered from the mandibular shelf.

Order #	Size
LNH-CP301501	15 x 30 x 1 (mm)

Xenograft Particulate

CERABONE® - Botiss

cerabone® is a 100% pure bone mineral of bovine origin manufactured by a unique 1200°C production process. It has been successfully applied in millions of patients in regenerative dentistry and has been in use for more than 20 years in various medical applications (e.g. craniofacial surgery, oncology and hand and spine surgery).

Description	Order #	Size
0.5 mm to 1.0 mm particle size in vial	BOTISS-1510	0.5 cc
	BOTISS-1511	1.0 cc
	BOTISS-1512	2.0 cc
	BOTISS-1515	5.0 cc

CERABONE® +HYA - Botiss

cerabone® +HyA combines the established bovine bone grafting material cerabone® with the well-known properties of hyaluronic acid. Thanks to the pronounced liquid binding capacities of hyaluronate, cerabone® +HyA forms a sticky bone material upon hydration that provides unique application comfort by allowing both easy uptake and delivery to the site of application.

Description	Order #	Size
0.5 mm to 1.0 mm particle size in vial	BOTISS-1810	0.5 cc
	BOTISS-1811	1.0 cc

INTEROSS® BOVINE XENOGRAFT - SigmaGraft

InterOss® is a natural hydroxyapatite bone grafting material for use in dentistry. Made from a proven multi-step purification process which leaves only a bone composition.

Vials

Description	Order #	Size
0.25 mm to 1.0 mm particle size in vial	SIG-IOG025	0.25g / 0.54 cc
	SIG-IOG050	0.5g / 1.08 cc
	SIG-IOG100	1.0g / 2.1 cc
	SIG-IOG200	2.0g / 4.32 cc
1.00 mm to 2.0 mm large particle size in vial	SIG-IOLG050	0.50g / 2 cc
	SIG-IOLG100	1.0g / 4.0 cc
	SIG-IOLG200	2.0g / 4.32 cc

Syringes

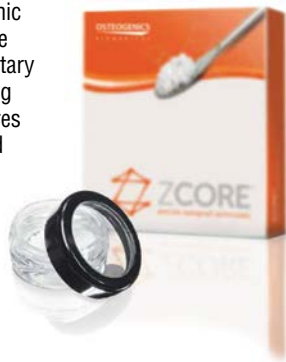

Description	Order #	Size
0.25 mm to 1.0 mm particle size in syringe	SIG-IOGS025	0.25 cc
	SIG-IOGS050	0.5 cc
	SIG-IOGS100	1.00 cc

SURGICAL ROOM - Regenerative

Xenograft Particulate

ZCORE™ PORCINE XENOGRAFT- Osteogenics

Zcore™ is an osteoconductive, porous, anorganic bone mineral with a carbonate apatite structure derived from porcine cancellous bone. Proprietary processing steps preserve both interconnecting macroscopic and microscopic porous structures of Zcore™ that helps support the formation and in-growth of new bone.

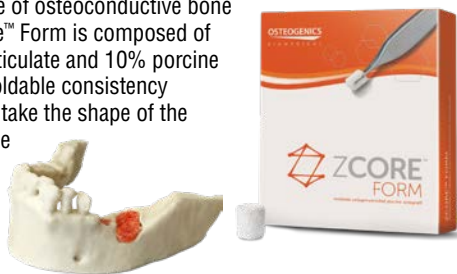

Proprietary processing steps preserve both interconnecting macroscopic and microscopic porous architecture.

Description	Order #	Size
0.25 mm to 1.0 mm particle size in vial	OST-ZS050	0.50 cc
	OST-ZS100	1.00 cc
	OST-ZS200	2.00 cc
	OST-ZS400	4.00 cc
1.0 mm to 2.0 mm particle size in vial	OST-ZL100	1.00 cc
	OST-ZL200	2.00 cc
0.25 mm to 1.0 mm particle size in syringe	OST-ZY025	0.25 cc

Collagen Enriched Porcine Xenograft

ZCORE™ FORM - Osteogenics

Zcore™ Form is a composite of osteoconductive bone mineral and collagen. Zcore™ Form is composed of 90% porcine xenograft particulate and 10% porcine collagen by weight. The moldable consistency of Zcore™ Form allows it to take the shape of the defect while also making the overall handling of the product easier and more convenient than particulate grafts.

Description	Order #	Size
9 mm diameter x 8 mm	OST-ZF050	0.5 cc
11 mm diameter x 12 mm	OST-ZF100	1.0 cc
11 mm diameter x 22 mm	OST-ZF200	2.0 cc

OST-ZF050

OST-ZF100

OST-ZF200

ZCORE™ EXPAND - Osteogenics

Zcore™ Expand is a composite of osteoconductive bone mineral and expandable collagen. Zcore™ Expand is composed of 80% porcine xenograft particulate and 20% porcine collagen by weight. Zcore™ Expand is supplied as a compressed preformed sponge that expands when hydrated, allowing it to take the shape of the defect. The unique expandable property makes Zcore™ Expand a popular option for extraction site grafting and/or sinus augmentation that uses a lateral approach.

Socket

Order #	Size
OST-ZXSOCKET	5 x 17 mm, 10 x 17 mm (Expanded)

Small Sinus

Order #	Size
OST-ZXSINUSS	13 x 10 mm, 17 x 10 mm (Expanded)

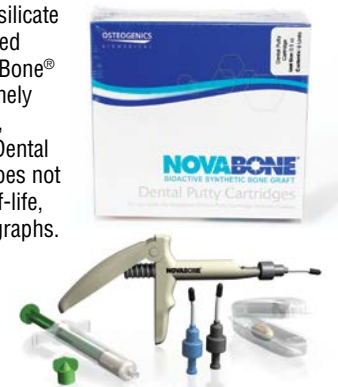

Large Sinus

Order #	Size
OST-ZXSINUSL	17 x 12 mm (Expanded)

Synthetics

NOVABONE® DENTAL PUTTY - Osteogenics

The next generation Calcium-Phosphosilicate bone substitute engineered for enhanced handling and predictable results. NovaBone® Dental Putty is ready to use and extremely user-friendly. It is pre-mixed, cohesive, moldable, and adaptable. NovaBone® Dental Putty is stable at room temperature, does not require refrigeration, has a 4-year shelf-life, and appears partially opaque on radiographs.

Description	Order #	Qty. / Size
Cartridge Delivery	OST-NA3620	2 x 0.5 cc / box
	OST-NA3640	4 x 0.5 cc / box
	OST-NA4640	4 x 0.25 cc / box
	OST-NA4600	Cartridge applicator gun
Syringe Delivery	OST-NA1610	1 x 0.5 cc / box

	OST-NA0622	2 x 1.5 cc / box
	OST-NA0660	6 x 0.5 cc / box

Resorbable Collagen

MILTEX ABSORBABLE COLLAGEN WOUND DRESSING

Miltex Absorbable Collagen Wound Dressing are soft, white, pliable, non-friable, absorbent sponges made from collagen obtained from bovine deep flexor (Achilles) tendon. The tendon is one of the purest sources of collagen that can be readily obtained and processed in commercial quantities. These dressings are intended for use on moist or bleeding wounds where a stabilized blood clot can help protect the surface of the wound from further injury. Collagen wound dressing products are typically reabsorbed by the body within 2 to 4 weeks after placement.

HELIPLUG™ - Miltex

- Extraction Sites.
- Biopsy Sites.

MIL-62-202 Box of 10
HeliPlug, 1 cm x 2 cm [mfg #62-202]

HELITAPE® - Miltex

- Minor oral wounds.
- Closure of grafted sites.
- Repair of Schneiderian Membranes.

MIL-62-200 Box of 10
HeliTape, 1" x 3"
(2.5 cm x 7.5 cm) [mfg #62-200]

HELICOTE® - Miltex

- Palatal donor sites.
- Mucosal flaps.

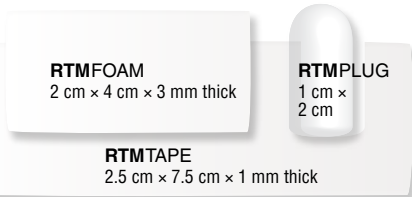

MIL-62-201 Box of 10
HeliCote, ¾" x 1.5" [mfg #62-201]

CYTOPLAST RTM - Osteogenics

Cytoplast™ RTMPlug, RTMTape, and RTMFoam absorbable wound dressings consist of highly purified collagen that is derived from bovine tissue of United States origin. The RTM wound dressings are essentially resorbed within 30 days.

Used in the treatment of surgical wounds, extraction sites, dental sores (non-infected or viral), oral ulcers, suture sites, burns, and traumatic wounds.

OST-RTMPLUG10 Box of 10
RTMPlug [mfg #RTMPLUG10]
1 cm x 2 cm

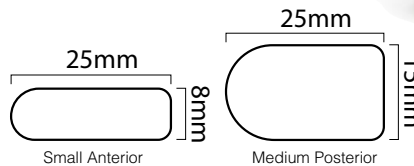

OST-RTMTAPE10 RTMTape [mfg #RTMTAPE10]
2.5 cm x 7.5 cm x 1 mm

OST-RTMFOAM10 RTMFoam [mfg #RTMFOAM10]
1.9 cm x 3.8 cm x 3 mm

FOUNDATION - J. Morita

Collagen-based Bone Augmentation Material. Promotes bone growth after tooth extraction allowing implants to be placed as early as 8 weeks.

- Collagen-based, bone filling augmentation material.
- Helpful in maintaining bone following permanent tooth extraction.
- Bullet shaped for easy placement in extraction sockets.
- Available in 2 sizes, small and medium.
- Can be trimmed or shaped for a better fit.
- Primary closure or membrane not required.

JMO-27-500100 Box of 10
Small Size [mfg #27-500100]

JMO-27-500200 Box of 5
Medium Size [mfg #27-500200]

JMO-27-500150 Box of 6
3 x Small Size + 3 x Medium Size [mfg #27-500150]

Resorbable Membranes

CYTOPLAST RTM COLLAGEN MEMBRANE - Osteogenics

Bovine-derived, engineered (reconstituted), collagen membrane. Long-lasting collagen membrane; resorption profile of 26-38 weeks. Easily drapes over the ridge, but not so flimsy that it collapses into defects. High tensile strength for stabilization, if necessary. Multi-layer construction; cell occlusive design.

2/box
OST-RTM1520 15 mm x 20 mm [mfg #RTM1520]
OST-RTM2030 20 mm x 30 mm [mfg #RTM2030]
OST-RTM3040 30 mm x 40 mm [mfg #RTM3040]

SURGICAL ROOM - Regenerative

Resorbable Membranes (continued)

INTERCOLLAGEN GUIDE COLLAGEN MEMBRANE - Sigmagraft

InterCollagen® Guide is a resorbable collagen membrane, derived from porcine pericardium. Substantially resorbed within 15 weeks after implantation, it is adaptable and easy to handle. It can be trimmed to the desired size and conforms easily when hydrated. The product is terminally sterilized via gamma irradiation.

Order #	Size
SIG-ICG1520	15 x 20 mm
SIG-ICG2030	20 x 30 mm
SIG-ICG3040	30 x 40 mm

JASON MEMBRANE - Botiss

Collagen membrane from porcine pericardium, with ultra-thin profile, long barrier function, and unique structure that provides exceptional tear resistance for fixation with pins or sutures.

Order #	Size
BOTISS-681520	15 x 20 mm
BOTISS-682030	20 x 30 mm
BOTISS-683040	30 x 40 mm

ZMATRIX PORCINE PERITONEUM MEMBRANE - Osteogenics

Zmatrix™ is a natural, porcine peritoneum collagen membrane with a perfectly soft consistency that drapes without the usual self-adherence experienced with other natural collagen membranes. Zmatrix™ is a natural, native collagen membrane; cross-linking chemicals and agents are unnecessary. † Substantially resorbs within 26 weeks.

Medium Drapability

† Hoganson DM, Owens GE, O'Doherty EM, Bowley CM, Goldman SM, Harilal DO, Neville CM, Kronengold RT, Vacanti JP. Preserved extracellular matrix components and retained biological activity in decellularized porcine mesothelium. *Biomaterials*. 2010; 27: 6934-6940.

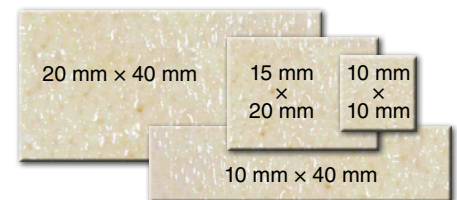

Order #	Size
OST-ZM1520	15 mm x 20 mm
OST-ZM2030	20 mm x 30 mm
OST-ZM3040	30 mm x 40 mm

Dermis Membranes

ORACELL DECELLULARIZED DERMIS ALLOGRAFT - LifeNet Health®

Intended to be used in conjunction with guided tissue and bone regeneration, and oral soft tissue correction. Exclusive Matracell™ process removes ≥ 97% of donor DNA and cells, leaving an intact acellular framework. Dermis products are provided medical device grade sterile (10-6), for increased safety for your patients. Retains native growth factors, collagen and elastin.

- Pre-hydrated - Excellent handling. Minimal prep time (less than 60 seconds).
- Compare to AlloDerm® & Puros® Dermis.
- Stores at room temperature, no refrigeration required.

1/box, Thickness (0.76 - 1.25 mm)

LNH-OCELL100	15 mm x 20 mm [mfg #OCELL100]
LNH-OCELL101	20 mm x 40 mm [mfg #OCELL101]
LNH-OCELL150	10 mm x 10 mm [mfg #OCELL150]
LNH-OCELL151	10 mm x 40 mm [mfg #OCELL151]

1/box, Thickness (1.26 - 175 mm)

LNH-OCELL200	15 mm x 20 mm [mfg #OCELL200]
LNH-OCELL201	20 mm x 40 mm [mfg #OCELL201]
LNH-OCELL250	10 mm x 10 mm [mfg #OCELL250]
LNH-OCELL251	10 mm x 40 mm [mfg #OCELL251]

Non-Resorbable Membranes

CYTOPLAST™ TXT-200 HIGH DENSITY PTFE MEMBRANE - Osteogenics

- Non-resorbable high-density PTFE membrane.
- Ideal dental membrane for socket grafting and grafting where primary closure is not possible.
- Porosity of less than 0.3 microns creates impervious barrier to bacteria.
- Designed to withstand exposure.

Size (12 mm x 24 mm)

OST-TXT1224-1	1/box [mfg #TXT1224-1]
OST-TXT1224	10/box [mfg #TXT1224]

Size (25 mm x 30 mm)

OST-TXT2530-1	1/box [mfg #TXT2530-1]
OST-TXT2530	4/box [mfg #TXT2530]

CYTOPLAST GBR-200 dPTFE MEMBRANE - Osteogenics

The original Cytoplast™ high-density PTFE membrane. Designed to withstand exposure. Impervious to bacteria (Data on file). Non-surgical removal when left exposed

- OST-GBR1224** 10/box, 12 mm × 24 mm [mfg #GBR1224]
- OST-GBR2530** 4/box, 25 mm × 30 mm [mfg #GBR2530]

CYTOPLAST TITANIUM-REINFORCED HIGH-DENSITY PTFE MEMBRANES - Osteogenics

Non-resorbable - High-Density PTFE Membrane.

- Ideal for ridge augmentation and grafting bony defects missing one or more walls.
- Membrane & Titanium frame may be trimmed and shaped to create additional space for bone growth.
- Although primary closure is recommended for long healing periods, dense PTFE membrane is impervious to bacteria and can withstand exposure.
- 250 (TI-250) or 150 (TI-150) microns thick.
- Membrane can be molded and shaped for tenting and space maintenance, and is also popular for adding structural support when grafting 3 or 4-walled extraction sites.
- Can be secured with screws.

POPULAR SIZES LISTED BELOW

Description	Order #	Qty.
1 Anterior Singles (14 mm × 24 mm) Designed for single-tooth extraction sites, especially where one or more bony walls are missing.	OST-TI250AS-N-2	pack of 2
2 Posterior Singles (20 mm × 25 mm) Designed for grafting posterior extraction sites and limited ridge augmentation.	OST-TI250PS-N-2	pack of 2
3 Anterior Narrow (12 mm × 24 mm) Designed for narrow single-tooth extraction sites, especially where one or more bony walls are missing.	OST-TI250ANL-N-2	pack of 2
4 Posterior Large (25 mm × 30 mm) Designed for grafting large bony defects, including ridge augmentation.	OST-TI250PL-N-2	pack of 2
5 Buccal (17 mm × 25 mm) Designed for large buccal defects. Pilot holes in titanium strut for easier placement of screws.	OST-TI150BL-N-2	pack of 2

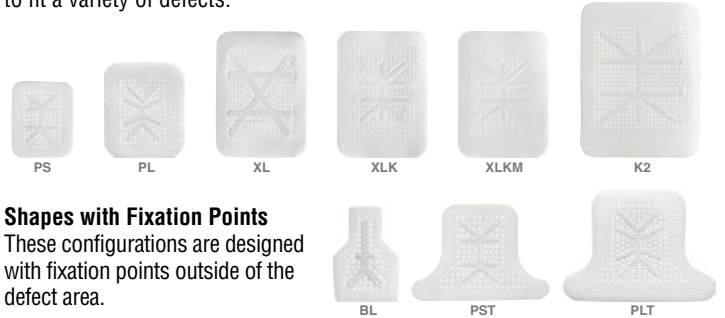

RPM REINFORCED PTFE MESH - Osteogenics

RPM's unique circular macroporous design allows for direct contact between the bone graft and periosteum, allowing naturally occurring revascularization and infiltration of cells into the bone graft.

Versatile Rectangular Shapes

These configurations can be trimmed to fit a variety of defects.

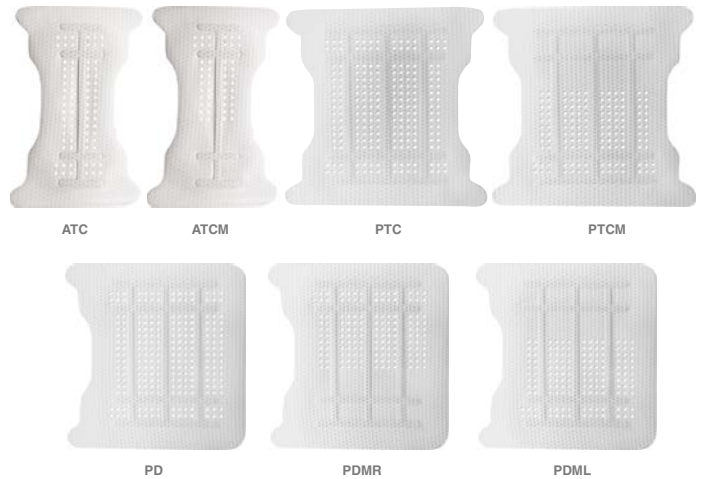

Shapes with Fixation Points

These configurations are designed with fixation points outside of the defect area.

Interproximal Shapes

These configurations are designed to fit between existing teeth.

Versatile Rectangular Shapes, 1/box

- OST-RPM200PS** PS, 20 mm × 25 mm [mfg #RPM200PS]
- OST-RPM200PL** PL, 25 mm × 30 mm [mfg #RPM200PL]
- OST-RPM200XL** XL, 30 mm × 40 mm [mfg #RPM200XL]
- OST-RPM200XLK** XLK, 30 mm × 40 mm [mfg #RPM200XLK]

SURGICAL ROOM - Regenerative

Fixation Kits

PRO-FIX™ PRECISION FIXATION SYSTEM - Osteogenics

Pro-Fix™ Fixation Kits (available as membrane, tenting or bone screws kits).

Membrane Fixation Kit

The Pro-fix™ Membrane Fixation Kit includes all the instruments needed to begin placing membrane fixation screws.

OST-PFMK20 Pro-Fix™ Membrane Fixation Kit [mfg #PFMK20]

Membrane Fixation Screws

Designed as an attractive alternative to using tacks for membrane stabilization. Easy pick-up, solid stability of the screw during transfer to the surgical site, and easy placement make membrane fixation quick and simple.

Order #	Size	Qty.

Bone Fixation Kit

The Pro-fix™ Bone Fixation Kit includes all the instruments needed to place bone screws.

OST-PFBK12 Pro-Fix™ Bone Fixation Introductory Kit [mfg #PFBK12]

Bone Fixation Screws

Designed with finer pitched, self-tapping threads that give the screws greater clamping force while using less driver torque. The screws' threads are equipped with a cutting flute that allows for easier insertion into harder bone. The screws are placed into a 1.2 mm pre-drilled pilot hole.

MASTER-PIN-CONTROL SYSTEM - MEISINGER

The Master-Pin-Control Bone Management® system is used for the fixation of membranes (absorbable, non-absorbable and titanium membranes) in order to avoid micro-mobility of the graft.

MEI-BMP00 Master-Pin-Control Full Kit (with 34 pins) [mfg #BMP00]

Kit includes:

2 × Twist drills
Shank: 205(RA L)
Size: 006

2 × Twist drills
Shank: 205(RA L)
Size: 008

2 × Initial bur
Shank: 204(RA)
Size: 018
Length: 12.0mm

1 × Screw driver
To remove pins

1 × Fixation holder

1 × Pin holder

Pins
Length: 3 mm, 5 mm
⊗ Nonreusable
▲ Minimal diameter: 0.5 mm
┌ External diameter: 0.6 mm

¹ Largest working part diameter in 1/10 mm

cerabone[®] plus

NATURAL BOVINE BONE SUBSTITUTE MATERIAL
WITH HYALURONATE

cerabone[®] plus combines the established **bovine bone grafting** material cerabone[®] with the well-known properties of hyaluronic acid.

Thanks to the pronounced liquid binding capacities of hyaluronate, cerabone[®] plus forms a sticky bone material upon hydration that **provides unique application comfort** by allowing both easy uptake and delivery to the site of application.

STICKY BONE OUT OF THE BLISTER

EXPERIENCE MT-BONE

From revolution to evolution: a new era of power, precision, and innovation in bone surgery

When mectron introduced PIEZOSURGERY[®] in 2001, the technology was revolutionary for bone surgery: a device that offered surgeons all over the world precision, safety, perfect ergonomics and the highest predictability. This new technology became the state of the art for bone surgery.

Thanks to the latest generation, we are now entering a new era. MT-BONE is not only introducing the new PIEZODRILL[®] technology but also ushering in a new era of PIEZOSURGERY[®] with enhanced power, improved insert control, and an innovative unit setting.

PIEZOSURGERY[®] MT HANDPIECE

- New circular LED light (more than 90000 LUX)
- New ergonomics for a better handling
- Disposable irrigation line

PIEZODRILL[®] MT HANDPIECE

- Better access to surgical field due to 90° inserts
- Circular LED light (more than 90000 LUX)
- Disposable irrigation line

NEW

SAFE ALVEOLAR RIDGE CONTOURING

with MEISINGER's Diamond Alveoplasty Burs with Safety Caps

Contouring and shaping of the alveolar ridge is a critical step in the long-term success of implant and denture restorations. These unique diamonds enable quick, controlled smoothing of irregular bone anatomy, while integrated safety caps help protect surrounding soft tissue from unnecessary injury.

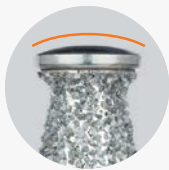

- Safety caps help protect soft tissue during bone contouring
- Super-coarse diamonds enable efficient shaping of the alveolar ridge
- Available in two anatomical shapes for improved access and ergonomics

 Made in Germany

Why use Surgical Gloves vs. Exam Gloves?

Type	Endurance	Cuffs	Finger Tips Fatigue	Thickness	Quality (industry standard AQL)
Surgical	Lasts through long procedures	Stays on to create effective sterile barrier	Highly tactile	Thicker to protect against punctures	Higher quality control
Exam	Lasts for minutes Multiple changes	Roll down Interfere with surgery	Lower tactility	Thinner & tears / punctures easily	Lower standards than Surgical

Surgical Gloves

Bleeding Control & Tissue Adhesives

PERIACRYL® 90 & PERIACRYL® 90-HV ORAL TISSUE ADHESIVE - Blacklock Medical

Cyanoacrylate dressings that offer surgical predictability and efficiency. These medical devices are a special blend of butyl and octyl cyanoacrylate adhesives, formulated to perform in the oral cavity. PeriAcry90-HV is the latest dental innovation from GluStitch Inc. and has a slower rate of flow. This offers the clinician more control over application.

X-1					

 Plain gut - Natural absorbable material with high tensile strength.

 Black braided silk - Non-absorbable noncapillary silk with uniform smooth surface and high tensile strength.

 Chromic gut - Natural absorbable material with high tensile strength.

 Nylon black monofilament - Smooth, polyamide non-absorbable material with high tensile strength.

 PGA undyed braided - Smooth, coated synthetic absorbable material.

ETHICON

ETHICON SUTURES - Johnson & Johnson

Ethicon sutures are made of strong, sharp micrograin stainless steel; an exclusive Ethicon process yields the ideal balance between ductility and resistance to bending. Seamless swaging produces a needle diameter that closely matches the diameter of the attached suture. A micro-thin, super-smooth finish allows the needle to penetrate and pass through the tissue with an almost fluid-like flow.

SURGICAL ROOM - Sutures

PERMA SHARP® SUTURES - Hu-Friedy

Perma Sharp suture needles are made from Series 300 Stainless Steel, the ideal alloy for dental sutures. This alloy allows very fine point geometry, stays sharp throughout the suturing procedure and is less likely to bend and more resistant to breakage. In addition, the needles have a high-polished finish for a smoother penetration. Box of 12.

- Plain gut** - loses strength in 5-7 days and is absorbed in 30-60 days.
- Chromic gut** - loses strength in 10-14 days and is absorbed in 60-90 days.
- PGA** - loses strength in 14-17 days and is absorbed in 60-90 days.

- Black braided silk** - has uniform smooth surface and high tensile strength.
- Polypropylene** - is a monofilament material with excellent tissue compatibility.

PTFE SUTURES - Cytoplast™

Cytoplast™ PTFE suture is an ideal suture for dental bone grafting and implant procedures where a soft monofilament suture is desirable. Monofilament construction doesn't allow bacterial wicking into the surgical site, and unlike most monofilament sutures, patients like it because it is soft.

- Non-wicking white monofilament construction.
- Soft and comfortable for patients.
- Excellent handling and knot security.
- Biologically inert.

 Little to no package memory.

SURGICAL ROOM - Instruments

The Surgical Room offers quality instruments, selected for implant and surgical dentistry. Our range reflects what specialists use today from brands that doctors trust.

Our broad selection covers all areas of surgical dentistry including:

- Extraction
- Bone Surgery
- Sinus Lift
- Apicoectomy
- Aspiration
- Crown Removal
- PRF
- Membrane Grafting
- Periodontal Surgery
- Hygiene

POWER CROWN REMOVER KIT - Power Dental Group

Designed for safe and effective crown removal, this kit features left and right removers with ergonomic handles and one pack of high-speed diamond burs.

TSR-4638 Power Dental Crown Remover (Set of 3) [mfg #4638]

POWER FLEX LUXATOR - Power Dental Group

Ultra-thin, serrated luxators designed to support controlled periodontal ligament separation and progressive tooth loosening. This 6-piece titanium kit includes straight and curved 2.5 mm, 3.5 mm, and 4.5 mm profiles to support predictable access and control throughout the extraction process.

TSR-4035 Power Flex Luxation Complete Set, Serrated, Titanium - Set of 6 [mfg #4035]

POWER UNIVERSAL ATRAUMATIC EXTRACTION FORCEPS KIT - Power Dental Group

Compact 6-piece atraumatic extraction forceps kit designed for adult and pediatric cases. Serrated beaks, tapered subgingival access, and a raised hinge point support controlled full-mouth extractions with a more compact intraoral feel.

TSR-5040 Atraumatic Universal Extraction Forceps, Compact Handle - Set of 6, Pediatric/Adult [mfg #5040]

SUPREMO TUNNELING KIT RICARDO KERN - Power Dental Group

The Ricardo Kern Tunneling Instruments are suited for performing periodontal microsurgery, minimally invasive surgery, avoiding very large flaps. Made from specially treated stainless steel. Exclusive anatomical handle in Octopus style silicone.

- Designed for tunnel and minimally invasive periodontal surgeries.
- Enables controlled access without wide flap creation.
- Ergonomic OCTOPUS silicone handles for enhanced tactile precision.
- Engineered stainless steel for balance, strength, and longevity.
- Refined for mucogingival and reconstructive procedures.

TSR-S1489K-1 Ricardo Kern Tunneling Kit - Set of 6 with Cassette [mfg #S1489K-1]

SCALPELS

PARAGON® DISPOSABLE STERILE SCALPELS - Medicom

Single-use scalpels prevent cross-contamination and are suitable for simple surgical procedures. Blade is precision molded into handle and has a replaceable blade guard for safety. Comfort fit handle ensures secure grip and easy manipulation. Made from high-quality stainless steel.

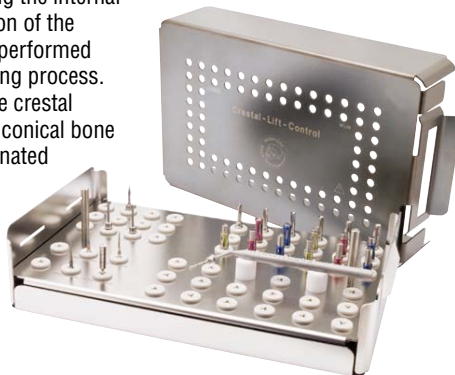

- Paragon Disposable Sterile Stainless Steel Scalpel, 10/Box
- 27919 #10 [mfg #90000-10]
 - 27917 #11 [mfg #90000-11]
 - 27921 #12 [mfg #90000-12]
 - 27332 #15 [mfg #90000-15]

- Paragon Disposable Sterile Stainless Steel Scalpel, 100/Box
- 27915 #10 [mfg #90010-10]
 - 27916 #11 [mfg #90010-11]
 - 27920 #12 [mfg #90010-12]
 - 27918 #15 [mfg #90010-15]

SURGICAL KITS - Meisinger

CRESTAL SINUS LIFT CONTROL SYSTEM - Meisinger

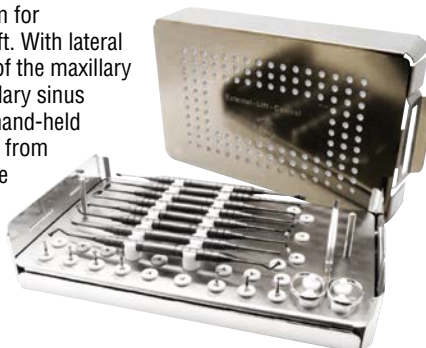

System for safely performing the internal sinus lift procedure. Elevation of the Schneiderian membrane is performed during the transcresal drilling process. The atraumatic design of the crestal drill serves to safely form a conical bone flap. In addition, the coordinated stop sleeve system offers protection against injuries to the membrane. Includes an extensive set of instruments for safely performing the internal sinus lift procedure.

MEI-BCL00 Crestal Sinus Lift Control Kit [mfg #BCL00]

EXTERNAL SINUS LIFTING SYSTEM - Meisinger

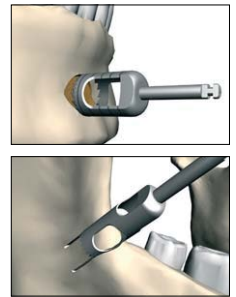

External Lift Control is a system for performing an external sinus lift. With lateral access through the facial wall of the maxillary sinus, the mucosa of the maxillary sinus is detached using the various hand-held instruments and lifted cranially from the floor of the sinus. A suitable augmentation can then be inserted under Schneider's membrane. The CARBOCER® – coated instruments provide a good contrast and reflection free work.

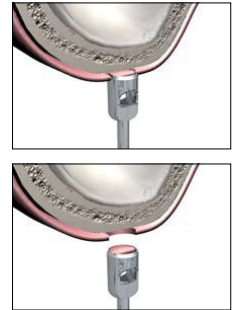

MEI-BTL00 External Sinus Lift Control System (Lateral) [mfg #BTL00]

MEI-7120 Trephine Basic Set [mfg #7120]

MEI-7140 Punch Basic Set [mfg #7140]

MEI-7150 Basic Saw Kit [mfg #7150]

SURGICAL SINUS SET - FOR LATERAL SINUS LIFTS - Meisinger

Contains surgical carbide cutters and diamond burs in three diameters for the lateral approach in an external sinus lift.

MEI-BSKSL Surgical Kit 1 Sinus Elevation Lateral Approach [mfg #BSKSL]

IMPLANT MOTORS

IMPLANTMED SI-1015 - W&H Impex

Canada's most popular implant motor - for a reason! Excels by virtue of its ease of operation, powerful motor and automatic thread cutter function.

- Easy to use.
- Powerful motor with 6.2 Ncm torque.
- Wide speed range: 200 up to 40,000 rpm at the motor.
- Precise torque limitation: 5 to 80 Ncm.
- Automatic thread cutter function.
- Motor with cable, thermo washer disinfectable and sterilizable - consists of: Control unit, motor with 1.8 m cable includes 5 clips, foot control S-N1, stand, motor support, power cord, 2 locking pins and a set of 3 disposable irrigation tubings.

SI-1015

implantmed

Handpieces sold separately. Serviced in Canada!

SURGICPRO - NSK

This surgical micromotor is 16.2 mm shorter and weighs 42g less compared to the conventional optic surgical micromotor.

- Powerful torque (up to 80 Ncm).
- Wide speed range (200 to 40,000 min).
- High torque accuracy.
- Lightest and smallest micromotor.
- LED illumination (over 32,000 LUX).
- Excellent durability.
- Autoclavable, thermo-disinfectable and maintenance free brushless design.

NSK

NSK-Y900114 Surgical Irrigation tubing, 10/Pack
[mfg #Y900114]

NSK-Y1001949 Surgic Pro LED Fibre Optic Complete Set [mfg #Y1001949]
Contains: Control Unit without data storage facility, SGL70M LED Micromotor, FC-78 Foot Control, X-SG20L Optic Handpiece (20:1 Reduction), Irrigation tube (5pcs.) and other accessories.

NSK-Y1001950 Surgic Pro Non-Fibre Optic Complete Set [mfg #Y1001950]
Contains: Control Unit without data storage facility, SG70M Non-Optic Micromotor, FC-78 Foot Control, SG20 Handpiece (20:1 Reduction) Irrigation tube (5pcs.) and other accessories.

OSSTELL BEACON - W&H Impex

The Osstell Beacon helps you to objectively and non-invasively determine implant stability – without jeopardizing the healing process. “The Osstell Beacon uses proprietary and evidence-based RFA technology, based on thousands of scientific studies. It also includes OsstellConnect, free cloud-based platform that provides access to extensive implant data and supports improved patient communication.

WH-08022260 Osstell Beacon Implant Stability Measurement [mfg #8022260]
Contains: USB dongle for wireless communication, 1 Osstell TestPeg, 1 SmartPeg mount, Instruction manual.

PIEZOSURGERY®

PIEZOSURGERY TOUCH - Mectron

Designed with a modern, intuitive touchscreen interface, this device makes workflows more efficient while maintaining the highest level of performance. Its cutting-edge technology enhances cutting efficiency, preserves soft tissue, and supports a broad range of surgical procedures. Compact and ergonomically designed, the PIEZOSURGERY® Touch seamlessly integrates into your practice, ensuring an optimal surgical experience for both clinicians and patients.

PIE-5120062 Mectron Piezosurgery Touch [mfg #5120062]

AIR POLISHER

AIRFLOW® PROPHYLAXIS MASTER - EMS

The latest EMS innovation for caries prevention and perio maintenance. AIRFLOW has been designed with the highest standards of performance, safety and comfort in mind, being specifically built to cater the 3 core treatments of Guided Biofilm Therapy. Ergonomic design, high precision and easy maintenance make it perfect for intensive professional use.

The AIRFLOW Station+ converts the AIRFLOW Prophylaxis Master and AIRFLOW One into an ultra-compact prophylaxis station – no water connection needed. This stand comes with an autonomous and independent water supply system with 360° movement for greater maneuverability, ideal for easy storage and tight spaces.

93547 EMS AIRFLOW® Prophylaxis Master [mfg #FT-229-2B-W02] NEW GBT ready configuration

CLINICAL CENTRIFUGES

GLOBE CLINICAL CENTRIFUGE ENHANCED - Globe Scientific

The GCC-E Enhanced Clinical Centrifuge adds an enhanced user interface with it's easy to read backlit LCD display, tight accuracy and automated self-diagnostics on startup. The GCC-E is suitable for numerous clinical and research applications and includes a twelve-position rotor that accommodates 5mL, 7mL or 10mL culture or blood collection tubes and up to eight 15mL tubes (all adapters included).

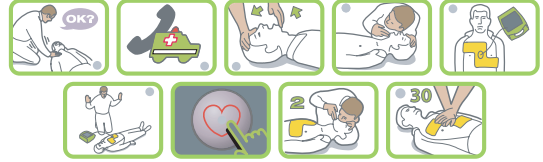

GLO-GCC-E Benchtop Centrifuge (fixed rotor) [mfg #GCC-E]

AUTOMATED EXTERNAL DEFIBRILLATOR (AED)

AED PLUS® AUTOMATED EXTERNAL DEFIBRILLATOR

ZOLL's AED Plus® features Real CPR Help®, a CPR feedback tool that is able to actually see what you are doing and provide feedback to help you do it well.

ZOL-AEDPLUS Zoll Aed Plus Automated Defibrillator [mfg #470- 22600010102011060]

PORTABLE SUCTION

DEVILBLISS VACU-AIDE SUCTION UNIT

The DeVilbliss Vacu-Aide Suction Unit w/battery is a portable, high performance medical suction machine (aspirator) designed to remove mucus, saliva, blood or fluids from a person's airway or a respiratory support system. It is primarily used for homecare, clinical, and emergency setting for patients ranging from neonates to adults.

DEV-B05-7325P-D DeVilbliss Vacu-Aide Suction Unit w/battery [mfg #B05-7325P-D]

Complete Solutions for Complete Care

Modern clinics require more than individual products. They require coordinated equipment, technology, and clinical expertise. K-Dental, The Surgical Room, and Ortho Supply Canada (OSC) deliver integrated solutions that support every aspect of patient care.

Clinical & Operatory Equipment

Efficient, ergonomic, and dependable clinical environments.

Practice Optimization

Solutions designed to improve efficiency and performance.

Surgical & Implant Solutions

Precision-driven tools and procedural support.

Complete Solutions for Complete Care

Technical Service & Support

Installation, maintenance, and expert assistance.

Orthodontic Products & Supplies

Comprehensive orthodontic materials and essentials.

Digital Technology & Imaging

Modern diagnostics and connected workflows.

THREE COMPANIES. ONE COMPLETE APPROACH.

Together, we help practices operate with confidence, efficiency, and clinical precision.
