DX-FOUNDATION DRILLING

BREAKING NEW GROUND

INTRODUCTION

DaltronX manufactures carbide cutting picks and holders for the foundation drilling industry. Our cutting teeth are designed to meet the demands of piling rigs, auger drills, and rotary drilling systems, ensuring reliable performance across challenging conditions like hard rock and dense soil formations. Whether you're working on large infrastructure projects or site preparation, we provide durable and efficient solutions that help enhance drilling accuracy and productivity.

We oversee every step of the production process, ensuring consistent quality control. With over 30 years of expertise, we've developed carbide tools that deliver superior wear resistance and performance, helping you tackle even the toughest foundation drilling environments.

Explore our range of carbide picks and holders or work with our team to develop custom solutions for your foundation drilling needs.
