REINVENTED

Shaping The Future of Heating and Smart Living

Meet Living Reinvented

We reinvented the world of Smart Home management.

No more cable clutter or complex setups. Swap out old switches and sockets for our user- friendly Living Reinvented devices.

Control it all through the Living Reinvented App, crafting custom scenes and automation, accessible from anywhere on the globe.

Working with Alexa and Google assistant voice control.

Friendly solution for landlords, hotels, real estates, social landlords and nursing homes.

Living Reinvented App

For residents and landlords to manage and interact with their smart apartment.

Web Platform

For property managers and landlords to centrally control over all units and devices.

Empowering Your Vision

With expertise in design, customization, installation, and support, we're your partners in creating tailored hardware and software solutions.

 **Access Control**
Effortlessly oversee property access through various methods

 **Authorization Management**
Includes move-in and staff access for construction

 **Property Management**
Streamline management of expansive communities and their properties

 **Device Management**
Monitor online/offline status of all devices at a glance.

 **Energy Management**
Gather electricity consumption data and query specific areas

 **Scene Management**
Configure device interactions and smart scenes with ease

Access Control Solutions

Your Security, Your Way.

Keyless Entry

Residents use their phones instead of keys or fobs for front door access

Guest Access

Manage and limit visitor entry to gates and front doors via one app

Contractor Entry

Schedule access to vacant units for service providers during resident moves

Staff Access

Assign specific area access to staff members, control permissions

Maintenance Efficiency

Generate work orders, issue temporary access codes, and monitor property entry

Emergency Ready

Manage property access, swiftly change codes in emergencies

POE POWERED

Internet: WiFi (2.4Ghz) connection or
CAT5/CAT6 cable connection 2.0MP, wide
angle lens 120 degree, with night vision
Built-in memory: DDR 128M /FLASH 16M
Power Consumption: 200mA Max.
Power Supply: PoE switch/ DC 15V 1A
Material: Pure stainless steel housing and
acrylic panel
Waterproof IP65

INTERCOM

-  Two-way talk and vision
-  Face recognition
-  Monitor, video record & snapshot function
-  Google & Alexa voice control
-  Living Reinvented App remote control

ENHANCE YOUR HOME SECURITY

Empower your home's safety with our cutting-edge devices.

From an advanced camera system with colour night vision and tracking, to intelligent door sensors for real-time alerts and flood sensors with automatic water valve closure – experience unmatched protection and peace of mind.

Rest easy, knowing your home is shielded from potential threats.

IHELIOS GATEWAY

Zigbee Gateway: A dedicated safeguard delivering continuous security notifications for comprehensive home protection. Highlighting an integrated security mode with an embedded alarm siren, it smoothly merges with home automation, enabling customized scene creation.

SENSORS

SMOKE ALARM

Our Smoke Alarm operates diligently, responding with an 85dB sound and red light upon detecting smoke. It ensures real-time smartphone notifications, while also seamlessly integrating with other devices to facilitate scene creation and automation.

FLOOD SENSOR

Designed to detect water leaks and provide round-the-clock notifications. Seamlessly integrates with security modes, offering home protection. Enhance home automation with scene creation. Extended battery life ensures dependable functionality.

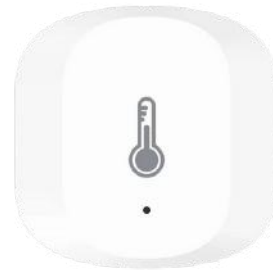

MOVMENT SENSOR

24/7 Security: Detecting motion, sending alerts, and integrating with home automation. Quick switch to alarm mode through the app. Unmatched battery life ensures your ultimate protection.

SOS BUTTON

Wireless SOS Button: A 24/7 security partner for home and loved ones. Lightweight design with a keychain hole, offering over 12 months of regular use. Impressive 15 to 30 meters indoor and 100 meters outdoor range ensures peace of mind.

TEMPERARURE & HUMIDITY SENSOR

Designed to detects temperature and humidity variations with precision, ensuring 24/7 security notifications. Seamlessly transition to alarm mode through the intuitive app interface. This sensor harmoniously collaborates with Security mode and home automation, facilitating scene creation. With an extended battery life, trust in uninterrupted performance.

ONE BUTTON

The One-Key Device with three modes: Single click, Double click, and Long press. Receive instant notifications upon sensor activation. Ideal for night illumination, remote appliance control, or emergency calls.

DOOR SENSOR

Open/Close alerts, battery and history monitoring, and continuous 24/7 notifications. Seamlessly integrating with Amazon Alexa and Google Assistant for voice support. Collaborating smoothly with security modes, enabling automation and scene creation. Depend on its extended battery life for sustained protection.

Manual and Programming Mode to give you maximum control

Multi-zone Control to control the temperature of each room or zone separately

Frost Protection to prevent freezing and protect your home from frost damage

Lock Function to prevent unauthorized access and tampering

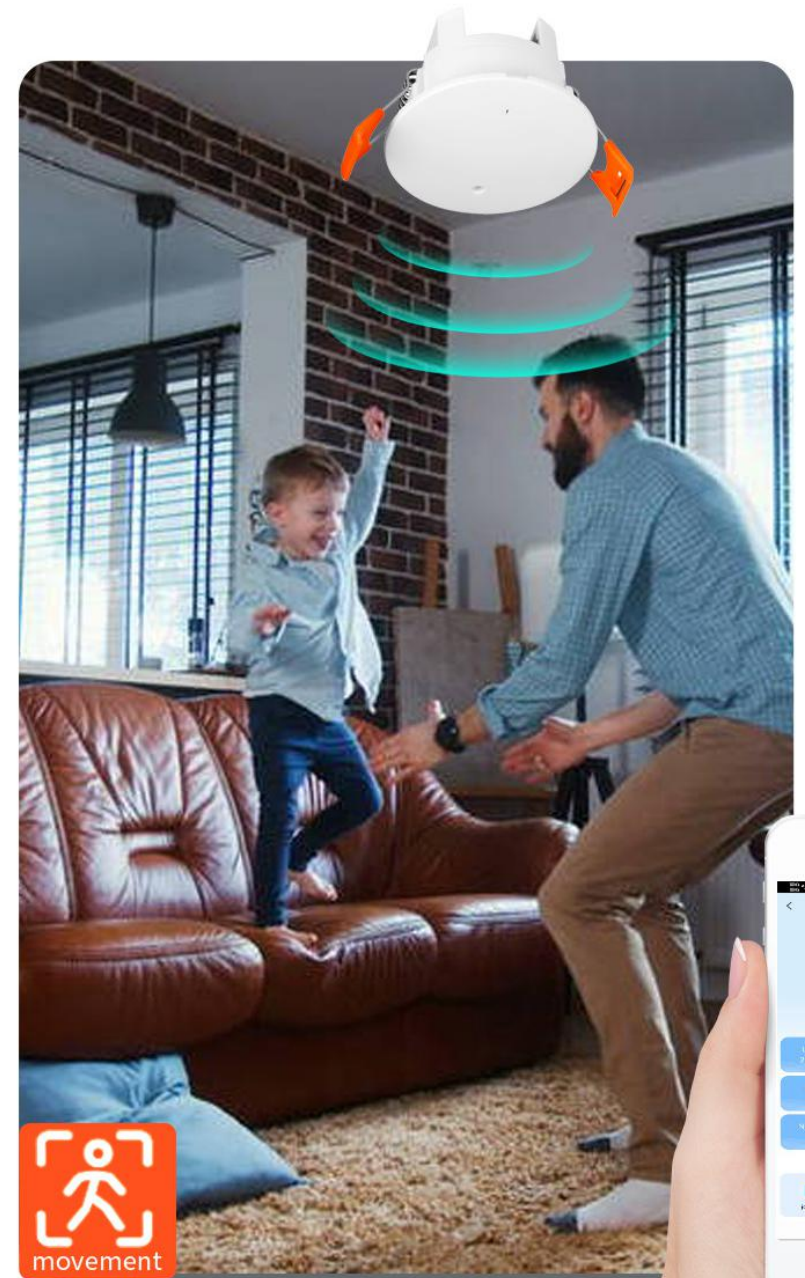

Energy Consumption management with real-time usage data and energy-saving recommendations

OCCUPANCY SENSOR

The iHelios Sensor detects heartbeat and breath to confirm occupancy. The iHelios Sensor is a cutting-edge technology that uses advanced algorithms to detect the presence of people in a room.

This technology is particularly useful in smart homes, offices, and public spaces, where it can help optimize energy usage and improve security. With the iHelios Sensor, you can have peace of mind knowing that your space is being monitored and used efficiently.

When occupancy is detected, the heating, lighting system automatically turns on. Here are some additional points that you could include: The system can be programmed to turn on when occupancy is detected during certain times of the day or in specific rooms. This feature helps to save energy by only heating the rooms that are in use. The system can also be configured to turn off the light and heating when no occupancy is detected for a certain amount of time, further reducing energy consumption.

CONTROL PANEL

8-inch Android

iHelios Living Reinvented control panel is a centralized device or interface that allows you to manage and control various aspects of your smart home. It serves as a hub, enabling you to monitor and control connected devices, such as lights, thermostats, security systems, and more, from a single location or through a mobile app. With a central control panel, you can automate routines, adjust settings, receive notifications, and create a seamless and convenient smart home experience.
