The Multi-Award Winning AquaBlade® - A New Era In Flush Technology

The most significant development in the product category since the invention of the flush toilet in the 19th century, AquaBlade® was launched by Ideal Standard in 2015 and its exclusive and patented technology offers superior flushing, even at low water volumes.

AquaBlade® technology sets new standards in both toilet design and optimum flush performance – the smooth, gently curved surface with no overhanging rim also means it is much more hygienic and easier to clean; it is quieter in flush, and has an all-round smarter design.

Connect Air Suite

The Multi-Award Winning AquaBlade® - A New Era In Flush Technology

The most significant development in the product category since the invention of the flush toilet in the 19th century, AquaBlade® was launched by Ideal Standard in 2015 and its exclusive and patented technology offers superior flushing, even at low water volumes.

AquaBlade® technology sets new standards in both toilet design and optimum flush performance – the smooth, gently curved surface with no overhanging rim also means it is much more hygienic and easier to clean; it is quieter in flush, and has an all-round smarter design.
