TISCHLER BIOPSY FORCEPS

TISCHLER BIOPSY FORCEPS TITANIUM BLUE

Bite Size: Mini Tischler (2mm X 4mm) & Tischler Standard (3mm x 7mm)
Working Length: 8" (20cm) – 10" (25cm)
Tip-Locking Tab
Gold Plated Double Spring Handle

**Tischler Biopsy Forceps
Titanium Rainbow**

Tischler Biopsy Forceps

SPECULUMS

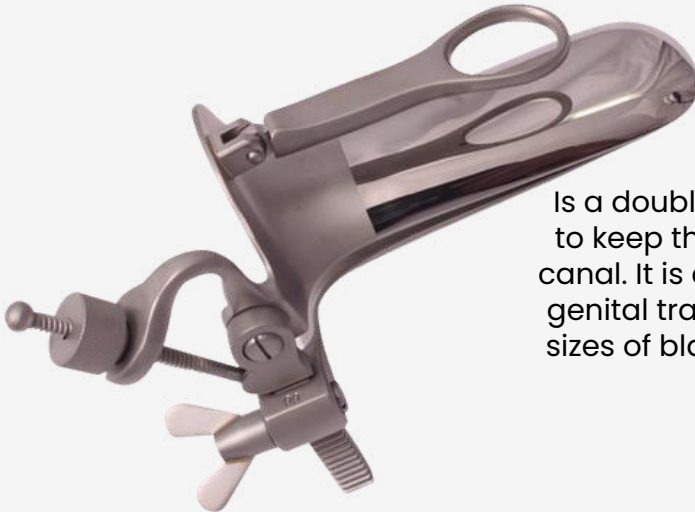

Sakurai Vaginal Speculum :

Is a double-bladed speculum with 2 opposite sides screws, later and horizontal. One of the hottest speculums since 2000, the Sakurai Speculum is basically Japanese-designed, very hard in production, but very user-friendly. The Sakurai Vaginal Speculum is available in various sizes of blades to accommodate a wide range of cases.

Size	Length Upper Blade	Length Lower Blade	Maximum Opening	Width of Blades
S	70	85	55	26
M	75	95	65	30
L	85	105	75	30
LL	95	110	80	45

Trelat Speculum:

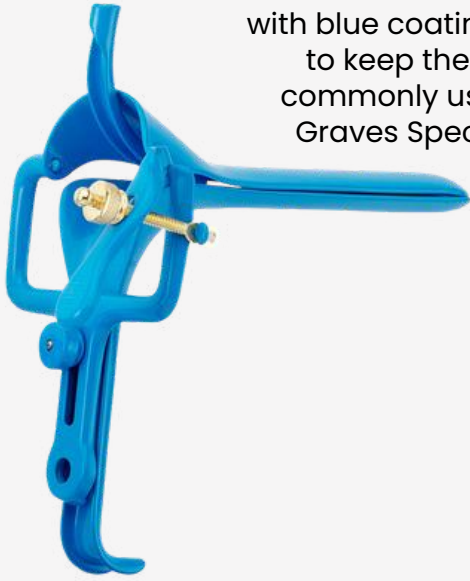

Is a double-bladed speculum with a screw mechanism to keep the blades open once inserted into the vaginal canal. It is commonly used for examination of the female genital tract. The Trelat Speculum is available in various sizes of blades to accommodate a wide range of cases.

Small: 85mm x 30mm
Medium: 95mm x 35mm
Large: 115mm x 43mm

SPECULUMS

Lletz Graves Speculum Full View:

with blue coating is a double-bladed speculum with a screw mechanism to keep the blades open once inserted into the vaginal canal. It is commonly used for examination of the female genital tract. The Lletz Graves Speculum Full View is available in various sizes of blades to accommodate a wide range of cases.

Small: 75mm x 20mm
Medium: 95mm x 35mm
Large: 115mm x 35mm

The Pederson Vaginal Speculum:

It is a specialized medical tool frequently utilized in gynecological examinations and treatments. It functions by gently separating the vaginal walls, allowing clinicians better visibility and access to the vaginal canal and lower abdominal area. This instrument plays a vital role in both diagnostic assessments and therapeutic interventions.

Small: 75mm x 13mm
Medium: 100mm x 22mm
Large: 120mm x 25mm

SPECULUMS

Cusco Speculum Side Screw

Cusco Speculum Center Screw

Cusco Speculum:

is a double-bladed instrument for use to visualize the vagina and cervix during DNC, DNE as well as IUCD insertion and regular pelvic examination. The instrument features a spring handle to open the blades and a screw mechanism to keep the blades open in the vaginal canal.

Small: 75mm x 32mm
Medium: 85mm x 35mm
Large: 100mm x 37mm

Graves Speculum Wide View :

Features two adjustable blades with a screw mechanism to keep the blades open in the vaginal canal. The instrument is designed for maximal visualization of the vaginal canal. The Graves Speculum Wide View is available in various sizes of blades to accommodate a wide range of cases.

Sizes:
Small, Medium and Large

SPECULUMS

Sheyfferts Speculum:

Is a double-bladed speculum with a screw mechanism to keep the blades open once inserted into the vaginal canal.

Sizes:
Small, Medium, and Large

The Pederson Speculum Wide View:

Is designed with two adjustable blades and a secure screw mechanism to maintain optimal blade separation within the vaginal canal. Engineered for maximum visualization, it ensures clear and unobstructed access during gynecological examinations and procedures.

Sizes:
Small, Medium, and Large

SPECULUMS

LLETZ 4-WAY LATERAL SPECULUM

Provides a superior view with one instrument as compared to a standard speculum and the lateral retractor. The built-in side blades are erected on demand to enhance the view of the cervix as needed.

GRAVES SPECULUM FULL VIEW

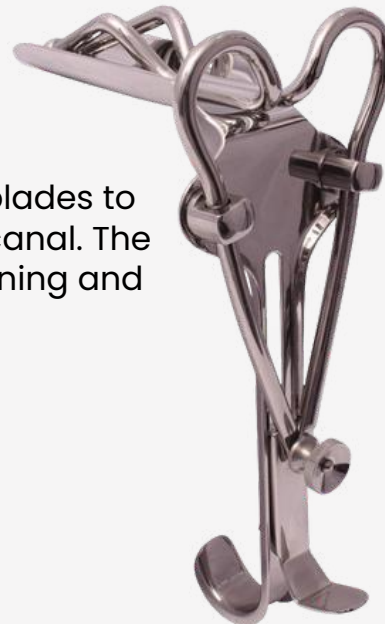

The Graves Speculum Full View features adjustable blades with a screw lock to maintain optimal opening and ensure maximum visualization of the vaginal canal. It is available in multiple blade sizes to suit diverse clinical needs

Guttman Speculum:

Features a solid center blade with no upper blades to allow for maximal visualization of the vaginal canal. The instrument has two separators that aid in opening and stabilizing the vagina.

Blade Dimensions: 90mm x 30mm

Collin Speculum:

Features two blades at the end of a screw mechanism to keep the blades open in the vaginal canal for visualization and/or operative purposes. It is available in various sizes of blades to accommodate a wide range of cases.

Small: 85mm x 30mm
Medium: 100mm x 35mm
Large: 110mm x 40mm

SPECULUMS

The 4-Way Lateral Speculum:

provides a superior view with one instrument as compared to a standard speculum and the lateral retractor. The built-in side blades are erected on demand to enhance the view of the cervix as needed.

Sizes:

Medium: 22mm x 108mm

Large 22mm x 133mm

Graves Speculum:

Features long, smooth, blunt-tipped jaws for easy and safe insertion, minimizing tissue trauma. It gently opens the vaginal canal to provide clear access to the cervix, uterus, and vaginal walls. The ergonomic handle ensures precise control, while the built-in screw lock secures the instrument in place, allowing hands-free operation. Its lightweight, streamlined design enhances user comfort during procedures.

Small: 75mm x 20mm

Medium: 95mm x 35mm

Large: 115mm x 35mm

Lateral Vaginal Retractor

The Lateral Vaginal Retractor is a specialized gynecological instrument designed to retract the lateral vaginal walls, providing enhanced exposure and access during pelvic procedures. It is commonly used in vaginal surgeries, cervical examinations, and other gynecologic interventions where clear visualization of the surgical field is essential.

Features:

Curved, Smooth Blades: Designed to gently retract tissue without causing trauma.

Ergonomic Handle: Ensures a firm, comfortable grip for precise control.

Durable Construction: Made from high-quality surgical-grade stainless steel for longevity and repeated sterilization.

Available in Various Sizes: Offers flexibility to accommodate different anatomical needs.

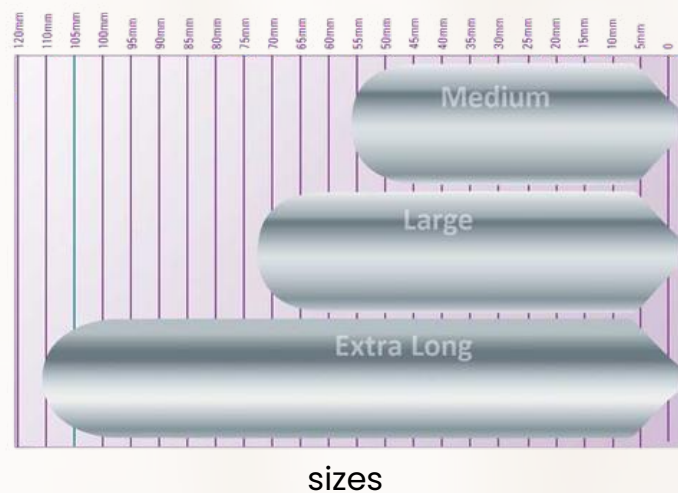

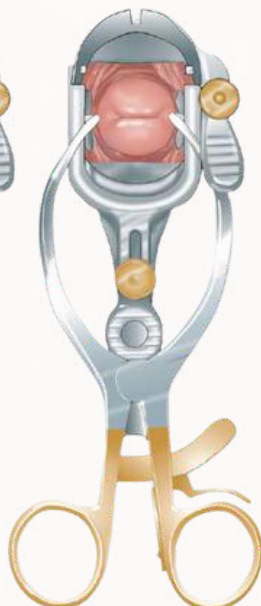

Autoclavable: Fully reusable and easy to clean for safe, sterile use in clinical settings.

This retractor is an essential tool for improving visibility and efficiency during gynecological procedures.

Uterine Dilators

Hegar Uterine Dilator Set

Hegar Uterine Dilator Set includes 8 double end dilators. Hegar Uterine Dilators are double-ended, curved instrument with rounded ends to measure the level of dilation of a woman's uterus or to induce further dilation. Hegar Uterine Dilators are available in many different width sizes to accommodate a wide range of cases.

Set includes sizes: 3mm/4mm, 5mm/6mm, 7mm/8mm, 9mm/10mm, 11mm/12mm, 13mm/14mm, 15mm/16mm, and 17mm/18mm

Pratt Uterine Dilator Set

Pratt Uterine Dilators Set includes 8 double end dilators. The Pratt Uterine Dilator is Straight in the middle, slightly curved at each end, with a smooth, rounded tip. Pratt Uterine Dilator is used to measure the level of dilation or facilitate further dilation of the uterus. The instrument is available in various width sizes to accommodate a wide range of cases.

The size of these dilators is determined by the circumference of the tip and measured in French units, with one French unit equaling $\frac{1}{3}$ mm.

Set includes sizes 4.3mm/5mm, 5.667mm/6.3mm, 7mm/7.667mm, 8.3mm/9mm, 10.3mm/9.667mm, 11.667mm/11mm, 12.3mm/13mm, and 13.667mm/14mm:

Small Cervical Dilator Set

Small Cervical Dilator Set is designed for patients with a stenotic cervical OS. These dilators are single-ended, rounded, and curved.

Set includes sizes 1mm, 2mm, 3mm, 4mm, 5mm, and 6mm

Uterine Dilators

Hank Uterine Dilators Set

Hank Uterine Dilators Set includes 6 double end dilators. Hank Uterine Dilators are rounded at the ends to measure dilation or induce dilation of the uterus. The rounded ends are slightly angled from the handle. Hank Uterine Dilators have a full millimeter size on one end and a half-millimeter size on the other for smooth dilation. The dilators are available in various width sizes to accommodate a wide range of cases.

Set includes sizes 4.5mm/5mm, 5.5mm/6mm, 6.5mm/7mm, 7.5mm/8mm, 8.5mm/9mm, and 9.5mm/10mm

Hegar Uterine Dilator Set Single End

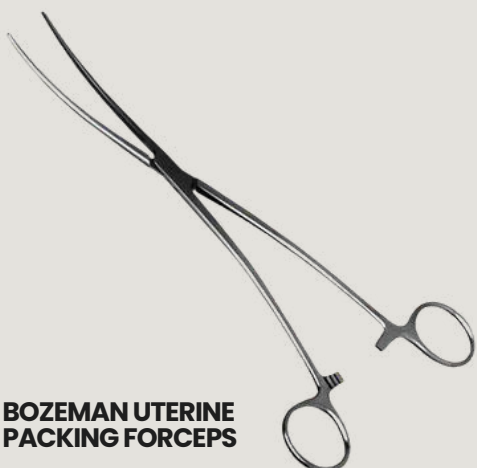

Hegar Uterine Dilator Set Single End includes 14 dilators. Hegar Uterine Dilator is a single-ended, rounded, curved instrument designed to measure the level of dilation of a woman's uterus or to induce further dilation of the uterus. The dilator is available in a many different width sizes to accommodate a large range of cases.

Set includes sizes 4mm, 5mm, 6mm, 7mm, 8mm, 9mm, 10mm, 11mm, 12mm, 13mm, 14mm, 15mm, 16mm, and 18mm

De Lee Universal Retractor blade 2-3 inches x 2 inches
(7cm x 5.1cm) Overall Length 9-1/2 inches (24.1cm)

Recamier Placenta Curette

Recamier Placenta Curette is designed to remove the placenta from a woman's uterus after childbirth. The curette features a loop tip at the end of a thick cylindrical handle. It is available with a rigid shaft and sharp or blunt loop tips to accommodate various cases.

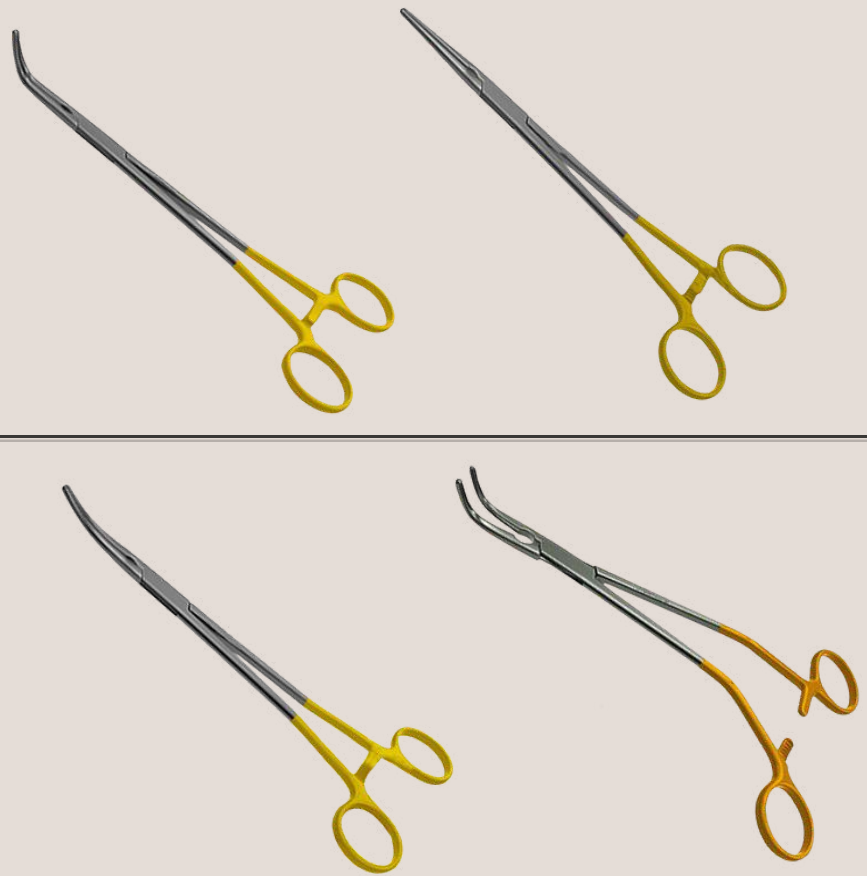

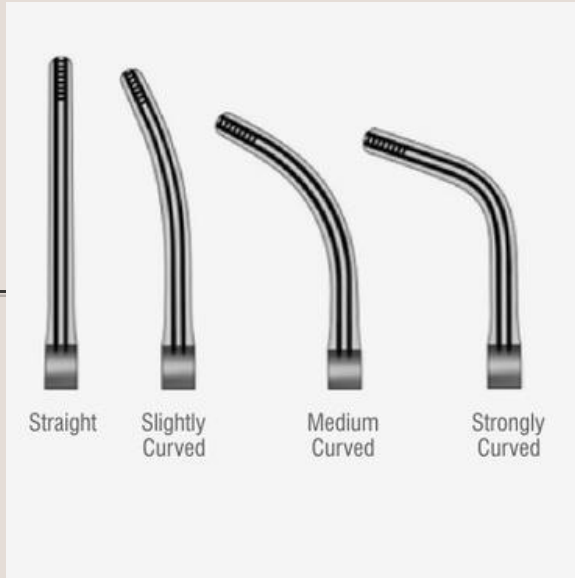

Sims Uterine Curette

Sims Uterine Curette with a sharp tip is designed to remove tough tissue from the lining of the uterus for biopsy or excision. The teardrop-shaped, fenestrated, loop tip is sharp and is available in various sizes. It is available as a rigid or malleable type to accommodate various cases. The overall length is 11" (28.0 cm).

Z-Type Atraumatic Hysterectomy Forceps

DESIGNED FOR PRECISION AND MINIMAL TISSUE TRAUMA, THE SURGICAL Z-TYPE ATRAUMATIC HYSTERECTOMY FORCEPS FEATURE ROBUST, ATRAUMATIC JAWS WITH SERRATIONS AND LONGITUDINAL GROOVES TO ENSURE A SECURE GRIP AND PREVENT SLIPPAGE DURING PROCEDURES. THE INSTRUMENT'S EXTENDED LENGTH PROVIDES SUPERIOR EXPOSURE AND VISUALIZATION IN DEEP PELVIC SURGERIES. ITS OFFSET HANDLE AND LIGHT CURVE ENHANCE MANEUVERABILITY AND ACCESS IN CONFINED ANATOMICAL SPACES.

Key Features:

- Atraumatic jaws minimize tissue damage
- Serrated and grooved design ensures optimal grip
- Extended 12" (30.0 cm) length for deep access
- Offset handle and light curve for ergonomic control and visibility

Kerrison Bone Punch

The Kerrison Bone Punch is a surgical tool used to remove small bones in spine surgeries and comes in different shapes like straight, curved, bayonet, and extra-long.

Available in up-biting, down-biting, straight, curved, and bayonet styles

Jaw sizes range from **1 mm to 5 mm** (Bite Width)

Comes with standard or thin footplate (thin for delicate areas)

Black ceramic coating reduces glare and improves durability

Ejector mechanism clears bone debris quickly

Ergonomic handles reduce hand fatigue for surgeons

Kerrison Bone Punch With 5 Rotating Shafts

The Rotating Kerrison Modular Handle is a surgical tool designed for precise cutting and removal of small bone fragments. It is equipped with a sturdy plier-style grip for enhanced control.

The device also features interchangeable shafts, which are offered in various jaw dimensions, including 1mm, 2mm, 3mm, 4mm, and 5mm.

Features:

Interchangeable shaft design

Ergonomic plier-like handle

Angled upward for optimal access
