PRODUCT GUIDE 2023

INTRUDER ALARMS | CCTV SYSTEMS | ACCESS CONTROL

INTRODUCTION TO INNOVATE ALARMS LTD

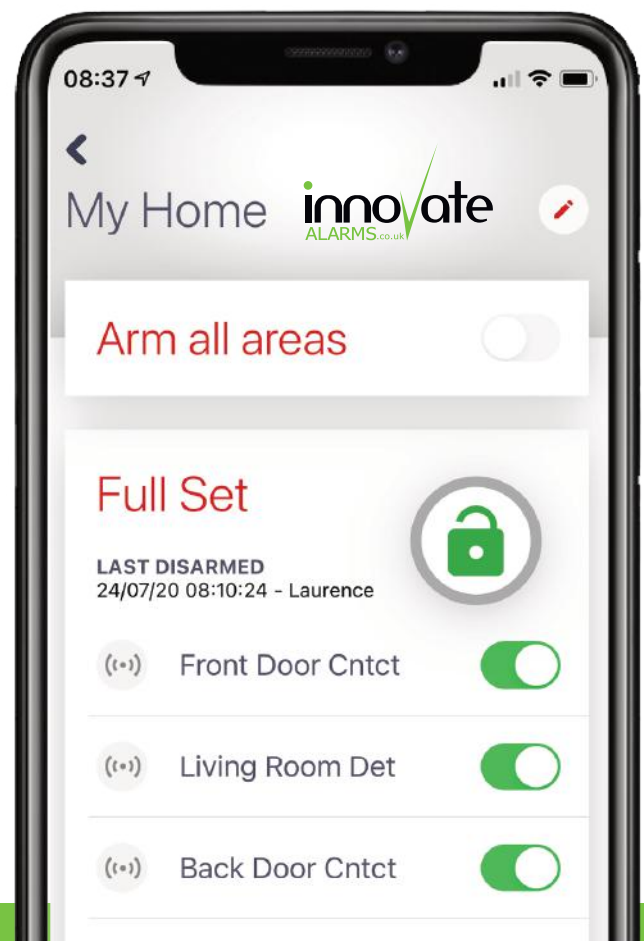

Innovate Alarms Ltd design, supply, install, maintain and service security systems including intruder alarms, CCTV systems, fire alarms and access control systems. We are SSAIB registered and insist on using equipment from reputable manufacturers in the security industry.

Founded in 2009 and based in Kirkintilloch on the outskirts of Glasgow we have built up a great customer base and we maintain an excellent reputation in the industry.

We understand when a customer chooses Innovate Alarms, they are putting their security in our hands and that is a privilege we take very seriously.

APP ENABLED

All of the systems in this book are compatible with an app. This means once set up each system will give an element of control and send alerts to smart devices from anywhere on earth with an internet connection.

Wireless alarms are a very popular choice when it comes to securing your property. The systems are reliable, graded, installed with no mess and due to the quick installation time, they are also reasonably priced. Advances in wireless alarms now make them suitable for both domestic and small to medium premises.

SETTING DEVICES

We provide a range of devices designed for setting and unsetting your security system. The most common used are:

Wireless Arming Station - Where you can enter a 4 digit pin code or use the built in proximity reader with a tag to set and unset the system.

4 Button Fob - Where you can set, unset and part set at the push of a button.

Prox Tag - Where you would present the fob to the built in proximity reader on the arming station or the control panel to set and unset the system.

SOUNDERS

As well as the on-board sounder in the Enforcer control panel we also provide the following:

Delta WE - Our Highly recognisable external sounder is supplied and fitted as standard with our Enforcer starter package and provides an excellent deterrent on the outside of your building.

Speaker/Sounder WE - is an optional internal sounder that can be plugged into any mains socket and learned into your system for additional alarm audio inside your building.

INTRUDER DEVICES

Motion Sensors - As the name suggests these units detect motion and are available with various technologies and lenses making them suitable for almost any room in any building. They are also available as a pet friendly option making them a great choice for home owners with pets.

Door Contacts - Come with 2 parts. 1 part is the contact and the other is a magnet. Designed to be fitted with 1 part on the door and the other part on the frame. The alarm is activated when the contact moves away from the magnet. Door contacts are available in white, brown and grey to fit in with the aesthetics of most doors.

Shock Sensors - Are designed to be installed on window frames and are activated by detecting vibrations and shocks. Shock sensors offer perimeter protection meaning they would detect an intruder before they enter a property. These units are also available in white, brown and grey to fit in with aesthetics of most windows.

External Detectors - There are also external intruder devices available for the wireless range including a wireless external motion sensor with a detection range of up to 12mtrs and an external gate magnet. Both devices are ideal for protecting gardens, driveways, gated entry etc.

HUD/MED

HOLD UP/MEDICAL DEVICE

innovate

MORE THAN SECURITY

Signal for help by sounding the alarm

With a wireless range of up to 300m in open space, users can press the centre of both buttons down for two seconds and the alarm is activated.

Loaded with great features and extras, including: one-push-to-learn, LED signal strength indicator, an easily replaceable battery, positional press marks and the option to modify it to a Medical Alert (MED).

Medical/elderly

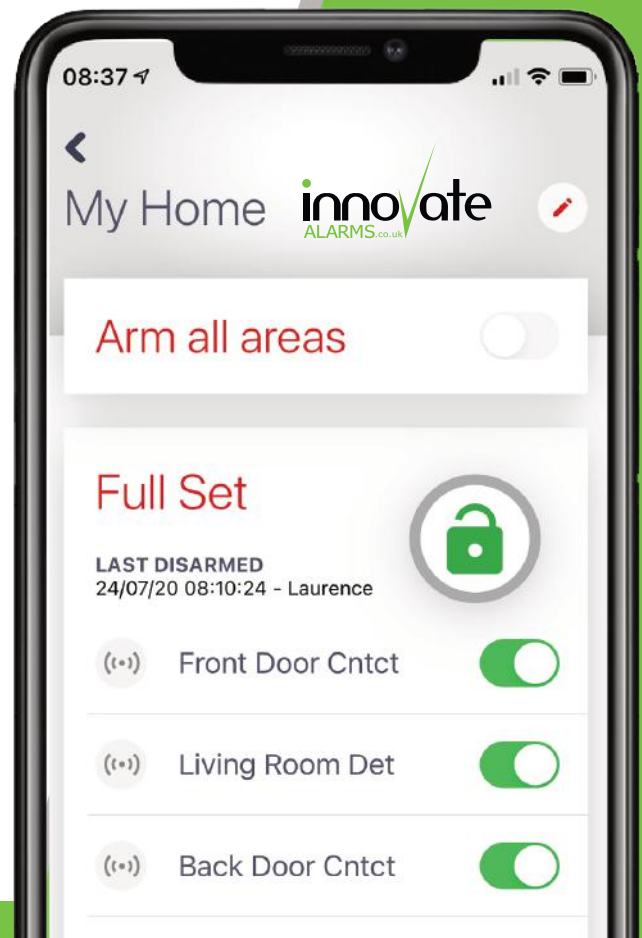

Immediate alert of any incidents, such as falls, faints or other medical emergencies.

Banks, offices, shops

The HUD/MED can be easily positioned in various locations to raise an alarm quickly and inconspicuously.

Industrial

The HUD/MED can be used by employees working in dangerous environments to signal for help if they become trapped or injured.

Wired alarms are a great option, particularly if you already have an older alarm system installed and are looking for an upgrade. Using existing cables we can bring your system up to date. The Euro range is compatible with wireless zone expanders, when added will allow the system to accept wireless intruder devices. This is the ideal option if you have recently built an extension on your premises. The Euro range is also app friendly with the use of a WIFI module.

WIRED/HYBRID ALARMS

EURO RANGE

WIRED/HYBRID ALARMS

EURO46 SYSTEM

Expandable and versatile security

Wired & wireless compatibility (with ZEM)

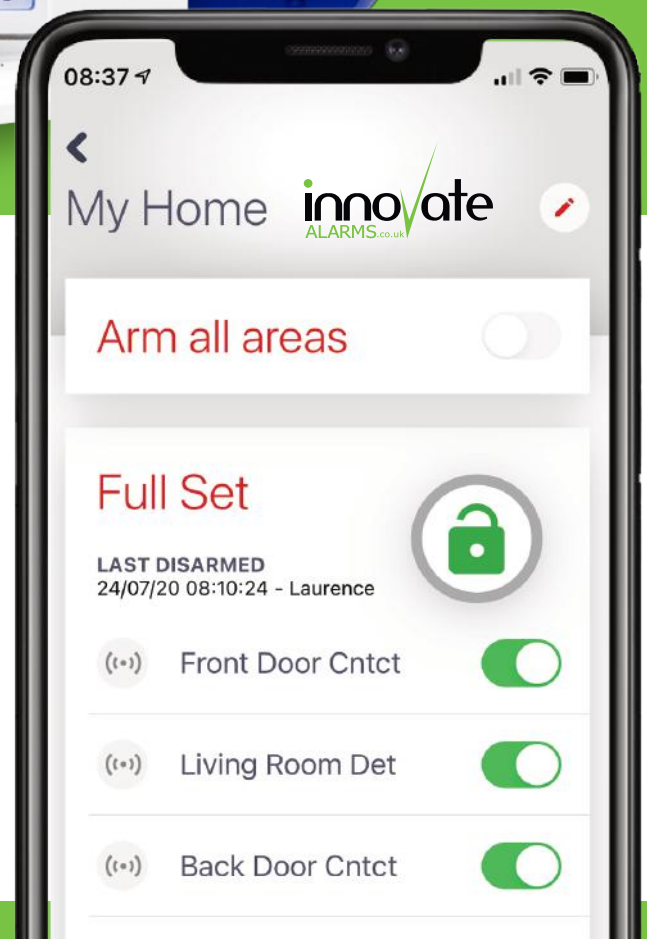

Grade 2 and Grade 3 options

LCD keypad with built in proximity reader

App compatible with WiFi module

Full metal enclosure

Up to 75 user codes and prox tags

CCTV Systems are very common throughout the UK and in recent years they have been growing in popularity at a rapid rate throughout the domestic market. This is down to the advances in technology, the reduction in costs and the effectiveness of CCTV. This guide provides just a fraction of the CCTV systems we offer.

TURRET CCTV CAMERAS

innovate
ALARMS.co.uk

IR CAMERAS

Suitable for both internal and external use, IR cameras provide a great option for high definition CCTV. IR cameras provide high quality colour images during the day. When the light levels go down the camera will switch to black and white and the built in IR LED's help to aid a high quality image.

FULL COLOUR CAMERAS

Full colour cameras have a large aperture lens and high a performance sensor. With a higher amount of absorbed light, advanced image processing algorithm and a built white lights the camera provides 24/7 colour images during the day and at night.

ACTIVE DETERRENT CAMERAS

Active Deterrent cameras links surveillance videos to alarms, audio prompts and various types of information to assist with verifying potential risks. These cameras actively warn off intruders with light and sound, while keeping you up to date of events in real-time through live view.

DAHUA
TECHNOLOGY

Smart Doorbells are a growing trend and can be very useful for both home owners and small businesses. See and communicate with whoever is at your door from your mobile phone from anywhere in the world. You can see why we like to refer to it as 'Answering your door in style'.
