ICS Warranty Program: The Right Choice for Quality and Confidence

Avery Dennison commitment to quality ensures that every product we produce is designed, engineered, manufactured and tested with one goal in mind—your complete satisfaction. That's why our range of innovative high performance products is backed with a warranty you can trust. Our Integrated Component System (ICS) Warranty Program is written assurance that our products perform exactly how they should from production through application and for the life of the graphic.

All Avery Dennison Graphics materials are covered by our general product warranty which guarantees you get products free from defects and that deliver consistent high quality and performance of our sign materials, screen print films, digital media and reflective products, every time. The ICS Warranty Program goes even further, offering you an open integrated system that provides the greatest range of flexibility, choice, confidence and protection.

ICS Performance Guarantee

- Available to all Avery Dennison customers
- Provides a standard product guarantee
- Includes extended assurance on performance and compatibility for a wide range of qualified printed platforms and inks

ICS Platinum Warranty

- Exclusive to Avery Dennison Specialist Converters and Installers, this warranty provides customers with the highest levels of quality and performance
- Provides a standard product guarantee
- Includes extended assurance on performance and compatibility for a wide range of qualified printed platforms and inks
- Specially prepared and customized warranty for larger projects

Even On The Move, Your Brand Can Influence A Purchase Decision

Commercial and fleet vehicles represent more than a mode of product transport and delivery for today's brands. Fleets are a powerful branding medium that captures attention and impressions, whether standing still or on the move.

What makes fleet vehicles of all sizes so special for branding is the breakthrough creative canvas that brings a visual identity to a larger-than-life size. The Avery Dennison® Fleet Graphics Portfolio features a robust portfolio of best-in-class digital, screen and cut vinyl and reflective graphic films that help your brand become a work of art on any mobile surface.

And, your quest for high-performance materials, for both short- and long-term applications, begins with fleet graphic solutions from Avery Dennison. The portfolio delivers vibrant and consistent color pop, with the ease of installation and removal to afford brands the opportunity to continually make a statement.

Get to know the graphic films that create a brand's colorful canvas.

Choose Avery Dennison Graphics Solutions for Your Fleet

Avery Dennison is a world leader in graphic materials for fleet, full vehicle wraps, exterior and interior graphics for corporate identity and point-of-purchase, as well as reflective and safety markings. Headquartered in Glendale, California, we employ more than 32,000 employees in over 50 countries and have the global breadth of resources to support fleet operations worldwide. When selecting Avery Dennison as a solutions provider, you can be assured of:

Superior Service

We have a dedicated team of experts who are highly trained, extremely knowledgeable and ready to support you throughout the planning and execution of a fleet project. We will work with you to understand your business needs and provide the best solution to help your brand stand out to your audience.

Digital Print Quality

We have a 99.8%* print consistency within our top selling brands.

Network of Resources

We have a network of converters, installers and suppliers to help service you through all steps of your project.

Dependable Products

Self-adhesive films you can rely on—with custom warranty and durability statements. We've done extensive durability and performance testing, and stand behind the quality of our fleet solutions.

Color Matching

Why wait? We produce exact color match samples in just a few days, which is quicker than our competition. Minimum order quantities apply.

Industry Knowledge and Reach

We are a world leader in graphic films that identify, promote and inform. Our Easy Apply™ adhesive technology provides a patented performance feature for easier, quicker and more effective installations.

*Based on claims per square foot of total product sold.

The Avery Dennison Story

Ray Stanton (“Stan”) Avery invented the world’s first self-adhesive label as a way to merchandise objects. In 1935, he founded Avery Adhesives in downtown Los Angeles and, in 1990, the company merged with Dennison Manufacturing to form Avery Dennison. We have grown from one bright idea into a global Fortune 500® corporation that continues to advance quality and innovation in materials science.

The company’s products, which are used in nearly every major industry, include pressure-sensitive materials for labels and graphic applications; tapes and other bonding solutions for industrial, medical and retail applications; tags, labels and embellishments for apparel; and radio-frequency identification (RFID) solutions serving retail apparel and other markets.

Avery Dennison Corporate Branding Solutions Guide

Film Name	Type	Description	Adhesive	Conversion or Printing Format	ICS Platinum Warranty** and Durability
MPI 1105	Cast Film	Premium high gloss cast film with 99.8% print consistency, superior 3D conformability, stunning printability and maximum durability for complex surfaces with curves and recesses. Pressure-sensitive adhesive for easy application on metal and painted metal. A solid tape construction that does not require edge sealing.	Permanent	n/a	5-10 years

**Please see product data sheets for complete technical, ICS Platinum and warranty information.

Understanding Film Types

Let Avery Dennison help you understand the different film types for ease and accuracy of your graphic film selection.

Cast Films

Cast films are premium vinyl films that offer the greatest flexibility and conformability for complex surfaces. These films are typically the best option for medium and long-term applications.

Reflective Films

Reflective films provide added safety or visibility and special effect markings. Beaded and Prismatic is the type of reflective pattern that catches the light for day and night visibility. You will want to make sure the film meets the federal guidelines for road safety. All Avery Dennison Reflective Films meet ASTM federal standards.

Calendered Films

Calendered films are an intermediate vinyl film for short-term applications and less complex surfaces, such as flat or simple curves.

Overlaminates

Overlaminates are clear, protective films that increase the durability of a printed graphic. The overlaminate makes the film slightly thicker, which helps with installation and removal efficiency. Overlaminates can also provide additional benefits or effects, such as giving color an extra gloss or sparkle finish.

Reflective Tapes

Reflective conspicuity pressure-sensitive tapes are high quality, microprismatic retroreflective materials that apply easily to areas of vehicles that require additional nighttime recognition. These tapes apply to metal and painted metal surfaces. These tapes can also be customized with your brand's logo.
