RF1904 SIDEWAYS LOUNGE CHAIR
& RF1905 SIDEWAYS COFFEE TABLE

SELL-IN MATERIAL
SIDEWAYS LOUNGE CHAIR & SIDEWAYS COFFEE TABLE

Carl Hansen & Søn's collaboration with Rikke Frost started in 2020 with the asymmetrical Sideways Sofa, followed by the Petal Lamp and the Sideways Footstool. Now, a lounge chair and coffee table have been added to the Sideways Series.

The RF1904 Sideways Lounge Chair is an elegant combination of solid wood, upholstery, and natural paper cord. The seat and back are padded so firmly that the upholstery remains smooth and crease-free. The back of the chair is upholstered in fabric with a woven, paper cord backrest – a design feature that gives the lounge chair a sense of lightness while also linking it to the Sideways Sofa.

The round RF1905 Sideways Coffee Table has a wooden frame, brass fittings, and a reversible tabletop with two different surfaces in either oak or walnut on one side and laminate on the other. There is also a version in Italian marble. Rikke Frost has designed the Sideways Coffee Table with a shelf, which allows you to put your mobile, iPad or remote aside, and, instead, enjoy the present and being offline.

Both pieces stand out for their classic materials shaped into modern, rounded designs, making them suitable for both private and public use.

RIKKE FROST
B. 1973

Danish designer Rikke Frost has always been curious about the combination of different craft traditions and types of material, a fact clearly reflected in her design portfolio where traditional and contemporary design is expressed in sofas, tables, chairs and lamps with an organic idiom.

Rikke Frost's interest in crafts and materials dates back to her childhood in the small Danish town of Bov. Her curiosity later led her to The Aarhus School of Architecture, where she trained as an industrial designer. Although her direction of study pointed towards industry, Rikke Frost chose to focus on furniture design and has since designed furniture for several renowned Danish and international companies. However, industrial design has influenced her design process, with production options always forming part of her initial consideration. She chooses materials, shapes and craft methods that can be incorporated in the best possible way into modern production – like at Carl Hansen & Søn's furniture factory in Denmark, where old craft traditions such as wickerwork with woven paper cord and a high-tech production go hand in hand.

MATERIALS

Driven by the maxim that every design should be ‘mindful, minimal, and magical’, designer Rikke Frost chose classic and sophisticated materials for these two new designs. The RF1904 Sideways Lounge Chair displays Frost’s curiosity for traditional craft and combinations of materials. A contemporary, organic design brings together classic materials and production techniques, including a steam-bent wooden backrest in FSC™-certified oak or walnut, firm upholstery, and elegant paper cord detailing.

The RF1905 Sideways Coffee Table is a harmonious, round design, displaying a hand-crafted wooden frame of solid FSC-certified oak or walnut with brass brackets, and a reversible tabletop in a choice of wood veneer and matte laminate or Italian, Bianco Carrara marble for a more vibrant expression.

“I’ve given a lot of thought to the design of the Sideways Series, where I have taken the circle as my starting point. The circle represents unity and sends a positive emotional message of harmony and balance. Circles convey a sense of freedom, which perfectly matches the feel I wanted from the Sideways Series. It has been very important to me that the design enables movement and different sitting positions.”
