Stay Safe with Meliá , we are ready to welcome you!

Faced with the unusual situation of Covid-19, Meliá Hotels International has developed a strategy to transform its hotel operations worldwide:

New Additional Cleaning and Hygiene Measures

New cleaning equipment

Diversey has published new cleaning and disinfection protocols, including new cleaning equipment and products to be used from the arrival of customers until their departure in all touch points.

Elimination of items that are dry cleaned

Decorative items that do not comply with new cleaning protocols (washing at more than 60o) will be eliminated. Example: cushions, plaid, etc.

Stay Safe Ambassador per hotel

An ambassador is appointed in each hotel to guarantee the implementation of the Stay Safe with Meliá programme..

Special prevention plan

We have created a special prevention and maintenance plan for air conditioning, heating, refrigeration and water systems to guarantee air quality and the disinfection of terminal points and equipment.

Laundry procedures

A protocol has been defined for laundries for washing and collecting linen during the stay and after the customer's departure to avoid contamination.

Personal Protective Equipment

Specific personal protective equipment (PPE) and hygiene equipment. Training in food hygiene and health standards prior to opening for all employees.

Seals on areas and articles

After disinfection of rooms and meeting rooms, all frequently used items (glasses and remote control) and the entrance to the room will be sealed.

Cleaning on request

Customers can decide whether they want to use the cleaning service during their stay. Cleaning will always be done when the customer is out of the room.

Main actions to take care of your health

Before customers arrive, they will be contacted and told about all the measures being taken and what their stay will be like. This information will be available and updated on melia.com

Protective screens

Installation of protective screens in reception, and in the dining room services.

Buffet modification: market-style

Buffets adapted to a market-style format, with our expert chefs directly serving customers a wide range of different dishes. Aiming to optimise the flow of customers and reduce food handling.

Virtual site inspections

Spazius has been implemented as a diagramming tool to design new room capacities and set-ups for the MICE segment and also allow virtual site inspections.

New signage system

A new signage system to inform customers and indicate how spaces will be used and the need for social distancing.

Training courses

New experiences: training courses to connect with customers in their new personal space. Focus on wellness.

Capacity reduction

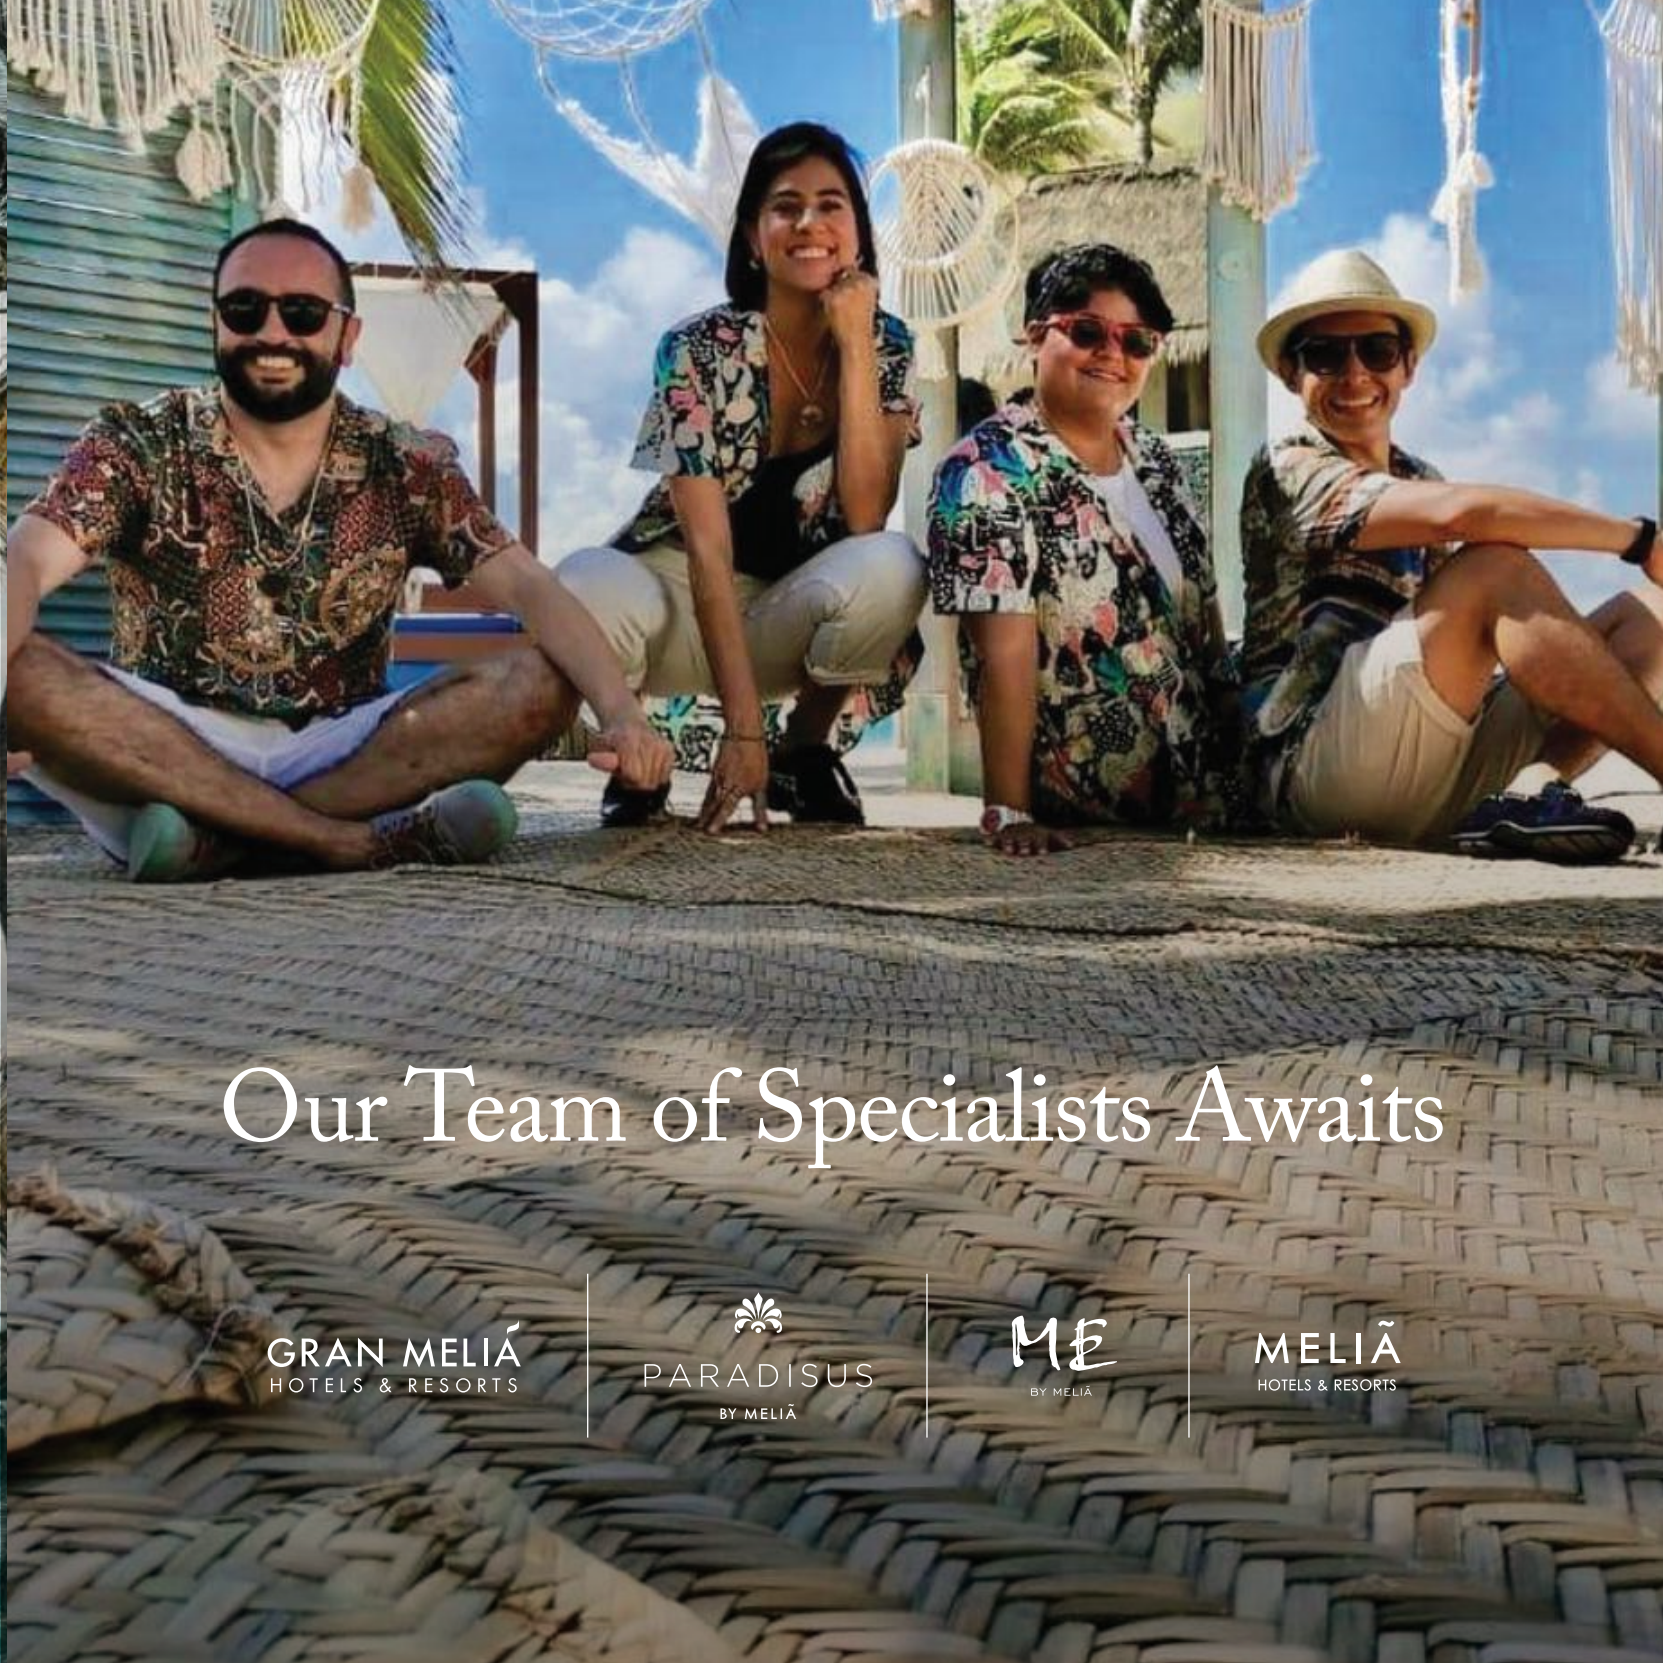

A space management tool has been implemented to reduce capacity in restaurants, meeting rooms and swimming pools and manage bookings to guarantee social distancing and personal space.
