Company history

IT ALL STARTED BACK IN 1962...

Audio-Technica was established in 1962 in Shinjuku, Tokyo, Japan, by Hideo Matsushita as a phonograph cartridge manufacturer. Its first products were the AT-1 and the AT-3 MM stereo phono cartridges. Business rapidly developed and Audio-Technica expanded into other fields. The headquarters and factory moved in 1965 to the current address in Naruse, Machida, Tokyo. In 1969, the company began exporting phono cartridges worldwide and launched the first microcassette recorders.

In 1972, Audio-Technica established its US arm in Fairlawn, Ohio, and started shipping VM phono cartridges to European manufacturers. In 1974, the company developed its first headphones, the AT-700 series, launched the same year. The AT-800 series of microphones were introduced in 1978 and in the same year the UK establishment in Leeds began operation.

In the 1980s, with the growth in digital music formats threatening their core business of phonograph cartridges, Audio-Technica began a period of diversification. Employee suggestions were solicited, with sushi machines among the ideas selected for further development.

In 1984, Audio-Technica introduced the ASM50 Nigirikko, a nigiri-forming appliance for home kitchens, which incorporated a turn-table like mechanism to deposit the nigiri onto. The market success of this product led the company to develop a range of sushi machinery for commercial and industrial use. Audio-Technica remains one of the largest manufacturers of sushi machines globally today, with products marketed under the brand AUTECH.

In 1986, the company developed RCA cables with high-purity copper produced from the continuous metal casting process (PCOCC), invented and developed between 1982 and 1985 by Atsumi Ohno. In the same year, the company launched the AT33ML/OCC phono cartridge, the first made with PCOCC materials. In 1988, another Audio-Technica subsidiary is founded in Taiwan.

In 1990s, Audio-Technica introduced several large-diaphragm condenser microphones for studio use: the AT4033 cardioid microphone in 1991, the AT4050 multi-pattern in 1995, and the AT4060 vacuum tube cardioid microphone in 1998; the AT895, a DSP-controlled five-element microphone array providing adaptive directional audio acquisition, was introduced in 1999. In 1996, the Southeast Asian establishment began operation in Singapore.

In 2008, the company celebrated the 20th anniversary of supplying microphones for US Presidential Debates. For their 50th anniversary, Audio-Technica celebrated at Consumer Electronics Show 2012, debuting their AT-LP1240-USB DJ Turntable and ATH-CKS55i.

In 2017, Audio-Technica Pure Digital Drive Wireless Headphone ATH-DSR9BT received CES Innovation Honoree Awards by using Trigrance Dnote Technology.

Since the late 1990s, Audio-Technica supplied microphones and headphones for US television shows such as the Big Brother, Deal or No Deal, the Rock and Roll Hall of Fame inductions and several international events:

Period	Event	Editions
1996–present	Summer Olympic Games	Atlanta 1996, Sydney 2000, Athens 2004, Beijing 2008, London 2012, Tokyo 2020
2002–present	Winter Olympic Games	Salt Lake City 2002, Torino 2006, Vancouver 2010, Sochi 2014, Pyeongchang 2018 Beijing 2022
1998–2013	Grammy Awards	1998–2013
2019	MotoGP	2019

The Driving Force For Your Audio

The ATH-M20x features 40mm drivers with rare earth magnets and copper-clad aluminium wire voice coils. Soak in the sound and enjoy high-quality audio reproduction where every syllable, breath and beat is crystal clear.

Closed-Back Design To Shut Out Distraction

There's nothing quite like the feeling of being completely absorbed in your audio, and Audio-Technica's ATH-M20x monitoring headphones allow you to isolate yourself from distraction and focus on the sound. The circumaural design completely contours around the ears for excellent sound isolation; particularly useful in noisy environments or home studios. Prevent sound interrupting your session or escaping into your recording space.

- Advanced build quality and engineering
- 40 mm drivers with rare earth magnets and copper-clad aluminum wire voice coils
- Tuned for enhanced low-frequency performance
- Circumaural design contours around the ears for excellent sound isolation in loud environments
- Convenient single-side cable exit
- Designed for studio tracking and mixing

The ATH-M40x over-ear wired headphones feature advanced engineering and robust construction, making them the perfect studio headphones for professional tracking, mixing, and monitoring. Equipped with 40 mm drivers and tuned flat for incredibly accurate sound monitoring across the entire frequency range, these closed-back headphones deliver a critically acclaimed audio experience.

Step up to the advanced design of M-Series professional headphones with the ATH-M40x studio monitor headphones. The high-quality build makes for a pair of lightweight yet durable wired headphones for professional studio tracking and mixing. Built with professional-grade ear pad and headphone material, the ATH-M40x provides a comfortable fit for extended wear.

- Cutting-edge engineering and robust construction
- 40 mm drivers with rare earth magnets and copper-clad aluminum wire voice coils
- Tuned flat for incredibly accurate sound monitoring across the entire frequency range
- Circumaural design contours around the ears for excellent sound isolation in loud environments
- 90° swiveling earcups for easy, one-ear monitoring
- Professional-grade earpad and headband material delivers more durability and comfort
- Collapsible for space-saving portability
- Detachable cable (includes 1.2 m - 3.0 m coiled cable and 3.0 m straight cable)
- For professional studio tracking and mixing, as well as DJ monitoring

The ATH-M50xBT2 is the second generation of our critically acclaimed M-Series wireless over-ear headphones. These headphones feature 45 mm large aperture drivers in a wireless design, so listeners will enjoy the same sonic signature of the legendary ATH-M50x studio headphones. With this update, we've also introduced several noticeable enhancements, such as improved vocal pickup for better call quality, an updated USB-C connection, and multipoint pairing mode.

So, whether you're looking for high-fidelity audio for your commute to work, conference call setup, or just relaxing and enjoying the music, the ATH-M50xBT2 lets you go wireless whenever you need it.

Personalized Listening Experience

Download the A-T Connect app to gain greater control of your headphones. Easily activate low latency mode, adjust EQ, change L/R volume balance, select desired voice assistant, locate misplaced headphones, change codecs, and more.

CONNECT App

- Wireless, on-the-go design delivers the same critically acclaimed sonic performance as the original ATH-M50x professional studio headphones
- Proprietary 45 mm large-aperture drivers and dedicated amplifier deliver exceptional clarity throughout an extended frequency range, with deep, accurate bass response
- Low latency mode improves synchronicity between audio and video for smooth streaming and gaming
- Premium audio-grade components, including an AK4331 advanced audio DAC and dedicated internal headphone amp, deliver pure, natural sound
- Dual mics and beamforming technology ensure crystal-clear call quality
- Sidetone circuitry improves conversations by letting you hear your voice in the headphones when making calls on most smartphones
- Microphone can be muted with a simple press of a button
- Multipoint pairing function allows you to stay connected to two Bluetooth devices at once
- Buttons built into the earcup provide easy control of volume/mute, music, and calls, and give you access to voice assistant (Amazon Alexa Built-in, Google Assistant, Siri)
- Google Fast Pair lets you quickly pair headphones with an Android smartphone or other device

Design

Made for
Studio

The ATH-R70x is Audio-Technica's first pair of open-back reference professional headphones. Together with the ATH-M70x, they stand as a flagship model in A-T's lineup of professional studio headphones.

Featuring specially designed drivers and acoustically transparent housings fashioned from aluminum honeycomb mesh, these headphones provide an accurate and natural open-back sound. They also incorporate a new, improved design of our popular 3D wing support system to provide even greater comfort during the prolonged use often required in professional settings.

Ideal for Long Listening Sessions

Stay comfortable and focused on the music. The R70x is exceptionally lightweight and features our popular 3D Wing Support system to keep you comfortable during extended use.

Tuned for Mixing and Mastering

Made for the most critical listening tasks, the R70x headphones are perfectly balanced to reproduce extreme low and high frequencies (5 to 40,000 Hz).

- High-efficiency magnets and pure alloy magnetic circuit design reduce distortion and ensure accurate and extended high-frequency response
- Carbon composite resin improves structural rigidity to provide detailed transient response
- Acoustically transparent, aluminum honeycomb-mesh housings provide a natural and spacious open-back sound
- Breathable fabric earpads and improved wing support provide long-wearing comfort
- Feather-light weight (approx. 210 g w/o cable) and robust construction make headphones perfectly suited for professional use
- Unique, dual-sided detachable locking cable is L/R signal independent, always ensuring proper stereo orientation

And the soft, durable earpads fit comfortably over the ears to provide excellent sound isolation.

- Newly developed 40 mm drivers provide extremely accurate sound
- Detachable locking cables - 1.2 m - 3.0 m (3.9' - 9.8') coiled and 1.2 m (3.9') straight - ensure secure connection during active DJ use
- Maximum input power of 1,500 mW enables distortion-free wide-range audio reproduction even at loud volumes
- Comfortable, durable earpads fit over ears for excellent sound isolation
- Soft, durable earpads can be worn comfortably for hours
- Over-ear style delivers exceptional isolation and long-wearing comfort
- Lightweight, sturdy construction

ATH-PRO7X

Professional On-Ear DJ Monitor Headphones

Type

Closed-back Dynamic

Driver Diameter

45 mm

Frequency Response

5 - 40,000 Hz

Maximum Input Power

2,000 mW at 1 kHz

Sensitivity

100 dB

The ATH-PRO7X professional DJ headphones combine the comfort and low-profile style of an on-ear design with powerful 45 mm drivers capable of handling 2,000 mW of input power. This combination gives DJs extremely accurate high-fidelity audio reproduction - even at loud volumes - from a pair of headphones that are easy to wear through even the longest gigs.

The ATH-PRO7X headphones come with two interchangeable cables - a 1.2 m - 3.0 m (3.9' - 9.8') coiled cable and 1.2 m (3.9') straight cable - that lock in place to ensure a secure connection during active DJ use. The headphones are lightweight, but built to hold up under rough use. And the soft durable earpads and headband are designed to provide hours of listening comfort.

- 45 mm large-aperture drivers reproduce ultra-expressive, detailed sound
- On-ear design with sleek, minimalist style
- Detachable locking cables - 1.2 m - 3.0 m (3.9' - 9.8') coiled and 1.2 m (3.9') straight - ensure secure connection during active DJ use
- Maximum input power of 2,000 mW enables distortion-free wide-range audio reproduction even at loud volumes
- Premium, soft, durable earpads can be worn comfortably for hours
- Easily replaceable headband cushion
- Lightweight, sturdy construction

ATH-E40

Professional In-Ear Monitor Headphones

- Proprietary dual phase push-pull drivers excel in monitoring applications by providing exceptional accuracy and clarity
- Flexible memory cable loops over ears for a custom fit and long-wearing comfort
- Specially designed housings provide maximum isolation, allowing you to focus on the music
- Detachable 1.6 m (5.2') cable, with newly developed A2DC (Audio Designed Detachable Coaxial) connectors at the headphones, offers exceptional durability and optimized audio performance (also available separately as the EP-C)
- Includes a carrying case, 6.3 mm (1/4") adapter, and silicone eartips (XS/S/M/L)

ATH-E50

Professional In-Ear Monitor Headphones

- Powerful single balanced armature drivers provide an accurate full-range response
- Flexible memory cable loops over ears for a custom fit and long-wearing comfort
- Specially designed housings provide maximum isolation, allowing you to focus on the music
- Detachable 1.6 m (5.2') cable, with newly developed A2DC (Audio Designed Detachable Coaxial) connectors at the headphones, offers exceptional durability and optimized audio performance (also available separately as the EP-C)
- Includes a carrying case, 6.3 mm (1/4") adapter, and silicone eartips (XS/S/M/L)

ATH-E70

Professional In-Ear Monitor Headphones

- Three balanced armature drivers provide accurate and extended response across the entire frequency range
- Flexible memory cable loops over ears for a custom fit and long-wearing comfort
- Specially designed housings provide maximum isolation, allowing you to focus on the music
- Detachable 1.6 m (5.2') cable, with newly developed A2DC (Audio Designed Detachable Coaxial) connectors at the headphones, offers exceptional durability and optimized audio performance (also available separately as the EP-CP)

ATH-A550Z

Art Monitor® Closed-Back Dynamic Headphones

The ATH-A550Z Art Monitor® closed-back dynamic headphones incorporate proprietary large-aperture 53 mm drivers with CCAW bobbin-wound voice coils to deliver audiophile-quality acoustic performance with linear frequency response.

The drivers also feature a top-mounted PCB, which contributes to smoother airflow for precise diaphragm movement. Audio-Technica's improved 3D wing support system provides an excellent, comfortable fit, aided by the headphones' soft, premium-grade earpads.

- Audiophile-quality headphones with metallic finish
- Newly designed 53 mm drivers with CCAW bobbin-wound voice coils
- Top-mounted PCB contributes to smoother airflow for precise diaphragm movement
- Double Air Damping System (D.A.D.S) for deep bass reproduction
- Proprietary 3D wing support system for excellent fit
- Premium, soft earpads for long-lasting comfort
- 3.0 m (9.8') cloth-wrapped, tangle-free cable
- Includes 6.3 mm (1/4") stereo adapter

ATH-A990Z

Art Monitor® Closed-Back Dynamic Headphones

- Newly designed 53 mm drivers with OFC bobbin-wound voice coils
- Drivers feature top-mounted PCB and integrated yoke for precise diaphragm movement and superior transient response
- Lightweight aluminum housings reduce unwanted resonance
- Double Air Damping System (D.A.D.S) for deep bass reproduction
- Proprietary 3D wing support system for excellent fit
- Premium, soft earpads for long-lasting comfort
- 3.0 m (9.8') cloth-wrapped, tangle-free cable
- Includes 6.3 mm (1/4") stereo adapter

ATH-AVC200

SonicPro® Over-Ear Headphone

The ATH-AVC200 headphones plug into a variety of audio and video systems to give you full-bodied, theater-like sound in the comfort of your own home or on the go.

Equipped with newly designed 40 mm drivers that reproduce clear mid and low frequencies and contoured, isolating earpads that retain every bit of the bass, the ATH-AVC200 headphones provide powerful, well-balanced audio to enhance your enjoyment of music and movies.

The large headband is paired with an adjustable headband support to ensure a comfortable, secure fit, allowing you to wear the headphones for extended periods without fatigue.

- Newly designed 40 mm drivers reproduce clear mid-low frequencies
- Adjustable headband support provides comfortable fit even during extended wear
- Large headband delivers comfortable and stable fit
- Contoured earpads fit naturally over ears to help provide rich bass
- 3.0 m (9.8') Y-type cable with 3.5 mm (1/8") gold-plated stereo mini-plug and 6.3 mm (1/4") adapter

ATH-AVC500

Closed-back Dynamic Headphones

- Large 53 mm CCAW bobbin-wound voice coil drivers
- Reproduce full, wide-range sound
- Anti-vibration aluminium housings ensure rich sound reproduction
- Self-adjusting headband support mechanism automatically for the best fit
- Bass-ports create tight, deep bass sound
- Soft foam earpads provide extra comfort while listening

ATH-AD500X

Audiophile Open-air Headphones

Designed for incredibly comfortable listening. With a lightweight honeycomb aluminum casing and magnesium frame structure, these open-air headphones produce no sense of pressure on the ears, offering a completely natural listening experience.

Newly designed 53 mm drivers with CCAW voice coils reproduce remarkably natural sound, with impactful bass and outstanding vocal projection. The self-adjusting wing support automatically adjusts to your head size. A straight OFC cable at the left earpiece terminates to a mini plug with included ¼" adapter.

- Newly designed 53 mm drivers with CCAW voice coils reproduce remarkably natural sound, with deep, impactful bass and outstanding vocal projection
- Open-air headphones produce no sense of pressure on the ears, resulting in a completely natural sensation
- Lightweight honeycomb aluminum casing
- Self-adjusting 3D Wing Support Housing provides comfortable support for a more enjoyable listening experience
- Flexible raised-fabric earpads offer excellent wearing comfort and durability

ATH-AD700X

Audiophile Open-air Headphones

- Newly designed 53 mm drivers reproduce clear treble and midrange
- Bobbin-wound CCAW voice coils for superior power handling
- Full open-air type headphones produce no sense of pressure on the ears, resulting in a completely natural sensation
- Lightweight aluminum honeycomb casing with excellent acoustic properties
- Self-adjusting 3D Wing Support provides a comfortable listening experience; total ear-fit design minimizes pressure
- Flexible raised-fabric earpads offer excellent wearing comfort and durability

ATH-AD900X

Audiophile Open-air Headphones

- Audiophile-quality open-air headphones deliver clear, natural vocal and instrumental reproduction, a smooth tonal balance, precise imaging and superlative dynamic range
- Large-aperture 53 mm drivers and CCAW voice coils for superior sound reproduction
- No sense of pressure on the ears, resulting in a completely natural sensation
- 3D Wing Support Housing offers a vibration-proof mechanism that provides comfortable support for a better listening experience

ATH-AVA400

Open-back dynamic headphones

- Open-air design, featuring 40mm CCAW drivers, delivers rich, detailed sound
- Honeycomb-punched aluminium housings enable clear sound reproduction
- Self-adjusting headband support provides comfortable fit even during extended wear
- Soft, cloth earpads reduce pressure on your ears

ATH-S200BT BK

Wireless On-Ear Headphones with Built-in Mic & Controls

- Bluetooth wireless technology with mic and controls built into the earcup for answering/ending calls, controlling music & video playback and adjusting volume on connected devices
- 40 mm drivers for outstanding sound quality
- Internal battery provides up to 40 hours of continuous use (1,000 hours on standby) on a full charge
- Headphones fold flat for easy transport
- Includes 30 cm (1') USB charging cable
- Lightweight earpads rest comfortably on the ears and provide good sound isolation

ATH-S200BT WH

Wireless On-Ear Headphones with Built-in Mic & Controls

- Bluetooth wireless technology with mic and controls built into the earcup for answering/ending calls, controlling music & video playback and adjusting volume on connected devices
- 40 mm drivers for outstanding sound quality

ATH-ANC40BT

QuietPoint® Active Noise-Cancelling Wireless In-Ear Headphones

The ATH-ANC40BT QuietPoint® wireless in-ear headphones combine Audio-Technica's proprietary active noise-cancelling technology with Bluetooth® wireless technology to give you greater freedom and listening pleasure in areas of high ambient noise.

The wireless headphones reduce that distracting background noise by up to 90% while the 13.5 mm drivers deliver superior sound reproduction.

- QuietPoint® active noise-cancelling technology reduces environmental noise by up to 90%
- Reliable Bluetooth® wireless technology with in-line mic and controls for answering/ending calls, controlling music & video playback and adjusting volume on Bluetooth wireless devices
- 13.5 mm drivers offer a premium listening experience
- Connects to two Bluetooth wireless devices simultaneously; remembers up to eight devices
- Employs aptX® sound-improvement technology, specifically created to yield the best-possible audio performance over Bluetooth transmission
- Included 1.2 m (3.9') cable with 3.5 mm stereo mini-plug allows wired use of headphones when battery has lost charge or in Bluetooth-free zones (e.g., in airplanes or hospitals)
- Lightweight, portable design is ideal for travel

ATH-CKS50 TW

Wireless Earbuds

Unlike many companies that produce truly wireless headphones, Audio-Technica places an emphasis on sound quality, not just convenience.

The ATH-CKS50TW earphones are no exception. Featuring specially designed 9 mm drivers, these earbuds deliver clear, full-range audio with deep, powerful bass - low frequency is enhanced by acoustic ducts on the back of the drivers.

- Newly developed 9 mm drivers deliver clear, full-range audio with the punch of enhanced bass
- Best-in-class battery life with up to 20 hours of continuous playback on a full charge (and up to 90 minutes of use from a 10-minute quick charge)
- Buttons in the earbuds provide easy control of music playback, volume, calls, and hear-through and noise-cancelling functions
- Low latency mode improves synchronicity between audio and video for smooth streaming and gaming
- Hybrid eartip structure combines hard and soft silicone material to provide a secure, comfortable fit with superior sound performance
- Selectable hear-through function lets in ambient sounds so you can remain aware of your surroundings
- Qualcomm® cVc™ Generation 8.0 ensures excellent call quality
- Sidetone circuitry improves conversations by letting you hear your voice in the headphones when making calls on most smartphones
- Compatible with high-quality Qualcomm® aptX™ Adaptive audio, Qualcomm® aptX™ audio, and AAC codecs
- Compatible with Sony's 360 Reality Audio for a truly immersive sound experience

ATH-TWX9

Wireless Earbuds

The ATH-TWX9 truly wireless earbuds offer the freedom to customize your sound space for an advanced audio experience. These headphones create an immersive audio experience and feature digital hybrid noise canceling technology.

With unique features including deep-UV sterilization, 360 Reality Audio for a realistic 3D sound stage, and Snapdragon Sound™ platform for higher quality music, video, and calls, the ATH-TWX9 set themselves above the rest as the best truly wireless headphones.

- Truly wireless in-ear headphones with digital hybrid noise-cancelling technology
- Ambience control (noise-cancelling and hear-through) can be employed for music playback and calls
- Use the touch sensor to choose from five preset noise-cancelling modes or optimized noise cancelling that adapts to your current environment
- Hear-through function allows you to hear ambient sounds (plus your own, unmuffled voice) so you can talk to others around you without removing your earbuds
- Newly designed 5.8 mm high-resolution drivers deliver an extended high-frequency range and improved sound detail
- Compatible with Qualcomm® Snapdragon Sound™, Qualcomm® aptX™ Adaptive audio, and Sony's 360 Reality Audio to deliver an advanced listening experience
- Eartips feature a hybrid structure of hard and soft silicone for best fit and sound performance, and come in three different lengths for each size (XS/S/M/L)
- Dual high-performance MEMS (micro-electromechanical system) mics, beamforming technology, and Qualcomm® cVc™ Generation 8.0 technology ensure crystal-clear call quality

ATH-ANC300 TW

QuietPoint® Wireless Active Noise-Cancelling In-Ear Headphones

The ATH-ANC300TW QuietPoint® in-ear headphones strike the perfect balance between comfort, convenience, and performance, delivering best-in-class sound quality and noise-cancellation in a compact, truly wireless design.

- Truly wireless in-ear headphones with digital hybrid noise-cancelling technology provide the highest degree of QuietPoint® ambient noise reduction
- Bluetooth® wireless technology with mic and multifunction buttons built into the earbuds to let you control music playback, calls, and volume without touching your smartphone
- 5.8 mm drivers with DLC (diamond-like carbon) coated diaphragms deliver exceptional full-range audio reproduction
- ANC feedback mic is positioned perpendicular to the driver to optimize the space in the sound tube for efficient sound delivery
- Compact, curved housing is designed to fit naturally in the ear for long-lasting comfort
- IPX2 water-resistant performance protects headphones from dripping water, such as rain and sweat

ATH-SQ1 TW BK

Wireless Earbuds

Enjoy music, movies, games, and more with truly wireless audio. Designed for all multimedia needs, the ATH-SQ1TW colorful earbuds are easy to use, comfortable, and convenient.

From the flexible dual or single earbud usability, to the hear-through functionality, the ATH-SQ1TW true wireless earbuds are not only stylish, but suitable for every lifestyle.

- Superior audio from an exclusive 5.8 mm driver in a small square design
- 6.5 hours of continuous playback with up to 19.5 hours* of extended use
- Touch sensor control allow users to play or pause music, skip between tracks, answer calls, and adjust the volume
- Enjoy minimal sound delay while watching videos or playing games with low latency mode
- Hear-through function that lets in ambient sounds
- Supports Fast Pair for convenient connection with Android devices
- Flexible dual or single-ear usability
- Automatic power-on when removed from the case
- Rain and Water Splashproof Design (IPX4**-equivalent)
- Six color variations available, from classic shades to unique combinations

ATH-ANC100BT BK

QuietPoint® Wireless In-Ear Active Noise-Cancelling Headphones

The ATH-ANC100BT QuietPoint® wireless in-ear headphones combine Audio-Technica's proprietary active noise-cancelling technology with Bluetooth® wireless technology to give you greater freedom and listening pleasure in areas of high ambient noise.

- QuietPoint® active noise-cancelling technology greatly reduces environmental noise
- Bluetooth wireless technology with in-line mic and controls for convenient handling of calls, music playback and volume adjustment
- Convenient pendant-type design
- Powerful 12 mm drivers provide excellent sound reproduction
- Compact housings for greater comfort
- 0.6 m (2.0') cable provides a wired connection for times when wireless operation is not available or when battery power is low
- Up to 10 hours of continuous use on a full charge

ATH-C200BT BK

Wireless In-ear Headphones

The ATH-C200BT in-ear headphones offer excellent Bluetooth® wireless sound quality at an exceptional value. These “open” style earbuds feature powerful 12 mm drivers coupled with specially designed sound tubes that control airflow to deliver full-range audio with enhanced low-frequency performance.

Yet the open design also allows some ambient noise to get through so you won't lose awareness of your surroundings. Silicon housings ensure a secure, comfortable fit.

The headphones feature an in-line mic and controls, allowing you to answer calls, adjust volume and control music playback on smartphones and other devices. The ATH-C200BT's design conveniently situates the mic and controls for easy access and places the battery case on the upper back where, if desired, it can be attached to your shirt collar with the included clip.

The internal battery powers the headphones for up to 9 hours (200 hours standby) and can be recharged with the included 30 cm (12") USB charging cable.

ATH-MSR7b BK

Over-Ear High-Resolution Headphones

- Renewal of the award-winning ATH-MSR7 adds audiophile option of a balanced connection
- Proprietary 45 mm True Motion Drivers (with diamond-like carbon coated diaphragms) are capable of Hi-Res Audio reproduction
- Multi-layer Air Damping Technology, comprised of a layered housing and triple-vent system, reduces unwanted vibration and controls the airflow for superior audio clarity
- Stainless steel acoustic mesh resistor provides improved high-frequency response, while bass acoustic resistor delivers accurate low-frequency response
- Lightweight design and optimized lateral pressure provide long time wearing comfort
- Aluminum housing structure reduces unwanted vibration

ATH-G1

Premium Gaming Headset

The ATH-G1 is the best premium gaming headset featuring specially tuned, large-diameter 45mm drivers.

With a max input of 1,300mW, these gaming headphones deliver an immersive sound quality for the ultimate gaming experience.

The wired gaming headset's state-of-the-art flexible and detachable boom microphone ensures you're always heard loud and clear.

- Large-diameter 45 mm drivers are specially tuned to bring Audio-Technica studio-quality sound to the gaming world
- High max input capacity (1,300 mW) ensures a lively, full-force gaming experience
- State-of-the-art, flexible (and detachable) boom microphone, with highly directional pickup, provides crystal-clear in-game voice communication
- 2.0 m (6.6') attached cable with gold-plated stereo mini-plug includes a simple volume control and locking microphone mute switch for one-hand operation
- Strong, lightweight construction and breathable headband pad and earpads provide supreme comfort through even the longest gaming sessions
- With mic removed, headset doubles as a pair of portable, high-fidelity headphones
- Earpads and headband detach for easy replacement
- Includes Y-type adapter cable (to split headphone and mic signals) and windscreen
- Compatible with PS4, PS5, Xbox One, Xbox Series X, laptops, PCs, and other gaming devices with a standard 3.5 mm TRRS headset connector or with a separate mic input and headphone output.

ATH-GDL3 BK

High-Fidelity Open-Back Gaming Headset

Inspired by the elemental spirit of air, the ATH-GDL3 open-back high-fidelity gaming headset offers an expansive sound for an immersive gaming experience like no other.

And at 220 grams, the ATH-GDL3 is nearly as light as air, making it an extremely comfortable gaming headset. The lightweight headset comes equipped with features like a detachable boom microphone, built-in volume control, and mute-switch for convenient control.

- Open-back gaming headset lets you localize sounds (an approaching opponent, for example) within an expansive sound field
- Large-diameter 45 mm drivers deliver high-resolution audio with exquisite detail
- Incredibly lightweight headset (less than 220 grams) offers long hours of comfortable gaming
- State-of-the-art, flexible (and detachable) boom microphone, with highly directional pickup, provides crystal-clear in-game voice communication

ATH-GDL3 WH

ATH-PDG1a

Premium Gaming Headset

- Large 40mm drivers with CCAW voice coils for unrivalled sound quality
- Open-air honeycomb aluminium design for the gamer who values a natural sound and feel
- Premium flexible gooseneck boom microphone with in-line volume & mute controller delivers crystal clear voice communications in any environment
- Strong, lightweight construction with ultra-comfortable leather headband suitable for long gaming sessions
- 3 x detachable cables: 2.0m cable with mic for PC & PS4; 1.2m smartphone cable; 2.0m extension cable for PC gaming with 2x 3.5mm plugs for audio and mic
- Compatible with PS4, Smartphones & PC. Also compatible with Xbox One using the Xbox One Stereo Headset Adapter

Designed for the serious gamer who values the natural sound and feel of open-air headphones, the ATH-PDG1a headset delivers powerful, detailed audio for exhilarating in-game action.

ATH-M50xSTS StreamSet™

Streaming Headset

Designed for streamers and content creators, the ATH-M50xSTS StreamSet™ is the world's first professional streaming headset that combines the legendary studio sound of the ATH-M50x headphones with the clarity of the iconic 20 Series microphones.

Equipped with a cardioid condenser microphone, and two distinct earpad styles that you can use according to your preference, this headset delivers the ultimate studio-quality sound for you and your streaming audience.

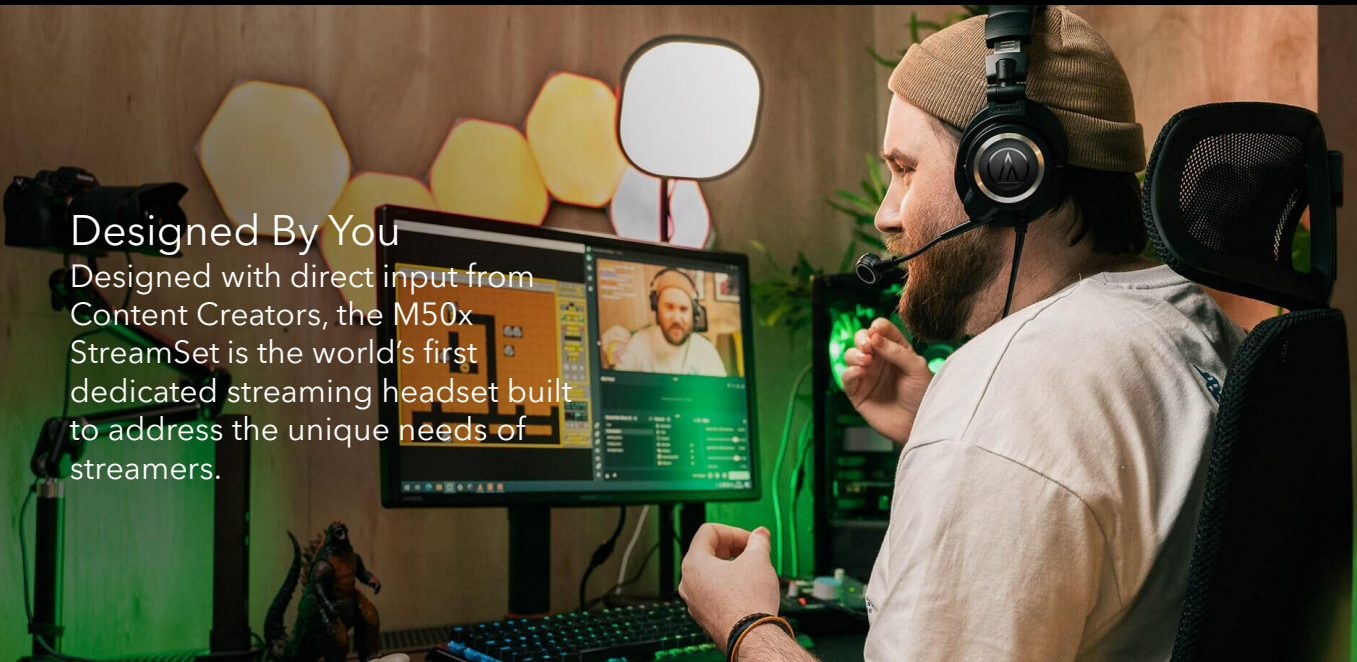

The microphone's design places it at the end of a flexible boom arm, keeping the mic in close proximity to your mouth, helping to reject background noise and deliver crystal-clear audio. The microphone can be easily muted quickly and efficiently simply by flipping the boom arm into the up position.

Designed from the critically acclaimed ATH-M50x, the ATH-M50xSTS StreamSet is equipped with the same 45 mm large-aperture drivers with the addition of two sets of distinct interchangeable earpads- M50x earpads that stress audio quality and sound isolation and mesh and leatherette to emphasize breathability and comfort.

The Best of Both Worlds
Legendary studio sound of ATH-M50x headphones paired with the renowned clarity of 20 Series microphones creates the ideal headset for live streaming.

Designed By You
Designed with direct input from Content Creators, the M50x StreamSet is the world's first dedicated streaming headset built to address the unique needs of streamers.

ATH-W1000Z

Audiophile Closed-back Dynamic Wooden Headphones

Type

Closed-back Dynamic

Driver Diameter

53 mm

Frequency Response

5 - 42,000 Hz

Maximum Input Power

2,000 mW

Sensitivity

101 dB/mW

While many listeners may believe that high-resolution audio came along with the introduction of the Compact Disc in 1982, constraints on the disc's storage space always prevented CD audio (standardized at 44.1 kHz/16-bit) from fully and completely reproducing the original recorded sound.

The advent and subsequent popularity of MP3s only made this problem more pronounced - the necessary compression of these files causes audio information to be lost, thus greatly reducing the audio quality.

Take your listening to Hi-Res Audio status with the ATH-W1000Z audiophile headphones, the 11th generation of our prized W Series. Featuring uniquely grained wood housings made of pure teak - one of the three most precious woods in the world - these headphones deliver warm, resplendent audio, aided by the wood's ability to reflect thick, natural bass sound. The bass extension is further improved by our exclusive D.A.D.S. (Double Air Damping System) housing structure.

Both of the headphones' 53 mm drivers is engineered with a unified yoke, comprised of two magnetic circuit parts, that boosts magnetic flux density for increased efficiency and better sound quality. The drivers also feature high-quality, bobbin-wound OFC-6N voice coils that ensure nuanced sound reproduction.

Lightweight and highly rigid magnesium frames and baffles, affixed to the wood housings via a special "floating mount" system, help to reduce unwanted resonance. Resonance is further reduced by our 3D wing support mechanism, which also provides a great, comfortable fit that can be enjoyed for hours on end.

The ATH-W1000Z comes equipped with a 3.0 m dual-sided, four-core parallel cable with a thermoplastic elastomer sheath to prevent tangling. The cable terminates in a 6.3 mm (1/4") gold-plated plug with a wooden sleeve.

- 11th generation of Audio-Technica's prized W Series
- Pure teak wood housing produces warm, resplendent sound
- 3D wing support for a great fit and long-wearing comfort
- Large 53 mm aperture drivers feature specially built two-part magnetic circuit that produces high-speed magnetic streams for improved sound quality
- D.A.D.S. (Double Air Damping System) structure provides deep bass reproduction
- Floating mount system brings out the natural sound properties of the wood housing
- 3.0 m tangle-free conductor cable with thermoplastic elastomer sheath
- 6.3 mm (1/4") gold-plated stereo plug with wooden sleeve

ATH-SR5BT BK

Wireless On-Ear High-Resolution Headphones

- Bluetooth wireless technology with mic and volume/control switch built into the earcup for convenient control of smartphones and other Bluetooth wireless devices
- NFC (Near Field Communication) functionality enables touch pairing with NFC-compatible Bluetooth wireless technology devices
- Remembers up to eight Bluetooth wireless devices
- Large 45 mm drivers for outstanding sound quality
- LED indicator in earcup displays status of pairing, Bluetooth wireless connection, battery level and charging
- Soft, memory foam earpads and easily adjustable headband slider provide a comfortable on-ear fit
- Internal battery provides 38 hours of continuous use (1000 hours on standby) on a full charge
- 1.2 m (3.9') cable with mic/controls provides a wired connection for when wireless operation is prohibited (e.g., in airplanes or hospitals), when battery power is low, or when Hi-Res Audio is desired.
- Includes 1.0 m (3.3') USB charging cable and carrying pouch

ATH-SR50BT BK

Wireless Over-Ear Headphones

- Exceptionally pure audio of Sound Reality in a wireless design
- Exclusively designed 45 mm drivers are capable of Hi-Res Audio reproduction with a wired connection
- Mic and touch-sensor controls built into the earcup for convenient handling of calls, music playback and volume adjustment
- Active ambient noise reduction circuitry gently reduces environmental noise for cleaner, high-fidelity sound
- Switchable quick hear-through function allows voices (conversations, announcements at airports and transit stations, etc.) to be heard through the headphones
- Internal battery provides up to 28 hours of continuous Bluetooth and ANC use on a full charge
- Soft memory foam earpads and headband for ultimate comfort
- Compatible with aptX, AAC and SBC codecs
- Fold-flat design for easy portability

ATH-AX3iS RD

SonicFuel® Over-ear Headphones for Smartphones

The ATH-AX3iS over-ear headphones feature large 40 mm drivers for enhanced sound, generously cushioned ear pads and headband for comfort during extended wear, a fold-flat design that allows for easy storage and a flat cord designed to eliminate tangling.

In-line mic, volume and track controls let you answer/end calls, play/pause/control music & videos and adjust volume on compatible smartphones and listening devices, all at the touch of a button.

- Flat, tangle-free cord
- Earcups fold flat for easy storage
- Large 40 mm drivers deliver enhanced sound
- Durable construction for active, everyday use
- Universal in-line controller lets you answer/end calls, adjust volume and play/pause/skip music & videos with compatible smartphones and listening devices
- Generously cushioned ear pads and headband provide comfort for extended wear

ATH-CKR100iS

Sound Reality In-Ear High-Resolution Headphones

Featuring dual phase push-pull drivers, the ATH-CKR100iS in-ear headphones deliver high-resolution audio that's true to the original sound.

The unique push-pull system incorporates two facing 13 mm drivers that generate phase-aligned audio signals that are mixed to compensate for each driver's inefficiencies, while providing an equal and tailored response without artificial coloration.

- Dual phase push-pull drivers (13 mm x 2, with pure iron yoke) provide extended frequency response by reducing intermodulation distortion
- Aluminum stabilizer ensures linear diaphragm movement for high-resolution audio reproduction
- High-rigidity titanium housings eliminate unwanted resonance
- Detachable 1.2 m (3.9') cable, with newly developed A2DC (Audio Designed Detachable Coaxial) connectors at the headphones, offers exceptional durability and optimized audio performance
- Separate star-quad cables for left and right channels improve isolation from external noise and channel crosstalk
- In-line control with mic for answering/ending calls and controlling music & video playback

ATH-CKR75BT GM

Sound Reality Wireless In-Ear Headphones

With its high-precision 11.8 mm drivers, the ATH-CKR75BT Sound Reality wireless in-ear headphones give you superb efficiency and audio quality with the convenience of Bluetooth® wireless technology. These aren't just any wireless headphones.

The powerful drivers reproduce audio with an extended 5 - 40,000 Hz frequency response and they feature a built-in amplifier that enhances the sound's depth and resolution.

- Bluetooth wireless technology with in-line mic and controls for answering/ending calls, controlling music & video playback and controlling volume on Bluetooth wireless devices
- Powerful, precisely designed 11.8 mm drivers offer superb efficiency and enhanced sound purity
- Built-in amplifier for a sound field with enhanced depth and improved resolution across the frequency range
- Internal lithium polymer battery provides seven hours of continuous use (200 hours on standby) on a full charge
- Includes silicone eartips (XS/S/M/L), secure-fit clip, 30 cm (11.8") USB charging cable and carrying case
- Strong yet lightweight aluminum housings greatly reduce unwanted resonance for crisp mid- and high-range reproduction
- Compatible with aptX and AAC codecs for high-quality sound and low latency

ATH-CKR70iS BK

Sound Reality In-Ear High-Resolution Headphones

The newly developed, highly efficient 11.8 mm Hi-Res Audio drivers allow the ATH-CKR70iS in-ear headphones to faithfully reproduce the crystal-clear sound of high-resolution audio sources.

The strong yet lightweight machined aluminum housings reduce unwanted resonance, and their design positions the drivers for optimal performance, while ensuring a comfortable fit with excellent sound isolation.

The performance is further enhanced by high-precision stabilizers that ensure linear diaphragm movement for controlled response.

- Powerful 11.8 mm Hi-Res Audio drivers allow for a perfect balance between housing size and sound quality
- Strong yet lightweight aluminum housings greatly reduce unwanted resonance for crisp mid- and high-range reproduction
- High-precision stabilizer ensures linear diaphragm movement for high-resolution audio reproduction
- Headphones designed to provide both excellent sound isolation and comfortable fit
- In-line control with mic for answering/ending calls and controlling music & video playback
- Includes silicone eartips (XS/S/M/L) and protective pouch

ATH-CKR55BT GM

Sound Reality Wireless In-Ear Headphones

- Bluetooth wireless technology with in-line mic and controls for answering/ending calls, controlling music & video playback and controlling volume on Bluetooth wireless devices
- Newly designed, compact 10.7 mm drivers deliver exceptional, full-range wireless audio
- Built-in amplifier for a sound field with enhanced depth and improved resolution across the frequency range
- Internal lithium polymer battery provides seven hours of continuous use (200 hours on standby) on a full charge
- Includes silicone eartips (XS/S/M/L), secure-fit clip, 30 cm (11.8") USB charging cable and protective pouch
- The compact housings are designed to provide a comfortable fit for ears of all sizes
- Machined brass stabilizers absorb unwanted vibration for clearer mid and high frequencies

ATH-CKR30iS BK

SonicFuel® In-Ear Headphones with In-line Mic & Control

With newly developed 9.8 mm drivers and machined brass stabilizers that absorb unwanted vibration for clearer mid and high frequencies, the ATH-CKR30iS in-ear headphones give users powerful audio wherever they go.

The headphones feature compact housings that are designed to fit comfortably in anyone's ears - a fit enhanced by four sizes (XS, S, M, L) of interchangeable eartips - and provide a high level of sound isolation. The headphones are also equipped with an in-line microphone and controller for easy answering of calls and control of music and video playback.

- High-performance 9.8 mm drivers for rich, wide-range sound reproduction
- Machined brass stabilizers absorb unwanted vibration for clearer mid and high frequencies
- In-line control with mic for answering/ending calls and controlling music & video playback
- The compact housings are designed to provide a comfortable fit for ears of all sizes
- Includes silicone eartips (XS/S/M/L) and protective pouch

ATH-CKX9iS BK

SonicFuel® In-ear Headphones with In-line Mic & Control

Music is your energy for life - the fuel for your heart and soul. SonicFuel® headphones are specifically designed for active, daily use, to power you forward by delivering extraordinary comfort, style and an immersive listening experience that never sounds artificial, processed or filtered.

Just pure sonic goodness for the high-octane tempo of your life.

The ATH-CKX9iS SonicFuel® in-ear headphones feature stay-in-place fit, providing unique comfort in addition to optimal sound. The C-tip configuration nestles within the ear where it locks in place for extra stability.

- Large 13.5 mm performance enhanced drivers offer a premium listening experience
- C-tip design fits the shape of your ear for reliable stay-in-place comfort
- In-line control with mic for answering/ending calls, controlling music & video playback, and controlling volume (on compatible smartphones & other portable devices)
- Included luxury zippered hard carrying keeps headphones protected and easy to find every time
- Also includes Comply™ foam tips, silicone eartips (XS/S/M/L), C-tips (S/M/L), and tangle-free flat cable

ATH-LS50iS RD

In-Ear Headphones with In-line Mic & Control

Bring the concert experience to your everyday life. With its Dual Symphonic Drivers, the ATH-LS50iS “Live Sound” in-ear headphones deliver the sonic realism that will have you cheering like you’re in the front row.

The two 8.8 mm drivers are serially situated within each housing and driven simultaneously to reduce diaphragm distortion and generate a balanced sound with deep, rounded bass and clear mid and high frequencies.

The housings are constructed of durable ABS resin that helps to reduce unwanted resonance, and the eartip posts are angled to provide a comfortable, sound-isolating fit.

- Exclusive 8.8 mm “Live Tuned” Dual Symphonic Drivers, comprised of two drivers serially situated within each housing, generate a balanced sound with reduced distortion and strong, articulated bass
- Acoustic sound pipe, constructed of stainless steel and high-durability resin, provides improved high-frequency reproduction
- Flexible memory cable loops over ears for a custom fit and long-wearing comfort
- Detachable 1.2 m (3.9') cable, with newly developed A2DC (Audio Designed Detachable Coaxial) connectors at the headphones, offers exceptional durability and optimized audio performance
- In-line control with mic for answering/ending calls and controlling music & video playback

ATH-LS70iS

In-Ear Headphones with In-line Mic & Control

The 8.8 mm Dual Symphonic Drivers of the ATH-LS70iS “Live Sound” in-ear headphones let you move through your day with the sonic realism of a live concert filling your ears.

The two 8.8 mm drivers are serially situated within each housing and driven simultaneously to reduce diaphragm distortion and generate a balanced sound with deep, rounded bass and clear mid and high frequencies.

The drivers’ diaphragms are also carbon-coated to add power and precision to the bass and extend frequency response.

- Exclusive 8.8 mm “Live Tuned” Dual Symphonic Drivers, comprised of two drivers serially situated within each housing, generate a balanced sound with reduced distortion and strong, articulated bass
- Acoustic sound pipe, constructed of stainless steel and high-durability resin, provides improved high-frequency reproduction
- Diaphragm’s hard carbon coating enables it to produce powerful, detailed wide-range audio
- Long voice coils increase the drivers’ power, enabling rich, low-frequency audio reproduction
- Flexible memory cable loops over ears for a custom fit and long-wearing comfort
- Detachable 1.2 m (3.9') cable, with newly developed A2DC (Audio Designed Detachable Coaxial) connectors at the headphones, offers exceptional durability and optimized audio performance
- In-line control with mic for answering/ending calls and controlling music & video playback
- Durable ABS resin housings greatly reduce unwanted resonance

ATH-SPORT10 BK

In-Ear Headphones

Compact Size, Powerful Sound

The SPORT10 may be lightweight but they deliver the sound you expect from our Japanese experts. These affordable sports earphones have been engineered with over 50 years of audio heritage and offer surprisingly powerful sound with our innovative 8.8mm drivers.

Whether you prefer to workout to a bassy, high BPM playlist, get lost in an audiobook or enjoy a motivational podcast, the SPORT10 in-ear headphones offer excellent audio quality. With a frequency range of 20 up to 20,000Hz, you can enjoy a rich sound experience as you stretch, sprint or lift.

These lab tested and IPX5 sweat resistant certified in-ear headphones are lightweight and affordable, all while offering high-quality sound.

Featuring a comfortable ear-hook design and two different styles of eartips, the ATH-SPORT10 earphones ensure a secure fit for your home, gym or outdoor workout routine.

ATH-SPORT70BT BK

SonicSport® Wireless In-ear Headphones

The ATH-SPORT70BT wireless in-ear headphones feature 9 mm performance-enhanced, carbon-coated drivers to deliver amazingly clear and powerful audio to fuel your workouts.

- Bluetooth wireless technology with in-line mic and controls for convenient handling of calls, music playback and volume adjustment
- Lab tested and certified IPX5* waterproof rating allows headphones to be washed after use
- Switchable ambient noise hear-through function allows you to hear people and traffic around you for safer use outdoors
- Internal battery provides six hours of continuous use on a full charge
- Includes standard eartips (XS, S, M, L), Comply™ foam eartips (M) with SweatGuard™ technology, 30 cm (1') USB charging cable, and hard carrying case
- 9 mm performance-enhanced, carbon-coated drivers for amazing wireless audio
- Supports high-quality AAC codec
- Ear-hook design provides a secure fit for active use

ATH-SPORT70BT RGD

SonicSport® Wireless In-ear Headphones

The ATH-SPORT70BT wireless in-ear headphones feature 9 mm performance-enhanced, carbon-coated drivers to deliver amazingly clear and powerful audio to fuel your workouts.

- Bluetooth wireless technology with in-line mic and controls for convenient handling of calls, music playback and volume adjustment
- Lab tested and certified IPX5* waterproof rating allows headphones to be washed after use
- Switchable ambient noise hear-through function allows you to hear people and traffic around you for safer use outdoors
- Internal battery provides six hours of continuous use on a full charge
- Includes standard eartips (XS, S, M, L), Comply™ foam eartips (M) with SweatGuard™ technology, 30 cm (1') USB charging cable, and hard carrying case
- 9 mm performance-enhanced, carbon-coated drivers for amazing wireless audio
- Supports high-quality AAC codec
- Ear-hook design provides a secure fit for active use
