FIRM OVERVIEW

Niles Bolton Associates (NBA) is a 130-person firm providing architecture, interior design, landscape architecture, and urban planning services. Founded in 1975, NBA has completed projects in 49 states and 16 countries. With offices in Atlanta, Georgia and Alexandria, Virginia, NBA was named a Top 66 design firm in the U.S. by Building Design & Construction in 2025. Our major markets include multifamily residential, higher education, retail, corporate, and hospitality.

Our skill to understand our clients' needs and design to those requirements garners trust that keeps clients coming back. For Niles Bolton Associates, success is measured not only with design awards, but by our ability to design an appropriate response to program and budget requirements, by acceptance in the market served, and by the ongoing financial reward for our clients. Throughout our 50 year history we have developed a strong sense of regionalism in our design methodology.

PROJECT EXPERIENCE

Niles Bolton Associates

MULTIFAMILY + MIXED-USE

With extensive experience encompassing everything from single family homes to luxury high rise developments, Niles Bolton Associates brings to our clients a remarkable understanding of the planning, design, market and construction issues specific to residential design. As one of the nation's leading multi-family housing design firms, we have designed more than 750,000 dwelling units in a variety of housing types. Our multifamily housing projects throughout the United States and abroad give us an international design perspective and enable us to respond in the appropriate regional architectural vernacular. NBA enjoys national, regional, and local recognition with design awards in areas such as best attached home, best apartment community, distinguished design, outstanding development, and best landscape design. Our multidisciplinary practice provides us with the ability to develop design solutions that address the total project from initial concept to final finishes.

SENIOR HOUSING

With knowledge of various types of senior housing design, NBA offers innovative solutions across a broad spectrum of care environments to our clients. The firms' expertise spans active adult communities, independent living, assisted living, skilled nursing, and memory care facilities across the Southeast and Mid-Atlantic regions. With a deep understanding of the unique needs of aging populations, NBA has successfully designed spaces that promote comfort, safety, and well-being, while integrating functional, aesthetic, and sustainable design elements. Our commitment to enhancing the quality of life for seniors is evident in our completed projects which promote thoughtful, resident-centered designs that prioritize both accessibility and a sense of community.

OFF-CAMPUS STUDENT HOUSING

For more than 45 years, NBA has been crafting the environment for college students to live and learn across the country and is currently **ranked #1 in student housing by Building Design + Construction**. We have designed over 60,000 student housing beds near college and university campuses - all with different goals, visions and budgets. Through our experience in student housing design, we know that housing facilities must be inviting and livable as well as architecturally appropriate. Our experience in commercial, housing and hospitality design gives us insight into many of the same issues that impact student housing development including unit/room configuration, food service, parking, access and security, curb appeal, and building maintenance.

EXIT

HIGHER EDUCATION

As the nation's leader in student housing design, NBA has a proven track record in planning and design for a wide range of educational and institutional clients. We have designed over 80,000+ student housing beds on more than 75 colleges and school campuses. Solving issues of specialized use, maintenance, security, and building efficiency for student housing communities is part of our daily practice. We understand project schedules, budget constraints, and the important function that housing plays on a campus environment. We also have the sensitivity to design educational environments that are specifically tuned to the unique needs of the institution.

HOSPITALITY

Niles Bolton Associates has a proven track record in the hospitality market with capital budgeting, planning and design, development consulting, flag and branding compliance, and standards development. We understand the operational requirements of food and beverage service, banquets, housekeeping, facilities management, concierge activities, registration, and retail. Our staff has developed extensive resources of suppliers and consultants who share detailed knowledge of two-star to five-star projects. For any hospitality project to be designed successfully, the project must blend aesthetics and ambiance with functionality and resilience to daily use. NBA's careful planning minimizes maintenance needs to maximize long-term viability while within budget and on schedule.

CORPORATE

Niles Bolton Associates brings a depth of experience to corporate and workplace design that reflects a clear understanding of how organizations function, grow, and evolve. Our work encompasses corporate headquarters, regional offices, coworking spaces, and mixed-use workplace environments for a wide range of clients. NBA approaches each project with a focus on aligning architecture and interiors with brand identity, corporate culture, and operational goals, creating spaces that support productivity, collaboration, and employee well-being. Through thoughtful planning, flexibility, and integration of technology, we design workplaces that adapt to changing business needs while maintaining a strong sense of place. Our multidisciplinary practice allows us to seamlessly coordinate architecture, interiors, and site considerations to deliver efficient, engaging, and future-ready corporate environments.

RETAIL

With a distinguished track record in retail design, NBA's experience extends from restaurants and free-standing buildings to large mixed-use developments where retail is seamlessly integrated into the ground level. The firm has designed 16 Neiman Marcus specialty stores across the country with locations in San Francisco, Las Vegas, Honolulu, Miami, Palm Beach, Tampa, Orlando, Plano, Scottsdale, and Oakland. Pulling from experience in mixed-use, multifamily, campus planning, and hospitality design, NBA excels in creating integrated, pedestrian-oriented developments that foster vibrant, walkable communities. By prioritizing accessibility, flow, and engaging storefronts, the firm ensures that the retail spaces we are designing not only attract customers but also enhance the overall urban experience, offering both functional and visually appealing environments.

AVIATION

For over 50 years, the DYE | NBA aviation team has been designing award-winning facilities across the Continental United States, Hawaii, and into the Caribbean, Middle East and Asia. We have become a valued resource for transit authorities, municipalities, airports and general aviation operators who are addressing critical infrastructure needs through a range of transportation project types including FBO executive terminals, corporate flight departments, and hangars. Our extensive experience in planning, permitting, operations, mixed-use development, and hospitality gives us a true understanding of how general aviation facilities can be critical drivers for the business community, economic development, and even in disaster response.

TRANSPORTATION

NBA has been designing transit facilities in cities across the U.S., including Los Angeles, Atlanta, Honolulu, Houston, Raleigh/Durham and Miami. We have become a valued resource for transit authorities and municipalities who are addressing critical urban issues through transit development.

One of primary reasons we are selected for transit projects is that we approach transportation design as a community-building opportunity. Our extensive experience in urban planning and mixed-use development gives us a true understanding of how transit design meets the needs of communities and how private developments can be transit-supportive to increase ridership and support smart growth.
