

CABLE & WIRELESS PANAMA FOUNDATION

ANNUAL REPORT 2022

CABLE & WIRELESS PANAMA

For Cable & Wireless Panama and our +Movil brand, 2022 was marked by the return to office, allowing us to resume volunteer activities led by the Cable & Wireless Panama Foundation, making it easier for us to reconnect with the community. In addition, after the acquisition of Claro Panama, S.A. We have positively advanced operations integration, adding more volunteers to social responsibility activities.

We are proud to see how our Foundation adapts to circumstances and keeps pace with social responsibility projects under the four pillars that set the course for our solidarity: education, access, environment, and disaster relief. For +Movil, this commitment is inspiring.

We keep the promise to do better and, with encouragement, to continue contributing to noble causes that fill Panamanians with hope and identity.

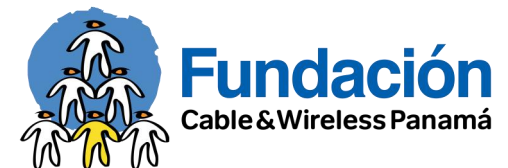

We are connecting communities and changing lives.

ABOUT US

Cable & Wireless Panama Foundation(+Movil) is a non-profit organization founded in 2003 to promote technological development programs and close the digital divide to benefit the least favored people in society, especially children, youth and women. The Ministry of Education recognizes it as a non-profit educational institution.

The Foundation also works on education, youth, health, art, and culture projects. These projects have allowed many communities to advance in economic and social progress. In addition, it maintains high-impact initiatives strengthening the pillars of Access, Environment, Disaster Support, and Learning that govern the corporate social responsibility strategy of our parent company, Liberty Latin America.

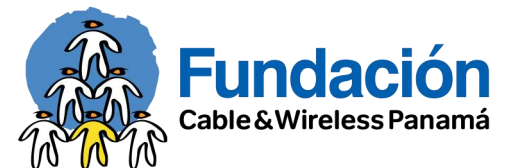

CABLE & WIRELESS PANAMA FOUNDATION

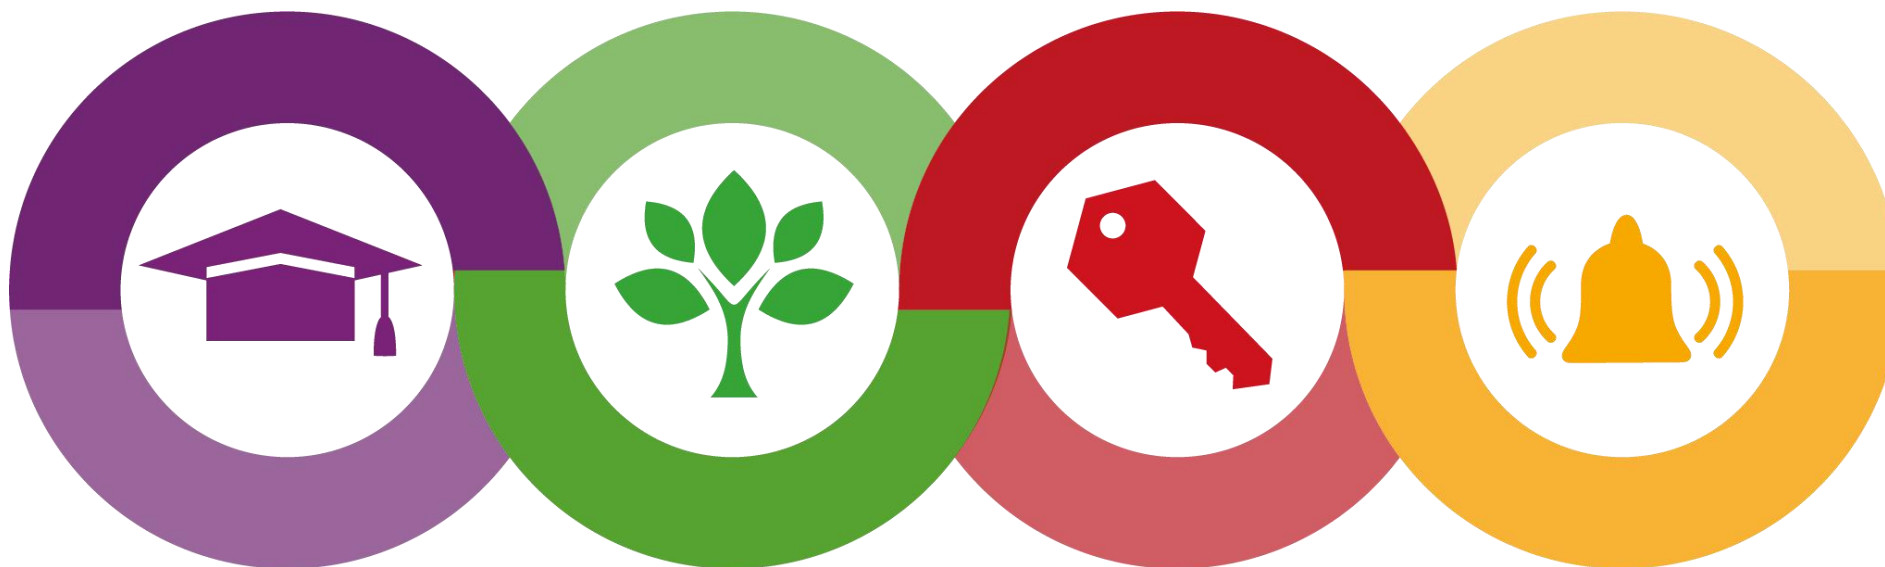

For 19 years, we have walked alongside hundreds of volunteers in various social areas directly impacting the community; we have learned and evolved. We adapt to circumstances while maintaining our commitment to make a positive social contribution to the community. We have built relationships of respect and trust with the organizations and benefactors with whom we have undertaken challenging projects. We continue to transform employees into volunteers committed to the communities we serve.

In 2022, we focused our financial and non-financial resources on the four pillars (Access, Environment, Disaster Support, and Learning) that constitute our north, particularly emphasizing education with equality, diversity, and inclusive perspective (EDI). EDI is an integral part of our efforts. We promote alliances with necessary projects for youth in education and mental health (National Oratory Contest and Tu Vales). We remain committed to the environment and our crusade to mitigate pollution through the e-waste recycling program "Give your cell phone a +green ending." We continue to support communities impacted by natural disasters like floods and connect the unconnected as technology helps individuals and communities thrive.

We thank our benefactors, volunteers, and partner companies for participating in this year's achievements.

NATIONAL ORATORY CONTEST 2022

The National Oratory Contest is an educational project that promotes healthy competition, intellect, and leadership among young people who, through public speaking, address and analyze current issues that, year after year, have marked the country's historical evolution. In 2022, the CNO (Spanish Acronym) maintained its convening power among high school and high school students. In 17 editions, the contest has impacted more than 800,000 students nationwide.

The contest's Grand Finale captured the entire country's attention and brought to the fore a fundamental issue for a Panamanian society: Reimagining education in Panama. The contribution of young people in transforming and strengthening the Panamanian educational system, post Covid.

+TERCLASS

Our +Terclass project, in 2022, held four master classes in a virtual format. We had a cumulative audience of more than 800 viewers, between students and teachers, with an average of 200 questions and comments. This year, we emphasized STEM careers more to encourage girls to consider careers in telecommunications, engineering, science, and the like. We kept a colloquial format, with dynamic content and relevant data from each specialty area of the guests, to fuel curiosity and research.

Our themes 2022:

- There's a dinosaur in my yard!
- ICT at the Society's Service
- Fortuna bringing renewable energy to Panama with the latest technology and innovation
- Digital Security

AYUDINGA FOUNDATION

Education does not stop, and for this reason, we continue to support the Ayudinga Foundation, donating connectivity services and permanent communication equipment to develop technical education projects that benefit thousands of students who connect through their study platforms.

Ayudinga is a team of valuable young people who work to change the world through quality, accessible, inclusive, and humane education for all children and adolescents in Panama and Latin America. Its digital content offers mathematics, physics, chemistry, and biology courses. In addition, Access is available from anywhere in the world thanks to online technology.

Ayudinga busca brindar una educación de calidad,
libre, gratuita, inclusiva y humana

Descripción

Ayudinga es un proyecto educativo que busca innovar las metodologías de enseñanza de manera creativa, diferente e interesante en América Latina. Buscamos adaptar la enseñanza al tipo de estudiantes que tenemos en este siglo XXI, buscamos que aprender sea divertido y gracioso. Somos jóvenes entre 18-25 años poniendo nuestros pocos conocimientos al servicio de la humanidad entera gratuitamente.

DONATION OF SCHOOL SUPPLIES

The CWP Foundation and the volunteers from +Movil and Claro traveled to El Valle de Antón in the Province of Coclé to deliver school supply kits in environmentally friendly bags. As a result, more than 30 students of the C.E.B.G. Toribia Rodriguez de Escudero received school supplies, Christmas gifts, and a celebration with entertaining games by the team of volunteers.

PROMOTING SCIENCE AND TECHNOLOGY

Continuing the efforts of the Foundation, the volunteers had the opportunity to address the 830 students from the schools visited, in other activities, to motivate them to be interested in STEM subjects. Through their experiences, the collaborators motivated students, especially girls, to pursue STEM careers to help meet future challenges in their communities.

ENVIRONMENT

RECYCLING PROGRAM

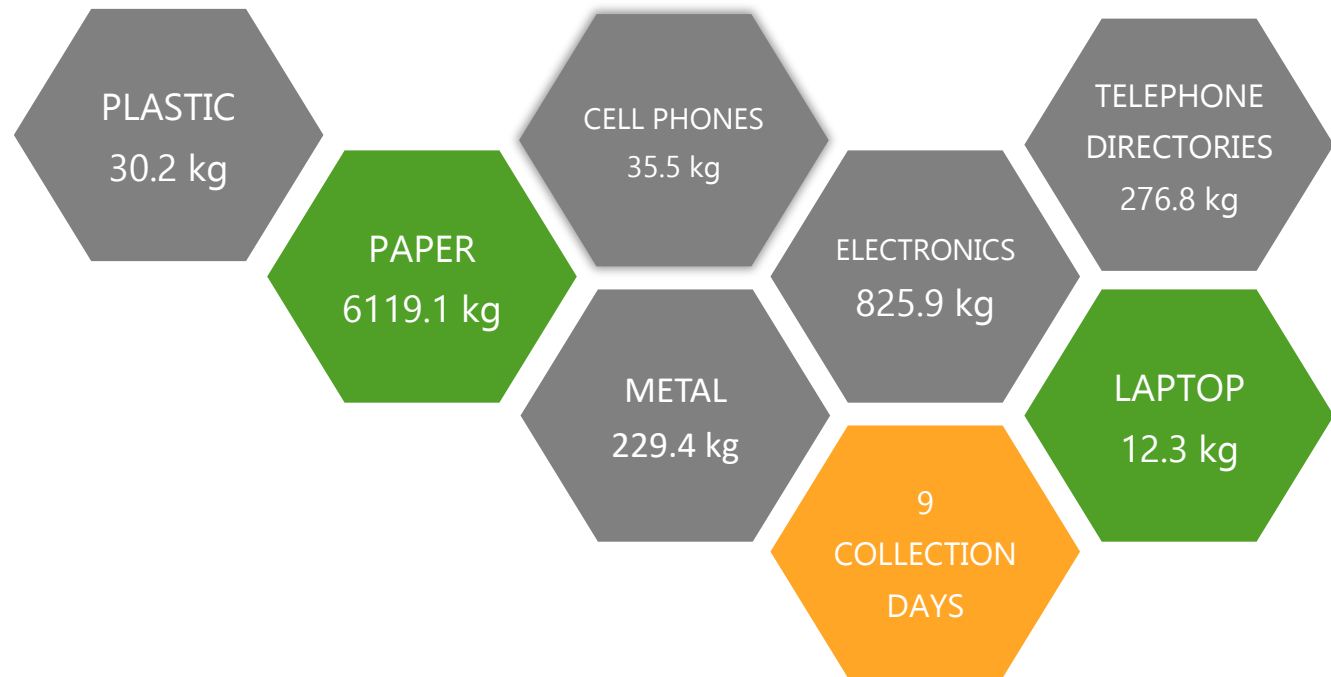

The stars of the consumer recycling program were the digital volunteers who spent hours in their area gathering all the materials to recycle.

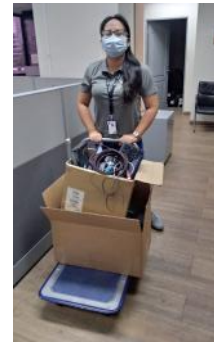

The program also integrates +Movil customers and different interest groups. For example, with companies like Recicla Panama and Recimetal, we maintain permanent monitoring of the materials that can go into the circular economy.

BEACH CLEANING

Balance
4.9 t

As part of the celebration of "The Ocean's Month" volunteers from Liberty Latin America, +Movil and Claro participated in a Beach Cleaning Day in Costa del Este in Panama City, intending to support the protection and maintenance of Panamanian coasts and beaches. These activities help mitigate the impact of pollution by plastics and all kinds of waste that reach this sector. As a result, it was possible to collect glass, cans, plastics, clothing, and electronic scrap, among other non-organic items, totaling 558 bags, equivalent to 4.9 tons of waste.

BEACH CLEANING

Within the framework of Mission Week, volunteers from +Movil and Claro and the residents of the Maria Chiquita township in the province of Colon collected 3.1 tons of garbage found in the community beach area. This activity, in which people of Colon of all ages participated, meant an educational moment to raise awareness about the problems caused by the contamination of beaches and oceans, affecting ecosystems and biodiversity.

ENVIRONMENTAL EDUCATION

Our commitment to the environment is to promote education in values, such as responsibility for our planet. Through a hand-painted mural, the volunteers from +Movil and Claro and the Trazos Libres Organization left a positive message full of colors to facilitate the development of healthy habits with nature.

REFORESTATION

As part of the environmental activities, +Movil and Claro's volunteers carried out support work in the institutional nursery of the Ministry of the Environment in Chilibre. The employees were divided into teams to cover the care and assembly of 958 seedlings. These will be distributed nationwide for various reforestation activities.

ACCESS

TELECOMMUNICATIONS AND CONNECTIVITY SERVICES

60 NGOs benefit from donated telecommunications services provided by CWP Foundation, helping them shape the technology landscape and bridge the digital divide.

- E-learning: 2
- Libraries: 6
- Network infrastructure: 1
- Domains: 3
- Schools: 7
- NGO:14
- Computer Classrooms (orphanages, homes): 27

CONNECTING THE UNCONNECTED

For the Foundation, access to technology guarantees education and helps expand development opportunities for communities, especially those that comprise the Guna Yala Region. Through the donation of tablets, the Foundation reaffirms its commitment to continue supporting education, giving young Panamanians from the Yandub - Nargana community access to technology.

The nine students on the honor roll from Felix E. Oller's High School and Rodolfo Chiari's Bilingual Center received a Tablet as a reward for their efforts.

CONNECTING THE UNCONNECTED

During Mission Week, the Foundation, with the support of +Movil, donated mobile phones with Sim cards and LTE +Movil data to thirty low-income residents in hard-to-reach communities. Volunteers from +Movil and Claro identified people who did not have access to the Internet due to a lack of equipment, primarily women and older adults. In addition, our team of employees guided the beneficiaries in using the digital advantages of the equipment and the mobile service.

Connectivity is a necessary element for the development of people; for this reason, we remain committed to advancing the connectivity of all.

DISASTER RELIEF

FOOD BANK

We support the Food Bank with work in the warehouse, a non-profit organization that seeks to alleviate hunger in Panama, providing food assistance to the country's most vulnerable sectors. The foundation's volunteers helped with food packaging and assembling bags with basic needs supplies that reached hundreds of families with limited resources—Reaching 7.5 tons of goods.

SOLIDARITY SUPPORT TO THE COMMUNITY

With the foundation's financial support and the collection of donations from the +Movil and Claro employees, dozens of volunteers from all the provinces traveled to different sectors of the country to deliver basic needs supplies to vulnerable families affected by heavy rains and floods. In November 2022, Panama suffered the overflow of the La Villa, Tonosi, and El Cacao rivers in the provinces of Herrera and Los Santos, leaving many affectations in the surrounding communities. Employees put together basic food kits with an accumulated weight of 1.9 tons. Families in Darien, Panama Oeste, Chiriqui, Bocas del Toro, Veraguas, and Colon benefited.

SPECIALS PROJECTS

"TÚ VALES" PROGRAM WITH NI1+ FOUNDATION

The official launch of the "Tú Vales" took place in alliance with the Ni Uno+ Foundation and the Ministry of Education (MEDUCA). A hotline (800-6410) will provide exceptional guidance to young people, victims, witnesses, and harassers, on school harassment (bullying) or cyberbullying (cyberbullying), in educational centers and communities nationwide. The Cable & Wireless Panama Foundation supported the "TÚ VALES" Program and donated to the call center system.

This cloud-based application works with mobile devices to allow volunteer agents and specialist psychologists to support school bullying (bullying) or cyberbullying victims.

CHILDREN WITH DISABILITIES

24 employees who have children with special needs receive 1 monthly financial support from the CWP Foundation to help them with the expenses required for their exceptional health care. We understand the needs of these families, and identify opportunities for improvement—labor benefits of these employees beyond health insurance.

MEJORANA FESTIVAL

The Foundation also supported culture through the Panamanian vernacular expression, sponsoring the contests of the Mejorana National Festival in Guararé. By this, the Foundation seeks to promote folklore and strengthen the seedbed of musical and artistic talent.
