LIVESTOCK

Online Sale Closes 7pm
Tuesday 3rd October 2023

AuctionsPlus

Welcome to the *Spring Selection Sale* Volume V

We are excited to bring you the 5th Spring Selection offering in what has been a busy year at Summit Livestock. We have expanded our own little family with the arrival of our second son in June. Although the boys keep us very busy already, a good friend and mentor always told us "the best way to find good help is to raise them"- let's hope they were right!

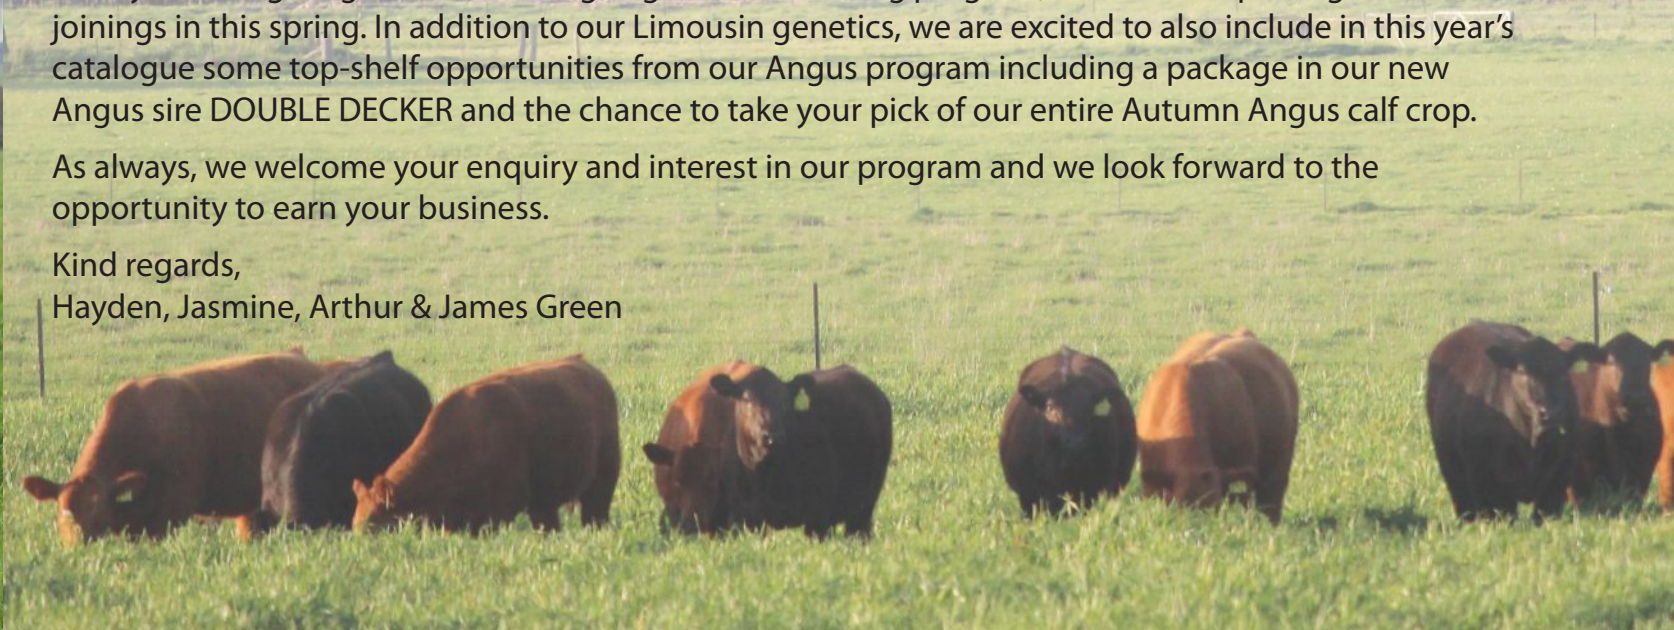

Our cow-herd has moved to their new home at Merryvale in Roslyn NSW as we step into an exciting new chapter to return to Jasmine's family farm. It's an amazing opportunity for us to merge the two operations and enables us to continue to grow our program under the Summit Livestock brand with Limousin and Angus genetics.

The past two years have seen some incredible times in our industry and although we have more recently returned to more tempered market conditions, the predictions for 2025/26 look to potentially be another positive and defining period for our industry. There is nothing that can substitute being prepared and ready for when market conditions change so we believe there is no time like the present to be investing in a strong genetic foundation to enable you to make the most of the opportunities that lie ahead.

This year, we have put together a small elite offering of heifers, representing some of the latest genetics we have on offer with progeny of SYES EASY GOING and ANCHOR B GOLD RUSH. We believe this is one of the strongest draft of heifers we have presented for your competition. The embryo offering is right on the cutting edge of our breeding program, as we will be putting these same joinings in this spring. In addition to our Limousin genetics, we are excited to also include in this year's catalogue some top-shelf opportunities from our Angus program including a package in our new Angus sire DOUBLE DECKER and the chance to take your pick of our entire Autumn Angus calf crop.

As always, we welcome your enquiry and interest in our program and we look forward to the opportunity to earn your business.

Kind regards,
Hayden, Jasmine, Arthur & James Green

Explanation of Estimated Breeding Values

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

Calving Ease Direct: indicates the influence of the sire on calving ease. Sires with positive EBVs for calving ease will increase calving ease and sires with negative EBVs will decrease calving ease.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Eye Muscle Area: ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat: ranks animals for rib fat depth at the 12th rib on a 300kg carcass

Comparing EBVs

The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

LIMOUSIN GROUP BREED PLAN	Breed Average EBVs for 2021 Born Calves																				
	CED	CEM	GL	BW	200	400	600	MC	MILK	SS	CWT	EMA	RIB	RMP	RBY	IMF	DOC	YPI\$	DMI\$	EMI\$	NEI\$
	+0.5	+0.8	-2.2	+1.7	+21	+35	+49	+48	+7	+1.1	+31	+1.8	+0.0	-0.1	+0.8	+0.0	+41	+\$45	+\$41	+\$66	+\$81

Accuracies

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

Rump Fat: ranks animals for fat depth at the P8 site on the rump on a 300kg carcass.

Intra Muscular Fat: ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Index values estimate the genetic difference (in relative earning capacity) between animals in net profitability per cow joined for a given market.

Yearling Prime Index: for a typical commercial herd targeting the domestic carcass trade targeting 200kg HSCW with 5mm P8 fat, with positive emphasis on ability to meet MSA specifications.

Domestic Maternal Index: for a typical self-replacing commercial herd targeting the domestic supermarket trade. Heifers are retained for breeding with steers finished on grass or short grain-fed program targeting 250kg HSCW with 8mm P8 fat at 15 months.

Export Maternal Index: for a typical self-replacing commercial herd targeting the heavy export trade. Heifer are retained for breeding with steers finished on grass or short grain-fed program targeting 330kg HSCW and 12mm P8 fat at 22 months.

Northern Export Index: for a typical commercial Bos indicus herd in Northern Australia targeting the export trade using Limousin bulls. All progeny finished on grass targeting 330kg HSCW and 12mm P8 fat at 27 months.

Sale Information

Sale Details

The Spring Selection Sale V will be held online via Auctionsplus (www.auctionsplus.com.au). Videos and photos of all lots will be available on the sale listing on Auctionsplus. Prior inspections are welcome by appointment with the vendors or their agents.

Lots will be sold via Helmsman Auction. The sale will open at **5pm AEDT on Tuesday 3rd October and will run until 7pm AEDT that evening**, where the timer will then take control of the auction. When the auction opens, all lots are on the market simultaneously. You can bid on any lot, regardless of lot number.

Buyers Registration & Sale Conditions

Buyers will be required to register as a bidder on Auctionsplus. Please note, any first time users will need to complete the buyer induction which takes approximately 30 minutes to complete online. Please ensure you give yourself enough time to complete this prior to the sale.

Live lots will be sold on a per head basis. Genetic lots will be sold on per embryo/straw basis and will be multiplied by the number of embryos/straws offered in the lot. All sale lots are sold exclusive of GST.

If you require any assistance with using the online bidding system, please contact the selling agents, vendors or Auctionsplus team prior to the sale.

Insurance

Purchases become the responsibility of the successful buyer at the close of the auction. While all care will be taken by the vendors, we recommend buyers insure their purchases. Please contact the selling agents to arrange insurance.

Herd Health

Summit Livestock is JBAS score 6. All lots have been drenched & vaccinated with Cydectin Platinum & 7in1.

Supplementary Information

Supplementary sheets will be available via Auctionsplus with any updated information on the sale offering.

All BREEDPLAN data published in this catalogue is from the August 2023 Limousin GROUP BREEDPLAN run or TransTasman Angus Cattle Evaluation. Where unavailable, EPDs from the North American Limousin Foundation or Canadian Limousin Association have been referenced.

Stud transfers

All animals are registered with the Australian Limousin Breeders Society. They are all eligible for transfer into the buyer's ownership. All purchasers of animals who require transfers will need to indicate this on their "Purchase Instructions".

Warranties

All live lots are offered under the terms & conditions of the Limousin Assurance Program.

Delivery

All live lots are located at Uranquinty, NSW. Delivery can be arranged from 4th October 2023. Please speak with either vendors or selling agents to arrange pick-up or transport. Delivery to Wagga Saleyards can be arranged if required. Live lots must be transported by the end of October, unless alternative arrangements have been made with the vendor. Please speak with Hayden or Jasmine.

All genetic lots are stored at Holbrook Breeders Australia, NSW. Shipping can be arranged by contacting Holbrook Breeders directly or by arrangement with Hayden.

We will endeavour to assist with organising transport to ensure you receive your purchases in the most cost-effective manner for you. Please speak with Hayden or Jasmine to arrange.

If you like your females fancy fronted, big bellied and powerfully made and your bulls to have that wow factor and scale pounding performance; this joining might just be the most exciting one on offer. Ready Made Q61 is an incredibly beautiful umbered, balanced, soggy middled young cow with real eye appeal. Big Star has worked exceptionally well in this mating; we have a couple of autumn calves born from this joining and they already look special! Ready Made is the cow family we believe many have underrated to date; the H40 cow may not have had the star-spangled career of some of our donors but she certainly earned her right to the donor pen through sheer performance. We believe Ready Made Q61 will have a long legacy here at Summit and in the Limousin breed.

Mating Predictor - Expected Progeny Averages

CED	GL	BWT	200D	400D	600D	MILK	EMA	RIB	RUMP	IMF	DOC
+0.5	-3.9	+1.0	+27	+50	+67	+10	+3.2	+0.2	+0.6	+0.4	+45

Expected average progeny values are provided to assist breeders estimate the outcome of particular mating combinations. These values are NOT BREEDPLAN EBVs and should not be published as such. The actual EBVs for any individual progeny resulting from a particular mating are likely to vary from the expected average value.

Justified was selected from over 250 bull calves to represent the Running Creek Ranch as part of their Pen Show team at the National Western Stock Show in Denver. He has gone on to be purchased as the walking herd sire by the HUNT Limousin Ranch in Nebraska. We selected Justified to use in our program based on his phenotypic appeal. He is a real standout, that will bring calving ease and short gestation with an impressive birth to growth spread. He is very reproductively sound with tremendous set of testicles and exceptional tight sheath. His dam is one of the most impressive cows in the RUNL herd. His EPD profile has 8 traits in the top 20% or better of the breed. He ranked 6th in his contemporary group for weaning (ratio 104) and 1st in his contemporary group for yearling weight (ratio 105) – an impressive achievement for a calf raised in North America’s largest purebred Limousin cow herd.

North American Limousin Foundation Expected Progeny Difference

	GEST	CED	BW	WW	YW	MK	TM	CEM	SC	ST	DOC	REA	MB

Summit First Fleet S41

Some calves are just standouts and First Fleet has always been impressive from day one. First Fleet was purchased privately as a yearling by Balamara Limousin in WA. Summit retained an interest in this outstanding young sire as we just love what he has to offer; he is moderate in frame, heavily muscled, yet extremely deep bodied and easy-keeping. We believe in time, First Fleet will gain a reputation as a superior cow maker as his pedigree is stacked with longevity, udder quality and productivity. If you are looking for a bull to improve foot shape, heel depth, disposition and overall quality, First Fleet is a must-use young sire. In addition to all his phenotypic qualities, all indications are at this point he will also be suitable for use on heifers. We look forward to watching the legacy of this young sire unfold.

This is a limited semen release so don't miss this opportunity to secure a package of First Fleet.

Zane will without doubt go down in history as one of the most complete, balanced and influential bulls ever to be used at Summit Livestock. The legacy he will leave in productive daughters and outstanding sires is simply unparalleled. We believe Zane's carcass superiority, sensible birth weight, exceptional calving ease, growth, softness and phenotypic excellence has carved him a reputation as one of the greatest breeding bulls in modern history.

If you study how Zane has bred, it doesn't take long to see how versatile this bull is and how he can positively impact any breeding program. If you are looking to create sound, productive, long-lasting cows or soft powerful sale bulls, Zane is a proven option that is sure not to miss.

Summit Patriot R53

Patriot R53 was retained in herd as a stud sire at Summit Livestock. A phenotypic standout since birth, Patriot exhibits as much body dimension, capacity and volume of any bull we have raised.

He represents to us one of the greatest combinations we have created in terms of stacking pedigrees with maternal excellence. This pedigree is SO predictable in terms of udder quality, milking ability, docility, and structural soundness.

If you have been searching for a Dictator son with a more moderate birthweight and superior calving ease, combined with impeccable docility and big nutts – R53 ticks all the boxes.

We can't wait to see the legacy this Meadowgrass son leaves in our herd and we are excited to share this opportunity with you.

ANGUS

HBR

USA19934857

We are always on the search for new genetics to bring to our program and our pursuit for a new Angus sire led us to BROWN DOUBLE DECKER 0004. Double Decker is an Angus herd sire bred by Browns Angus Ranch in North Dakota and is a bull with extra size, length, muscle and growth. His performance is hard to beat in all areas that drive profit – providing power to sire calves that grow, gain and top the markets. Double Decker is powerful in every dimension – extra-long, thick and heavy muscled with superior soundness, perfect feet and a friendly disposition. His awestruck appeal is hard to miss with his physical form and superb structural design. He is sired by the incredible Hoover No Doubt and his powerful dam is a full sister to the high-income cow in the breed 'SAV Blackcap May 4136' – well known as the dam of Rainfall, President, Raindance, Renown, Resource, and more. When we saw his dam, she was still super sound as a 15yo cow so this pedigree has plenty of longevity. We had the opportunity to secure a limited amount of semen for Australia on this incredible young sire and to date we have shared this opportunity exclusively with the Moorunga Angus herd in Victoria.

Pick of the Autumn'23 Angus Calf Crop

We have been quietly building our registered Angus program with Jasmine's family for over 15 years. The registered herd was started to provide bulls for our commercial operation when our long-time bull suppliers Narranggullen Angus dispersed. Over the years, we have supplied bulls to neighbours and friends and more recently when we started talking with Jasmine's family about the opportunities ahead, we began to focus on growing the registered cow herd to align with our passion for raising superior seedstock.

We have had incredible opportunities to get to know, work with and learn from some truly incredible Angus breeders over the years and we are excited to continue our journey incorporating our Angus program under the Summit Livestock brand.

We are excited to take this opportunity to introduce our Angus program to you – we have been stacking together some exciting genetics with a strong focus on phenotype, performance and longevity. We couldn't decide which Angus calves to offer on the Spring Selection Sale... so we decided to let you be the judge!

Take your pick of our entire Autumn'23 drop of registered Angus calves!

The winning bid is able to come and take their pick of all the Summit Angus calves born between 1st February and 30th April 2023.

Sires include Brown Double Decker 0004, Mill Brae Benchmark, Sitz Tailor Made, Ferguson Trail Blazer, Ellingson Rangeland, HF Alcatraz and more.

Cow families include Bara, Federation, Lowan, Dream, Jedda, Mecca, Eutesca, Moongara, Kite, Rosary, Champagne, Empress, Wilcoola, Patriot and more.

Herd inspections welcome.
