

EXECUTIVE 2024

In line with our concept 'From Nature to Nature,' we make environmentally friendly choices when making corporate decisions.

We use convertible raw materials with a consciousness of preserving natural resources, invest in increasing energy efficiency, and work towards preventing waste. We progress in our design, production, and management processes with sustainable solutions.

All the wooden materials we use are certified with FSC® C114358.

FSC® is an international council that comprehensively assesses the biological and ecological impact on the environment by companies using forest products. We obtained our certification by passing these audits.

All the wood materials we use are certified by FSC® C114358.

FSC® (Forest Stewardship Council) is an international council that comprehensively monitors the environmental impact of companies using forest products from a biological and ecological perspective. We obtained our certification by successfully passing these audits.

We design all our products to be easily disassembled.

By adhering to this principle, we create sustainable and durable products while minimizing packaging consumption and logistics costs.
