*PAPR SYSTEM
NOT INCLUDED

Enhance Comfort & Endurance in Demanding Work Environments

-  Boosts local airflow velocity within the helmet
-  Maintains filter performance
(NATA Accredited Filter Efficiency)
-  Improves thermoregulation via axial fan
turbulence enhancing sweat evaporation
-  Kit includes power cable that plugs into
battery ready to plug & play

"XGEN makes a noticeable difference to head temperature in a welding environment, especially in warmer months, and the extra airflow also makes breathing easier. While it can shorten Adflo battery life, most users find the comfort gain worth it - and many would happily keep a spare battery on hand to get that added comfort all day."

- Central Queensland Boilermaker

NOTE: XGEN is not PPE, is not a respirator, and should not be used alone.
