

SEMICONDUCTOR
CRYOGENIC
SAFETY

An aerial view of a city with a blue digital network overlay. The network consists of glowing blue lines connecting various points across the city, with some points highlighted in white. The background is a dark blue gradient with some faint numbers and a large '-10' in the top right corner.

Engineering Your Solutions

Bring **Innovative Solutions**
to your projects and applications

PRESTiGE
Technology

ABOUT COMPANY

Prestige Technology is a leading solutions provider for engineering projects and operating system upgrades. We have been an active partner in the semiconductor, cryogenic processes and systems, and safety for more than a decade. We customised turnkey solutions and provide a full spectrum of engineering services to fulfill your needs and requirements. Our expertises are widely distributed across Asia for immediate support.

MISSION

To empower our customers with exceptional services and solutions that help them succeed.

VISION

Emerge as one of the leading companies in Asia in supporting our customers to achieve their manufacturing goals through innovative solutions.

Prestige Technology is headquartered in Singapore with operations in Philippines, Malaysia and Taiwan.

WHY CHOOSE US

>10 years experiences in handling projects

Well-trained engineers and regular training to update and upgrade them

Customise solutions based on your needs

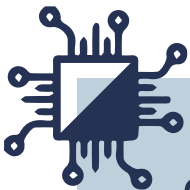

Good after-sales services to keep customers hassle-free

Prompt service delivery and fast response

SEMICONDUCTOR SOLUTIONS

Overhaul and Repair

Have over 10 years of experiences in maintaining and repairing semiconductor equipment and specialised in generators, mass flow controllers, and chillers.

Equipment Refurbishment

Design and reconfigure used equipment to customer new specs and ensure refurbished equipment is integrated to the existing systems with a greater cost return.

Sell & Trade-In Program

Advise and offer customers on used equipment based on their production needs and provide technical information and support.

Provide a full suite of solutions from overhaul and repair to integrated system planning and supports

PRODUCTS

Mass Flow Controllers

Liquid Vaporizers

Chillers

FOUP Cleaning Systems

Electrodes

CRYOGENIC SOLUTIONS

Design, Customise and Build

Enhance customer experience by customising every cryogenic piping solution and using cutting edge technology with the consideration of process efficiency and flexibility and customers budget.

Turnkey Project

Deliver the highest standards and safe turnkey system to customer by going through detailed assembly and multiple testing.

Spare Parts & Equipment Supply

Have an extensive database of cryogenic industrial parts and components to source the spare parts based on customers needs.

Handle entire end-to-end SIVL system from design stage to maintenance and repair

PRODUCTS

Vacuum Jacketed Pipes & Systems

Transfer Hoses

Portable Cryogenic Tank Rental

Cryogenic Accessories & Spare Parts

SAFETY SOLUTIONS

Maintenance and Calibration

Provide on-site and off-site gas detector maintenance and calibration service that complied with ISO 9001 standards for both portable or fixed gas detector.

Gas Detector and PPE Supply

Cover a complete set of safety products, from head to toes protections and gas detection. No matter what kind of dangers faced in the workplace, we have the right solution for you.

Instrument Rental System

Have a set of customised gas detection rental system that comes with a full line of accessories including probes, docking stations, and other needed accessories.

Bring the best fit safety solution to customers ranging from PPE up to safety monitoring

PRODUCTS

Portable Gas Detectors

Area Monitor

Fixed Gas Detectors

Personal Protection Equipments
