DESIGN TECHNOLOGY INNOVATION

DESIGN TECHNOLOGY INNOVATION

Black Nova is an Italian company based in Milan and focuses on pure design, premium technologies and continued innovation.

Black Nova's Smart Design Collections are made in Italy and feature a bold personality and sophisticated Italian design that is exquisitely enriched through the use of luxury materials, relentless attention to detail, and customization.

Black Nova is brand and technology agnostic, which elevates its Smart Design Keypads to pure design objects that are not tied to any specific technology or control platform. As a result, Black Nova is rapidly becoming a global reference brand for Smart Design Keypads.

This achievement is a testament to the hard work and exceptional talent of our diverse team across Europe and Asia. Black Nova proudly supports the circular economy and promote eco sustainability.

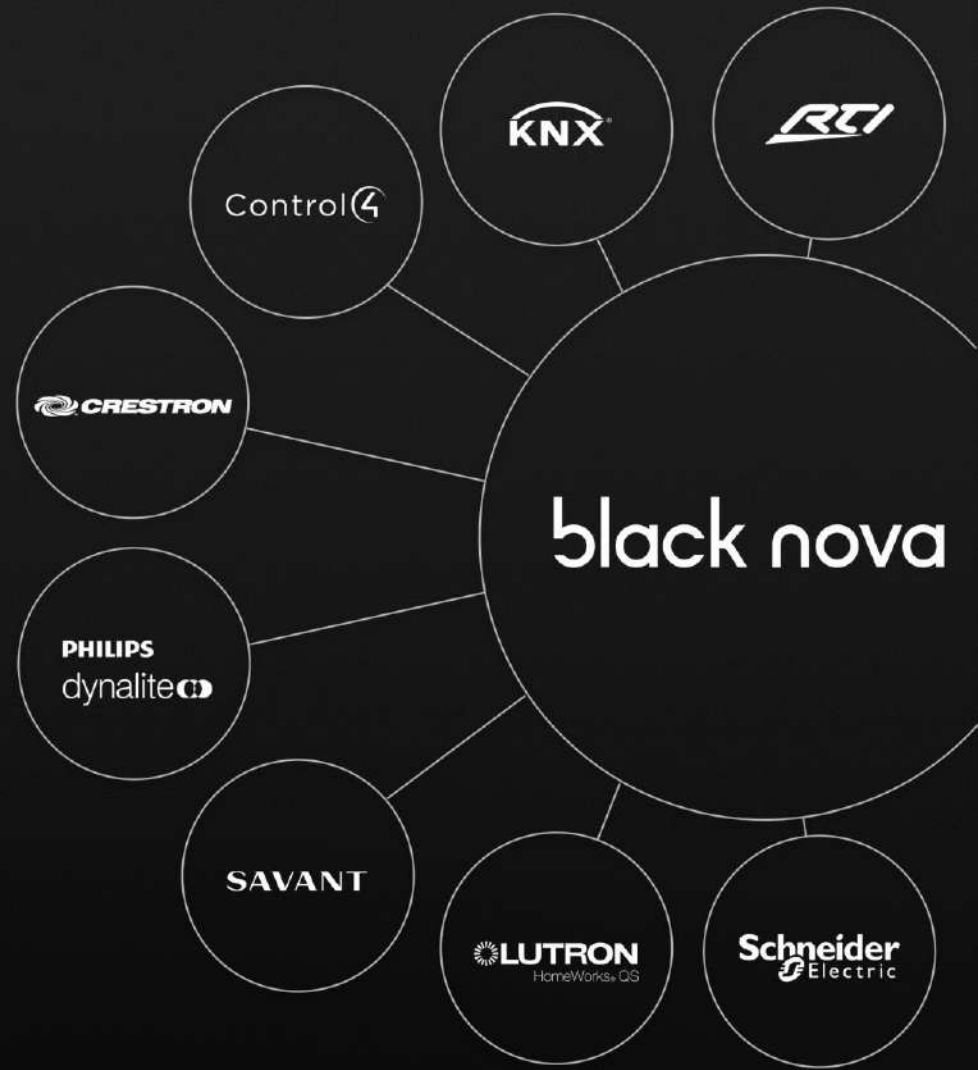

DESIGN EXCELLENCE

Black Nova represents the excellence of the Italian design and its perfect blend with innovative technology and bespoke finishing.

TECHNOLOGY AGNOSTIC

Black Nova Design Collections become pure design objects,
seamlessly integrated with the most popular control systems.

PERFECT FOR ALL USES

From eclectic urban loft to neoclassical hotel suite, from minimalist
conference room to modern yacht's sky lounge,

Black Nova Design Collections are the perfect match for any interior.

- ARIA keypads are available in the double frame version, which allows to combine different products in a single double frame.

ARIA COLLECTION

ARIA keypads are available in the triple frame version,
which allows to combine different products
in a single triple frame.

The background is a dark, almost black, surface with a rough, fibrous texture, resembling recycled paper or a natural material. The texture is uneven, with visible fibers and slight variations in tone, creating a sense of depth and organic quality.

Capsule keypads are available in the double frame version,
which allows to combine different products
in a single double frame.

BLACK JACK

Capsule keypads are available in the triple frame version,
which allows to combine different products
in a single triple frame.

The background of the entire image is a dark, textured surface with a marbled pattern. It features a dense network of thin, light-colored veins (ranging from light grey to off-white) that crisscross and swirl across a dark charcoal or black base. The texture appears organic and slightly grainy, reminiscent of high-quality marbled paper or stone.
