# Profelis

Our Signature Projects

Since our establishment, we have undertaken many projects with the promise of expanding the use of free and open source software around the world.

- **2008** — Fully Open Source Hospital IT Infrastructure
- **2010** — One of the Largest Custom OpenVPN Deployments
- **2013** — World's 10th Largest Operating System Migration GİBUX Project
- **2015** — World's First E-notary Application
- **2020** — SambaBox Directory Migration in the Presidency of Religious Affairs

What Do We Offer?

By adopting co-production, continuous learning and unconditional customer satisfaction as a corporate culture, we offer solutions in areas such as open source software implementation, operating system migration, Linux system management, IT security, professional consulting services for open source databases and microservice architecture infrastructures, e-mail service and directory service migration.

Empowering Organizations with Open Source Solutions

We provide tailored IT solutions that enhance efficiency, security and flexibility. Specializing in open-source integration, system management, database solutions and information security, we give assistance to organizations eliminate vendor lock-in and optimize their IT infrastructure.

Beyond implementation, we also offer expert consulting and training services to ensure seamless integration and long-term success. By combining robust open-source solutions with our expert team's support, we empower your organization's digital transformation.

Operations Centers

Linux Operations Center

Linux Operations Center provides a comprehensive range of services to ensure the smooth operation of your Linux servers. From updates to optimization and monitoring, our expert team handles all aspects of Linux system management. With proactive reporting, emergency response and performance tuning, we support organizations in maintaining stability, security and efficiency in their Linux environments.

Database Operations Center

Database Operations Center offers expert database management services, ensuring system health, security and efficiency. Our team handles scheduled updates, performance optimization, disaster recovery and monitoring, enabling businesses to maintain database reliability even during peak workloads. With regular health checks and backup solutions, we provide a robust and proactive approach to database operations.

Featured Products

SambaBox is an authentication and authorization solution based on open source Samba4. In addition to directory management functions, it also includes services that meet the corporate needs. SambaBox is the most powerful alternative to Microsoft Active Directory in the international market with features such as Exchange compatibility and 2016 functionality level support.

PassBox is a solution that allows users of an organization to renew their own passwords in seconds, 24/7. It can also be used for OTP purposes. PassBox provides an additional layer of security to applications with its 2FA structure. It has a web-based management interface and provides cost savings by offering alternative notification channels such as WhatsApp and Telegram.

Zimbra Profelis Edition

Zimbra Profelis Edition is based on the Zimbra 9 OSE version and forked by Profelis. Offering a compatible and affordable solution, Zimbra Profelis Edition provides full compatibility with mobile phones. While users continue to use the features they are accustomed to, their old e-mails can be transferred in the background without interrupting their work processes during migration.

Our Service Portfolio

| Database Operations Center | Linux Operations Center | Open Source Migration Consultancy | Open Source Software Trainings | Microservice Architecture Infrastructure |
