NIMCO, Inc. is proud to join forces with National Family Partnership in promoting National Red Ribbon Week®

Red Ribbon Campaign brings us together!

WHAT IS RED RIBBON WEEK? It is an ideal way for people & communities to unite & take a visible stand against drugs. Show your personal commitment to a drug-free lifestyle through the symbol of the Red Ribbon, October 23-31st.

WHY? The Red Ribbon Campaign was started when drug traffickers in Mexico City murdered Kiki Camarena, a DEA agent, in 1985. This began the continuing tradition of displaying Red Ribbons as a symbol of intolerance towards the use of drugs. The mission of the Red Ribbon Campaign is to present a unified & visible commitment toward the creation of a DRUG-FREE AMERICA.

WHO? The National Family Partnership, (NFP) was created in 1980 by parents across America in response to the rising level of youth drug use. The mission of the National Family Partnership is "to lead & support our nation's families and communities to nurture the full potential of a healthy, drug-free youth." The National Family Partnership works to accomplish its mission through parent training, networking & sponsoring the National Red Ribbon Campaign.

WHY SUPPORT NFP'S THEME? A theme unifies each year's campaign & helps to broadcast one message creating a tipping point to change behavior. To participate in the theme go to www.NFP.org.

HOW? Plan a Red Ribbon celebration. Order & display Red Ribbon materials with the National Red Ribbon Theme. Proceeds from the sale of Red Ribbon themed merchandise helps support prevention programs across America. Order for your family, students, staff, patients, employees and customers and encourage them to wear the Red Ribbon symbol during...

Peggy Sapp,
President & CEO
National Family Partnership

NIMCO Inc., is proud to join forces with National Family Partnership in promoting National Plant the Promise Week. This campaign coincides with National Red Ribbon Week, and provides an opportunity to reinforce the "Say No to Drugs" message. Join other schools, businesses, families and youth across America that will be planting bulbs during **Red Ribbon Week**. Planting flowers is a symbol of hope, and a great way to involve both children and parents in your Red Ribbon Week campaign. These bulbs will bloom into vibrant red tulips and will serve as a reminder to stay DRUG FREE.

(As an added campaign bonus, most bulbs that are planted during October will bloom in April, during National Alcohol Awareness Month.)

THE DANGERS OF VAPING

The Vaping Epidemic

What are "e-cigs" and vaping?
An electronic cigarette, or e-cig, is a handheld electronic device that simulates the experience of smoking a cigarette. It works by heating a liquid which generates an aerosol, or "vapor", that is inhaled by the user. Using e-cigarettes is commonly referred to as vaping.

WHAT DOES AN E-CIG LOOK LIKE?
There are many types of electronic cigarettes. The most popular among youth is the JUUL. This device looks like a USB drive. Due to different designs e-cigs are sometimes hard to recognize, making them easier to be used by youth in plain sight!

WHAT IS IN VAPOR?
TOLUENE
Commonly used paint thinner. Toluene is highly toxic. This chemical can cause headaches, nausea, and breathing difficulties.

FORMALDEHYDE
This is used to preserve dead bodies. It causes cancer and can lead to lung disease. Formaldehyde also leads to eye and digestive system damage.

BENZENE
Benzene is a widely used industrial chemical. Benzene is found in crude oil and is a major part of gasoline. Benzene can lower bone marrow, and affect blood cell levels.

LIQUID NICOTINE
The most common part of liquid which creates the "vapor" is nicotine. Nicotine is highly addictive. Nicotine is also a neurotoxin, meaning it can damage the brain and nervous system.

LEAD
Used in car batteries. Lead is highly toxic. It has been banned from many products. Lead poisoning starts growth, causes brain damage, and can even lead to death!

2ND HAND VAPING ISN'T HARMLESS!
2nd hand vape is dangerous to everyone around. The e-cig does not produce a vapor (gas), but rather a dense visible aerosol of liquid sub-micron droplets, consisting of glycols, nicotine, and other chemicals, some of which are carcinogenic. At least 10 chemicals are released in 2nd hand vapor that are toxic, or addictive.

VAPOR DOESN'T MEAN SAFER
SIDE EFFECTS:
POPCORN LUNG
One chemical in some e-cig flavorings is a buttery-flavored one called diacetyl. It's been linked to a serious lung disease called bronchiolitis obliterans. It's also known as popcorn lung.

Vaper's Tongue
Vaper's Tongue causes loss of taste, foods, drinks, even vapes will be flavorless. Vaper's tongue also causes gritty, numb, discolorization of the tongue.

TEENS AND VAPING
JUUL E-CIG SALES INCREASED 641% IN JUST ONE YEAR. JUULING IS ONE OF THE MOST POPULAR E-CIGS AMONG TEENS.

31% of teen e-cig users started smoking cigarettes within 6 months.

WHAT TEENS THINK IS IN THEIR E-CIGS:

MARIJUANA	5.6%
NICOTINE	13.2%
OTHER	1.3%
JUST FLAVORING	66.9%
DON'T KNOW	13.7%

MALES ARE 2X MORE LIKELY TO USE E-CIGS THAN FEMALES

NIMCO INC. WWW.NIMCOINC.COM
800-962-6662

Available in Tall or Table-Top sizes

YOUTH AND DISPOSABLE VAPES

What everyone should know!

WHAT ARE DISPOSABLE VAPES?

Disposable vapes are a type of vaporizer or e-cigarette, designed so discreetly that most people don't even recognize them as an e-cig. Popular brands are Puff Bar, Vuse, SMOK, and JUUL. These prefilled devices deliver nicotine, flavors, and harmful chemicals with each hit.

Okay, but are they really that bad?
Many people use e-cigarettes, like Juuls, because they aren't made with tar and all the cancer-causing chemicals you'll find in a tobacco cigarette. A study published in the journal, Pediatrics, found that teenagers who smoked e-cigarettes had higher levels of cancer-causing chemicals in their bodies than non-smokers.

DO YOU THINK VAPING IS COOL?
Many have noted that the discreet design and flavors appear to be targeted to young people. The trend of vaping has become so popular because of social media and the idea that it is a healthier smoking alternative although there is very little proof. Celebrities on social media are seen partaking in these activities and giving their opinions.

MALES ARE 2X MORE LIKELY TO USE DISPOSABLE VAPES THAN FEMALES
31% of teen e-cig users started smoking cigarettes within 6 months.
Nearly 12% of 12th graders
6.5% of 10th graders
1.9% of 8th graders vape every day.

CAN YOUTH GET THEM EASILY?
News outlets and social media sites report widespread use of vapes by students in schools, including classrooms and bathrooms.

When it comes to nicotine levels, each pod cartridge is equivalent to the same amount of nicotine as a pack of cigarettes.

Rumor has it, vaping is safe, but that's FALSE!!!
SERIOUS & POTENTIALLY LONG-TERM EFFECTS OF VAPING
SEIZURES
IT'S BEEN KNOWN THAT NICOTINE CAN PROVOKE SEIZURES IN SOME PEOPLE. AND THE "TIGHT SQUEEZE" AMONG VAPERS SIGNALS A POTENTIAL ENGINEERING SAFETY ISSUE.

SEVERE LUNG INJURY
VAPING COATS LUNGS WITH HARMFUL CHEMICALS. E-LIQUID CONCOCTIONS USUALLY INCLUDE SOME MIX OF FLAVORINGS, AROMATIC ADDITIVES AND NICOTINE, DISSOLVED IN AN OILY LIQUID BASE. SOME OF THE VAPORIZED ELEMENTS OF THE OIL ARE GETTING DEEP DOWN INTO THE LUNGS AND CAUSING AN INFLAMMATORY RESPONSE.

ADDICTION
YOUR ATTEMPTS AT STOPPING MAY CAUSE PHYSICAL AND MIND-RELATED SYMPTOMS, SUCH AS STOMACH CLASPING, ANXIETY, IRRITABILITY, RESTLESSNESS, DECREASED CONCENTRATION, DECREASED FOOD INTAKE, ANGER, INCREASED IRRITATION, INSOMNIA.

More than 2 million U.S. youth currently use e-cigarettes
Among youth current e-cig users,
Disposables are the more commonly used e-cigarette device type.
Nearly 85% use flavored e-cigs.
About 1 in 4 use e-cigs daily.

The sleekly designed device often resembles a small USB flash drive and creates very little smoke, so it is not easily detected by teachers and parents.

IT'S OKAY TO SAY NO!
Just say no, Be firm, strong and clear but polite. No thanks, I don't vape!
Give a reason or an excuse why you can't.
"If my parents find out I'm grounded for a month."
Ask them why they're smoking, while still staying polite and friendly.
"Why do you want to vape?"
"We know vaping is bad for us, so what's good about it?"
If all else fails, WALK AWAY!

It's not water vapor!
While using an e-cigarette is often called "vaping," the device produces an aerosol, not a vapor. Unlike vapor, which is simply a substance in gas form, the aerosol from an e-cigarette can contain tiny chemical particles from both the liquid solution and the device (e.g., metals from the heating coil).

THE DANGERS OF VAPING

MORE VAPING PREVENTION PRODUCTS ON PAGES 72-96

Dangers of VAPING MARIJUANA

Vapor is NOT SAFER!
Just because it's vapor doesn't make it safer. The harmful chemicals in marijuana are still released when vaped.

If it's legal it's safe, right?
Many substances are legal but that does not mean they are safe. Marijuana has many negative side effects. Marijuana is not legal in all states.

Legalization and Effects
States that have legalized the use of marijuana have seen a recent increase in accidents. Drugged driving deaths spike with the spread of legal marijuana.

SIDE EFFECTS

- Decline in IQ
- Impaired Thinking
- Addiction
- Relationship Problems
- Financial Difficulties
- Brain Health Decrease
- Weakened Immune System
- Impaired Coordination
- Memory Loss
- Anxiety
- Panic Attacks
- Hallucinations
- Increased Heart Rate
- Increased Risk of Heart Attack
- Increased Risk of Stroke

TEENS VAPING AND MARIJUANA

WARNING SIGNS:
Dilated Pupils
Bloodshot Eyes
Lack of Motivation
Constant Hunger

EFFECTS OF MARIJUANA ON TEENS
Difficulty with critical thinking skills
Impaired reaction time
Decline in school performance
Increased risk of mental health issues
Higher chance of addiction.

CRIMINAL CHARGES
SOME STATES CARRY PRETTY HEFTY PUNISHMENTS. FOR EXAMPLE:
Arkansas is the strictest state in the country in terms of enforcing marijuana possession laws. In fact, if the only state in the nation where the amount of marijuana will draw a punishment heavy enough to lead to life in prison.

Federal Law
Cannabis is treated like every other controlled substance, such as cocaine and heroin. The federal government places every controlled substance in a schedule, in principle according to its relative potential for abuse. Under the CSA, cannabis is classified as a Schedule I drug, which means that the federal government views cannabis as highly addictive.

DAILY MARIJUANA USE:

Grade	9th	10th	11th
Use (%)	0.7%	3.4%	5.8%

TEENS ARE MORE LIKELY TO SMOKE MARIJUANA THAN CIGARETTES.

1.7 MILLION TEENS have vaped marijuana

ONLY 29% of 12TH GRADERS view regular marijuana use as risky (half the rate of perceived harm 20 years ago)

WHAT'S IT REALLY COST?

INHALING POISON

TOXIC METALS
The heavy metal, lead, is showing up in lab tests of recreational cannabis products. There's no safe level of exposure to lead. It's a neurotoxin that can lower IQ, lead to illness, and even death!

LEAD IS FOUND IN CAR BATTERIES!

HIGHER THC LEVELS
When vaping marijuana the THC level is significantly higher than when smoked. THC level in vapes can be as high as 87%, when smoking is only around 12%.

Some vape pens contain harmful additives.
Propylene glycol (PG) and polyethylene glycol (PEG). Unfortunately, while these additives are generally recognized as safe by the U.S. Food and Drug Administration (FDA), they transform into more dangerous substances when heated to the point of combustion.

BOX MODS
Box mods allow the user to pick the level of THC. It also allows the user to have a lower vape cloud release making it hard to detect the use of marijuana.

JUUL
Although the Juul is designed to vape nicotine-containing e-juice, some have discovered a way to adapt the device so that it can be used to vape weed. JUULING is popular among the younger generations.

MARIJUANA UNDETECTED

The odor of vaped marijuana is less strong than when smoked, making it easier to hide. Also due to the fact that many vaping devices can be used for vaping e-juice or marijuana sometimes it's harder to detect what is being vaped.

DISPOSABLE THC PENS
The disposable pens come pre-loaded with a THC mixture. Due to the fact that they look like nicotine vapor pens, they can go undetected.

Available in Tall or Table-Top sizes

Vaping Marijuana: A Dangerous Alternative	Pamphlets	ITEM # 11399
Electronic Cigarettes: An All-Too-Familiar Danger	Pamphlets	ITEM # 11400

the truth about VAPING MARIJUANA

a dangerous alternative

what is it?
As the popularity of vaping rises, so too does the popularity of vaping substances other than nicotine products, such as marijuana.

Marijuana vapes, or "THC carts" as they are commonly referred to, are vape cartridges filled with the compound THC, the part of the marijuana plant that produces the "high" feeling associated with its use.

However, oftentimes more than just THC makes its way into the cartridge, making this method of marijuana use a dangerous alternative.

information
Many marijuana users, including both recreational and medical recipients, have switched to this method of use in recent years. Many make the switch out of convenience. However, there are certain risks associated with the vaping of marijuana that are not limited to those associated with regular vaping itself.

With marijuana legalization happening across the United States, individuals have begun to create their own "THC Carts" to sell, oftentimes including dangerous and even deadly compounds that present a wide range of health issues when inhaled.

One of these compounds, vitamin E, has been known to rapidly lead to a coma and even death.

the truth about ELECTRONIC CIGARETTES

also referred to as e-cig, vape, and juul

what is it?
Electronic cigarettes (also known as "e-cigs") are small, electronic devices typically used for the inhalation of vapor. These devices are in the form of vapor pens or cartridges.

The devices come equipped with "cartridges" that are used to heat the substance.

This substance contains chemicals that are carcinogenic, including heavy metals, volatile organic matter and ultrafine particles that can cause lung disease and cancer.

information
Despite popular belief, vaping is not a safer alternative to smoking cigarettes. Both contain chemicals that are harmful to your health.

This includes: harm to your lungs, brain, and heart.

Some vape cartridges are illegally manufactured to sell online and through social media. These "carts" contain dangerous things and have been known to cause severe health issues, including cancer.

The risk of vape addiction is just as high as cigarettes thanks to the substance nicotine. This leads to more frequent use of the product to achieve the same "buzz" or "high" that cigarettes commonly provide.

Opioids/Alcohol/THC

Fatal Vision® Opioid Program Kit

• The Fatal Vision® Opioid Program Kit offers a hands-on, immersive experience that models the physical and cognitive effects of opioid abuse • By simulating the impairments caused by opioid use, participants gain a deeper understanding of the risks and consequences associated with opioid addiction

• **The opioid simulation kit allows participants to experience four primary impairments:** 1. Divided attention failure, which narrows the field of view to reduce environmental awareness; 2. “Nodding out,” simulated through intermittent blackouts; 3. Contrast sensitivity impairment, which uses a specialized film to limit peripheral vision; 4. Heaviness in the extremities, modeled by wrist weights that recreate the sluggish movement and lack of coordination associated with opioid use

• **This Program Kit includes:**

- Fatal Vision® Opioid Goggle with Case
- Hand/wrist weights set
- Backpack
- “Opioid’s Addiction, Overdose and Death” DVD
- In-app educational materials, including instructional videos and user guides

ITEM # 11076

Opioid Program Kit

\$3225.00

FATAL VISION

Fatal Vision® Polydrug [Alcohol & THC] Goggles Event Kit

• The Fatal Vision® Polydrug [Alcohol & THC] Goggles Event Kit clearly demonstrate how polydrug impairment from the use of alcohol and THC can lead to dangerous consequences, especially while driving.

• **How It Works:** The Polydrug [Alcohol & THC] Goggles impair a person’s ability to perceive the visual cue of color and ability to maintain their balance • The goggles use these features to model drug-induced cognitive distortion (NOTE: someone under the influence of THC DOES NOT lose their ability to see colors) • The goggles also cause a loss of coordination, targeting skills, slowed decision-making, and delayed reaction time • The result is the participant’s inability to make quick and accurate decisions and loss of motor skills, thereby demonstrating the amplified impairments and associated dangers of polydrug (alcohol and THC) consumption

• **This Event Kit includes:**

- (1) - Fatal Vision® Polydrug [Alcohol & THC] Goggles
- (1) - DIES® Maze Driving Mat Activity
- (1) - Tic Tac Two activity (Images on balls may differ in appearance)
- (10) - Large pop-up cones with case
- (12) - Activity balls
- (1) - Printed user guide and online access to instructional videos and materials
- (1) - Backpack

THE FENTANYL EPIDEMIC

AVAILABLE IN ENGLISH OR SPANISH

FENTANYL DEATH IN DISGUISE

WHAT IS FENTANYL?
Fentanyl is a synthetic opioid that can be up to 50 times stronger than heroin and 100 times stronger than morphine.

WHAT DOES FENTANYL LOOK LIKE?
Most users are unaware they are ingesting fentanyl until it's too late. Fentanyl comes in several forms, including pills, patches, powders, and liquids. Fentanyl can be found mixed with other drugs, such as heroin, counterfeit pills, metamfetamine, and cocaine.

FAKE PILLS: FROM WHERE? REAL?
The sale of fake pills, the rise of counterfeit pills, and the use of fentanyl in counterfeit pills are becoming increasingly common. Fentanyl is often mixed with other drugs, such as heroin, counterfeit pills, metamfetamine, and cocaine.

WHICH IS WHICH?
In 2022, the Drug Enforcement Administration seized over 1 million counterfeit pills, many of which contained fentanyl. These seizures represent more than 270 million potentially lethal doses of fentanyl. For laboratory testing, researchers found that 10% of the fentanyl-laced counterfeit pills contained a potentially lethal dose of fentanyl.

IT ONLY TAKES THIS MUCH
New research has shown that the amount of fentanyl it takes to cause a lethal overdose is much smaller than previously thought.

SIGNS OF AN OVERDOSE
• Respiratory distress
• Extreme lethargy
• Incoherence
• Pinpoint pupils
• Cold, clammy skin
• Slow lips and reflexes

SUSPECT AN OVERDOSE? THESE STEPS MAY SAVE A LIFE
1 CALL 911 IMMEDIATELY
2 ADMINISTER NARCAN
3 KEEP THEM AWAKE & BREATHING
4 LAY THEM ON THEIR SIDE TO AVOID CHOKING
5 STAY BY THEIR SIDE UNTIL HELP ARRIVES

FAKE & FATAL WHEN ONE PILL CAN KILL

a growing problem
Deaths from fake pills laced with fentanyl are surging at an alarming rate all across the country. People are purchasing what they think are prescription pills such as Xanax, Oxycodone, Percocet, and Adderall via social media or online websites, but drug dealers are making fake pills with cheaper, stronger, more deadly synthetic drugs called fentanyl to increase their profits.

fentanyl: the facts
Fentanyl is up to 50 times more potent than heroin and 100 times more potent than morphine. Fentanyl is odorless, tasteless, and colorless. You can't tell if there is fentanyl in the pills by looking at them. The amount of fentanyl it takes to overdose is equivalent to 2 grains of sand. One pill is all it takes to kill.

to plain sight: fake pills
These pills are so well made that even experienced users can't tell the difference between a counterfeit pill and a pharmaceutical company. These are not pharmaceutical-grade products; they are pills made by drug dealers, mostly outside of the country. There is no quality control; pills in the same batch can have widely varying levels of fentanyl. Young people often buy these pills more appealing because they are cheap, more socially acceptable than meth or heroin, and don't have a smell like marijuana or alcohol.

THE FENTANYL EPIDEMIC

JUST THE FACTS RACK CARDS: FENTANYL

PACK OF 100 - SKU: 11582

ONLY \$45.00

Fentanyl is a very powerful prescription opioid that is highly addictive. It is similar in make up to heroin and morphine. Fentanyl is also produced illegally in labs that are very unsafe and unregulated.

IDENTIFICATION

Street Names: Apache, China girl, China White, Dance Fever, Friend, Goodfella, Judcat, Murder 8, TNT, Tonga and Cash

What's it Look Like? White powder that is often transformed for prescription use into liquid, patches or lozenges.

How's it Used? Snorted, injected, or placing it under the tongue.

What's it Do? Fentanyl fuses to the body's opiate receptors, the areas of the brain that control pain and emotions. This drives up dopamine levels in the brain, producing a state of euphoria or relaxation.

Warning Signs of Abuse

- Isolation from family and friends
- Poor academic performance and a lack of interest in school
- Extreme changes in appearance and attitude
- Difficulty communicating
- Injection wounds or track marks
- Fatigue followed by patterns of alertness

Facts about Fentanyl

- Fentanyl is often mixed with heroin on the street increasing the risk of fatality. This hybrid is often called "Ace of Spades" or "Ace of Hearts".
- When made illegally, fentanyl can be laced with all sorts of harmful chemicals including arsenic.
- Often people become addicted to fentanyl after just one use.

JUST THE FACTS RACK CARDS: FENTANYL

PACK OF 100 - SKU: 11582

ONLY \$45.00

Fentanyl is a very powerful prescription opioid that is highly addictive. These rack cards provide a quick reference guide to keep you informed on the risks and dangers of this synthetic drug.

JUST THE FACTS RACK CARDS: FENTANYL (SPANISH)

PACK OF 100 - SKU: 11583

ONLY \$45.00

El fentanilo es un opioide de prescripción muy potente que es altamente adictivo. Es similar a la heroína y a la morfina. El fentanilo también se produce ilegalmente en laboratorios que son muy inseguros y no regulados.

IDENTIFICACIÓN

Nombres comunes en la calle: En inglés se lo conoce como apache, dance fever, friend, goodfella, judcat, murder 8, TNT, tonga, cash. En español como china blanca o china china.

¿Cuál es su apariencia? Luce como un polvo blanco el cual a menudo se transforma de acuerdo a la que indique la prescripción, sea esto en líquido, parches o chupetas.

¿Cómo se usa? Esnufado, inyectado o poniéndolo debajo de la lengua.

¿Qué hace? El fentanilo se fusiona con los receptores de opioide del cuerpo, los áreas del cerebro que controlan el dolor y las emociones. Esto impulsa los niveles de dopamina en el cerebro, produciendo un estado de euforia o relajación.

Señales de advertencia del uso de fentanilo:

- Aislamiento de la familia y amigos
- Mal rendimiento académico y falta de interés en la escuela
- Cambios extremos en la apariencia y actitud
- Dificultad para comunicarse
- Heridas o marcas de inyección
- Fatiga seguida de períodos de alerta

Hechos sobre el fentanilo:

- En la calle es usualmente mezclado con heroína aumentando el riesgo de muerte. Este mezcla es a menudo llamado "As de espadas" o "As de corazones".
- Cuando se hace ilegalmente el fentanilo puede ser mezclado con todo tipo de productos químicos nocivos, incluso arsénico.
- A menudo, las personas se vuelven adictas al fentanilo después de un solo uso.

ONLY \$45.00

Approved by the FDA, Naloxone is a medication that quickly reverses opioid overdose. It does this by binding to opiate receptors and reversing the effects of opiates, such as fentanyl, heroin, oxycodone and morphine.

IDENTIFICATION

Administering It: Naloxone can be injected into the nose (intranasal), injected into the muscle (intramuscular) under the skin (intramuscular) or through an intravenous injection. NARCAN (naloxone HCl) Nasal Spray is the most dispersed rainbow brand.

Candidates for Naloxone

- Someone who is known to have overdosed
- Those seeking rotating opioid medication regimens
- Patients discharged from medical care following opioid poisoning or treatment

How to identify an overdose?

- Slow or no breathing
- Clonine vomiting
- Blue lips
- Gurgling, snoring, gurgling
- Pinpoint sized pupils

Side Effects of Naloxone: Naloxone can may cause symptoms similar to opioid withdrawal. Some of these symptoms are body aches, diarrhea, weakness, dizziness, stomach pain or nausea, tear and chills, sweating and a general sense of restlessness or feeling nervous.

Fentanyl

Fentanyl has quickly become a major problem and is a leading cause of the majority of drug overdoses around the world. Fentanyl is a very powerful prescription opioid that is highly addictive. It is similar in make up to heroin and morphine. Fentanyl is also produced illegally in labs that are unsafe and unregulated.

Facts about Fentanyl

- Fentanyl is often mixed with heroin on the street increasing the risk of fatality. This hybrid is often called "Ace of Spades" or "Ace of Hearts".
- When made illegally, fentanyl can be laced with all sorts of harmful chemicals including arsenic.
- Often people become addicted to fentanyl after just one use.
- There has been a rise in heroin overdoses when users unknowingly ingest fentanyl.

JUST THE FACTS RACK CARDS: NALOXONE (NARCAN)

PACK OF 100 - SKU: 11660

ONLY \$45.00

Opioid overdose is on the rise. Naloxone, or Narcan, can be used to reverse an opioid overdose. This rack card is a quick reference for anyone wanting to know the facts about Narcan.

JUST THE FACTS RACK CARDS: RAINBOW FENTANYL

PACK OF 100 - SKU: 11663

ONLY \$45.00

Rainbow Fentanyl is fentanyl pills and powder that come in a variety of bright colors, shapes and sizes. It is a very powerful synthetic opioid that is highly addictive and very deadly. It is similar in make up to heroin and morphine.

IDENTIFICATION

What's the difference between Fentanyl and Rainbow Fentanyl?

Technically speaking, the 2 drugs are one in the same and the effects of using either of these will be the same. Rainbow Fentanyl, however, are made to appear like candy, using bright colors and different shapes. By doing this, the drug is used to lure young children and drive addiction amongst kids and young adults.

Street Names: Teens are calling this form of fentanyl "Sweet Tooth" and other candy-like names.

What's it Look Like? Multicolored pills that are made into many shapes and sizes.

Major Concern: Many people are worried that kids will take these pills, thinking they are another drug or even assuming it's candy, which may lead to accidental ingestion and possible overdose.

What's it Do? Just like regular Fentanyl, Rainbow Fentanyl fuses to the body's opiate receptors, the areas of the brain that control pain and emotions. This drives up dopamine levels in the brain, producing a state of euphoria or relaxation.

Warning Signs of Abuse

- Isolation from family and friends
- Poor academic performance and a lack of interest in school
- Extreme changes in appearance and attitude
- Difficulty communicating
- Injection wounds or track marks
- Fatigue followed by patterns of alertness

JUST THE FACTS RACK CARDS: RAINBOW FENTANYL

PACK OF 100 - SKU: 11663

ONLY \$45.00

Fentanyl is already known to be a very powerful synthetic opioid that is highly addictive. But now, fentanyl is being marketed to the youth by making it look like candy and calling it "rainbow fentanyl."

JUST THE FACTS RACK CARDS: DANGERS OF ILLICIT DRUGS MIXED WITH FENTANYL

PACK OF 100 - SKU: 11664

ONLY \$45.00

The powerful synthetic opioid, Fentanyl, is 50 to 100 times more powerful than morphine and highly addictive. It is frequently produced illegally in labs that are unsafe and unregulated. When Fentanyl is mixed with illicit drugs, they are much deadlier than when used alone.

IDENTIFICATION

Fentanyl is often mixed with other drugs, without the user's knowledge. Following are some examples of drugs that may be laced with fentanyl:

- Cocaine: Stimulant that may be injected, snorted, or smoked
- Pain pills: Percocet, Oxycodone, etc.
- Heroin: white or brown powder
- Anxiety Medication: such as Xanax

There has been a rise in heroin overdoses when users unknowingly ingest Fentanyl. Most overdose related deaths in the emergency room have been related to Fentanyl.

Why is Fentanyl often mixed with other drugs?

- Fentanyl is cheap to produce.
- It is used as a "filler" so that drug dealers can make more money.
- These substitutes are cheap, but potent. This may lead to a similar "high", and if users do not realize that they're consuming cutting agents, they don't know how strong the drugs are.
- Fentanyl is easily disguised as a pharmaceutical pill, which makes people feel safer trying it.

JUST THE FACTS RACK CARDS: ILLICIT DRUGS MIXED WITH FENTANYL

PACK OF 100 - SKU: 11664

ONLY \$45.00

Fentanyl is a very powerful prescription opioid that is highly addictive. It is often-times mixed with other drugs without the user's knowledge, which is even more dangerous than the already dangerous fentanyl.

The Lowdown™ on Methamphetamines

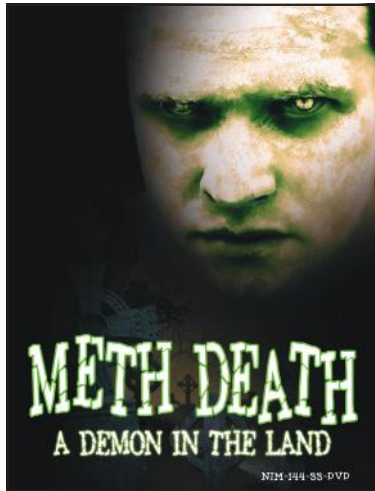

The SHOCKING truth about
 "METH" the "drug of choice"
 with America's youth!

Meth Death: A Demon in the Land

• Interviews Col. Alex Mahon, Director of the Governors Task Force on Methamphetamine

- Covers:
 - What is meth?
 - Effects of meth use
 - Cycle of abuse
 - Pre-cursor elements
 - Physical effects
 - Psychological effects
 - Binge use
 - High intensity use
 - Tweaking, & information on spotting the dangers of a meth user in the tweaking zone
- Meet Becky a long term meth user struggling to overcome her addiction and come to terms with the damage it has done to her life
- Encourages: Education, A commitment to responsibility, the Hope of recovery, and That time is of the essence
- 31 min. • Grade 7-Adult

ITEM # NIM-144-33-DVD DVD \$49.95

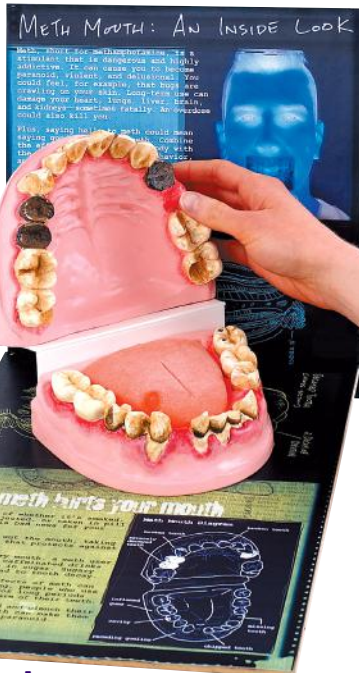

Drunk Busters Drug Simulation Goggle

* The Drunk Busters Drug Goggle simulates many of the effects of using illegal drugs or overdosing on prescription medication, including disorientation, altered space perception, vertigo, lack of concentration, image distortion, memory problems, and feelings of euphoria

- Comes with the Instructor's Guide
- Each goggle includes a cloth carrying bag
- Grades 7-Adult

ITEM # 243006 DRUG SIMULATION GOGGLES \$115.00

Meth Mouth: An Inside Look

- Handpainted 3-D mouth model
- Shows consequences of Meth use such as missing teeth, severely decayed teeth, broken teeth, receding gums, and more
- Includes tongue model with ulcer
- Informative text explains how Meth harms both the mouth and body
- Drives home the message that Meth is a dangerous drug
- 10" x 10" x 16"

ITEM # 79758 Display \$409.95

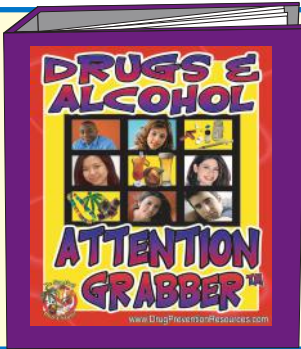

"Drugged and Distorted" Drug Education Game

- This award winning drug education game demonstrates how drugs severely limit your ability to do basic tasks effectively
- The goggles and motion-restriction glove work upon your senses so that your perceptions, thinking, and coordination are distorted
- Requires participants to wear the goggles and the glove while they do ordinary activities such as typing and doing a series of normal office tasks
- Includes: pair of Drugged and Distorted Goggles
- 2 Motion-Restriction Hands (one medium and one large)
- Activity Guide

ITEM # 75024 Game \$399.95

PRESCRIPTION DRUGS

"Overdoses involving prescription pain killers are at epidemic levels and now kill more Americans than heroin and cocaine combined" former CDC Director Thomas Frieden, MD, MPH

What's the Problem?

Although most people take prescription medications responsibly, an estimated 52 million people have used prescription drugs for non-medical reasons at least once in their lifetime. Prescription medication, such as those used to treat pain, attention deficit disorders, and anxiety, are being abused at a rate second only to marijuana among illicit drug use.

WHO ABUSES PRESCRIPTION DRUGS

6,600 Americans start abusing prescription drugs each day in which one-third are 12 to 17 years of age.

That is over 4.5 new abusers per minute

THE MOST COMMONLY ABUSED PRESCRIPTIONS ARE

- SEDATIVES (BARBITURATES) **2.2** million
- STIMULANTS (AMPHETAMINES) **5.1** million
- TRANQUILIZERS **5.1** million
- PAIN RELIEVERS **5.1** million

In 2016 approximately **11.5 MILLION** people misused prescription opioids

17,087 Deaths attributed to overdosing on commonly prescribed opioids in 2016

1 in 20 Americans 12 and older have misused prescription painkillers

PRESCRIPTION DRUG ABUSE AND TEENAGERS

WHY DO TEENS ABUSE DRUGS?

- TO TREAT PAIN, OR GET HIGH
- MANY ALSO BELIEVE IT WILL IMPROVE THEIR SCHOOLWORK
- WEIGHT LOSS

"As America faces an explosive prescription drug abuse problem, parents need to be aware that their family medicine cabinet and the internet have become today's back alley drug dealers. Teens need to understand that abusing prescription drugs is every bit as dangerous as abusing 'street drugs'." Michael Cassanti, Administrator, Drug Enforcement Administration

1 in 12 High school seniors have reported nonmedical use of Vicodin

7.7% Youth 12-17 have reported nonmedical use of prescriptions

1 in 20 High school seniors have reported abuse of OxyContin

70% of 12th-graders who've abused prescription narcotics got them from a friend or relative

DEATHS

In 2016, the 63,632 drug-induced deaths exceeded the number of deaths from motor vehicle crashes (40,327)

63,632 DEATH FROM DRUG ABUSE

The death toll from overdoses of prescription painkillers has more than tripled in the past decade. More than 40 people die every day from overdoses of narcotic pain relievers like hydrocodone (Vicodin), oxycodone (OxyContin), and morphine (Duramorph).

40,327 MOTOR VEHICLE ACCIDENT DEATHS

There was a 91% increase in drug poisoning deaths among teens aged 15-19 between 2000 (200%) and 2009 (157%) due to prescription drug overdose.

DRUG INDUCED DEATHS NOW OUTNUMBER GUNSHOT DEATHS IN AMERICA.

Fentanyl

STAY SAFE SERIES

What is Fentanyl?

- A powerful, highly addictive prescription opioid
- Similar in make-up to heroin and morphine
- Often produced in illegal, unregulated labs
- Fuses to the body's opiate receptors, which control pain and emotions in the brain, driving up dopamine levels, producing a state of euphoria or relaxation

Signs of Abuse

- Isolation from family and friends
- Extreme changes in appearance and attitude
- Difficulty communicating
- Fatigue followed by patterns of alertness
- Poor academic performance and a lack of interest in school

FENTANYL Can be Mixed with ILLEGAL DRUGS? YES!

It is often mixed with cocaine, heroin, opioids, MDMA, meth, and xylazine animal sedative, which makes the already dangerous drug even more deadly.

FENTANYL ABUSE

Vomiting and nausea Risk of overdose Respiratory problems Painful Withdrawal symptoms Death	Short-Term Effects Long-Term Effects	Insomnia Depression Risk of liver & kidney disease Heart problems Death
--	---	--

Facts About Fentanyl

- OFTEN CALLED "FACE OF SPADES" OR "FACE OF HEARTS" WHEN MIXED WITH HEROIN
- KNOWN TO BE ADDICTIVE AFTER JUST ONE USE
- LACED WITH ARSENIC, AMONG OTHER CHEMICALS, WHEN MADE ILLEGALLY
- TRANO (DOPE) IS FENTANYL MIXED WITH XYLAZINE ANIMAL SEDATIVE AND ALREADY LINKED TO DEATHS IN 39 STATES
- GO TO 100 TIMES MORE POWERFUL MORPHINE
- 73% OF OPIOID OVERDOSE DEATHS INVOLVED SYNTHETIC OPIOIDS SUCH AS FENTANYL, WITH NUMBERS RISING

Rainbow Fentanyl

Rainbow Fentanyl comes in a variety of bright colors, shapes and sizes as pills and powder, made to appear like candy in order to lure young children and young adults.

SAYING "NO" TO FENTANYL

Simply say "No" and stand by your decision or try one of the following:

- "No thanks. No telling what's in that."
- "No thanks, I want to be healthy to run track."
- "That's not my thing."

ITEM # 690685	Retractable Banner	\$239.95
ITEM # 790685	Table Top Retractable Banner	\$119.95

WHAT IS MARIJUANA?

Marijuana (also called cannabis) is a drug made from the dried leaves and flowers of the Cannabis sativa or Cannabis indica plant. The main mind-altering chemical in marijuana is delta-9-tetrahydrocannabinol (THC). Delta-9-THC is another mind-altering chemical in marijuana found only in small amounts. The amount of THC in marijuana determines how strong it is.

"Synthetic marijuana," such as K2 and Spice, is different from marijuana. These designer drugs contain laboratory chemicals that are similar to THC but are often stronger and can be deadly.

What Are the Consequences of Marijuana Use?
Although marijuana use continues to gain public acceptance, marijuana is not a risk-free drug.

Possible Short-Term Effects:
Altered senses, Distorted sense of time, Memory problems, Impaired thinking and judgment, Increased heart rate, Changes in mood, Poor coordination, Hallucinations, Delusions and paranoia.

Potential Long-Term Effects:
Addiction, Changes in brain development, Long and lasting problems, Cardiovascular stress, Mental health problems, Fetal and infant harm, Severe nausea and vomiting.

MARIJUANA / CANNABIS: How Is Marijuana Used?

Marijuana may be smoked, vaped, eaten as a food, or consumed as a liquid, contained in foods and beverages, or absorbed under the tongue.

Smoking Marijuana
Marijuana is typically smoked in hand-rolled joints, pipes, bongs, and blunts. Other methods include vaporizers, e-cigarettes, and edibles.

Vaping Marijuana
Vaping involves inhaling the vapor from a liquid containing THC. It is considered less harmful than smoking because it does not produce tar or carbon monoxide.

Oral Delivery Methods
Marijuana can be consumed orally in various forms, including edibles, tinctures, and capsules. The effects are slower to onset but longer-lasting.

A CLOSER LOOK

Vaping Marijuana
Vaping involves inhaling the vapor from a liquid containing THC. It is considered less harmful than smoking because it does not produce tar or carbon monoxide.

Oral Delivery Methods
Marijuana can be consumed orally in various forms, including edibles, tinctures, and capsules. The effects are slower to onset but longer-lasting.

Marijuana/ Cannabis: A Closer Look 3-D Display

- Helps parents and educators identify newer forms of marijuana while alerting young people to the potential risks of marijuana (also called cannabis) & shows how it is not a risk-free drug • This educational display features realistic 3-D models of marijuana and related paraphernalia secured behind a durable Plexiglas cover • Covers smoking marijuana, vaping marijuana, and oral delivery methods (edibles and tinctures) • A stand-alone panel (12" x 17 1/2") explains what marijuana/cannabis is, how it differs from "synthetic marijuana," such as K2 and Spice, and potential consequences of marijuana use, including addiction and mental health problems • A great resource for classrooms, health fairs, and more • 29" x 20" opened

Dangers of Marijuana Edibles Posters & Banners

SAME THING, RIGHT? WRONG!

CONSUMING MARIJUANA EDIBLES CONVERTS THC INTO A COMPOUND KNOWN AS 11-HYDROXY-THC, WHICH IS CONSIDERABLY MORE POTENT. THIS NEW COMPOUND HAS THE ABILITY TO NOT ONLY PUT THE USER INTO AN OVERDOSED STATE, BUT CAUSE A DANGEROUS CONDITION KNOWN AS CANNABIS TOXICITY.

ITEM # 11416	Poster	\$9.95
ITEM # 21416	Banner	\$49.95

EDIBLES: ARE THEY CONSUMING YOU?

EDIBLES COME IN ALL SHAPES AND SIZES, INCLUDING COOKIES, CANDIES, BROWNIES, PRETZELS AND MORE. SO WHAT'S THE RISK?

UNLIKE SMOKING MARIJUANA, CONSUMING EDIBLES CAN TAKE UP TO 2 HOURS TO FEEL THE EFFECTS OF EDIBLES, CAUSING MANY USERS TO BELIEVE THEY DON'T FEEL ENOUGH, SO THEY EAT MORE. THIS IN TURN CAN CAUSE A VERY BAD "TRIP" FOR THE USER THAT IS NEAR IMPOSSIBLE TO GET OUT OF EARLY!

SOME OF THE WORST SIDE EFFECTS OF EDIBLE OVERDOSING ARE: HALLUCINATIONS, PARANOID, PSYCHOSIS, PALPITATIONS.

LEGAL DOESN'T MEAN SAFE!

Vaping Prevention & THC

Fatal Vision® THC Simulation Starter Kit

• The program kit includes (5) activities to use with the THC goggles as well as instructional materials and videos • The activities give participants an understanding of the potentially severe consequences that can result from recreational THC use

• The Fatal Vision Marijuana/THC Goggle impairs a person's ability to perceive color (**NOTE: someone under the influence of marijuana DOES NOT lose their ability to distinguish between colors**) • We use this goggle feature to model a loss of capacity to make quick and accurate decisions, one of the main recreational marijuana/THC's impairing effects • For an impaired driver, this loss could lead to a crash.

• KIT INCLUDES:

- (1) – Fatal Vision® THC Goggles with cloth protective bag (Frame styles may vary)
- (1) – Germicidal disposable wipes (set of 50)
- (1) – Backpack
- (12) – Activity Balls with 3 fabric boxes
- (1) – Executive function dry erase maze boards and markers kit
- (1) – USB with Road Scenes and User Guide
- (1) – DVD – Marijuana: Does Legal Mean Safe?
- (1) – 4-In-A-Row Memory Challenge

ITEM # 11004 THC Simulation Kit \$999.00

Marijuana/Cannabis: A Closer Look 3-D Display

• Helps parents and educators identify newer forms of marijuana while alerting young people to the potential risks of marijuana (also called cannabis) & shows how it is not a risk-free drug

• This educational display features realistic 3-D models of marijuana and related paraphernalia secured behind a durable Plexiglas cover

• Covers smoking marijuana, **vaping marijuana**, and oral delivery methods (edibles and tinctures)

• A stand-alone panel (12" x 17½") explains what marijuana/cannabis is, how it differs from "synthetic marijuana," such as K2 and Spice, and potential consequences of marijuana use, including addiction and mental health problems

• 29" x 20" opened

ITEM # 11633
3-D DISPLAY \$899.95

Health Risks of Vaping Marijuana

• Vaping marijuana is touted as "safer" than smoking marijuana but, vaping marijuana comes with its own set of serious risks • Marijuana vapor releases harmful chemicals into your lungs that can negatively impact your respiratory system, your heart, your central nervous system, your immune system, and your mouth, throat and teeth • Explores the latest research and assesses the risks, focusing on teen health • Includes teacher's resource book, student handouts and pre/post tests in digital format • Contains Spanish subtitles • Grades 7-12 • 19 minutes

ITEM # 11491 DVD \$149.95

10 Reasons You Should Never Try Vaping

• Designed to protect elementary and middle school students from the dangers of vaping by presenting age-appropriate facts and information with a strong no-use message • Four kids lead viewers through a list of 10 reasons why vaping is harmful, including nicotine addiction, damage to the brain, lungs, heart, teeth, and more • Strong graphics and humor reinforce the message that vaping is illegal for kids and dangerous for kids' health • Includes teacher's resource book, student handouts and pre/post tests in digital format • Grades 4-8 • 16 minutes

ITEM # 114921 DVD \$149.95

DRUNK BUSTERS IMPAIRMENT GOGGLES

EXPERIENCE THE IMPACT OF IMPAIRMENT- SAFELY

Drunk Busters Impairment Goggles

- Now available in five different BAC configurations, Drunk Buster impairment goggles are the most affordable on the market • These best-selling goggles let participants safely experience how impairment from alcohol or drugs can affect coordination, reaction time, balance, and judgment
- Designed for hands-on learning, the goggles simulate various levels of intoxication and distraction to demonstrate the dangers of impaired driving, decision-making, and physical movement
- Ideal for schools, safety programs, law enforcement demonstrations, and prevention education, each goggle is color-coded to represent a specific impairment level • Use them during walk-the-line tests, obstacle courses, or task-based activities for maximum engagement
- Each goggle includes a cloth carrying bag, an instructor guide, and a full 5-year manufacturer's warranty (excluding normal wear and tear)

HANDS-ON ACTIVITIES TO ENHANCE DRUNK BUSTERS GOGGLE DEMONSTRATIONS:

Drunk Busters Challenge Activity Mat with Steering Wheel

- Make alcohol and drug prevention lessons interactive and impactful with the Drunk Busters Challenge Activity Mat
- Students follow a guided path with tasks like walking heel-to-toe or retrieving an object—all while wearing simulation goggles
- The activity promotes critical thinking, motor skills awareness, and real-world decision-making in a controlled, engaging setting

Includes:

- 6' x 12' vinyl Drunk Busters Challenge Activity Mat
- Drunk Busters Steering Wheel
- 1-Drunk Busters Goggle (.08-.15 BAC Level)
- Instructor's Guide

Drink Aware Display

- Helping viewers understand recommended alcohol limits, this eye-catching display provides clear examples of one standard drink
- Features durable plastic models of a 12-oz beer, a 12-oz cooler, a 1.5-oz shot of spirits, and a 1.9-oz martini
- Includes two-sided, 8 1/2" x 11" tent card that defines a standard drink, as well as heavy, binge, and moderate drinking
- Comes with carrying case

ITEM # 978640 Display \$389.95

FATAL VISION® ALCOHOL IMPAIRMENT GOGGLES KITS

Fatal Vision® Alcohol Impairment Goggles Kits

- These money saving kits offer different components of the FATAL VISION® Alcohol Impairment Goggles and Hands on Activities at a lower cost than buying the components individually
- Goggles are available in five (5) levels that simulate the impairments associated with a particular BAC – from less than .06 to .25+ BAC. Alcohol goggles come in either a clear lens to simulate daylight conditions or a shaded lens to simulate night condition
- Students can experience how alcohol affects vision, balance, reaction time, and judgment. While wearing the goggles, they perform tasks like walking a straight line, throwing a ball, or balancing on one foot to see the impact firsthand

Campaign Kit shown

THREE KIT OPTIONS PROVIDE FLEXIBILITY BASED ON YOUR NEEDS:

Program Kit

Includes goggles, core activities, and instructions—perfect for small groups or classroom demonstrations.

ITEM # 11934 - \$1100.00

Event Kit

Builds on the Program Kit with 3 additional activities and testing materials to boost student engagement and comprehension.

ITEM # 11008 - \$2500.00

Campaign Kit

Includes everything in the Event Kit, plus extra goggles, added activities, and convenient storage—ideal for larger events or school-wide campaigns. (Shown above)

ITEM # 11009 - \$4999.00

FATAL VISION® ALCOHOL IMPAIRMENT GOGGLES

Fatal Vision® Alcohol Impairment Goggles

• Fatal Vision® Alcohol Impairment Goggles provide a powerful, hands-on learning experience that goes beyond lectures and warnings • By simulating the effects of alcohol on balance, vision, and coordination, these goggles help high school students see and feel how impairment can impact their actions and decisions • The activity encourages safe choices, enhances engagement, and makes alcohol prevention lessons more relatable, memorable, and impactful—especially for teens who often learn best through experience

• These Goggles are available in five (5) levels that simulate the impairments associated with a particular BAC – from less than .06 to .25+ BAC. and come in either a clear lens to simulate daylight conditions or a shaded lens to simulate night conditions.

• Participants perform simple activities or sobriety tests without and then with the goggles

• Performing the activities twice lets participants experience their performance while unimpaired and then impaired. Students can experience how alcohol affects vision, balance, reaction time, and judgment

HANDS-ON ACTIVITIES TO ENHANCE FATAL VISION® GOGGLE DEMONSTRATIONS:

Fatal Vision® Smash Match® Impairment Challenge

• Participants race to match and place traffic-related shapes on the Smash Match® mat—first without, then while wearing the impairment goggles

• The difference is immediate and impactful, reinforcing how even simple tasks become difficult under the influence • Positive safety messages printed on the mat encourage responsible choices and promote safe driving behavior

• (Fatal Vision® Goggles sold separately)

ITEM # 174313 Game \$225.00

Fatal Vision® DIES® Winding Sidewalk Mat

• Participants attempt to walk the winding sidewalk first without goggles, then again while wearing goggles, then again while wearing goggles and simulating alcohol or drug impairment

• The sharp contrast in performance highlights the real-life danger of attempting to operate a vehicle while impaired

• (Fatal Vision® Goggles sold separately)

ITEM # 11015 4' x 10' Mat \$975.00

Fatal Vision® DIES® Alcohol Balcony Mat

• This mat is designed specifically to help you raise awareness about one's susceptibility to the potential dangers associated with alcohol impairment in a party scene by providing the simulated challenge of walking through a room while performing simple tasks such as picking up a TV remote or piece of pizza, talking to another "partygoer," and avoiding tripping hazards that could result in a fall from the balcony to the street below

• This activity addresses potential dangers associated with alcohol at house parties, block parties, holiday parties, family celebrations, and other events

• (Fatal Vision® Goggles sold separately)

ITEM # 11014 4' x 14' Mat \$975.00

Fatal Vision® DIES® Roadside Sobriety Test & Stairs Challenge Mat

• This engaging activity simulates standard roadside sobriety tests, including a straight-line walk and stair navigation, offering a compelling, interactive way to demonstrate how alcohol or drug impairment can affect balance, coordination, and basic motor skills

• Participants attempt the tasks first unimpaired, then repeat them wearing simulation goggles

• The contrast in performance makes a lasting impression and reinforces the dangers of impaired driving

• (Fatal Vision® Goggles sold separately)

ITEM # 11016 4' x 10' Mat \$975.00

THE DANGERS OF VAPING

PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

WHAT IS VAPING?
Vaping is the act of inhaling and exhaling the aerosol, often referred to as vapor, which is produced by an e-cigarette or similar device. The term is used because e-cigarettes do not produce smoke, but rather an aerosol, whose mist-like form is made up of fine particles containing various amounts of toxic chemicals.

E-CIGS AND OTHER DEVICES
Vaping devices come in all shapes and sizes. Some are designed to look like traditional cigarettes, while others are more discreet. Some are rechargeable, while others are disposable.

HOW DO E-CIGS WORK, AND WHAT'S IN THEM?
E-cigarettes operate by heating a liquid solution to produce an inhalable aerosol. At least 10 ingredients are found in e-liquids, and many are known to be harmful. E-liquids contain many chemicals, ranging from nicotine to heavy metals. They are heated to create an aerosol that is inhaled. The paper that is put in the e-cigarette is made of paper that is not safe for use in e-cigarettes. The aerosol from e-cigarettes contains harmful chemicals, including lead and other heavy metals.

LIQUID INGREDIENTS
BENZENE, ACETONE, TOLUENE, NICKEL, LEAD, CALCIUM, ACRYLONITRILE, FORMALDEHYDE

THE VAPING EPIDEMIC
MARIJUANA
A marijuana vaporizer heats the drug in either herbal or concentrated form to a degree that active ingredients are fragmented into the body. It can be used to vaporize concentrates, such as hash, hash oil, or wax. It can also be used to vaporize dried cannabis flowers. The heat used to create the vapor is much lower than the heat used to smoke marijuana. This means that the active ingredients are not destroyed by the heat. The result is a much stronger, more potent high. The psychoactive effects of THC, the main component of marijuana, are much stronger when inhaled than when smoked.

ALCOHOL
Whether you vape it or drink it, alcohol is still a deadly poison. Alcohol is a central nervous system depressant. It slows down the brain and can lead to accidents, injuries, and death. It can also lead to liver disease, heart disease, and other health problems.

METH
1 in 10 teens say they have offered meth. Methamphetamine is a powerful stimulant that can lead to addiction, heart disease, and other health problems. It is often used in combination with other drugs, such as alcohol, and can be very dangerous.

ADDICTION
Nicotine is highly addictive; most e-juices contain nicotine. Consuming of nicotine—through vaping—leads to the release of the chemical dopamine in the brain. Dopamine is a natural brain chemical that makes you feel good. It is released when you do something that you find pleasurable, such as eating or sex. The brain then craves more of the same thing to get that same feeling. This is how addiction works. The body craves the activity that causes the dopamine release.

EVALI
EVALI is the name given to the case of the EVALI lung disease linked to vaping. The EVALI cases were first reported by the CDC in August 2019 after several deaths. EVALI is a lung disease that is caused by inhaling EVALI. EVALI is a lung disease that is caused by inhaling EVALI. EVALI is a lung disease that is caused by inhaling EVALI.

THE VAPING EPIDEMIC FOLDING DISPLAY

• Helps your students understand the risks of this fast-growing trend in teenage drug abuse • Learn that e-cigarettes are not a safe choice and that vaping other drugs like marijuana and alcohol is a highly risky, often deadly choice • Can be exhibited on a tabletop or folded flat for easy transportation • 58" x 22"

ITEM # 74858

Display

\$119.95

What Are E-Cigarettes?
Electronic cigarettes (e-cigarettes) are battery-powered vaping devices. E-cigarettes work by heating a liquid ("e-liquid" or "e-juice") to create an aerosol vapor that the user inhales. The aerosol vapor typically contains nicotine, flavorings, chemicals, and other substances. Vaping devices are known by many names, including:

- E-cigs
- E-hookahs
- Vapes
- Vape Pens
- Tanks
- Mods
- Pod Mods
- Electronic Nicotine Delivery Systems (ENDS)

E-cigarettes can also deliver marijuana and other drugs. Using vaping devices (sometimes called "wax" or "dab" pens) to vaporize marijuana concentrates ("wax," "shatter") is called "dabbing."

What Are the Health Risks of E-Cigarettes?

Nicotine Addiction
Most e-cigarettes contain nicotine, the highly addictive drug in tobacco. Young people who use e-cigarettes may increase their risk of becoming cigarette smokers. Nicotine use also:

- Can harm brain development in young people
- May increase the likelihood of addiction to other drugs
- Is toxic to developing fetuses

Lung Injury
E-cigarette aerosol vapor may contain small particles, cancer-causing chemicals, and other harmful substances. Vaping has been associated with serious lung injury, sometimes leading to death.

Other Dangers
It can be difficult to know exactly what is in an e-cigarette. Testing has found some e-cigarettes to be laced with dangerous substances, such as Spice, a synthetic drug that can cause cardiac arrest.

Breathing, swallowing, or absorbing e-liquid through the skin or eyes can cause potentially deadly nicotine poisoning.

Defective e-cigarette batteries have the potential to explode, possibly causing serious injury and death.

E-CIGARETTES & VAPING: What Do E-Cigarette, or Vaping, Products Look Like?

Most e-cigarettes include four main parts: Mouthpiece, Atomizer (heating coil), Battery, and Cartridge (or pod) to hold e-liquid.

Disposable E-Cigarettes
Disposable e-cigarettes are designed to be discarded once the battery or e-liquid runs out. Some varieties are rechargeable.

Refillable and Rechargeable Devices
Designed for repeated use, these vaping devices have rechargeable batteries and can be refilled with e-liquid.

Flavored Disposable
Flavored Rechargeable Disposable
Cigalike
Pen-Style Device
E-Liquid

A CLOSER LOOK

Mods or Tanks
Designed by customization, tanks or mods are typically larger devices that can be modified to provide more control over the vaping experience.

Mod With Sub-Ohm Tank
Sub-Ohm Tank
Sub-ohm tanks are powered by low-resistance coils (less than 1 ohm), which create more dense vapor and stronger hits of nicotine or other e-liquid substances.

Pod Mods
Pod mods are smaller vaping devices with a pre-filled or refillable cartridge (pod) inside most other vaping devices, which use a reusable nicotine e-liquid. Pod mods typically use a nicotine salt e-liquid, which provides a smoother nicotine hit to the throat but contains higher levels of nicotine.

Drop-Shaped Pod Mod
Nic Salt Pod With Nicotine Salt E-Liquid

HEALTH EDUCATION

E-CIGARETTES & VAPING: A CLOSER LOOK 3-D DISPLAY

• E-cigarette, or vaping, devices come in a variety of styles and appearances, making them attractive to young people and difficult for parents and educators to identify • This colorful, educational display (29" x 20" opened) features realistic 3-D models and images of different types of vaping devices and e-liquids secured behind a durable Plexiglas cover • Great for health education classes to deter teen vaping, parent and teacher education, and more

THE DANGERS OF VAPING

PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

Hair Health
Nicotine content of e-cigarettes affects the body in the same way as ordinary cigarettes and chewing tobacco. That means less blood flow to the scalp, which can significantly undermine hair follicle health, leading to thinning or loss of hair.

Brain Health
Nicotine exposure during adolescence, or a critical period for brain development, can cause addiction and can also damage the developing brain. E-cigs have been shown to contain a mixture of nicotine.

Eye Health
Vaping contains several chemicals that are known to cause inflammation of the eyes, nose, and throat. It is well known smoking in any form can increase the risk of developing eye diseases such as macular degeneration, cataracts, and diabetic retinopathy. These risks are also present in e-cigarettes.

Lung Health
The inhalation of harmful chemicals from e-cigarettes can cause irreversible lung damage and/or lung disease. Popcorn lung is also a risk factor from e-cigs. Popcorn lung is a medical condition that damages the bronchioles, the lung's smallest airways. Over time this will cause scarring that leads to breathing difficulties.

Heart Health
Flavorings found in e-cig juice have been tested. When tested they showed the heart-healthy you, nitric oxide. Nitric oxide reduces inflammation, prevents depressed platelets from forming, and helps blood vessels open up to improve blood flow. Drugs in this gas can lead to heart attacks and strokes.

Skin Health
Any form of smoking leads to premature signs of aging: deep wrinkles, bags under eyes and dull, dehydrated skin. This bad habit starves your skin of oxygen and constricts blood flow, which affects circulation and breaks down collagen and elastin.

Central Nervous System
Some studies have found vapors to contain lead, nickel, tin, silver, formaldehyde, manganese, selenium, and other chemicals linked to cancer and central nervous system problems.

Addiction
Using nicotine, regardless of how it is delivered, increases the risk of addiction. Nicotine addiction is notoriously difficult to reverse, and the use of e-cigarettes frequently leads to use of other nicotine products, including smoked cigarettes, as well as alcohol and other drugs.

E-cigarettes and other vaping devices are NOT risk-free.

VAPING: A BAD DECISION

VAPING: A BAD DECISION BANNER

• This 3' x 5' banner is designed to educate viewers on the health risks associated with vaping • It features a teen at the center, with various sections of the body highlighted to emphasize the negative impacts of vaping on different organs and systems • The banner also emphasizes that e-cigarettes are addictive due to nicotine, and that vaping devices are not risk-free

ITEM # 11844 3' x 5' Banner \$37.50

VAPING... A TOXIC MIX

It's more than just WATER VAPOR

BENZENE
Benzene is a widely used industrial chemical. Because it tends to build up and is a major part of gasoline, Benzene can lower bone marrow, and affect blood cell count.

ACETONE
Commonly used in nail polish removers, Acetone can irritate the skin, along with damaging the coated surface of your teeth.

TOLUENE
Commonly used in paint thinners, Toluene is highly toxic. This chemical can cause headaches, nausea, and breathing difficulties.

NICKEL
Commonly used in stainless steel, car production, magnets and batteries, Nickel can cause cancer, lung damage, and kidney organ failure.

LEAD
Used in car batteries, Lead is highly toxic. It has been banned from many products. Lead poisoning causes growth, brain damage, and can even lead to death!

CADMIUM
Used in batteries, cadmium causes damage to the liver, kidneys, and brain. This chemical takes years to leave the body.

ACROLEIN
Used as a herbicide in corn, weeds and algae. It is a toxic irritant to skin, eyes, and nasal passages.

FORMALDEHYDE
This is used to preserve dead bodies. It causes cancer and can lead to lung damage. Formaldehyde also leads to skin and digestive system damage.

LIQUID NICOTINE
THE MOST DANGEROUS PART OF VAPING, NICOTINE ABSORBS AND STAYS OVER 80% OF THE WAY INTO YOUR BLOODSTREAM, CAUSING HEART AND BLOOD VESSEL DAMAGE. VAPING CAN CAUSE SEIZURES, VOMITING AND EVEN DEATH IN CHILDREN.

Caution: Do not inhale. "Juice" comes in many flavors, liquid colors, and the packaging is very similar to e-cigs.

The products shown contain chemicals found in e-cig vapor. The products themselves are not added to e-cigs and are used for illustrative purposes only.

VAPING... A TOXIC MIX (BANNER OR POSTER)

• With this banner or poster, you will learn why vaping is a toxic mix • Gives names and descriptions of the many chemicals found in e-cig vapor including the harmful side effects for each one

TOXIC HAZE: VAPING POISONS™ DISPLAY

• Students can pick up this giant attention-grabbing 3-D display of an e-cigarette vape to see 8 models of products containing just a few of the same harmful chemicals found in e-cigarette aerosol vapor

- The 8 models included are:
- Cigarette (nicotine)
- Car (acrolein)
- Specimen jar (formaldehyde)
- Battery (cadmium and nickel)
- Gasoline can (benzene)
- Pesticide can (acetaldehyde)
- Nail polish remover (acetone)
- Laundry pod (propylene glycol)

new PRODUCT

Toxic Haze: Vaping Poisons™ Display

If you think vaping is a safe alternative to smoking, think again! The models inside this e-cigarette (vape) represent just a few of the harmful substances that can be found in e-cigarette aerosol vapor.

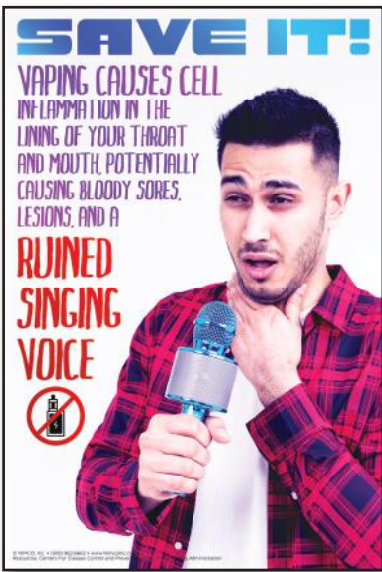

Can You Find...

- ... A battery?
- ... A pesticide can?
- ... A gasoline can?
- ... A cigarette?
- ... A car?
- ... A laundry pod?
- ... A nail polish remover?
- ... A specimen jar?

HEALTH EDUCATION

• Also comes with a durable two-sided display stand that discusses other dangerous substances that have also been found in e-cigarettes, including diacetyl (which causes "popcorn lung"), vitamin E acetate (which is associated with severe lung injury), fentanyl (a synthetic opioid involved in many opioid deaths), and more

THE DANGERS OF VAPING

PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

THE FACTS ABOUT VAPING

What is Vaping?

What is inhaled?

Is Vaping Safe?

Nicotine

Dependence

Gateway to Smoking

Risks

Vaping is the act of inhaling and exhaling the aerosol, often referred to as vapor, which is the product of an e-cigarette or similar device. The term is used because e-cigarettes do not produce tobacco smoke, but rather an aerosol, often mistaken for water vapor, that actually consists of fine particles.

VAPING

What is Vaping?

How do you "vape"?

Facts About Vaping

Is Vaping Safe?

Vaping & Teens

JUULing?

Vaping is highly addictive. E-cigarette pods contain nicotine, and in some e-cigarettes, like JUUL, the nicotine concentration is more than twice the amount than that of other e-cigarettes. The more you vape, the more your brain and body crave the nicotine. Also, vaping has been known to cause users to smoke regular cigarettes.

PULL

VAPING: TRAPPED BY VAPE PAMPHLETS (SET OF 100)

• Once you realize how dangerous it is to vape, what should you do if you want to quit? • This pamphlet not only educates readers on how dangerous it is to vape, but also gives the readers tips and suggestions on quitting vaping

ITEM # 11075

\$50.00

JUST THE FACTS

STARTING A CONVERSATION: KIDS AND VAPING

If you're looking for a way to help kids and teens steer clear of vaping, one of the best things you can do is talk to them. Kids are much less likely to tune you out if they feel like they're part of the conversation. Resist the urge to lecture.

WHAT CAN YOU DO?

Ask questions

- Has anyone ever asked you to vape?
- Do your friends vape?
- Are you vaping?
- If someone asked you to vape, would you?

Best Policy

- Don't vape or if you've done so in the past, explain why you started.
- Talk about why you quit (or why you want to quit).
- Express how hard it is to quit.
- Mention any vaping-related health problems you've had.

If you've never vaped:

- Explain why you never wanted to start.
- Mention friends or relatives who have had vaping-related health problems.
- Discuss how you handled peer pressure.

What if your teen already vapes?

Tips to help them quit:

- **Choose a Day to quit.** Help them pick a date and prepare for that date.
- **Help them find their reason why.** Tell them to make a list of every reason why they are quitting. Write them down, keep the list in their phone and often glance at the list to remind them why they want to quit.
- **Picture the vape-free you.** Tell them to imagine themselves and their future after they quit vaping. Use this vision as motivation to keep pushing forward when things get hard.

JUST THE FACTS: STARTING A CONVERSATION - RACK CARDS (SET OF 100)

• The use of Electronic Cigarettes are on the rise among kids and teens • Offers tips to parents, counselors, teachers, and anyone who works with kids & teens about the dangers of vaping

A CLOSER LOOK AT TOBACCO 3-D DISPLAY

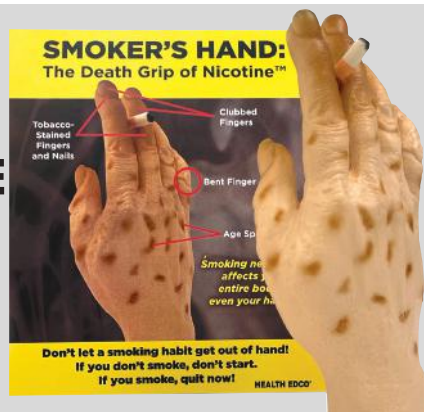

• Magnifying all the ways tobacco companies market their deadly wares, this 3-D display features ultra-realistic facsimiles of popular types of tobacco products enclosed behind Plexiglas

ITEM # 11733 **ONLY \$849.95**

SMOKER'S HAND: THE DEATH GRIP OF NICOTINE MODEL

• This haunting, utterly realistic hand model (4" x 9½" x 3") grabs your attention by showing viewers how smoking can affect their hands

ITEM # 11751 **ONLY \$239.95**

SMOKED FOOT GANGRENE MODEL

• Many people don't realize that smoking affects the entire body even the feet
• This alarming model of a diseased foot graphically depicts the results of peripheral artery disease, resulting in decreased blood supply to the foot and gangrene

ITEM # 11753 **ONLY \$199.95**

SMOKEFREE AND SMOKER'S LUNG DISPLAY

• Simple but effective way of showing how smoking damages the lungs
• Comparing the air sacs of the lungs to bubble wrap, this 3D model of 2 lungs shows the bronchial air passages entering two lungs
• Smokefree lung is pink and healthy, smoker's lung is black from tar

ITEM # 52482 **ONLY \$349.95**

WHAT'S YOUR POISON?

• 3D interactive display with descriptions of 15 toxic chemicals in tobacco smoke and details of what these chemicals can do to the body
• Approx. 25" x 18" wooden stand

ITEM # 423533 **ONLY \$379.95**

PUFFING POISON TANK: A SECONDHAND SMOKE TRAP

• A demonstration of the effects of secondhand smoke without cigarettes is easy with this unique simulator! • A special unit behind the nonsmoker's face stains a removable filter with tiny "smoke particles". Includes 50 filters, "smoke particle" powder, and more
• 110 volts required
• 11 1/2" x 10 1/2" x 9 1/2"

SET OF 50 REPLACEMENT FILTERS
ITEM # 85-79247-D only \$49.95

DISPLAY ITEM # 79596 **ONLY \$899.95**

DROWNED LUNG MODEL

• Bring the reality of COPD to life with this audible, interactive model
• This lifelike model of a damaged lung swims in simulated phlegm, and picking up the jar triggers a voice module that plays a recording of a gasping, gurgling cough

ITEM # 11752 **ONLY \$339.95**
