

# RESEARCH DRIVING CHANGE

SPONSORED PROJECT FUNDING FY2025

# **At the University of Oregon College of Education, our research drives positive change for communities, schools, and families.**

UO faculty and students are passionate about making an impact. Our College of Education has a decades-long record of renowned research and innovation, and a demonstrated commitment to translating research into practice.

This year, 60 principal investigators across the college led projects focused on adolescent mental health, evidence-based mathematics and literacy instruction, childhood safety and wellbeing, supports for women involved in the juvenile justice system, and much more.

**The projects highlighted in this report reflect the breadth of our impact across communities, schools, and families. Thank you for reading and being part of our community.**

## PROJECT SPOTLIGHT

### **Wendy Machalicek, PhD Professor**

**Project CO-LEAD: Collaboration  
Across University to Prepare Leaders  
in Evidence Based Practices, Autism  
Spectrum Disorder, and Diversity**

**Primary Sponsor: U.S. Department  
of Education, Office of Special  
Education Programs**

**Award Amount: \$4,532,113**

**The major objectives of Project CO-LEAD are to prepare and graduate 15 doctoral students across the University of Oregon, Purdue University, and the University of Illinois at Urbana Champaign to provide national leadership as applied researchers, university faculty, and school administrators in the field of special education with an emphasis on improving educational and behavioral outcomes for diverse school age autistic students.**

This leadership training consortium has leveraged the University of Oregon's Big 10 university partnership to address an ongoing national shortage of personnel and leaders in special education.

To date, Project CO-LEAD has graduated 11 future PhD level leaders who are now employed as faculty in special education, post-doctoral fellows, and directors in local education agencies. These graduates, who have developed rigorous research agendas focused on improving outcomes for autistic students and their families through evidence based practices, are skilled in the adaptation of interventions for diverse high-needs populations, and are knowledgeable about implementing evidence-based interventions within educational settings. Ultimately, these highly trained researchers and instructors will contribute to improved educational and behavioral outcomes for countless autistic students and their families across the life of their careers.

Based on our past successes and current employment of CO-LEAD graduates, we anticipate that most scholars will eventually assume positions in higher education. In doing so they will have the potential of training 20-30 undergraduates or master's special education students per year, each of whom, in turn, will deliver services to 20 to 30 children and families per year across a 10-year career. Conservatively, across their careers, our 15 CO-LEAD scholars could indirectly affect the quality of services for over 130,000 autistic children and their families.

CO-LEAD scholars each completed a 20-week research and service internship within high-poverty and high-need schools and districts implementing evidence-based practices for autistic students. These experiences provided scholars with opportunities to implement evidence-based practices firsthand and understand real-world implementation of special education services and research in challenging contexts (e.g., schools, districts, and technical assistance serving vulnerable populations with limited resources). For instance, one of our scholars completed their internship with Northwest Positive Behavior Intervention and Supports Network, providing expert tele-behavioral consultation to diverse Alaskan schools implementing positive behavior interventions and supports. In addition, students were actively involved in externally funded federal research across the 3 partner universities. For example, several scholars participated as parent coaches in a National Institutes of Health clinical trial, Project WellCAST-Addressing the WELLbeing of CAregiverS via telehealth (NCT05999448; PI, B. Kelleher, Co-I, W. Machalicek).

## PROJECT SPOTLIGHT

**Jeffrey Todahl, PhD** | **The Center for Childhood Safety and Wellbeing**  
Associate Professor

### **A Vision for Transformation: Redesigning Child Welfare Workforce Preparation and Development**

Primary Sponsor: Oregon Department of Human Services  
Award Amount: \$460,000

**The Center for Childhood Safety and Wellbeing (CSAW) collaborates with Oregon communities, youth, families, and traditionally excluded persons to prevent violence and promote healing, belonging, and child and youth well-being.** CSAW's research, evaluation, and demonstration efforts prioritize youth and survivor leadership, individual action-taking, social justice advocacy, and systems-level change.

CSAW is currently leading Oregon's comprehensive redesign of the new caseworker training academy (Jeff Todahl, PI), ensuring each aspect of learning aligns with the state's guiding frameworks of equity, relational practice, and healing-centered engagement.

Grounded in Oregon's Equity North Star and Vision for Transformation, this effort prepares new workers to uphold a system that promotes safety through connection, family strengthening, and community partnership. The Equity North Star establishes Oregon's commitment to achieving equitable outcomes for all children and families, particularly those most impacted by systemic racism and historical injustice. The Vision for Transformation builds on that foundation, prioritizing child welfare as a collaborative, trauma-informed system that supports wellbeing and belonging over separation and surveillance.

This contract represents phase 1, beginning with ODHS District 5, toward a statewide redesign of new caseworker training. CSAW's phase 2 contract (\$2.47 million) includes design, launch, and evaluation of the new training, beginning in October 2025. CSAW, in partnership with ODHS, District 5, and PSU's Child Welfare Partnership, will in phase 3 support implementation of revised trainings in all additional Oregon districts.

CSAW was invited and selected to lead the new training due largely to our research-to-practice and community-based model. In 2024, this included \$2.57 million in support of Cultivate, Parent and Community Cafes, the Protect Our Children evaluation, our Youth Advisory Council, the Lane County Violence Prevention Coalition, ODHS Asset Mapping, and the Oregon Child Abuse Prevalence Study.

## PROJECT SPOTLIGHT

### **Jessica Turtura, PhD** Research Assistant Professor

**Math Ready: Supporting Early Number Sense (M-SENS)**

Primary Sponsor: U.S. Department of Education, Education Innovation and Research (EIR)

Award Amount: \$4,000,000

**Math Ready: Supporting Early Number Sense (M-SENS)** is a research study designed to develop and test a 50-lesson kindergarten program that combines evidence-based mathematics instruction with strategies that promote positive classroom behavior.

The study is focused on creating a program that is both effective and practical for teachers to use in real-world classrooms, ensuring that students have access to engaging, high-quality early math learning experiences.

The program is designed to improve mathematics achievement in kindergarten while simultaneously fostering productive learning behaviors. By weaving behavior supports directly into daily math instruction, it gives students the strong number sense and positive classroom skills they need to thrive and equips teachers with tools that make their instruction more impactful and equitable.

The desired impact of M-SENS is to close early opportunity gaps in mathematics by ensuring all kindergarten students, including those most at risk, receive strong foundations in number sense. In the short term, we expect to see measurable gains in math performance and improvements in classroom behavior.

In the long term, by reducing the number of students needing intensive intervention in later grades, the project aims to narrow persistent achievement gaps and support greater equity in access to high-quality math instruction.

Community partnerships are at the center of M-SENS. We are collaborating with school districts in Oregon, Montana, and Missouri to co-design and implement the program in ways that are feasible, responsive, and sustainable. District leaders, principals, and teachers have shaped decisions about training, scheduling, and lesson delivery.

Teachers are active partners in the research itself: they receive professional development and coaching, and they provide feedback through surveys, logs, and focus groups. This partnership model ensures that teacher voice drives program refinement, while also building district capacity to sustain integrated academic and behavior supports beyond the grant period.

**[education.uoregon.edu/research](http://education.uoregon.edu/research)**

The University of Oregon is located on Kalapuya Ilihi, the traditional indigenous homeland of the Kalapuya people, many of whom are now citizens of the Confederated Tribes of Grand Ronde and the Confederated Tribes of Siletz Indians.

The University of Oregon is an equal-opportunity, affirmative-action institution committed to cultural diversity and compliance with the Americans with Disabilities Act. This publication will be made available in accessible formats upon request. Accommodations for people with disabilities will be provided if requested in advance.
