Baran Tejarat Pasargad Industrial Group

Since 1949, we have started our activities in the field of production of timber and wooden doors in a completely traditional way. With more than half a century of continuous effort and during two generations of our fathers' experiences with a purposeful vision for the future, we were able to launch these valuable experiences in 2006 in the form of a company called Baran Tejarat Pasargad Industrial Group. In order to import high quality raw materials and produce high quality wooden products, this company has always tried its utmost so that new horizons of amazing colors and designs inspired from the nature could be opened to the eyes of the end users; using best production lines and modern equipment. Now, after years of experience with a variety of products, we have an active presence in the country's wood industry.

It is hoped that Baran Tejarat Pasargad will take a big step towards a better way of life for the good people of this world with the increasing progress while protecting the environment.
