

HYOSUNG

Thriving in the Midst of Change

Hyosung is leading the way in deploying **strategic innovations** to help you stay relevant, address new challenges and meet consumer needs in these changing times.

We are the right partner to empower you to provide the best customer experience, and THRIVE!

Today's environment brings new challenges and is changing the way consumers shop:

- Businesses and customers want self-service banking solutions that are reliable, easy to use, and secure.
- Customers need to access cash for shopping and to take care of routine financial transactions without having to make a trip to the bank.
- Meeting mandatory guidelines for proper sanitation is difficult along with protecting the health of your employees.

In this changing environment, Hyosung's technology is here to give your customers the confidence they need to perform all transactions without stepping foot into a bank. Customers want to make fewer trips to stores and are looking for more one-stop-shop solutions.

Transform your ATM to increase revenue and make customer visits even more convenient with Value-Added Transactions.

Dynamic Currency Conversion (DCC)

- Allow the cardholder to view their balance and withdrawal amount in their domestic currency for easy and transparent international transactions.

Dual Balance

- Customers get the convenience of one transaction to see both checking and savings balances and you earn extra interchange revenue with each multi-account inquiry.

Cryptocurrency

- Turn your retail ATM into a cryptocurrency compatible ATM by adding Bitcoin transaction support from B4U and LibertyX.
- Your customers can perform a variety of Bitcoin transactions, such as buying, selling, and even making cash withdrawals.

Cardless Cash

- Now your users can make surcharge-free transactions with CardFree Cash, while you still make revenue on every transaction.

Mastercard Cash Pick-Up

- Become a cash-out destination for ALL consumers, even without a card.
- Customers can use a mobile number, a transaction code, an access code, and the dollar amount to enter at the ATM.

GivePay

- With GivePay ATM software, customers can buy and send gift cards from hundreds of reputable companies from the convenience of your ATM.

As an ATM operator, remote monitoring gives you access to your ATM 24/7 to update, protect, send, and retrieve information through MoniView.

Benefits of MoniView:

- Access your ATM fleet from your laptop anytime, anywhere
- Network Security
- Integrate with your company's custom application
- Increased efficiency and reduced cost of operating your ATM fleet
- Send commands to your ATM remotely

Announcing ATM Disinfection Enhancements

Antimicrobial Features

- Upgrade kits will consist of a set of replacement parts with antimicrobial features. There are two components:
 - **Embedded Silver Ions:** We will use resins, paint, and glass with silver ions embedded during the manufacturing process on key user interaction points on the ATM to provide antimicrobial protection for those parts. These parts will maintain their antimicrobial properties.
 - **Violet Blue LED Lights:** We will provide Violet Blue LED lights at high-touch parts of the ATM to disinfect the surface without the potential to harm people in proximity of the light.

Upgrade kits will consist of the following parts:

- EPP with keys made using antimicrobial resin and with antimicrobial paint around the rest of the component
- Card Reader made with antimicrobial plastic and using antimicrobial paint on the metal portion of the card reader
- Plastic function keys made with antimicrobial resin or a touchscreen made with antimicrobial glass
- Violet Blue LED sterilization lights

HYOSUNG, THE SPEED OF RETAIL

Hyosung moves at the speed of retail, and that means **industry-leading service and support**, and **customer-focused leadership**. As the U.S. ATM **market share leader**, Hyosung machines are **engineered** to provide consumers with a **functional, user-friendly**, and **secure experience**.
