Carefully selected materials

We have a strong affinity for natural materials like solid wood and veneer—oak, walnut, and ash—because they perfectly embody our New Scandinavian style. Not only are these materials visually appealing, but they're also durable and connect us with nature. Our wood and veneer tops exude warmth and beauty, with each piece of Poet wood furniture being uniquely crafted to last for generations.

Luxurious stone surfaces

Marble, a stunning natural stone, is formed over millions of years within mountain rocks. Its varied patterns and colors are influenced by the unique composition of each cut. No two pieces are alike, which is why each and every piece of our marble furniture will be completely unique. With the right care, can last almost forever.

Our path towards sustainability

At POET, we believe true artistry respects the environment. That's why we use FSC-certified wood and recycled fabrics. Every piece we make honors our planet, combining beauty with sustainability. By repurposing materials, we reduce waste and contribute to a healthier world. Our commitment to sustainability is deeply rooted in our values and woven into every aspect of our journey. One of the pillars of our sustainability journey is our dedication to responsible sourcing. From sourcing materials locally to optimising transportation routes, we actively seek ways to minimise energy consumption and reduce carbon emissions. By doing so, we contribute to the global efforts to combat climate change and create a more sustainable future.

Recycled plastic turned into textiles

What sets the Rebirth sofa apart is its foundation in recycled materials. From its upholstery made of carefully selected recycled fabrics to its solid wood frame sourced from reclaimed timber of old Australian houses, every element of this sofa speaks to a profound ethos of reuse and regeneration. The very name "Rebirth" captures its essence—a celebration of discarded materials finding new purpose and vitality.

Recycled ocean plastic turned into sustainable fabrics

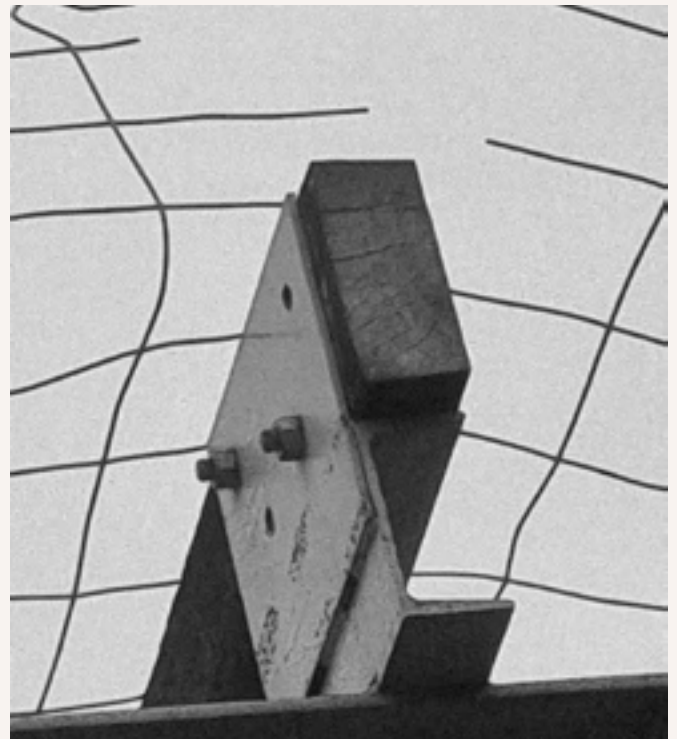

Rebirth sofa designed by Enrique Marti

By choosing the Rebirth sofa, you are not merely acquiring a piece of furniture; you are embracing a lifestyle of responsible consumption and sustainable living. This sofa is more than just a comfortable addition to your home; it is a statement—a declaration that our choices matter and can make a positive impact on our planet.

Re-claimed wood from old houses

Moreover, the solid wood used in its frame is sourced from old factory and houses in Australia, salvaged and given new life in Malaysia where skilled artisans transform it into the elegant framework of the Rebirth sofa and table collection. This process not only reduces waste but also imparts a unique character to each piece, celebrating the history embedded in every recycled component. From its recycled fabrics to its reclaimed wood frame, every element reflects a dedication to sustainability.

From the past to your home

Imagine the journey of each component of the Rebirth sofa—once forgotten fabrics now adorning your living space with elegance, and aged wood beams reincarnated into a sturdy and beautiful frame. This narrative of transformation resonates deeply with our shared responsibility to steward our resources wisely. Together, let's make a difference—one sofa, one home, and one planet at a time.
