Not Sure What to Invest in Next?

Digital dentistry is moving fast, and the information out there is mostly coming from people selling you one specific brand.

The Future of Dentistry is an evening of honest, unbiased education from someone who has personally tested 37 intraoral scanners and 15 3D printers. No manufacturer demos. No sales pitches. Just clarity.

What You'll Learn

- 1 Choosing the Right Scanner**
An honest comparison of today's scanners based on your workflow, your caseload, and your budget.
- 2 3D Printing in the Dental Clinic**
What clinics are actually printing today, what makes sense financially, and what's still developing.
- 3 Face Scanning and Digital Diagnostics**
How facial scanning integrates with intraoral and CBCT data, and which technologies are available now.
- 4 The Fully Digital All-on-X Implant Workflow**
Horizontal scan bodies, photogrammetry, and what the evidence actually supports.

"I've gone to two courses in the last 10 years that have changed my practice life. This is one of them."

Dr. Jeffrey Field, General Dentist
32 years in practice

"He gives it to you straight, no BS. Great for beginners, but also excellent for those who already have digital equipment."

Dr. Craig Duval, General Dentist
Owns 3 scanners and a printer

Early bird price \$99 CAD (until April 13 or first 50 tickets)

Standard registration (through May 4) - \$189 CAD
