SEE WHAT SETS US APART

Wheeler FIT Diesel Particulate Filter (DPF) and Diesel Oxidation Catalysts (DOC) are designed as a direct replacement to the most common OEM filter systems.

- An exact fit designed for ease of removal and installation (with the exception of cut out/weld in units)
- Diesel Particulate Filters & Diesel Oxidation substrates sourced from top tier suppliers in the industry
- All DPF and DOC units include OEM grade clamps and gaskets
- All metal parts are made from high quality stainless steel for increased durability
- All units are designed and manufactured in North America come with a 2-year Unlimited Mileage Warranty

**DPF'S AND DOC'S FOR ARE AVAILABLE
IN A WIDE VARIETY OF ENGINE MODELS**

SUBSTRATE OPTIONS

Wheeler Fit DPF's/DOC's offer two substrates: Standard (200 CPSI) and High Efficiency (300 CPSI). The High Efficiency option's increased cell count results in higher back pressure, improving soot capture, combustion, and operational efficiency, leading to fewer regenerations.

DURABLE CONSTRUCTION

Industry leading hydroformed one piece canister design reduces welding, increases material strength and heat retention

PROTECTIVE COATING

A proprietary wash coat is used throughout each DPF to achieve a stronger molecular bond which prolongs degradation. This coating also allows for passive regeneration to occur at 380° compared to OEM or other aftermarket brands at 700° providing improved fuel efficiency and longer filter lifespan.

ACCESSORIES

All Wheeler Fit DPF's and DOC's includes graphite gaskets and OEM quality clamps to ensure a perfect seal
